

SCE EnergyManager® Basic

MAKE THE BEST ENERGY DECISIONS FOR YOUR BUSINESS

Let SCE EnergyManager® Basic help you save energy and money. This easy-to-use web-based program provides basic energy information and analytical tools to help you effectively manage your energy usage.

HOW WILL THIS BENEFIT MY BUSINESS?

Using SCE EnergyManager will provide you with a better understanding of your energy use so you can make the best energy decisions for your business. Plus, you may be able to participate in load reduction programs and rate options, such as Demand Response programs and Time-Of-Use rates that can save you money. For more information on SCE's wide variety of energy efficiency and load reduction programs that can provide further savings, visit www.sce.com/EnergyManager.

ELIGIBILITY REQUIREMENTS:

- Have an SCE-approved interval data recorder (IDR) meter
- Monthly demand must be greater than 200kW at least 3 times in the last 12 months
- On a Time-of-Use (TOU) rate

HOW DOES SCE ENERGYMANAGER® BASIC WORK?

Your meter will be read electronically every day. Then "as read" energy usage will be posted to the SCE EnergyManager website for your review.* After each billing cycle, SCE will post "actual" monthly usage data, overlaying the "as read" data.

WITH SCE ENERGYMANAGER® YOU CAN:

- Review the 15-minute interval data in various charts, graphs and table formats.
- View up to 48 months of historical kWh and kVARh data in 15 minute intervals, if available.

WHAT DO I NEED TO DO?

- You can access your SCE EnergyManager Basic accounts at www.sce.com by registering for MyAccount services.
- Next, click on SCE EnergyManager Tools to view your energy usage.

For additional assistance, call your SCE account representative or the EnergyManager Help Desk at 888-462-7078.

**Data is posted daily for the previous day's usage — for example, you will be able to view Monday's usage information on Tuesday.*

This information is meant as an aid to understanding SCE's program options. It does not replace the tariffs. If there are differences between this material and SCE's tariffs, the tariffs shall prevail.

SCE EnergyManager® Basic

ADDITIONAL PRODUCTS

In conjunction with SCE EnergyManager® Basic, SCE offers additional products to enhance your on-line access to energy usage and cost information.

	SCE ENERGYMANAGER® BASIC	SCE COST MANAGER®	SCE BILL MANAGER®
Available Data			
Current and Historical Monthly Bill Data			Up to 48 months (updated monthly)
15-minute Intervals of Energy Demand and Usage (kW/kWh)	Refreshed daily	Refreshed monthly, daily, hourly or quarter-hourly based on customer choice	
15-minute Intervals of Excess kW/kWh Generation (if applicable)	Refreshed daily	Refreshed daily, hourly, or quarter-hourly based on customer choice	
15-minute Intervals of Reactive Demand and Energy Usage (kVAR/kVARh)	Refreshed daily	Refreshed daily except monthly service level where it is only refreshed monthly	
Historical kW/kWh in 15-minute Intervals	Up to 48 months	Up to 48 months	
Historical kVAR/kVARh in 15-minute Intervals	Up to 48 months	Up to 48 months
