

Bishop Creek Hydroelectric System Relicensing Project Effects Meeting

Meeting Objectives

1. Review relicensing schedule and process, including role of Effects Meetings
2. Outline "proposed action," i.e., how SCE proposes operating the project looking forward
3. Provide an overview of the Relicensing Team's preliminary findings on project effects based on study results
4. Build consensus on project effects and any limitations of the studies
5. Provide TWG members information & context needed to target their review of the Draft License Agreement (DLA) and begin thinking about appropriate PM&Es (for later discussion)

Meeting Agenda

Tuesday, October 26: Botanical, Wildlife, and Recreation Resources

Thursday, October 28, Fisheries, Instream Flows, Sediment/Geomorphology, & Operations

There will be an opportunity for Q&A after each agenda item.
