F. Specific Data request

In section 5.3.5 on page 5-97, SCE states that “Trees that are determined to potentially threaten electrical facilities and require management are included in SCE’s tree inventory for tracking purposes.” In what time frame for management to be required would a tree qualify to be tracked within the tree inventory?

**Response to Question 060 (SCE-43895-I-375):**

SCE objects to this question as it is vague and ambiguous. Notwithstanding this objection, SCE interprets this question to mean when are identified trees added to inventory for tracking purposes and responds as follows. SCE adds trees to its inventory upon discovery.
