

ENERGY EDUCATION CENTER IRWINDALE'S SMART ENERGY EXPERIENCE[®]

Discover how smart grid technologies can help better manage your energy use and provide smarter, cleaner, more reliable power.

A Smart Energy Home for Your Future

Imagine a home with state-of-the-art resources to help you make the best energy decisions possible, as well as help lower your monthly electricity bills.

At SCE's Energy Education Center – Irwindale, we have a full-scale, operational demonstration home you can visit. Come see how it can help you more effectively manage your energy use and costs while lowering your carbon footprint and reducing demand on the electric grid.

The Smart Energy Experience[®] is an interactive environment that gives you a view of the energy-saving home of tomorrow. Whether you are a homeowner or renter, looking to remodel or upgrade, a builder, architect, contractor or developer, working on your next commercial, residential or institutional project, the Smart Energy Experience[®] has something for everyone.

Learn How the Latest Home Energy Features Work with SCE's Programs

You'll view these exciting technologies that can connect with SCE's energy-saving incentive programs, creating a synergy for increased home efficiency:

- Smart communicating devices
- Home energy management systems
- Small-scale renewable generation (such as solar power)
- Residential Level 2 Electric Vehicle Supply Equipment (EVSE)
- Best practices for sustainable and energy-efficient home design and construction

See, Touch, and Feel What Goes into Building an All-Electric Home

While you're here, take a look at our interactive 3-D, life-size residential high-performance building envelope displays, and see the actual techniques and materials needed to construct high-performance walls and attics. You'll also get a close-up look at energy-efficient equipment:

- Active battery storage
- Heat pump water heater
- Heat pump Heating, Ventilation, and Air Conditioning (HVAC) system
- Heat pump clothes dryer
- Induction cooktop

SMART ENERGY EXPERIENCE®

Discover how smart grid technologies can help better manage your energy use and provide smarter, cleaner, more reliable power.

Location:

Energy Education Center – Irwindale
6090 N. Irwindale Ave.
Irwindale, CA 91702
energyeducationcenter@sce.com

Hours of Operation:

Monday through Friday
9 a.m. to 5 p.m.

Learn How Technology and SCE Programs Work Together to Help You Save

The Smart Energy Experience® demonstrates how real-time energy usage data works with home communicating devices, so you can:

- Access daily cost and billing information
- View near-real-time energy usage data
- Determine how and when you want and need to save energy

During your visit, you'll also learn about energy-saving tips, plans, rate programs, and rebates that help empower you to save energy, costs, and the environment:

- The Clean Fuel Reward rebate program, for purchasing or leasing a new or used electric vehicle
- Bill credits for lowering energy use when electricity demand is relatively high, with SCE's Smart Energy Program, as well as the Summer Discount Plan, our air conditioner compressor cycling program

In addition, SCE's My Account gives our customers access to online energy management information, with features designed to help you save.

Visit Tomorrow's Home Today

Take a guided or self-guided tour of the Smart Energy Experience®, and learn about the latest energy-saving solutions and opportunities.

Our Smart Energy Experience® is just one way we're working to meet your current and future needs, while assisting you in managing your energy use, helping protect the environment, and reducing demand on the electric grid.

Join us for this exciting experience that demonstrates how we're revolutionizing the way we use electricity and creating a clean energy future together.

WE LOOK FORWARD TO SEEING YOU AT SCE'S ENERGY EDUCATION CENTER – IRWINDALE SMART ENERGY EXPERIENCE®.
