Hanson Fireside Room
100 N. Calle Seville
San Clemente, CA 92672

The purpose of the PPH is to accept public comment from electric utility customers regarding the Phase 2 issues of the CPUC Smart Meter Opt-Out proceeding. These Phase 2 issues include:

- 1) Should more than one opt-out option be offered to customers who do not wish to have a wireless SmartMeter (e.g., a digital, non-communicating meter)? Should different fees be assessed based on the type of opt-out meter selected by the customer and, if so, what is an appropriate level for such fees?

- 2) Should all costs associated with the opt-out option be paid by only those customers electing the option, or should some portion of these costs be allocated to all ratepayers and/or to utility shareholders?
- 3) What fees should be assessed on customers who elect the opt-out option and should the fees be assessed on a per meter or per location basis?
- 4) Should there be an "exit fee" imposed on customers who elect the opt-out option and later return to a wireless SmartMeter?
- 5) Should the opt-out option be extended to local governments and communities?

SCE Representatives will be present at each site listed above to assist with individual customer concerns.

BACKGROUND

On February 1, 2012, the Commission issued Decision (D.) 12-02-014, which modified PG&E's SmartMeter Program to include an option for those residential customers who did not wish to have a wireless smart meter (as used in this proceeding, a wireless smart meter is a digital electric or gas meter that transmits customer usage data through radio transmission). Similar decisions were issued for SDG&E in D.12-04-019 and for SCE in D.12-04-018 (D.12-02-014, D.12-04-018 and D.12-04-019 are collectively referred to as the "Opt-Out Decisions"). The Opt-Out Decisions adopted interim fees for those customers electing to participate in the opt-out option and directed that a separate phase be initiated to consider cost and cost allocation issues associated with opt-out options. The decisions also directed that the second phase consider whether the opt-out option should be extended to communities, such as local governments and residents of apartment buildings or condominium complexes.

On June 8, 2012, CPUC Assigned Commissioner, Michael Peevey, issued a Ruling adding this required separate phase – Phase 2 – to the smart meter opt-out proceedings.

SCE's PROPOSED RATE CHANGE

SCE projects that its Opt-Out Program will require approximately \$21 million in revenue (\$15.010 million in operations & maintenance expenses and \$5.979 million in capital expenditures) over the 2012 through 2014 period, and requests CPUC approval to recover 100 percent of this forecasted revenue requirement through opt-out fees.

SCE proposes to recover the incremental costs associated with the Opt-Out Program from those residential customers exercising the option. The proposal includes an initial fee and monthly charges. These costs include the labor associated with the removal of the opt-out meter and the installation of the Edison SmartConnect® meter when a customer leaves the Opt-Out Program. These fees will be discounted by 20 percent for those customers enrolled in the CARE program (the CARE discount will be allocated to

all ratepayers, except Street Lighting customers, on an equal-cents-per-kilowatt hour basis pursuant to CA Public Utilities Code Section 327(a)(7) and consistent with Commission practice).

The following table presents SCE’s proposed fees for opt-out customers, based on the forecast revenue requirements and estimates of opt-out participants:

Customer Group	Initial Fee	Monthly Fee
Non-CARE	\$98	\$24
CARE	\$78	\$19

Any actual changes in rates, or approval of any additional opt-out fees, will be determined by the Commission.
