

*Southern California Edison*  
***WSD-001 – Resolution WSD-001 to Establish Procedures for the Wildfire Safety Division's  
Review of 2020 Wildfire Mitigation Plans Pursuant to PUC Sections 8386 and 8386.3***

**DATA REQUEST SET M G R A - S C E - 0 0 4**

**To: 151**  
**Prepared by: Gary Cheng**  
**Job Title: Senior Advisor**  
**Received Date: 3/5/2020**

**Response Date: 3/10/2020**

---

**Question 005:**

Provide a table with recalculated risk scores and risk spend efficiencies (Table columns I and J), including only HFTD circuits having the HIGHEST internal risk ranking (Set 1) for the following Initiative Activities: Table 23 - 17-1. Updates to grid topology to minimize risk of ignition in HFTDs - System Hardening, Distribution

Table 23 - 17-2. Updates to grid topology to minimize risk of ignition in HFTDs - Surge Arrestor, Distribution Table 25 - 15. Remediation of at-risk species - Enhanced Vegetation Management Table 26 - 5-1 PSPS events and mitigation of PSPS impacts - Distribution

**Response to Question 005:**

SCE objects to "...the following questions will require a recalculation of risk scores and risk-spend efficiencies" on the grounds that new analysis/recalculation is outside the scope of a discovery/data request process.

SCE calculated RSEs at the system level, which is discussed in Section 5.3 of our 2020-2022 WMP, and has not done so at a more granular level than what has been provided.
