Response to Question 001- SCE-43900-Z -626:

The attached file geodatabase is a resubmittal from the February 27th data request showing PSPS damage locations with hyperlinked photos. ESRI limitations limit one picture per feature so where there are multiple pictures for a structure there will be multiple points. Geodatabase contains the point feature class and the PSPS damage photos.

File geodatabase name: PSPS_Damage_Detail_NonConfidential.gdb

GIS Feature class name: PSPS_Damages_NonConfidential
