

Rush Creek Project Relicensing Kick-Off Webinar

You are invited to attend the relicensing kick-off webinar for Southern California Edison Company's (SCE) Rush Creek Project (FERC Project No. 1389) on October 19, 2021. The Project is located in Mono County, California near the Town of June Lake primarily in the Inyo National Forest; a portion of the Project is located within the Ansel Adams Wilderness. The Project generates electricity from the diversion of water from Rush Creek. The current Federal Energy Regulatory Commission (FERC) hydroelectric license expires on January 31, 2027. SCE intends to relicense the Project using the Integrated Licensing Process (ILP). The formal FERC relicensing process is initiated with submittal of the Notice of Intent and Pre-Application Document by SCE within 5 to 5 1/2 years of the license expiration.

SCE will convene two public webinars (Microsoft Teams Meetings) on October 19, 2021 to discuss the upcoming relicensing process. The two webinars will have identical agendas (see below), but are provided during both the day and night to provide greater opportunity for participation by federal and state resource agencies, local governments, Native American Tribes, non-governmental organizations, and other interested parties.

The purpose of these webinars is to acquaint interested parties with FERC's ILP, including key milestones and opportunities for stakeholder participation. SCE will also provide an overview of the existing Project; the proposed Project under consideration in the relicensing proceeding; and the Pre-Application Document that SCE intends to file with FERC, no later than January 31, 2022.

Specific webinar details are as follows:

Date:	October 19, 2021
Time (afternoon):	1:00 – 4:00 PM
Time (evening):	6:00 – 9:00 PM
Webinar Link:	Provided in Teams Meeting Invitation (to be sent separately)
Dial-in (audio only):	Provided in Teams Meeting Invitation (to be sent separately)
Agenda:	<ul style="list-style-type: none">• FERC Relicensing Process Overview• Existing Project Description• Proposed Project Alternatives• Participation Opportunities

For additional information on the webinar or the Project, please contact Matthew Woodhall, SCE Relicensing Project Manager, at matthew.woodhall@sce.com; visit www.sce.com/RushCreek; or FERC's eLibrary at <https://www.ferc.gov/docs-filing/elibrary.asp>.

If you received this announcement via e-mail, you are on the relicensing distribution list. If you obtained this announcement by another means and want to be added to the distribution list, please visit the Project website at www.sce.com/RushCreek and complete the contact registration form.

Register online at www.ferc.gov/ferc-online/overview to be notified via e-mail of new FERC filings and issuances related to the Rush Creek Project. Follow the online instructions and subscribe to docket number P-1389.

If you wish to be removed from future communication regarding this Project, please reply to this e-mail (julie.smith@cardno.com).
