

# Monitor, Analyze, and Manage Your Company's Energy Usage

SCE EnergyManager<sup>®</sup> is a powerful web-based application that helps you monitor, analyze, and report your company's energy usage. With the knowledge and insight gained, you have the means to more effectively manage your energy costs.

## Energy Management as Cost Management

Businesses today are responsible for the efficient use of energy resources while reducing impact on the environment and on the bottom line. Energy can comprise a significant portion of your operating costs. Careful monitoring, recording, and reporting of energy usage is the foundation for all levels of an organization to understand how to better manage energy resources, and ultimately, how to better manage costs.

The reporting functions within SCE EnergyManager help provide you with key information<sup>1</sup> such as:

- Summary of minimum, maximum, and average energy usage
- Energy usage and load peak in 15-minute intervals
- 10-Day Average Baseline usage
- Estimated costs for previous day's usage
- Comparison of usage between time periods
- Comparison of usage between service accounts
- Detailed cost and usage breakdown from bills
- Comparison of billing charges on current rate or tariff plan versus another plan
- Ability to export billing data to a spreadsheet

SCE EnergyManager<sup>®</sup> is offered as three modules:

- SCE EnergyManager Basic<sup>®</sup>
- SCE Cost Manager<sup>®</sup>
- SCE Bill Manager<sup>®</sup>

SCE EnergyManager®

# Monitor, Analyze, and Manage Your Company's Energy Usage

## Better Intelligence for a Challenging Environment

Cost management. Profitability. Sustainability. Businesses face challenges from multiple stakeholders who want to be sure the organization is running efficiently and optimizing output, while being environmentally and socially responsible.

SCE EnergyManager tools help facilitate the collection and organization of information to answer your vital questions.

- When is my company using the most or least electricity?
- Can we shift our usage to periods with lower rates to avoid peak pricing?
- Are we following our energy reduction strategies?
- Are we consistently using less energy than in previous months or years?

## Technical and Eligibility Requirements

### For Medium or Large Businesses with an Assigned SCE Account Manager/Representative

- Internet access
- Must have an SCE-approved meter capable of recording usage at 15-minute intervals
- Registration in SCE My Account is required

## SCE EnergyManager Analysis and Reporting Features

Previous Day Data (Included)	
Usage data available next day	✓
Current and historical monthly bill data	✓
View data in charts, graphs, and tables	✓
Save customized, frequently-accessed reports	✓
Trend data — identify highs and lows	✓
Aggregation of multiple service accounts	✓
Variance analysis	✓
Benchmark facility cost and usage	✓
Energy cost estimation*	✓
Rate comparisons	✓
Download data to Excel file	✓
Access PDFs of monthly bills (up to 48 months)	✓
Same Day Data (Additional fees apply)	
Hourly usage data	\$60/month per enrolled account
Quarter-hourly usage data	\$100/month per enrolled account

\* Some cost information/reporting functionality is not available for all accounts and may require a specific type of meter.

For more information, contact your Account Manager or call the SCE EnergyManager Help Desk at **1-888-462-7078**. Visit us online at **sce.com/energymanager**.

This fact sheet is meant to be an aid in understanding the SCE EnergyManager® suite of tools. Please refer to Schedule CC-DSF, under SCE's Tariff Books. Energy cost estimates, rate comparisons, and rate scenario comparisons are intended as estimates only and are not a guarantee of rates or eligibility; actual billed data may vary.
