SCE's APPLICATION FILING

This revenue increase request is referred to as a General Rate Case (GRC), and it covers costs to operate SCE and deliver power to its customers. It does not cover SCE's cost to purchase fuel to operate its generators, or costs to purchase power from other companies. If this request is approved by the CPUC, SCE's revenue requirement will be \$5.885 billion in 2018, a 5.5% increase over the currently authorized amount.

THE KEY REASONS FOR SCE’S PROPOSED INCREASE

The primary reasons for the requested revenue increases are:

1. Electric grid safety;
2. Reinforcing grid reliability, and grid resiliency in case of an emergency;
3. Improving customer service and communication, and offering customers more choices to meet their needs; and
4. Modernizing the electric grid to integrate distributed energy resources without compromising safety and reliability.

WHAT THIS PROPOSED GRC APPLICATION MEANS TO YOU

If the CPUC approves the application, the impact on non-CARE residential customers who use the system-wide average of 600 kWh per month would be about \$3.75 a month in 2018. In 2019, the monthly increase would be about \$5.65 and in 2020 the monthly increase would be about \$7.29. The table below shows the proposed rate increase by customer group:
