ADVICE 2056-E
(U 338-E)

PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA
ENERGY DIVISION

SUBJECT: Daylight Saving Time Changes Contemplated Under the
Federal Energy Policy Act of 2005

Southern California Edison Company (SCE) hereby submits for approval the following changes to its tariff schedules. The revised tariff sheets are listed on Attachment A and are attached hereto.

PURPOSE

This filing is made as a consequence of certain calendar changes affecting Daylight Saving Time (DST), as adopted under the Energy Policy Act of 2005. As a result, SCE's Schedules RTP-2, RTP-2-I, and PA-RTP have been revised to remove a specific footnote reference regarding DST calendar days.

BACKGROUND

The Energy Policy Act of 2005 (Act) was passed by the United States Congress on July 29, 2005 and was signed into law on August 8, 2005. Section 110 of the Act amends the Uniform Time Act, by extending DST for a period of three to four weeks each spring and for a period of one week in the fall, beginning in March of 2007. As enacted, the Act amends Section 3(a) of the Uniform Time Act of 1966 to provide that clocks be set forward beginning on the second Sunday of March (instead of the first Sunday of April) and set back on the first Sunday in November (rather than the last Sunday of October). Section 110 also calls for the U.S. Department of Energy (DOE) to submit a report to Congress not later than December 11, 2007, addressing any impacts of the revised DST schedule on energy consumption. Congress has explicitly retained a "right to revert" to the current DST schedule after the DOE study is completed.

SCE currently provides service under Time-of-Use (TOU) rate schedules to approximately 38,000 of its nearly 4.7 million customer accounts. The meters used for

these TOU rate schedules are primarily interval data recording (IDR) meters that record energy usage in 15-minute intervals. The TOU peak usage and demands are derived from grouping the recorded interval values in accordance with the time period definitions included in the customers' TOU rate schedules.

Depending on the meter type, these IDR meters have been programmed either on Pacific Standard Time (PST) or on the current pre-2007 DST. Currently, SCE's billing system automatically adjusts the IDR data to accommodate DST by shifting by one hour the intervals collected from those meters programmed with PST. SCE is in the process of completing billing system changes to accommodate the changes to DST required by the Act. When the extended DST required by the Act is implemented in 2007, SCE's billing system will automatically adjust the IDR data collected from meters programmed with PST and the pre-2007 DST by shifting the intervals one hour to coincide with the extended DST.

Due to the IDR metering used for billing its TOU customers, SCE will not need to modify its TOU rate schedules as ordered by the California Public Utilities Commission (Commission) Resolution E-3982 for Pacific Gas and Electric Company and San Diego Gas & Electric Company. Since SCE's billing system can accommodate the extended DST by shifting the recorded intervals one hour, SCE customer billing will not be impacted by the extended DST. The only change that is required to SCE's tariffs is the removal of references to the old DST in three of SCE's Real Time Pricing tariffs. By removing the DST references, subsequent changes to DST by Congress will not require further tariff revisions. The following language will be removed from the footnote area of schedules RTP-2, RTP-2-I, and PA-RTP:

"Daylight Savings Time commences at 2:00 a.m. on the first Sunday in April and ends at 2 a.m. on the last Sunday in October when Pacific Standard Time commences."

No cost information is required for this advice filing.

This advice filing will not increase any rate or charge, cause the withdrawal of service, or conflict with any other schedule or rule.

EFFECTIVE DATE

It is requested that this advice filing will become effective upon 30 calendar days of this filing, which shall be December 3, 2006.
