Review of 2020 Wildfire Mitigation Plans Pursuant to PUC Sections 8386 and 8386.3***

DATA REQUEST SET W S D - S C E - 0 0 2

To: WSD
Prepared by: Tom Rolinski
Job Title: Fire Scientist
Received Date: 3/5/2020

Response Date: 3/10/2020

Question 014 (SCE-43895-D-302):

A. Item Index [For CPUC tracking purposes. Please reference this item index with the response provided.]

SCE-43895-D-302

B. Request Type

Request for additional specificity or clarification regarding information submitted in WMP or maturity survey

C. Relevant section of WMP (if applicable)

5.3.2 Situation Awareness and Forecasting

D. Relevant question in Maturity Survey (if applicable)

NA

E. Relevant meeting or call (if applicable)

NA

F. Specific Data request

On page 5-55, SCE states that it will support full integration of all weather and fuel model products, full redundancy capability, and the development of a 40-year historical weather and fuels dataset. On page 5-54, SCE refers to a current historical data set of 40 years. In these two cases is SCE referring to the same weather data set? If so, explain if the 40-year data set is the set currently being used by SCE or if that 40-year data set is still in development.

Response to Question 014 (SCE-43895-D-302):

The 40-year dataset that is referenced on pages 5-54 and 5-55 is the same. On page 5-55, SCE is referring to the development of the 40-year historical dataset (which is currently in development). On page 5-54, SCE is referring to adding additional years to that same dataset as more data becomes available.
