Our Commitment to California
Keeping our communities safe from wildfires

Community Meeting for Chatsworth
May 19, 2021
**How to Submit a Question**

- You can submit a question using the Q&A window throughout the session.

- If there is a similar question already being asked that you would like answered, you can click on the heart icon next to the question to “like” it.

- Please only submit questions that are relevant to the presentation and topics being presented.
SCE Presenters

David Ford
Government Relations Manager
Local Public Affairs

Greg Ferree
Vice President
Distribution

Rob Tucker
Principal Manager
Transmission & Distribution

Mike Bushey
Director
Customer Service
AGENDA

• 2020 Wildfire Season
• SCE’s Wildfire Mitigation Plan
• Public Safety Power Shutoffs
• Reducing the Need for PSPS
• Customer Care Programs
• Engaging Our Communities
• Resources
• Q&A
READY!
Create and maintain defensible space and harden your home against flying embers.

SET!
Prepare your family and home ahead of time for the possibility of having to evacuate.

GO!
Take the evacuation steps necessary to give your family and home the best chance of surviving a wildfire.

For more information: fire.lacounty.gov/rsg
Alert LA County: alert.lacounty.gov
California’s wildfires in 2020 were the worst on record, with dry vegetation and strong winds threatening our communities during an unprecedented fire season.

5 OF THE 6 LARGEST CALIFORNIA WILDFIRES HAVE HAPPENED IN 2020*

SCE’s PSPS Execution

• To reduce the threat of wildfires, SCE implemented Public Safety Power Shutoffs (PSPS) that impacted about 138,000 customers, with some customers experiencing multiple PSPS outages.

• We understand the significant impact that PSPS has on communities, especially during a pandemic when many people are working and learning from home.

• PSPS is used as a tool of last resort to protect public safety under dangerous fire weather conditions.

• We are working to reduce the impact of PSPS and are continuing to strengthen the electric grid to become more resilient in the face of extreme weather events.
Our Wildfire Mitigation Plan

Grid Hardening
Improving the electrical system to make the grid more resilient in high fire risk areas, improving reliability and reducing wildfire risk

Situational Awareness
Using a dense network of weather stations and wildfire cameras to monitor location-specific, real-time conditions that help inform operational decision-making

High Risk Fire Inspections
Annually inspect equipment in high fire risk areas for any needed maintenance, repair or replacement, prioritizing the highest-risk structures

Vegetation Management
Annually inspect, trim and remove trees to prevent vegetation from coming into contact with electrical equipment and potentially sparking a fire

Public Safety Power Shutoffs
Tool of last resort to protect our communities from the threat of wildfire, where we temporarily shut off power to prevent our electric system from becoming the source of an ignition

safetrees@sce.com
PSPS Decision Points

Decision points include, but are not limited to:

- National Weather Service Red Flag Warnings
- SCE meteorologists forecast strong wind conditions in service area
- SCE fire scientist assessment of fire potential to include consideration of weather and fuels
- Real-time observations from qualified electrical workers monitoring for hazardous conditions in the field
- Impact of de-energizing circuits on first responders and essential services
Our PSPS Action Plan

We are implementing a plan to reduce the impact of PSPS to our customers and communities

Reducing the Need for PSPS
- Expediting grid hardening and other measures

Executing PSPS More Effectively
- Making decision-making process transparent, improving communications and notifications

Reducing the Impacts of PSPS
- Increasing customer and community resiliency

Keeping Partners and Customers Informed
- Educating and engaging our communities and stakeholders

Enhancing Post-Event Reporting
- Improving our post-event reports to make them more transparent and clearer
REDUCING THE NEED FOR PSPS

• We are putting specific emphasis on those circuits most frequently impacted by PSPS while continuing work on other circuits subject to PSPS

• Grid hardening make circuits more resilient in the face of extreme weather events and reduce the scope, frequency and duration of future PSPS events
# Tools to Reduce Need for PSPS

<table>
<thead>
<tr>
<th>Insulated Wires</th>
<th>Segmentation</th>
<th>Weather Stations</th>
<th>Switching Protocols</th>
<th>Operational Protocols</th>
</tr>
</thead>
<tbody>
<tr>
<td>Targeted replacement of bare wire with insulated wires (covered conductor) to be able to safely raise windspeed thresholds for PSPS</td>
<td>Installing additional automated devices to further isolate and reduce the number of customers that have to be de-energized per circuit</td>
<td>Adding new weather stations to improve situational awareness and increase accuracy of PSPS operations – so only those circuits facing danger are in scope</td>
<td>Continuing to develop circuit-specific protocols to move customers to nearby circuits not impacted by PSPS, to reduce the number of customers remaining on an affected circuit</td>
<td>Up-to-date information on ground conditions, such as lack of vegetation, recent burn scars, and location of poles and wires are considered to assess wildfire threat and the need for PSPS</td>
</tr>
</tbody>
</table>
Why Does My Neighbor Have Power and I Don’t?

The location of your home or business on a circuit and the area of severe weather relative to your local substation are important factors in determining whether or not you are impacted by a Public Safety Power Shutoff (PSPS).

**Neighborhood with power shut off due to PSPS**
- Wires originate in windy area with high fire risk

**Neighborhood keeps power during PSPS**
- Wires originate in area with lower fire risk
Planned Work:
- Replace 15.2 miles of existing overhead wire with new insulated wire
- Install 3 automated switches and implement additional segmentation
- Add temporary generator to serve approx. 120 customers during a PSPS event with minimal outages

Expected Improvements:
- **77% reduction** in customer outage time, assuming the same weather conditions in 2020
Notifications

- SCE provides PSPS notifications through various communication channels
  - SCE Account Holders (email, text, and voice call)
  - Zip Code
  - NextDoor
- Sign up to stay informed before, during and after a PSPS event

PSPS Outage Map

- Outage status look up is also available on our website
CUSTOMER CARE PROGRAMS

Rebates & Programs

- Fully subsidized Critical Care Backup Battery Program
  - Eligible Medical Baseline customers*
- $50 rebate for portable batteries (small device battery backup)
- $300 & $500 portable generator rebates for well water dependent customers
- Self-Generation Incentive Program (SGIP)

Care During Outages

- Community Crew Vehicles and Community Resource Centers
  - Information & Customer Support
  - Resiliency Kits
  - Hotel discounts

Community Resiliency

- Resiliency zones targeting essential services in rural communities providing back-up generation during PSPS
- Community partnerships

*Income-qualified Medical Baseline customers living in high-risk fire areas
HELPING PROTECT COMMUNITIES

• SCE supports the readiness of fire agencies

• SCE’s partnership with the LA County Fire Department, Orange County Fire Authority, and Ventura County Fire Department, will bring three fire-suppression helicopters to help combat wildfires across SCE’s service area
ENGAGING OUR COMMUNITIES

• Customer education and community outreach
  • Use of digital, social media, media and radio channels
  • Community meetings for impacted communities
  • Annual PSPS newsletter to all customers
  • Engage our most vulnerable customers
  • Partner with community-based organizations to support resiliency and emergency preparedness

• Ongoing engagement with government officials, public safety partners, essential service providers and other stakeholders

LEARN MORE
- Visit our website to learn more about our wildfire safety efforts and Public Safety Power Shutoffs (PSPS)
- Provide feedback through the survey

SIGN UP
- PSPS alerts
- SCE’s Medical Baseline program
- SCE programs and rebates

BE PREPARED
- Be prepared with a safety preparedness plan, some basic supplies and advance planning
- Power outage tips
