**WSD-001 – Resolution WSD-001 to Establish Procedures for the Wildfire Safety Division's  
Review of 2020 Wildfire Mitigation Plans Pursuant to PUC Sections 8386 and 8386.3**

**DATA REQUEST SET Cal Advocates - SCE - 2020 WMP - 03**

**To: Cal Advocates**  
**Prepared by: Gary Cheng**  
**Job Title: Senior Advisor**  
**Received Date: 3/16/2020**

**Response Date: 3/18/2020**

---

**Question 002:**

Has SCE estimated the marginal risk reduction benefit generated by an additional dollar of spending (relative to either the 2018 or 2019 spending level) on any of the following programs? If so, please provide that analysis.

- a. Situational awareness and forecasting (WMP Section 5.3.2), or any subprogram therein.
- b. Grid design and system hardening (WMP Section 5.3.3), or any subprogram therein.
- c. Asset management and inspections (WMP Section 5.3.4), or any subprogram therein.
- d. Vegetation management and inspections (WMP Section 5.3.5), or any subprogram therein.
- e. Grid operations and protocols (WMP Section 5.3.6), or any subprogram therein.
- f. Emergency planning and preparedness (WMP Section 5.3.9), or any subprogram therein.
- g. Any existing control programs for which SCE does not report an RSE in the 2020-2022 WMP.

**Response to Question 002:**

- (a) No, SCE did not estimate the marginal risk reduction benefit generated by an additional dollar of spending. Instead, SCE estimated the yearly RSE, the ratio of incremental risk reduction benefits to spend, of mitigation programs. The spend is the cost of the mitigation program for that deployment year.
- (b) See response to (a)
- (c) See response to (a)
- (d) See response to (a)
- (e) See response to (a)
- (f) See response to (a)
- (g) SCE did not calculate the marginal risk reduction benefit generated by an additional dollar of spending for existing control programs.
