**Response to Question 004- SCE-43900-Z -629:**

SCE is currently on track to provide the remaining data layers by March 31, as described in our 2020-2022 WMP. On Friday, March 13, 2020, SCE held a call with CAL FIRE and the CPUC, at their request, to discuss the remaining data layers and steps SCE is working through to gather, organize, and process the remaining data layers. SCE appreciated the discussion and ability to describe the work it takes to get at and compile the remaining data layers. SCE understands that both CAL FIRE and the CPUC were also appreciative of the dialogue and supports the process SCE has to undertake to complete the remaining data layers in order to provide as much information as SCE has in its systems in a manner consistent with the requirements in the WMP Guidelines.
