Key Requirements	Charging Equipment Operational Duration	Minimum of 10 Years	Minimum of 10 Years	Minimum of 10 Years	Minimum of 10 Years	Minimum of 10 Years
	TOU Rate and Demand Response Program Enrollment	Required	Required	Required	Required	Required
	Separate Meeting	Required	Required	Strongly Recommended	Required	Required
	Charging Equipment Network Communications	Required	Required	Required	Required	Required

\*L2 Chargers run on a 220-volt outlet delivering 12-80 miles of charge per hour, an order of magnitude faster than an L1 charger.

L1 Chargers typically plug into a household 120-volt outlet and take quite a bit of time to charge the battery. Used primarily for Plug-In Hybrid vehicles. DCFC equipment is typically delivered at 480 volts.

Rebate amounts are limited and dependent on remaining funding available in the program. \*Maintenance and Networking Rebate values are not guaranteed. Rebates are subject to change at any time based on funding availability.
