

*Southern California Edison*  
***R.18-10-007 – Order Instituting Rulemaking to Implement Electric Utility Wildfire Mitigation  
Plans Pursuant to Senate Bill 901 (2018).***

**DATA REQUEST SET A b r a m s - S C E - 0 0 2**

**To: Abrams**  
**Prepared by: John Clarke**  
**Job Title: Prin Mgr, Strategic Plng / Corp Dev**  
**Received Date: 11/12/2019**

**Response Date: 11/25/2019**

---

**Question 007:**

Level of Effort (LOE) Measure for Tactics and Technology Deployment – IOUs should provide an indication of projected costs, man-hours and cycle/deployment timeframe associated with the implementation of each tactic (#3 above) as well as for the deployment of each new technology (#6 above).

**Response to Question 007:**

SCE objects to this request on the grounds that it is unduly burdensome and calls for a study/analysis that SCE has not undertaken. Notwithstanding this objection, SCE has provided 2019 Wildfire Mitigation Plan (WMP) section 7.1 Cost Information and 2021 General Rate Case (GRC), Wildfire Management Volume, SCE-04 Volume 5 which include overviews of SCE's planned wildfire mitigations and cost estimates that were filed in Feb. 2019 and Aug. 2019, respectively.
