

## Summer Discount Plan

# SUMMER SAVINGS FOR YOUR BOTTOM LINE.

Enroll in our Summer Discount Plan (SDP) for commercial customers and earn up to \$195\* in bill credits by simply allowing us to turn off or cycle off your selected air conditioning compressor unit(s) during periods of peak energy usage. It's a perfect fit for office buildings, retail stores, and more.

### SDP makes summer savings easy — and it's free.

Signing-up for SDP is simple, and there's absolutely no cost to you. Once you've enrolled, we'll install a small, remote-controlled cycling device on or near your central air conditioning unit(s). Then, when the demand for electricity or costs for energy spike, we may call an energy event and temporarily turn off (or "cycle") your air conditioner's compressor(s). As an incentive for participating, you'll receive a bill credit each month from June 1 through October 1. While these types of energy events can occur year round, most are likely to occur during the summer season, when demand for electricity is normally the greatest.

### ENROLL IN SDP TODAY!

Download an application at [sce.com/bizsdp](https://www.sce.com/bizsdp), contact your SCE Account Manager, or give us a call at 1-800-990-7788 to request a commercial application.

### How much will you save? It's your choice.

Maximum Savings	Good Value	Maximum Comfort
<b>100% Cycling</b> <small>A/C compressor shuts off 100% of the time during an event</small>	<b>50% Cycling</b> <small>A/C compressor shuts off 50% of the time, or 15 minutes out of every 30 minutes</small>	<b>30% Cycling</b> <small>A/C compressor shuts off 30% of the time, or 9 minutes out of every 30 minutes</small>
<b>\$195*</b> <small>Earn up to \$195* per year, per unit</small>	<b>\$68*</b> <small>Earn up to \$68* per year, per unit</small>	<b>\$13*</b> <small>Earn up to \$13* per year, per unit</small>

Customize your savings by selecting one of the three cycling plans that best fits your operational needs and desired comfort level. Want even more flexibility? Tailor your savings by selecting the number of central air conditioning units you enroll in the program.

# Summer Discount Plan

## How the Cycling Device Works

The cycling device is a remote-controlled box we attach to the outside of your air conditioning unit(s) that allows us to communicate with it. When an energy event is called, the cycling device receives a remotely dispatched radio signal that temporarily turns off (“cycles”) the unit’s compressor. A green light on the cycling device indicates it’s receiving power and proper radio signals, while a flashing green light indicates your compressor has been turned off. The unit’s indoor fan may continue to run to circulate the air, unless you let us know in advance that you prefer to have it turned off as well.

## Other Helpful Reminders

- Signing up for the SDP requires a one-year commitment from the first meter-read date following activation of your cycling devices. After the first year, your enrollment will be automatically renewed every year until you notify us you no longer wish to participate.
- The cycling devices can only be installed on central air conditioners in good working order, so be sure to check yours before enrolling in the program.
- Some air conditioners are not compatible with the SDP cycling device. These air conditioners are not eligible for the program.
- This program is not recommended for:
  - Individuals with health problems such as asthma, emphysema, heart disease, or other respiratory conditions
  - Individuals who are unable to tolerate high temperatures
- Your account must register the use of a minimum of 0.2 kWh per A/C ton, one hour before or after, in at least one event day per calendar year to remain eligible to participate in the SDP program.

## Courtesy Alerts

For added convenience, our system will automatically alert you by sending courtesy alerts to let you know when an energy event is occurring in your area and when your air conditioner’s compressors are being cycled off. You can choose to be notified by email, voice message, or text message. To opt in to these convenient alerts, give us a call at **1-800-990-7788**, and we’ll be happy to set you up. Also, you can visit **[sce.com/drp/events](https://sce.com/drp/events)** for the status of SDP energy events in your area.

## ENROLL IN SDP TODAY!

For an application, visit **[sce.com/bizsdp](https://sce.com/bizsdp)**, contact your **SCE Account Manager**, or call **1-800-990-7788**.

Once we’ve received and processed your application, a technician will install and verify the proper operation of the cycling device(s). After verification, we’ll activate the device(s) and update your account to reflect your rate change as of your next regularly scheduled meter read date.

\* The estimated savings assume a typical 5-ton central air conditioning unit, enrolled in the program from June 1 to October 1. Savings could increase with larger units and decrease for smaller ones. Maximum credit amounts are subject to certain minimum usage requirements and vary by central air conditioner tonnage. Enrollment after June 1 will result in prorated savings beginning from the next scheduled meter read date after your application is processed and your device is installed and activated. SCE may need to test or replace the device. The credit amounts and program options are subject to change by the California Public Utilities Commission. An Edison SmartConnect® meter or interval data recorder (IDR) meter capable of registering hourly interval usage data is required for enrollment in the SDP program. If removed from the program for failing to meet the minimum electric usage requirement, you will not be allowed to re-enroll for the following 12-month period. This program is not recommended for those with health problems, respiratory conditions, or an inability to tolerate high temperatures. SCE is not responsible for any costs associated with receiving optional SDP courtesy alerts. This information is meant as an aid to understanding SCE’s Summer Discount Plan. It does not replace the CPUC-approved tariffs. Any inconsistencies between this material and SCE’s tariffs are unintended, and the tariffs prevail. Please refer to SCE’s Tariff Books at **[sce.com/regulatory](https://sce.com/regulatory)** for a complete list of terms and conditions. This program is funded by California utility customers and administered by SCE under the auspices of the California Public Utilities Commission.
