Health and Safety Tips for Temperature-Sensitive Customers

Extreme hot or cold weather may be harmful to people who are temperature-sensitive or those who are in poor health. Here are steps you can take to avoid heat- or cold-related illness:

To help you stay cool in hot weather
- Take a cool shower or bath.
- Wear lightweight, loose, light-colored clothing and a head covering.
- Stay out of direct sunlight and limit outdoor activity to covered or shaded areas.
- Drink plenty of water to stay hydrated.
- Visit a movie theatre, an air-conditioned mall, a library or a community center.
- Visit friends or family whose homes are air-conditioned and are located in areas not affected by a rotating outage or severe weather.

How to warm up in cold weather
- Wear a head covering, as the head is the greatest source heat loss from the body.
- Keep extra blankets on hand.
- A portable heater can be used to heat small areas. If you choose to use a portable heater, select one that is certified by a nationally recognized testing lab and one that has a tip-over switch.
- Plug portable heaters directly into electrical wall outlets, and keep them at least three feet away from curtains, chairs, beds, furniture, walls, or other flammable items.

For your safety and those around you, do not use a cooking stove or oven to heat your home, and never use a barbeque, patio heater or hibachi indoors.

What To Do During Rotating Outages
Plan ahead! To learn which rotating group you or your friends and family members are assigned to, or to learn if there is a current rotating outage in your area, visit www.sce.com/planahead and click on Advanced Notification Form, found on the right side of the Web page under Helpful Links. Or, call 1-800-655-4555 to obtain a listing of Cooling Stations in your area.

Advanced Notification of a Rotating Outage
When possible, SCE will provide advanced notice of a rotating outage via an automated telephone message to residential customers, or to someone in a customer's household who files an application certifying that his or her health is at risk when they are exposed to extreme temperatures.

Note: If you already participate in SCE's Medical Baseline program you do not need to complete this application form. Medical Baseline participants receive advanced notification, whenever possible, of rotating power outages that may affect them.

To sign up for advanced notification, download the application at www.sce.com/planahead and click on Advanced Notification Form, found on the right side of the Web page under Helpful Links. Or, call 1-800-655-4555 to request an application.

Return the completed application to:
Southern California Edison
Temperature-Sensitive Customer Representative
P. O. Box 6400
Rancho Cucamonga, CA 91729

Upon receipt of your application, SCE will place your name on a calling list to receive advanced notice, whenever practical, if a rotating outage is anticipated in your area. This service will be provided to you at no cost.

Stay On Budget With SCE's Level Pay Plan
One easy way that SCE can help you simplify your monthly budget is with our Level Pay Plan. This plan allows you to spread higher summer and lower winter bills into equal monthly payments over an entire year.

We calculate your average power usage over the prior 12 months. Based on current rates, that dollar amount becomes your new monthly billed usage. Your account is periodically reviewed and your payment may be adjusted during the year, depending on your power usage pattern.

If your average electricity usage increased over the period, your year-end statement will show a balance due. If you used less power, the savings will be credited to your next bill.

Level payment will help you map out your electricity costs ahead of time, and if your usage remains steady, the plan will give you a better handle on your energy budget for the upcoming year.

To enroll, or for complete details and restrictions, please call 1-800-434-2365, or visit www.sce.com/levelpay.

Looking Out For Your Meter Reader
Monthly meter readings help ensure an accurate reading of your electric bill. And with your cooperation, our meter readers can complete their jobs quickly and safely.

Keep the area around your electric meter clear of safety hazards such as debris, toys, hoses, gardening tools, equipment, and overgrown vegetation, as well as bee and wasp nests. Eliminating these hazards will help protect your household members as well as our employees.

Please confine dogs and grant meter readers safe access to your property on the date listed on the first page of your electric bill. Even friendly dogs may become defensive toward strangers and attack the meter reader.

If you cannot accommodate our employee with safe access on your meter reading date, please call SCE at 1-800-655-4555 to make other arrangements. Learn more at www.sce.com/meterreader.
On April 27, 2009, SCE filed an application with the CPUC requesting authorization to incur and recover the costs necessary to pursue the development of three fuel cell installations at various state-owned universities in SCE’s service territory (Fuel Cell Program). The sites selected by SCE to participate in its program are the California State University at San Bernardino (CSUSB), the California State University at Long Beach (CSULB), and the University of California at Santa Barbara (UCSB). Both CSUSB and CSULB will each host a fuel cell installation with associated cogeneration facilities and an electrical output rating greater than one megawatt (MW), and UCSB will host a highly efficient electric power output only fuel cell installation rated at 200 kilowatts (kW). Locating the power plants “on-site” at institutions of higher learning will provide benefits of locally generated electrical and thermal energy, and will also provide an educational platform for the universities to help develop an educated workforce, and increase the public’s familiarity with this advanced, environmentally friendly technology.

SCE expects to incur approximately $21.6 million in direct capital expenditures and $8.9 million in non-fuel related operation and maintenance (O&M) expenses over the 10-year life of the fuel cells. These costs represent the expenses required to acquire, install, and maintain the fuel cells at the three host sites. However, SCE is proposing to fund 50% of the of the Fuel Cell Program’s estimated capital cost by using approximately $10.8 million of unspent and uncommitted funds that are currently recorded in the existing Self Generation Program Incremental Cost Memorandum Account (SGPICMA). SCE’s proposal to recover the remaining $10.8 million of capital costs and O&M expenses associated with the Fuel Cell Program is detailed in its supporting testimony.

If the CPUC approves SCE’s request, it would result in an increase that is less than 1% of SCE’s total revenue (the total amount of money customers pay in a year for the electric services they receive). An average residential customer using 600 kilowatt-hours per month would see an increase of $0.02 per month, from $77.72 to $77.74, or 0.026%. The recovery of these costs is expected to begin 2010. The following table shows an estimate of proposed rate changes by customer group:

<table>
<thead>
<tr>
<th>Customer Group</th>
<th>Present Rates ¢/kWh</th>
<th>Proposed Rates ¢/kWh</th>
</tr>

THE CPUC WELCOMES YOUR PARTICIPATION AND COMMENTS

The CPUC may hold evidentiary hearings whereby formal parties of record provide testimony and are subject to cross-examination before a CPUC Administrative Law Judge (ALJ). These hearings are open to the public, but only those who are formal parties of record may participate. The CPUC has its own court reporters who will record the comments of those formal parties of record participating in the evidentiary hearings. After considering all proposals and evidence presented during the formal hearing process, the assigned ALJ will issue a proposed decision. When the CPUC issues a final decision on the application, it may adopt, amend, or modify all or part of the ALJ’s proposed decision as written. The CPUC’s decision may be different than SCE’s request.

The Division of Ratepayer Advocates (DRA) is an independent arm of the CPUC, created by the Legislature to represent the interests of all utility customers throughout the state to obtain the lowest possible rates for service consistent with reliable and safe service levels. DRA has a multi-disciplinary staff with expertise in economics, finance, accounting, and engineering.

You may submit written comments to the CPUC’s Public Advisor’s Office at the address or e-mail shown below. Please state that you are writing concerning SCE’s application A.09-04-002. Your comments will become a part of the formal correspondence file for public comment in this proceeding. The Public Advisor’s Office will circulate your comments to the five Commissioners, the ALJ, DRA, and to CPUC staff assigned to this proceeding. You may also write to the CPUC if you need advice on how to participate in this proceeding, or would like to receive further notices regarding the date, time, and place of any hearing on SCE’s application. You may also review a copy of this Application and related exhibits at SCE’s corporate headquarters (2244 Walnut Grove Avenue, Rosemead, CA 91770). Finally, you may also review a copy of this Application and related exhibits at the CPUC’s main office in San Francisco, listed below.
