INFORMATION ABOUT THIS REQUEST

The CPUC initiated this rulemaking in June 2012 to examine current residential electric rate design and structure. Assembly Bill (AB) 327 was signed into law in October 2013 permitting electric rate reform in California.

On February 28, 2014, SCE filed a request with the CPUC for changes to residential rates starting in 2015 and a roadmap for rate changes through 2018. SCE's request will better align rates with the actual costs of providing electric service as indicated by AB 327. As a result, lower use customers will see increases in their monthly bill and higher use customers will see decreases. This proposal will not change the amount of total revenues collected by SCE, which is determined in other proceedings.

Specifically, SCE is proposing to:

- Transition from its current 4-tiered structure to a 3-tiered structure beginning in 2015, and finally to a 2-tiered structure beginning in 2017.
- Offer simplified optional non-tiered Time-of-Use (TOU) rate options beginning in 2015 to provide greater choice and flexibility. Time-of-use rates are rates that change in price depending on the time and day the energy is being used.
- Increase the monthly service fee from \$0.91 to \$10 per month for Non-CARE customers and from \$0.73 to \$5 for CARE customers.
- Hold the California Alternate Rates for Energy (CARE) discount percentage at the current level of 32%.

Transition customers receiving service on the Family Electric Rates for Energy (FERA) program to a flat 10% discount, resulting in a decrease in the current effective discount of approximately 1% from approximately 11% to 10%. Continue the Medical Baseline program, which provides additional baseline allowance for eligible customers with qualified medical devices.
