

Schedule TOU-BIP  
TIME-OF-USE-GENERAL SERVICE  
BASE INTERRUPTIBLE PROGRAM

Sheet 1

APPLICABILITY

This Schedule is optional for General Service customers and Aggregators who have monthly Maximum Demands or aggregated monthly Maximum Demands reaching or exceeding 200 kW. Customers, both directly enrolled and those in an Aggregator's portfolio, must take service under the provisions of a Time-of-Use (TOU) or Real Time Pricing (RTP) rate schedule to participate in the Program, and must commit to curtail at least 15 percent of their Maximum Demand, which shall not be less than 100 kW, per Period of Interruption. Additionally, this Schedule is optional for customers with load served under the maintenance and/or backup service provisions of Schedules S, TOU-8-S, or TOU-8-RTP-S as well as supplemental and excess supplemental load of that Schedule.

Participant must choose Participation Option A or Participation Option B, as defined in Special Condition 2 of this Schedule. Customers directly enrolling must make such selection in the Interruptible Service Agreement (Form 14-315) and Aggregators in the Time-of-Use Base Interruptible Program Aggregator Agreement (Form 14-780) prior to receiving service under this Schedule. Participation Option B is the default option for participants who make no selection.

For the purpose of this Schedule a participant is defined as either a customer directly enrolling in this Schedule or an Aggregator.

This Schedule is not applicable to customers served under Schedules GS-APS-E, AP-I, and CBP.

Pursuant to Decision 10-06-034, which placed a Megawatt (MW) cap on emergency demand response programs, this Schedule may at any time be subject to a cap for new participants. (N)  
(N)

TERRITORY

Within the entire territory served.

RATES

All charges and provisions of the customer's Otherwise Applicable Tariff (OAT) shall apply.

Schedule TOU-BIP  
TIME-OF-USE-GENERAL SERVICE  
BASE INTERRUPTIBLE PROGRAM

Sheet 2

(Continued)

RATES (Continued)

Directly Enrolled Customer:

In accordance with the terms and conditions of this Schedule and the applicable contract(s) a customer is eligible for interruptible bill credits on their monthly bill. The bill credits will be based on the kW demand difference between the customer's monthly average kW demand recorded during each TOU period (on-peak and mid-peak during the Summer Season, and mid-peak during the Winter Season), and the customer's Firm Service Level (FSL). The kW demand difference, as described above, will be multiplied by the applicable bill credit amounts differentiated by the selected Participation Option (A or B), by voltage levels, by season, and by TOU period, as listed in this Section. The bill credit(s) for each applicable TOU period is then summed to arrive at the total credit for the month.

(D)

Example – Monthly BIP Credit Calculation for Customers during Summer Season:

MASO = Monthly Average Summer On-Peak Demand

MASM = Monthly Average Summer Mid-Peak Demand

FSL = Firm Service Level

SOPC = Summer On Peak Credit amount depending on Participation Option A or B and Voltage Level

SMPC = Summer Mid Peak Credit amount depending on Participation Option A or B and Voltage Level

Step 1: Total Monthly Summer On-Peak kWh / Total Monthly Summer On-Peak Hours = MASO

Step 2: (MASO – FSL)\* = Summer On-Peak Interruptible kW

Step 3: Summer On-Peak Interruptible kW x applicable SOPC = monthly bill credit for Interruptible kW for Summer On-Peak Interruptible kW

Step 4: Total Monthly Summer Mid-Peak kWh / Total Monthly Summer Mid-Peak Hours = Monthly Average Summer Mid-Peak Demand (MASM)

Step 5: (MASM – FSL)\* = Summer Mid-Peak Interruptible kW

Step 6: Summer Mid-Peak Interruptible kW x applicable SMPC = monthly bill credit for Summer Mid-Peak Interruptible kW

Step 7: The sum of Steps 3 and 6 = Monthly Summer Season Bill Credit

\* Value must be 0 or above.

BASE INTERRUPTIBLE PROGRAM

Sheet 3

(Continued)

RATES (Continued)

**Aggregator:**

In accordance with the terms and conditions of this Schedule and the applicable contract(s), an Aggregator is eligible for monthly payments. The payments will be based on the kW demand difference between each Aggregated Group's total monthly average demand of all of its service accounts as recorded during each TOU period (on-peak and mid-peak during the summer season, and mid-peak during the winter season), and the Aggregated Group's Firm Service Level (FSL). The kW demand difference, as described above, is then multiplied by the applicable payment amount differentiated by the selected participation option (A or B), by voltage level, by season, and by TOU periods, as listed in this Section. The BIP payment(s) for each applicable TOU period is then summed to arrive at the total payment for the month.

MASO = Monthly Average Summer On-Peak Demand

MASM = Monthly Average Summer Mid-Peak Demand

FSL = Firm Service Level

SOPC = Summer On Peak Credit amount depending on Participation Option A or B and Voltage Level

SMPC = Summer Mid Peak Credit amount depending on Participation Option A or B and Voltage Level

- Step 1: Total Monthly Summer On-Peak kWh for all service accounts in the aggregated group/  
 Monthly Summer On-Peak Hours = Aggregated Monthly Average Summer On-Peak Demand (Aggregated MASO)
- Step 2: (Aggregated MASO – Aggregated FSL)\* = Aggregated Summer On-Peak Interruptible kW (T)
- Step 3: Aggregated Summer On-Peak Interruptible kW x applicable SOPC = Aggregated monthly payment for Summer On-Peak Interruptible kW
- Step 4: Total Monthly Summer Mid-Peak kWh for all service accounts in the aggregated group/  
 Monthly Summer Mid-Peak Hours = Aggregated Monthly Average Summer Mid-Peak Demand (Aggregated MASM)
- Step 5: (Aggregated MASM – Aggregated FSL)\* = Aggregated Summer Mid-Peak Interruptible kW (T)
- Step 6: Aggregated Summer Mid-Peak Interruptible kW x applicable SMPC = Aggregated monthly payment for Summer Mid Peak Interruptible kW
- Step 7: The sum of Steps 3 and 6 = Aggregated Monthly Summer Season Payment

\* Value must be 0 or above. (T)

Excess Energy Charges:

For both Participation Option A and Participation Option B, a charge for Excess Energy may apply under certain conditions, as set forth in Special Condition 6.

Excess Energy Charges (\$/kWh):

	<u>Option A</u>	<u>Option B</u>
Voltages below 2 kV	\$14.80456	\$13.89417
Voltages from 2 kV to 50 kV	\$14.49402	\$13.60306
Voltages above 50 kV	\$13.94961	\$13.09274

SPECIAL CONDITIONS

1. Interruptible Load: The Interruptible Load is the measured difference between the customer's or Aggregated Group's demand, at the time of interruption, and the customer's or Aggregated Group's Firm Service Level.
2. Participation Option A and Participation Option B:
  - a. Participation Option A: 15-Minute Participation Option requires a customer or Aggregated Group to reduce its demand imposed on the electric system to its Firm Service Level within 15 minutes of a Notice of Interruption from SCE, as defined in Special Condition 4 of this Schedule.
  - b. Participation Option B: 30-Minute Participation Option requires a customer or Aggregated Group to reduce its demand imposed on the electric system to its Firm Service Level within 30minutes of a Notice of Interruption from SCE, as defined is Special Condition 4 of this Schedule.
3. Load Zone: SCE will assign each participant to a load zone. The assigned Load Zone may be at SCE's system or subsystem level which may change over time. Participant may be direct enrolled customer or customer in an Aggregated Group. (N)

Schedule TOU-BIP  
TIME-OF-USE-GENERAL SERVICE  
BASE INTERRUPTIBLE PROGRAM

Sheet 6

(Continued)

SPECIAL CONDITIONS (Continued)

4. Firm Service Level (FSL): FSL is the Maximum Demand SCE is expected to supply and/or deliver during any Period of Interruption. The FSL shall be specified by the customer and by the Aggregator for each of its Aggregated Groups. During a Period of Interruption, the participant is expected to interrupt load to its specified FSL. Except for the participants who are verified with the status of Non-Performance as described in Special Condition 10, and the participants with a change in the Prohibited Resource Attestation as described in Special Condition 11, increases or decreases in FSL may be made no more often than once per year, upon written request by the participant between November 1 and December 1 and execution of an Interruptible Service Agreement (Form 14-315) for customers, and Attachment E to the Time-of-Use Base Interruptible Program Aggregator Agreement (Form 14-780) for Aggregators to increase or decrease the participant's FSL. Participants served under this Schedule shall establish a FSL of zero or greater. (N)(T)

Default Adjustment Value (DAV) is the nameplate capacity value of the participant's Prohibited Resource provided at the time of attestation. If a participant has multiple units of Prohibited Resource at the same site, then the DAV is the sum of the nameplate capacity values from all Prohibited Resource units at the same site. For participants who do not use their Prohibited Resource to reduce load during a Demand Response event, as described in Special Condition 11, b. (1) ii, the DAV will not affect the participant's FSL. For participants electing to use its Prohibited Resource to reduce load during a Demand Response event on the same site for the same service account, as described in Special Condition 11, b. (1) iii, the direct enrolled participant must set the FSL at no less than the DAV, and the Aggregators must set the FSL for their Aggregated Group at no less than the sum of the DAV for all participants attested to Special Condition 11. b. (1) iii. (N)

5. Notice of Interruption: A Notice of Interruption will be sent to customer designated contacts. Customers must ensure the notification delivery method is functional and be responsible to pay for all charges associated with the notification delivery service. Failure to provide at least one valid notification contact or functional notification delivery service may result in Excess Energy Charges being applied. SCE may give a Notice of Interruption under this Schedule:

- a. After the California Independent System Operator (CAISO) has (i) publicly declared a Warning, Stage 1, Stage 2, Stage 3, or Transmission Emergency and (ii) has taken all necessary steps to prevent the further degradation of its operating reserves according to Operating Procedure 4420; or
- b. Upon determination by SCE's grid control center of the need to implement load reductions in SCE's service territory; or
- c. At the discretion of SCE for program evaluation or system contingencies.

Effective \_\_\_\_\_  
Resolution E-4838; E-4906

Schedule TOU-BIP  
TIME-OF-USE-GENERAL SERVICE  
BASE INTERRUPTIBLE PROGRAM

Sheet 7

(Continued)

SPECIAL CONDITIONS (Continued)

5. Notice of Interruption (Continued):

Once SCE sends a Notice of Interruption to a participant's contact(s), the participant shall reduce the demand imposed on the electric system to its FSL in accordance with Special Condition 4 above. Upon receiving a Notice of Interruption, participant is responsible for determining they are located in the affected Load Zone (block) and shall respond accordingly. SCE will not be responsible for notifying the customers within an Aggregated Group of an interruption. The Aggregator will be solely responsible for notifying the customers within its Aggregated Group of an interruption. (T)

6. Period of Interruption: A Period of Interruption is a time interval which commences 15 minutes after Notice of Interruption for participants on Participation Option A and 30 minutes after a Notice of Interruption for participants on Participation Option B. For Participation Option A and Participation Option B participants, a Period of Interruption ends for participants upon notification by SCE of the end of a Period of Interruption.

7. Excess Energy: Excess Energy is the number of kWh consumed in each Period of Interruption which exceeds the product of the FSL kW multiplied by the total number of hours within the Period of Interruption.

8. Charges for Excess Energy: For each Period of Interruption during which the participant has Excess Energy, the applicable Excess Energy Charge shall be added to the customer's bill or charged to the Aggregator.

9. Noncompliance: The customer's noncompliance with any of the terms and/or conditions of this Schedule and/or the associated contract(s), except for the terms and conditions relating to failure to interrupt load, may result in the suspension of the interruptible credits and charges pursuant to the customer's otherwise applicable tariff. However, the customer remains subject to all other terms and conditions of this Schedule and the applicable contract(s). The interruptible credits of this rate schedule will be applied effective the next meter read date after SCE determines the customer is in compliance.

10. Non-Performance: If a participant fails to reduce demand to its FSL during a Period of Interruption, SCE may give written notice to that participant that a repeated failure to reduce demand to its FSL during a Period of Interruption may result in removal from the Schedule. Following the written notice, if the participant fails to reduce demand to its FSL during another Period of Interruption, SCE may direct the participant to revise its FSL to a level designated by SCE. Such participant may be subject to removal from this Schedule if its FSL is not timely adjusted to the level designated by SCE. Any participant removed from this Schedule for multiple failures to reduce demand to its FSL during a Period of Interruption over the contract term is not eligible to participate in this Schedule during the subsequent 12 month term.

SPECIAL CONDITIONS (Continued)

11. Use of Prohibited Resources:

a. Prohibited Resources.

Effective January 1, 2019, the following list of resources are prohibited in providing load reduction during demand response events: distributed generation technologies using diesel, natural gas, gasoline, propane, or liquefied petroleum gas, in topping cycle Combined Heat and Power (CHP) or non-CHP configuration ("Prohibited Resources"). The following resources are exempt from the prohibition: pressure reduction turbines and waste-heat-to-power bottoming cycle CHP, resources powered by fuel (e.g., renewable gas, renewable diesel, or biodiesel) that has received renewable certification from the California Air Resources Board, as well as energy storage resources not coupled with fossil fueled resources.

b. Attestation of Prohibited Resources

(1) Participant must attest to one of the following conditions in order to participate in this Schedule

- i. Participant does not have a Prohibited Resource onsite
- ii. Participant does have a Prohibited Resource onsite and will not use the resource to reduce load during any demand response event. Participant must provide the number of unit(s) of Prohibited Resource onsite, and the DAV for the Prohibited Resource onsite (as defined in Special Condition 4).
- iii. Participant does have a Prohibited Resource onsite and may have to use the resource(s) during demand response events for safety, health, or operational reasons. Participant must provide the number of unit(s) of Prohibited Resource onsite, and the DAV for the Prohibited Resource onsite (as defined in Special Condition 4).

(2) Form Requirement for Attestation of Prohibited Resources: The direct enrolled participants must sign Form 14-315. The aggregator enrolled participants must sign Form 14-980, Authorization for Participation in Aggregated Demand Response Programs Form, (Form 14-780, Attachment C). For participants enrolled with an Aggregator prior to January 1, 2019, the Aggregator may use its own attestation form. Participant with multiple accounts enrolled through an Aggregator may submit one form for all accounts with same attestation condition as described in Special Condition 11.b.(1). Each aggregator is responsible for submitting the completed attestation form(s) for each participating accounts of their participants on this Schedule to SCE in a machine readable format, such as a comma-separated value (.csv) file or other format acceptable by SCE. Customer signature for the participating accounts may be in an electronic format, including a "click." Each Aggregator with active participating account(s) on this Schedule must re-execute and submit Time-of-Use Base Interruptible Program Aggregator Agreement (Form 14-780) to SCE, after October 1, 2018 and no later than December 10, 2018.

SPECIAL CONDITIONS (Continued)

## 11. Use of Prohibited Resources (Continued):

## b. Attestation of Prohibited Resources (Continued):

- (3) Initial Attestation: All existing participants must attest prior to December 10, 2018, and all new participants must attest at the time of enrollment.
- (4) Update of the Attestation: Participants may update their attestation(s) with any of the following changes, if the change is supported by documentation that confirms the operational change, and can be verified by SCE or a Verification Administrator. Update of the Attestation may be subject to SCE's approval.
  - i. Add, remove, or modify an onsite Prohibited Resource
  - ii. Change the status of the use of Prohibited Resource(s) to reduce load during any demand response event.
  - iii. Change the DAV.

## c. Verification of Attestation of Prohibited Resources:

The Verification Administrator is an independent contractor responsible for verifying the Prohibited Resource attestations.

- (1) Participant's compliance and participation may be subject to verification performed by a Verification Administrator and consequences associated with non-compliance.
- (2) Participation in this Schedule is contingent on complying with possible verification requests and facility access for site visits, as deemed necessary by the Verification Administrator. Compliance with Verification Administrator requests will be determined by the Verification Administrator
- (3) If directed by the Verification Administrator, SCE may pay for the installation of monitoring equipment for purpose of verification of attestation in the test year 2019.
- (4) All participating accounts may be required to provide the Verification Administrator with written operating manifest(s), date and time stamped photo(s) of the Prohibited Resource unit(s), load curtailment plan(s), single line diagram(s), permit copy(ies), or other information and/or documentation about their onsite Prohibited Resource unit(s).

SPECIAL CONDITIONS (Continued)

11. Use of Prohibited Resources (Continued):

c. Enforcement of Prohibition of Resources:

The Verification Administrator is responsible for enforcing the prohibition.

(1) Type I Violation

- i. Invalid Attestation: This type of infraction includes mistakes on the attestation that may be reasonably found to be clerical or administrative in nature, such as reporting a higher than actual nameplate capacity value of a Prohibited Resource or not including an onsite Prohibited Resource on the attestation, as long as the resource is not used to reduce load during a DR event. These instances of "Type I" infractions may be subject to a 60-day cure period for customer correction and aggregator validation. SCE or its Verification Administrator will notify the direct enrolled participants or the aggregators of any identified Invalid Attestation. Once notified, if the violation is not cured within 60 days, the participant will be removed from this Schedule at the next regularly scheduled meter read date. Once removed from this Schedule, if the participant or the participant's aggregator is able to provide SCE with a valid attestation at the time of re-enrollment, the participant may re-enroll at any time.
- ii. No Attestation: Any active participant that does not agree to the prohibition, by submitting an attestation by December 10, 2018, will be removed from this Schedule on the participant's next regularly scheduled meter read date, but will be eligible to re-enroll subject to the submittal of the attestation.

SPECIAL CONDITIONS (Continued)

11. Use of Prohibited Resources (Continued):

d. Enforcement of Prohibition of Resources (Continued):

(2) Type II Violation - Non-Compliance with the Prohibition: A Type II Violation is defined as a violation of the term(s) of its attestation when (a) the participant that did not attest to any use of any Prohibited Resource, but is using a Prohibited Resource to reduce load during a demand response event, or (b) a participant submits an invalid nameplate capacity value that is lower than the actual capacity value on the nameplate. SCE or its Verification Administrator will notify the direct enrolled participants or the aggregators of any identified Type II Violation. A participant identified with a single instance of a Type II Violation shall be removed from this Schedule for one year, and must wait 12 months to be eligible to re-enroll in this Schedule and all other "affected DR programs." A participant with two or more instances of Type II Violation shall be removed from this Schedule for a period of three years, and must wait 36 months to be eligible to re-enroll in this Schedule and all other "affected DR programs." "Affected DR programs" are all DR programs and pilots subject to the prohibition requirements in Decision 16-09-056 and Resolution E-4906.

e. Dispute Resolution:

Participants disputing a Type I or Type II Violation shall be permitted to engage in a dispute resolution process with the Verification Administrator, SCE, the California Public Utilities Commission (Commission), and, if applicable, the aggregator. The participants, the aggregators, and SCE shall follow the Commission Alternative Dispute Resolution (ADR) and Formal Complaint processes to resolve disputes over verification issues.

SPECIAL CONDITIONS (Continued)

12. Direct Access (DA) and Community Choice Aggregation (CCA): A customer receiving DA or CCA service shall notify its Energy Service Provider (ESP) or Community Choice Aggregator (CCA), as applicable and Scheduling Coordinator that it is subject to interruption under this Schedule. In addition, if a customer receiving DA or CCA service owns its own meter or has a meter provided by an ESP, the meter must be capable of providing the proper pulse data interface between the customer's metering system and SCE's data recorder. Where SCE is the MDMA and MSP for participating service accounts which do not have the required IDR metering, SCE will provide and install such equipment.
13. Meter Requirements: Interval data recorder (IDR) metering is required for all customers providing interruptible load for purposes of this Schedule, whether the load is provided directly by the customer or through an Aggregator.
14. Contracts: A contract is required for service under this Schedule. A participant with a valid contract may not be required to execute a new contract for account changes if the participant's Federal Tax Identification Number remains the same. To be served under this Schedule, eligible Participants shall comply with all provisions of the contract and this Schedule.

Except for the conditions listed in Special Condition 14. d. below, participants shall have a one month window each year between November 1 and December 1, to provide written notice to SCE for the following options, a through c, with all changes becoming effective on the next regularly scheduled meter read date on or after December 1.

- a. Terminate service under Schedule TOU-BIP and return to the OAT.
- b. Change the Participation Option. Changes in Participation Option with timely receipt of the signed Interruptible Service Agreement (Form 14-315) or Attachment D to the Time-of-Use Base Interruptible Program Aggregator Agreement (Form 14-780).
- c. Increase or decrease the FSL. Increases or decreases in the FSL with timely receipt of the signed Interruptible Service Agreement (Form 14-315) or Attachment E to the Time-of-Use Base Interruptible Program Aggregator Agreement (Form 14-780).
- d. A participant may provide written notice to SCE and request for any of the options a through c above outside of the November 1 to December 1 period, if the customer is changing its attestation of the Prohibited Resource(s). All changes become effective on the next regularly scheduled meter read date on or after SCE's approval of the participant's written notice. In addition, SCE may, at its sole discretion, initiate additional window(s) throughout the year with a duration of a specified period, due to any change which may affect customer's participation on this Schedule. A participant may be removed from this Schedule at any time if the participant has incurred one or more instances of Type II Violation as described in Special Condition 11. d. (2). (T)

SPECIAL CONDITIONS (Continued)

14. Contracts: (Continued)

Participants with a verified status of Non-Performance as described in Special Condition 10, (T)  
may be removed from this Schedule. Termination of Service under Schedule TOU-BIP due to  
Non-Performance will become effective upon participant's next regularly scheduled meter  
read date following SCE's notification of service termination to the participant.

Aggregators are required to complete a Time-Of-Use Base Interruptible Program Aggregator  
Agreement (Form 14-780) including the attachment thereto.

Customers shall not be permitted to prematurely terminate service hereunder unless changes  
in electrical demand require a change in the customer's Otherwise Applicable Tariff (OAT) is  
not eligible for this Schedule.

Failure to meet minimum applicability requirements due to changes in demand or connected  
load for 12 or more consecutive months will result in the customer being removed from this  
Schedule. Removal from this Schedule will occur once per year on the next regularly  
scheduled read date after December 1.

Schedule TOU-BIP  
TIME-OF-USE-GENERAL SERVICE  
BASE INTERRUPTIBLE PROGRAM

Sheet 14

(Continued)

SPECIAL CONDITIONS (Continued)

15. Number and Duration of Interruption: The number of Periods of Interruption will not exceed one (1) per day, ten (10) in any calendar month, and a total of 180 hours per calendar year. The duration of each Period of Interruption will not exceed 6 hours.
16. Customer Electrical Generating Facilities:
- a. Where customer electrical generating facilities are used to meet a part or all of the customer's electrical requirements, service shall be provided concurrently under the terms and conditions of Schedule S or TOU-8-S, whichever is applicable, and this Schedule. Parallel operation of such generating facilities with SCE's electrical system is permitted. A generation interconnection agreement is required for such operation.
  - b. Customer electrical generating facilities used solely for auxiliary, emergency, or standby purposes (auxiliary/emergency generating facilities) to serve the customer's load during a period when SCE's service is unavailable and when such load is isolated from the service of SCE are not subject to Schedule S or Schedule TOU-8-S. However, upon approval by SCE, momentary parallel operation may be permitted in order for the customer to avoid interruption of load during a Period of Interruption or to allow the customer to test the auxiliary/emergency generating facilities. A generation interconnection agreement is required for such momentary parallel operation.
17. Relationship to Other Demand Response Programs. Unless otherwise permitted herein, participants on this Schedule may not be served under any other demand response program. Aggregated Groups may not include TOU-BIP directly enrolled customer service accounts. With limitations, customers participating directly (not through an Aggregator) in TOU-BIP may also participate in Schedules CPP, SLRP, OBMC, an applicable RTP rate schedule, or Option CPP of an applicable TOU rate schedule. Customers' service accounts participating in SLRP will not receive a SLRP incentive payment during hours where there is an overlapping TOU-BIP event. In addition, customer's service accounts on this Schedule may also participate in other SCE resource contracts, provided specific contract provisions allow for such dual participation. Customer's service accounts on this Schedule shall not participate in the CAISO's Ancillary Services Load Program. (T)

For customers' service accounts dual participating with Schedule CPP or Option CPP of an applicable TOU rate schedule, the sum of credits provided by TOU-BIP and CPP will be capped. The capped credit amount, also known as the Maximum Available Credit, is listed per the customer's OAT in the applicable rate section of Schedule CPP or Option CPP. (T)

Schedule TOU-BIP  
TIME-OF-USE-GENERAL SERVICE  
BASE INTERRUPTIBLE PROGRAM

(Continued)

SPECIAL CONDITIONS (Continued)

- 18. Insurance. Insurance may not be used to pay non-compliance penalties for willful failure to comply with a Notice of Interruption. Existing and new participants will not be eligible for continued service or new service under this Schedule unless a declaration is signed under penalty or perjury which states that the participant does not have, and will not obtain, any insurance for the purpose of the insurance paying non-compliance penalties for willful failure to comply with Notices of Interruptions. Continued eligibility and new eligibility under this Schedule will require that each participant execute a declaration stating that it does not have, and will not obtain, such insurance. For any participant with such insurance after the effective date of this Special Condition, service under this Schedule will be terminated and such participant will be required to pay back the interruptible rate discounts for the period covered by the insurance. If the period cannot be determined, the recovery shall be for the entire period the participant was on this Schedule. (T)
  
- 19. Aggregators: Pursuant to Decision 06-11-049, Aggregators may participate under this Schedule. The Aggregator may aggregate the load of customers whose load falls below the minimum load requirements, as defined in the applicability section of this Schedule, into one or more Aggregated Groups as long as the total load of each Aggregated Group meets the minimum load requirements. SCE will provide the Aggregator with a monthly payment in accordance with the terms and conditions of Time-Of-Use Base Interruptible Program Aggregator Agreement (Form 14-780). Payments will remain at the Aggregated Group level, providing for interruptible payments and Excess Energy Usage Charges based on each Aggregated Group's Firm Service Level (FSL) and monthly average peak demand. Existing TOU-BIP customers wishing to join an Aggregated Group may only do so after opting out of this Schedule during the annual window from November 1 through December 1. (T)

Schedule TOU-BIP  
TIME-OF-USE-GENERAL SERVICE  
BASE INTERRUPTIBLE PROGRAM

(Continued)

SPECIAL CONDITIONS (Continued)

- 20. Aggregated Groups: Aggregators may group their customers into one or more Aggregated Groups as they require. All customers in an Aggregated Group must be served under the same voltage level, and the same Participation Option A or B, the same load zone, and the Aggregated Group must meet the minimum load requirements of this Schedule. In addition, an Aggregated Group will be comprised wholly of either Bundled, DA, or CCA customers. Once established, the addition or removal of customers from an Aggregated Group is not permitted until the annual window from November 1 to December 1. An exception applies to allow removal of a customer's service account when electric service with SCE is discontinued for that service account. In an Aggregated Group, if a customer service account's voltage level changes to a level different from that of the other customers in the Aggregated Group, then such customer service account must be removed from the Aggregated Group during the annual window, but will remain in the Aggregated Group until such time. Each Aggregated Group must maintain the minimum requirements as outlined within this Schedule. (T)
  
- 21. For the purposes of participations under Schedule TOU-BIP, time periods are defined as follows: (T)
  - On-Peak: Noon to 6:00 p.m. summer weekdays except holidays
  - Mid-Peak: 8:00 a.m. to Noon and 6:00 p.m. to 11:00 p.m. summer weekdays except holidays
  - 8:00 a.m. to 9:00 p.m. winter weekdays except holidays
  - Off-Peak: All other hours.

Holidays are New Year's Day (January 1), Presidents' Day (third Monday in February), Memorial Day (last Monday in May), Independence Day (July 4), Labor Day (first Monday in September), Veterans Day (November 11), Thanksgiving Day (fourth Thursday in November), and Christmas (December 25).

When any holiday listed above falls on Sunday, the following Monday will be recognized as an Off-peak period. No change will be made for holidays falling on Saturday. The summer season shall commence at 12:00 a.m. on June 1 and continue until 12:00 a.m. on October 1 of each year. The winter season shall commence at 12:00 a.m. on October 1 and continue until 12:00 a.m. on June 1 of the following year.
  
- 22. Event for Program Evaluation: At SCE's discretion, customers may be requested to participate in a program evaluation event demonstrating their ability to reduce load to their contracted FSL. A BIP program evaluation event will be counted as an actual curtailment event and excess energy charges will apply. (T)
