Question 01.a:

Regarding Weather Station Totals

- a. SCE states on pg. 381 that they have over 1,450 weather stations capable of relaying 30-second, real time reads. SCE states on pg. 415 that there are 1,947 weather stations within SCE's service territory utilizing a machine learning forecast system based on public weather model data, 1,624 weather station locations utilizing machine learning, 1,483 weather station locations leveraging the SCE ensemble forecasts as inputs. SCE states on pg. 422 that they have a network of 1,780+ weather stations.
- Provide the total number of weather stations capable of relaying 30-second, real time reads.
 - Provide the total number of weather stations owned, operated, and maintained by SCE.

Response to Question 01.a:

- At the conclusion of 2024, SCE owned 1,446 weather stations capable of relaying 30-second, real time reads. As part of SCE's non-substantive errata submission, SCE plans to correct the language indicating that SCE has "over 1,450" weather stations capable of relaying 30-second, real time reads to "approximately 1,450" such weather stations.
- At end of 2024, SCE owned, operated and maintained 1,787 weather stations.
