Question 03:

- a) Is SCE currently planning or implementing any remote grid programs as a wildfire risk mitigation?
- b) If yes, please describe these initiatives.

Response to Question 03:

SCE is not currently planning or implementing a remote grid site for the specific purpose of wildfire mitigation. SCE is planning a pilot remote grid program where the targeted location(s) are specifically for restoration of service that has been disrupted. It is possible that future remote grid sites may be implemented for the purpose of wildfire risk mitigation, but specific sites are not in the planning phase.
