**NOTICE OF APPLICATION SOUTHERN CALIFORNIA EDISON
COMPANY'S REQUEST TO INCREASE ELECTRIC RATES
APPLICATION A.22-09-014**

Why am I receiving this notice?

On September 28, 2022, Southern California Edison Company (SCE) filed its third securitization application with the California Public Utilities Commission (CPUC), proposing to finance up to \$772.432 million for costs related to wildfire mitigation.

If the CPUC approves this application, the securitization transaction will allow SCE to recover these costs and expenses at a lower rate to customers than through traditional utility financing. SCE intends to recover this amount through forecasted costs in electric rates over a 25-year period beginning January 1, 2023. This will result in an annual revenue requirement of \$62.858 million for 2023 through the issuance of recovery bonds. This will impact your monthly bill.

Why is SCE requesting this rate increase?

The California legislature approved Assembly Bill 1054 (AB 1054) authorizing issuance of recovery bonds to fund certain fire risk mitigation costs and associated financing costs. In accordance with AB 1054, SCE is further enhancing and expanding efforts to reduce wildfire risk as part of a multiyear strategy, focused on reducing the potential for fires to be started by electrical equipment and reducing the potential for fires to spread. Financing these costs with recovery bonds reduces the customer rate increase compared to traditional utility ratemaking.

How could this affect my monthly electric rates?

If SCE's proposed rate increase is approved, an average residential electric non-CARE customer using 500 kWh per month would see a bill increase of \$0.48 per month (0.3%), from \$149.02 to \$149.50. The average residential CARE customer using 500 kWh per month would see a bill increase of \$0.32 per month (0.3%), from \$100.83 to \$101.15.
