

TRANSPORTATION ELECTRIFICATION ADVISORY SERVICES

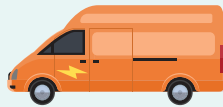

Planning services toward the acquisition and implementation of electric vehicle charging equipment.

Transportation Electrification (TE) Advisory Services supports business and property owners in preparing for the potential deployment of electric vehicle (EV) charging equipment at their commercial business locations or multi-family properties.

Our expert representatives are available to provide education, awareness, and support through our services, including custom EV Readiness Studies, grant writing assistance, webinars, and in-person events. With TE Advisory Services, property owners and businesses can now confidently implement the clean-energy technologies they desire to support the needs of their EV fleets, customers, and/or tenants.

Through comprehensive planning and professional deployment, those interested in adopting electric vehicle charging equipment and achieving their clean energy goals can do so with expert advice. TE Advisory Services are ideal for:

- Medium- and heavy-duty fleet owners (buses, trucks, shuttles, off-road vehicles, etc.)
- Multi-family properties (apartments, retirement communities, etc.)
- Small businesses
- Large businesses (located in Disadvantaged Communities)
- Commercial locations (hospitals, shopping centers, schools, etc.)

Requirements

To utilize TE Advisory Services, customers must have:

1. An active SCE customer account; and
2. A proposed project site within SCE's service territory

EV Readiness Studies

We develop site-specific EV Readiness Studies that help determine the feasibility of a proposed electrification project. We offer two types of EV Readiness Studies: Fleet & Site, available for medium- and heavy-duty vehicle (MDHD) fleet customers, and Site Only, available for multi-family properties and commercial business customers.

Grant Assistance

There are many funding opportunities for zero-emission vehicles that vary in both form and complexity, especially in California. We currently offer grant writing webinars where customers can engage directly with our experts, receive help toward writing more effective grant applications, and learn about EV funding opportunities.

Beginning in 2022, TE Advisory Services will be available to assist qualified customers secure grants through grant writing assistance and grant package review.

Educational Webinars & Workshops

TE Advisory Services will host quarterly, one-hour webinars on various technical topics for all commercial and multi-family dwelling stakeholders. Our customized webinars examine the unique needs, concerns, and challenges organizations face when considering transportation electrification.

In-Person Events

Beginning in 2022, our team will host events throughout SCE's service area to give customers an opportunity to ask questions, meet with electrification experts, and test new technology.
