

We Will Be in Your Neighborhood to Upgrade Our Equipment

January 29, 2026

Dear Neighbor,

As part of our emergency restoration efforts (due to a broken city water main) and long-term plan to modernize the energy grid, Southern California Edison (SCE) will be making upgrades in the City of Beverly Hills. This work involves the removal of substation equipment that has been damaged beyond repair. During this time, you may experience potential noise, increased presence of crews and trucks, temporary alleyway closures, and pedestrian traffic control in the area. We appreciate your patience as we work to strengthen and improve the reliability of your local energy service.

Why are we performing this work?

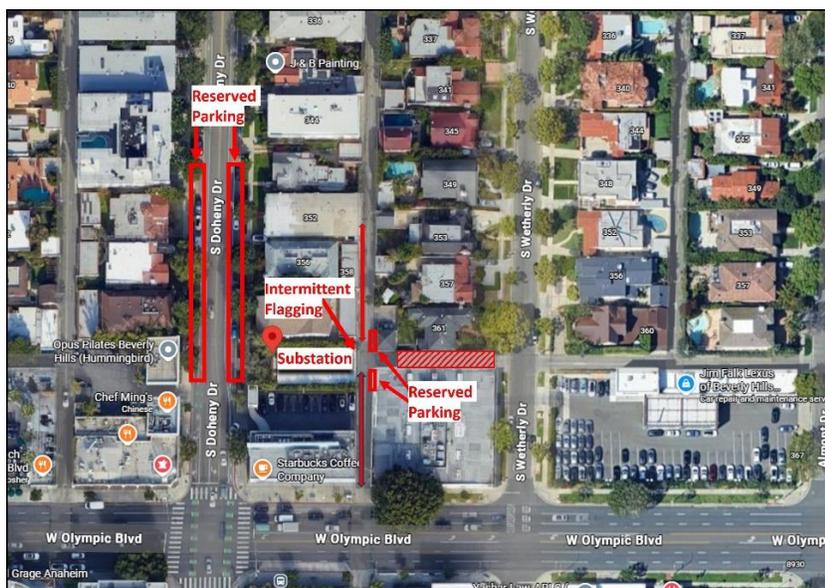

Our priority is to make sure you have access to safe, reliable energy into the future. Upgrading our equipment will help improve power quality for the community, make the system more resilient and reliable and prepare the grid for future growth. We understand this work may impact you, and we will do everything we can to minimize any inconvenience.

When is the work scheduled to occur?

- The project is estimated to last from January 2026 to May 2026.
- Primary workdays: Weekdays
- Standard Daytime Work Hours: Work will primarily occur between 7 a.m. – 5 p.m.
- Additional possible work periods: Evenings, select weekends and holidays (as needed).

Where is the work area?

The work area is outlined in the map below.

We Will Be in Your Neighborhood to Upgrade Our Equipment (continued)

Who will do the work?

SCE and our approved contractor will do the maintenance work. SCE vehicles will display the SCE logo. All workers will have identification badges.

What to expect:

- For crew safety, we may schedule temporary maintenance outages during construction. Multiple outages may be required to complete the work. We will notify you by phone, text, email, or mail at least 72 hours prior to scheduled outages.
- Work crews may require access to electrical equipment on your property. Unless they notice an immediate safety concern, we will attempt to notify you before entering your property.
- To ensure your safety during construction, there may be traffic lane and sidewalk closures, as well as designated “No Parking” areas. There may also be street closures and detours, depending on permit requirements. Crews will use appropriate traffic control signs and flags.
- We will notify you of construction work by providing additional communications, such as door hangers, traffic signs, and/or parking signs.
- To minimize traffic and outage impacts, some work will be conducted during permitted nighttime hours.
- There may be noise related to construction work.
- Crews may have to dig, trim, or remove trees and other plant material to safely access equipment.

How to prepare:

Log into your SCE My Account and visit the Customer Preference Center at sce.com/mysce/preference-center to set your outage notification preferences. You can choose to receive notifications via text, email, or voice. Also, review your contact information to make sure it's correct, and update it as needed.

To learn more about outage preparedness, check your outage status, access additional resources, and view an outage map, visit sce.com/outagemap. If you experience an extended outage, you may be able to take advantage of special programs. For details, visit sce.com/customerresources.

Thank you for your patience and understanding as we work on grid improvements to continually provide you with safe, reliable energy. Sincerely,

SCE Outage Communication Team
Southern California Edison
