

RATE SCHEDULES TOU-EV-7, TOU-EV-8, TOU-EV-9

for Business Customers Charging Electric Vehicles

What is a TOU-EV Rate and are you eligible?

Southern California Edison's (SCE) Rate Schedules TOU-EV-7, TOU-EV-8, and TOU-EV-9 are applicable to businesses that separately meter the charging of their electric vehicles.

TOU-EV-7

Is available to customers with charging demands of 20 kilowatts (kW) or less.

TOU-EV-8

Is available for customers with charging demands above 20 to 500 kW.

TOU-EV-9

Is available for customers with charging demands exceeding 500 kW.

Basic Charges

TOU-EV rates have three main charges:

A monthly **customer charge**, which does not vary based on usage. The customer charge is designed to cover the basic costs of providing electric service,

including, but not limited to metering and billing operations.

Time-Of-Use (TOU) energy charges are the cost per kilowatt-hour (kWh) of energy used in each TOU period. TOU periods vary by time of day, day of the week, and season. Learn more at [sce.com/TOU](https://www.sce.com/TOU).

Facilities-Related Demand (FRD) charges apply to the maximum kW demand in each monthly billing cycle. The FRD charge reflects the cost of maintaining infrastructure—transformers, substations, and distribution systems—to meet your peak demand.

Please note that demand charges for TOU-EV-8 and TOU-EV-9 are currently not applicable until determined and authorized by the Commission.

TOU-EV-7 Option D

Option D has a Facilities-Related Demand charge. In exchange for paying demand charges, you will pay lower energy charges per kWh. This option is best suited for customers with consistent high energy demand during peak hours.

RATE SCHEDULES TOU-EV-7, TOU-EV-8, TOU-EV-9

TOU-EV-7 Option E

Option E has no demand charges. In exchange for paying no demand charges, you will pay higher energy charges per kWh. This option is best suited for customers who can shift their energy use to off-peak hours.

Helpful Energy Tip

You can lower your electric bill by using most of your energy—or shifting enough of it—during lower-cost summer Off-Peak hours and winter Super Off-Peak hours.

Rebates and Incentives. You may qualify for several available SCE programs, federal, state, and local funding opportunities or incentives that support the adoption of electric vehicles. For links to resources, go to on.sce.com/chargeready.

Electric Vehicle Load Management. To help you manage your electric vehicle load and costs, there are several load management strategies and technologies available to you. For more information, go to sce.com/TE.

AN ONLINE TOOL TO COMPARE AND SELECT YOUR RATE OPTIONS

We encourage you to use our online **Rate Plan Comparison Tool** to compare your current energy costs to other rate options, including CPP. The rate analysis generated by this tool for your account will help you select the best rate plan for your business. To access the Rate Plan Comparison Tool, please visit

sce.com/ratetool.

Note: The Rate Plan Comparison Tool can only complete rate analyses for accounts with 12 or more months of historical energy data.

This rate sheet is meant to be an aid to understanding SCE's Rate Schedules TOU-EV-7, TOU-EV-8, and TOU-EV-9. It does not replace pricing information contained in the CPUC approved tariffs. Please refer to the tariffs for a complete list of terms and conditions of service, which can be viewed online at sce.com/tariffbooks.
