

## Get the Benefits of SCE's E-Summary Billing for Multiple Accounts

*Receive invoices more quickly, reduce or eliminate late fees, and ensure greater security with access to statements through a secure portal.*

If you are already a summary-billed customer (meaning you have two or more service accounts on the same bill), you can elect to receive your monthly statements using **e-summary billing**. This service provides all monthly billing and energy usage information in one spreadsheet, sent each month via a secure SharePoint site.

E-summary billing provides a convenient option for customers with hundreds or thousands of service accounts – and you can enroll some or all of them. Additional features and benefits include:

- Receive prompt notification when statements are available.
- Eliminate lost or delayed receipt of statements.
- Identify statement details by line item and see billing corrections.
- View and download statements securely for six months.
- Lower your costs for document storage and shredding.
- Decrease paper waste and reduce your carbon footprint.

To enroll in e-summary billing, email [EDI@sce.com](mailto:EDI@sce.com) with the following details for each recipient:

- Company/business partner name
- Requestor's first and last name and title
- List of contract account numbers to enroll
- Email address(es) for the monthly link
- Display name (how the recipient will be addressed in monthly messages)

### Additional Electronic Billing Options

SCE also offers **paperless billing** and **Electronic Data Interchange (EDI)**, which enables the exchange of business documents between computers) as options to help you conveniently and efficiently manage your accounts. To learn more, visit our [Business Electronic Billing](#) website page.

## Black History Month: Recognizing Business and Community Partnerships

SCE recently held our 23rd annual Black History Month event, with a theme of "Honoring the Past & Rebuilding for the Future." This year's event focused on providing resources to support our communities and creating a space for meaningful connections. We shared how we are supporting and strengthening the community in response, recovery and rebuilding after the 2025 Southern California wildfires.

We also honored Altadena's history as a Historic Black Community and recognized African American businesses and organizations for their commitment to clean energy, community involvement, diversity, and rebuilding.

Congratulations to the highly deserving 2025 award recipients:

- **Community Partnership Award:** Everett Glenn, CEO and Executive Director of Business of Student Success (BOSS)
- **Community Impact Award:** Jonathan DeCuir, Executive Pastor of Victory Bible Church
- **Clean Energy Champion Award:** Debra Williams, Founder and CEO of Building Resilient Communities
- **Gwen Moore Diversity Award:** Former California State Senator Steven Bradford
