

Renewable Electrical Generating Facilities (Generating Facility) that are sized larger than a customer's electrical requirements are not eligible for Net Energy Metering (NEM) as described in [Schedule NEM](#). A Generating Facility is considered oversized when its estimated annual production (in kWh) exceeds the customer's past 12 months of usage (in kWh).

When a Generating Facility appears to be oversized or in cases for which an account does not have 12 months of usage history, SCE customers can complete this form to certify that their Generating Facility is sized appropriately and in accordance with SCE's NEM tariffs. To proceed with your Interconnection Request, please review the section below.

By signing below, I (Customer) certify that:

I have compared the estimated annual production of my Generating Facility¹ with my most recent 12-month usage history². I am aware that my Generating Facility is expected to produce more energy than I used in the last 12 months.

- OR -

I do not have 12 months of usage history and I have compared the estimated annual production of my Generating Facility to the standard utilized by SCE of 2 Watts / sq. ft. I am aware that the estimated annual production of my Generating Facility exceeds this calculated value.

I affirm that I expect to increase my usage accordingly in the upcoming year. My Generating Facility was sized to meet this expected increase. I understand that SCE reserves the right to further validate that my Generating Facility is sized in accordance with the NEM tariff.

¹ The calculation used to estimate annual production for solar Generating Facilities is as follows:
(CEC Nameplate kW) x 720 hrs. / month x 12 months / year x 0.20 capacity factor.
For wind and fuel cell technologies, or more details, please see the [SCE NEM Handbook](#).

² To obtain your most recent 12 months of usage history, please login to your SCE.com account and click on 'MyAccount', or call (866) 701-7868 or (800) 655-4555.
