In compliance with California Public Utilities Commission (CPUC) decisions, Southern California Edison Company (SCE) has filed an Energy Resource Recovery Account (ERRA) application, which sets forth SCE’s procurement-related operations for the Record Period January 1, 2008 through December 31, 2008. In this application, SCE demonstrates that during the Record Period: (1) its recorded fuel expenses and energy expenses were reasonable, (2) its contract administration, dispatch of generation resources, and related spot market transactions complied with Standard of Conduct Four in SCE’s CPUC-approved procurement plan, and (3) its other operations subject to CPUC review were reasonable.

In addition to presenting SCE’s recorded 2008 costs for review, this application requests approval to recover $35.796 million (including franchise fees and uncollectibles) associated with under-collections in four memorandum accounts authorized by the CPUC: (1) the Department of Energy Litigation Memorandum Account (DOELMA), (2) the Market Redesign and Technology Upgrade Memorandum Account (MRTUMA), (3) the New System Generation Memorandum Account (NSGMA), and (4) the Project Development Division Memorandum Account (PDDMA).

Compared to revenue at present rates as of March 1, 2009, this application requests a revenue increase of $35.796 million, or 0.323% beginning in 2010. If the CPUC approves SCE’s request, an average residential customer using 600 kilowatt-hours per month would see an increase of $0.15 per month, from $81.93 to $82.08. The following table shows an estimate of proposed revenues and rate changes by customer group:

THE CPUC WELCOMES YOUR PARTICIPATION AND COMMENTS

The CPUC may hold evidentiary hearings whereby formal parties of record provide testimony and are subject to cross-examination before a CPUC Administrative Law Judge (ALJ). These hearings are open to the public, but only those who are formal parties of record may participate. The CPUC has its own court reporters who will record the comments of those formal parties of record participating in the evidentiary hearings. After considering all proposals and evidence presented during the formal hearing process, the assigned ALJ will issue a proposed decision. When the CPUC issues a final decision on the application, it may adopt, amend, or modify all or part of the ALJ’s proposed decision as written. The CPUC’s decision may be different than SCE’s request.

The Division of Ratepayer Advocates (DRA) is an independent arm of the CPUC, created by the Legislature, to represent the interests of all utility customers throughout the state to obtain the lowest possible rates for service consistent with reliable and safe service levels.

DRA has a multi-disciplinary staff with expertise in economics, finance, accounting, and engineering.

You may submit written comments to the CPUC’s Public Advisor’s Office at the address or e-mail shown below. Please state that you are writing concerning SCE’s application A.09-04-002. Your comments will become a part of the formal correspondence file for public comment in this proceeding. The Public Advisor’s Office will circulate your comments to the five Commissioners, the ALJ, DRA, and to CPUC staff assigned to this proceeding. You may also write to the CPUC if you need advice on how to participate in this proceeding, or would like to receive further notices regarding the date, time, and place of any hearing on SCE’s application.

As noted above, you may review a copy of this Application and related exhibits at the CPUC’s main office in San Francisco, listed below.

April 2009

Stay On Budget With SCE’s Level Pay Plan

One easy way that SCE can help you simplify your monthly budget is with our Level Pay Plan. This plan allows you to spread higher summer and lower winter bills into equal monthly payments over an entire year.

We calculate your average power usage over the prior 12 months, that dollar amount becomes your new monthly billed usage. Your account is periodically reviewed and your payment may be adjusted during the year, depending on your power usage pattern.

If your average electricity usage increased over the period, your year-end statement will show a balance due. If you used less power, the savings will be credited to your next bill.

Level payment will help you map out your electricity costs ahead of time, and if your usage remains steady, the plan will give you a better handle on your energy budget for the upcoming year.

To enroll, or for complete details and restrictions, please call 1-800-434-2365, or visit www.sce.com/levelpay.
On April 27, 2009, SCE filed an application with the CPUC requesting authorization to incur and recover the costs necessary to pursue the development of three fuel cell installations at various state-owned universities in SCE’s service territory (Fuel Cell Program). The sites selected by SCE to participate in its program are the California State University at San Bernardino (CSUSB), the California State University at Long Beach (CSULB), and the University of California at Santa Barbara (UCSB). Both CSUSB and CSULB will each host a fuel cell installation with associated cogeneration facilities and an electrical output rating greater than one megawatt (MW), and UCSB will host a highly efficient electric power output only fuel cell installation rated at 200 kilowatts (kW). Locating the power plants “on-site” at institutions of higher learning will provide benefits of locally generated electrical and thermal energy, and will also provide an educational platform for the universities to help develop an educated workforce, and increase the public’s familiarity with this advanced, environmentally friendly technology.

SCE expects to incur approximately $21.6 million in direct capital expenditures and $8.9 million in non-fuel related operation and maintenance (O&M) expenses over the 10-year life of the fuel cells. These costs represent the expenses required to acquire, install, and maintain the fuel cells at the three host sites. However, SCE is proposing to fund 50% of the of the Fuel Cell Program’s estimated capital cost by using approximately $10.8 million of unspent and uncommitted funds that are currently recorded in the Program’s estimated capital cost by using approximately $10.8 million.

The CPUC may hold evidentiary hearings whereby formal parties of record may participate. The CPUC may also issue a summary decision on the application, it may adopt, amend, or modify all or part of the decision. When the CPUC issues a final decision on the application, it may adopt, amend, or modify all or part of the ALJ’s proposed decision as written. The CPUC’s decision may be different than SCE’s request.
