

SCE Non Solar Inverter List (Simplified Data)

Data has not changed since 8/6/ 2019

The Inverter Listing Request Procedure process and the [list of eligible solar inverter equipment](#) will be managed by the California Energy Commission. See the site www.gosolarcalifornia.org/equipment page for list of eligible solar equipment.

This **list below of eligible non-solar equipment** has been updated to reflect NRTL submission of the reactive power priority requirements and the Function 5 & 6 (SA14 SA15) requirements to SCE. This list will be periodically refreshed to include smart inverters that are certified with reactive power priority based on NRTL certification submittal. Please submit the request for internal SCE listing certification to SmartInverterTechnicalInformation@sce.com. It is the responsibility of the customer/installer/contractor to ensure the equipment purchased meets both the smart inverter requirement and the new RPP requirements adopted in E-4920 and E4898 Requirements (Effective Feb 22,2019)

Effective February 22, 2019 The following Non Solar Inverters are verified with Resolution E4898 Requirements	
NON-PV SYSTEM- Verified with UL1741 SA, RPP & Function 5 & 6	
Manufacturer Name	Model Number
Tesla	AC Powerwall 1092170-xx-y
Tesla	Powerpack 2.0 Model 1095371-xx-y
Tesla	Powerpack 2.0 Inverter 1.5 Model 1134768-xx-y
Eguana	Evolve Line Bi-Direx PCS- Model ACB05U-LP
Princeton Power	GTIB-480-125
