***WSD-001 – Resolution WSD-001 to Establish Procedures for the Wildfire Safety Division's  
Review of 2020 Wildfire Mitigation Plans Pursuant to PUC Sections 8386 and 8386.3***

**DATA REQUEST SET M G R A - S C E - 0 0 4**

**To: 151**  
**Prepared by: Jose Ramon Goizueta**  
**Job Title: Director Advanced Analytics**  
**Received Date: 3/5/2020**

**Response Date: 3/10/2020**

---

**Question 004:**

Please provide a tabular listing of HFTD circuits in descending order of internal risk ranking, with the highest risk circuit listed first. If there is a numerical risk score associated with each circuit, include it as a second column. In the event that multiple internal risk scores are used by utilities to prioritize remediation of different wildfire risks independently, please provide additional tables showing the HFTD circuits sorted in descending order of risk for each applicable risk metric and include applicable score as a second column.

**Response to Question 004:**

SCE is providing an export of our wildfire risk model as of 3/6/2020 showing circuit risk from high to low. Although operational considerations may require prioritization of certain remediations, they can deviate slightly from this ranking as the ranking serves as the starting point for most mitigation decisions.
