Public Safety Power Shutoffs

Your safety is our highest priority. Severe weather events continue to increase wildfire risk across Southern California.

When fire weather conditions put communities at risk, we may need to temporarily shut off power to protect your safety through a Public Safety Power Shutoff (PSPS). This important safety tool helps reduce the risk of fires caused by utility equipment.

We understand the hardship that power outages can create, and remain committed to helping you stay safe, prepared and informed.

How to Prepare: Update your contact information or sign up for PSPS alerts in English and other languages at www.sce.com/pspalerts.

Learn more about PSPS, including answers to common questions and emergency preparedness at www.sce.com/psps.

Be Prepared for Outage Emergencies

Homes and small businesses in PSPS-affected areas should consider adding a portable backup battery or portable generator into their emergency preparedness strategies. These devices can supply backup power for essential personal electronics, such as mobile phones and computers, as well as critical household appliances including refrigerators, lighting, garage door openers and medical equipment, helping you stay prepared during outages. Rebates are available for qualifying products.

Watch our backup power educational videos, learn more about available solutions and apply for rebates in the SCE Marketplace at www.sce.com/backuppower.

To learn more about the process and method the California Public Utilities Commission used to determine High Fire Threat District maps, visit:

Budget Your Electricity Bill with the Budget Billing Plan (was Level Pay Plan)

Are your electric bills higher in the summer? Do these higher bills stretch your budget? Sign up for SCE's Budget Billing Plan (BBP), which allows you to spread high summer and/or winter bills over an entire year in eleven (11) equal monthly payments (on the 12th month, you will receive a settlement bill showing either a payment due or a credit balance). To learn more go to:

Bill Payment > Ways to Save at

www.sce.com/customer-service-center

If you'd like to enroll, please call **1-800-434-2365**. BBP is based on eligibility and some restrictions may apply. Once enrolled, you must pay your bills monthly by the due date to remain eligible for the program.

Get Help If You Use Medical Equipment

If you or someone in your household requires the regular use of electrically-powered medical equipment, including but not limited to power wheelchairs, scooters, respirators, breathing machines or other qualifying medical devices, you may be eligible for our Medical Baseline Allowance program which:

- ◆ Provides an additional allotment of 16.5-kilowatt hours (kWh) of electricity per day on your monthly bill which can help offset the cost of operating the medical equipment, and
- ◆ Prioritizes your household to get critical alerts and notifications if outages occur, including Public Safety Power Shutoffs.

To apply, you will need the signature of a licensed medical professional. * If you apply online, you can enter your medical professional's email address and we will contact them for an electronic signature approval. Please let them know they will receive an email from SCE.

To learn more about eligibility requirements or if you have questions about medical equipment or criteria, visit www.sce.com/mbi or call **1-800-655-4555**. Application forms are available in several languages online and alternative formats (such as large print and braille) upon request.

NOTE: We will evaluate the eligibility of the device on your application if it is not listed on www.sce.com/mbi. Medical devices used for therapy but not medically required for sustaining life do not qualify for this program.

* Includes Medical Doctor (MD), Doctor of Osteopathy (DO), Physician Assistant (PA) or Nurse Practitioner (NP)

Proposition 65 Warnings

WARNING: The Safe Drinking Water and Toxic Enforcement Act of 1986, commonly referred to as Proposition 65, requires the governor to publish a list of chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. It also requires California businesses to warn the public of potential exposures to these chemicals that result from their operations.

Providing safe and reliable service to all of our customers is a top priority for Southern California Edison and we want you to be aware of these chemicals so that you can reduce exposure to chemicals associated with electricity generation and distribution. We handle all equipment and materials at our sites carefully for your good health as well as ours. However, if you are at or near our facilities and work sites, you can be exposed to the following chemicals on the state's Proposition 65 list. Reduce, limit, or avoid activities at and near the sources of exposure described below. For more information go to:

www.P65Warnings.ca.gov

1. Diesel Generation : Diesel Exhaust: SCE uses diesel-fueled emergency generators during emergencies and other times to help minimize the interruption of our customers' supply of electricity. The generators are used at some SCE facilities like substations and service centers, and at locations where repairs are made to the electrical system. SCE also uses diesel as the primary fuel for electricity generation on Catalina Island and in many service vehicles used throughout our service territory. Diesel engines produce exhaust as a by-product of the combustion of diesel fuel. Breathing diesel engine exhaust exposes you to chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. You should avoid breathing diesel fumes whenever possible.

2. Wooden Utility Poles : SCE uses wooden poles that have been treated with chemical preservatives. These chemicals include pentachlorophenol, which is known to the State of California to cause cancer, and petroleum products such as diesel fuel, which contains chemicals including toluene and benzene that are known to the State of California to cause cancer and birth defects or other reproductive harm. If you come into contact with a wooden utility pole or the dust, debris, soil surrounding the pole, or water runoff that may contain dust, debris, and soil previously in contact with the pole, you could be exposed to these chemicals. Avoid contact with wooden utility poles and the dust, debris, soil surrounding the poles, or water runoff that may contain dust, debris, and soil previously in contact with the poles.

3. Painted Structures : SCE utilizes metal and wood structures and equipment that may have been coated with paints containing chemicals, such as lead-based paint, that are known to the State of California to cause cancer and birth defects or other reproductive harm. When the paint on these structures deteriorates, flakes of paint can impact the soil adjacent to the structure. To avoid exposure, you should avoid contact with any paint flakes or soil near any structure with deteriorating paint.

Safe Portable Generator Hook-Up

Connecting a portable generator to your home's electrical wiring is dangerous and can cause serious injuries or electrocution.

Do not hook up a generator directly to an electrical panel. The safe way is to plug the electrical equipment into a portable generator using a properly sized extension cord approved by Underwriters Laboratories (UL).

If your needs require a generator to be wired directly to your home's electrical system, California state law mandates that you notify us. We also recommend that you enlist the service of a qualified electrician to perform the task.
