**ADVICE 154-G**  
**(U 338-E)**

PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA  
ENERGY DIVISION

**SUBJECT:** Increase in Santa Catalina Island Gas Cost Adjustment  
Billing Factors and the California Alternate Rates for Energy  
(CARE) Surcharge

Southern California Edison Company (SCE) hereby transmits for filing the following changes to its gas tariff schedules applicable to Santa Catalina Island. The revised tariff sheets are listed on Attachment A and are attached hereto.

**PURPOSE**

This advice filing revises SCE's gas tariffs to reflect an increase in the Santa Catalina Island Gas Cost Adjustment Billing Factors (GCABFs) and the CARE Surcharge component of base rates for non-CARE gas customers.

The revised GCABFs are calculated in accordance with the procedures set forth in Preliminary Statement, Part F, Santa Catalina Island Gas Cost Adjustment Clause (GCAC), of SCE's gas tariffs as authorized in California Public Utilities Commission (Commission) Decision No. (D.) 82-04-010.

A decrease in the estimated March 1, 2009 balance in the GCAC balancing account resulted in a slight decrease in the total March 1, 2009 GCAC revenue requirement when compared to the September 1, 2008 GCAC revenue requirement. Although the March 1, 2009 GCAC revenue requirement decreased, the decline in the retail sales forecast was significant enough to cause an over-all increase in the GCABFs of 3.6 percent.

**INFORMATION**

In D.82-04-010, Ordering Paragraph 2, the Commission authorized SCE to submit GCAC filings by advice letter for every six-month period with March 1 and September 1 as the regularly scheduled revision dates. SCE's GCABFs were last revised effective

September 1, 2008, as filed in Advice 148-G,<sup>1</sup> dated July 21, 2008. The CARE surcharge was last revised effective September 28, 2008, as filed in Advice 151-G,<sup>2</sup> dated August 29, 2008.

The GCABFs established herein are based on the total GCAC revenue requirement which reflects: 1) gas expense for the Forecast Period of March 1, 2009 through February 28, 2010; and 2) amortization of the estimated March 1, 2009 balance in the GCAC balancing account over the Forecast Period. Table I (attached) sets forth the calculation of the GCAC balancing account revenue requirement and the fuel revenue requirement.

SCE's current and revised GCABFs and CARE Surcharge for Santa Catalina Island are listed below:

|                              | <u>Current<br/>\$/Therm</u> | <u>Revised<br/>\$/Therm</u> |
|------------------------------|-----------------------------|-----------------------------|
| Domestic Baseline Service    | 2.52103                     | 2.65191                     |
| Domestic Nonbaseline Service | 2.63559                     | 2.78599                     |
| Other Than Domestic Service  | 3.11486                     | 3.28077                     |
| CARE Surcharge <sup>3</sup>  | 0.05554                     | 0.05839                     |

This advice filing allocates the revenue increase to Domestic and General Service customers on a System Average Percentage Change (SAPC) basis. This is consistent with the allocation adopted by the Commission in SCE's previous GCAC filings.

The increase above present rate revenues resulting from these changes in rates, based on the therms estimated to be sold during the Forecast Period, is as follows:

| <u>Rate Schedule</u> | Revised Revenue Change<br>From Present Rates |                     |          |
|----------------------|--|---------------------|----------|
|                      | <u>Therms</u>                                | <u>\$ Thousands</u> | <u>%</u> |
| Domestic             | 267,746                                      | 35.9                | 3.6      |
| General Service      | 333,079                                      | 56.2                | 3.6      |
| TOTAL                | 600,825                                      | 92.1                | 3.6      |

Ordering Paragraph 5 of D.82-04-010 requires SCE to show the method used to calculate the transportation charges for delivery of propane to Santa Catalina Island. SCE does not calculate this charge. All propane is purchased from the supplier freight on board (FOB) Santa Catalina Island, and as such, the transportation charge is included in the total cost of the propane. Table II (attached) sets forth the historical quantity and cost of propane to

<sup>1</sup> Advice Letter 148-G was approved by the Commission's Energy Division on September 22, 2008.

<sup>2</sup> Advice Letter 151-G was approved by the Commission's Energy Division on November 3, 2008.

<sup>3</sup> The cost of the CARE discount is recovered from all non-CARE customers through a surcharge which is added to the base rate.

SCE for the 12-months ended December 2008, which includes transportation charges. The average price of propane is also shown by month, and for the 12-month period.

Section 8 of Part F in the Preliminary Statement of SCE's tariffs is also revised to reflect the GCABFs set forth on the applicable rate schedules in this advice filing.

This advice filing results in a price increase, but does not result in a withdrawal of service or more restrictive conditions.

### **TIER DESIGNATION**

Pursuant to D.07-01-024, Appendix B, Energy Industry Rule 5.1(3), SCE believes this advice letter is subject to Energy Division disposition and should be classified as Tier 1 (effective pending disposition).

### **EFFECTIVE DATE**

This rate change is requested to be effective for service rendered on and after March 1, 2009, pursuant to D.82-04-010.
