Agenda

- Background and Overview
 - PCIA Background
 - GHG-Free Energy Interim Allocation Regulatory Precedent
- Allocation Enrollment Process
 - Allocation Process
 - Milestones
 - Overview of DocuSign and How to Enroll
 - Process after Enrollment
- Questions

Background and Overview

Energy for What's AheadSM

Background

- In Working Group 3 of R.17-06-026, the Co-Chairs (SCE, Clean Power Alliance (CPA) and Commercial Energy) proposed a portfolio optimization framework that included a GHG-Free Energy allocation component
- A decision in WG 3 is expected in Q4 2020 (Decision)
- Pending a Decision, SCE and CPA requested authority in Advice Letter 4194-E to implement the interim GHG-Free Energy allocation

Effective Date of Advice Letter 4194-E

- Pursuant to Rule 9.2.3 of CPUC General Order 96-B, Advice Letter 4194-E is effective as of April 17, 2020 for load serving entities (LSEs) that are government agencies, pending final disposition by the CPUC through a Resolution (“the Resolution”)
 - LSEs that are government entities may opt into the interim GHG-Free allocation during the 30-day calendar period starting 5/15/2020
- For all other LSEs, Advice Letter 4194-E will be effective upon approval by the CPUC through the Resolution
 - These LSEs will, upon notice, be able to opt into SCE’s interim GHG-Free allocation during a 30-day calendar period following approval by the CPUC through the Resolution

Allocation Enrollment Process

Energy for What's AheadSM

Allocation Process

- Eligible LSEs are those whose retail end-use customers pay SCE's Cost Responsibility Surcharges (CRS) (*i.e.*, the Power Charge Indifference Adjustment (PCIA) and/or the Competition Transition Charge (CTC))
- Eligible LSEs that are not government agencies in SCE's service area will be able to elect to participate in the 2020 interim GHG-Free Energy allocation when Advice Letter 4194-E becomes effective for them
- Each calendar year of the interim GHG-Free Energy allocation, SCE will provide LSEs notice and a 30-calendar day enrollment and election window for the subsequent year's allocation
- The Term Sheet* submitted with Advice Letter 4194-E will govern the interim GHG-Free Energy allocations
- The products available for the interim GHG-Free Energy allocations are i) a nuclear pool of resources and (ii) a hydroelectric pool of resources
- Eligible LSEs may elect one or both products
- Allocation amounts per product are based on a participating LSEs customers' actual, vintaged annual load shares relative to the sum total of all other actual loads in each vintage year

* NOTE: The Term Sheet is a Standard Offer and non-negotiable

2020 Enrollment Schedule for Government Agency LSEs

Event	Milestones
Open Enrollment Begins	May 15, 2020
2020 Enrollment Webinar	May 27, 2020 11:00am - 12:30pm PST
Open Enrollment Ends – Deadline to Enroll for 2020 Allocations	June 15, 2020
SCE Confirmation of Eligibility and Notification to LSE of Enrollment & Availability of July – December 2020 Forecast of Generation	By June 19, 2020
Allocation Commences	July 1, 2020

How to Enroll

- SCE is using DocuSign for participating LSEs to sign Term Sheets
 - Follow the link on the SCE.com website and fill out Attachment B

Attachment B

Agreement Regarding GHG-Free Energy Allocation and Confirmation of Allocation Elections

Utility: Southern California Edison Company (“SCE”)

Participant:

Term Year: 2020

This confirms that Participant elects to receive its customers’ vintaged, pro-rata share of the following Products during the Term Year specified above, pursuant to SCE’s standard offer described in its “Standard Offer Term Sheet of Southern California Edison Company for Allocation of GHG-Free Energy,” submitted with the California Public Utility Commission (“CPUC”) in SCE Advice Letter 4194-E on April 17, 2020 (“SCE’s Standard Offer GHG-Free Allocation”).

Product Allocation Elections (you must check the box to elect the allocation):

Hydroelectric Pool:

Nuclear Pool:

3 Step Process

1. Populate the attachment with LSE name in the Participant field
2. Select either or both products depending on preference
3. Have the attachment executed by an authorized signatory

How to Enroll

Participant:

By:

Print Name. _____

Title:

Date: 5/20/2020 _____

- SCE will review Attachment B once the allocation window closes on June 15th
- By June 19th SCE will confirm enrollment with LSEs and provide access to the 2020 Balance of year forecast via SharePoint.

Post-Enrollment

- SCE will provide each LSE a forecast for aggregate generation from the assets in the accepted allocation pools to allow participants to estimate the quantity of clean energy they will be allocated
 - Annually, SCE will provide a forecast with monthly granularity that will represent total generation from these resources. Participants will have to make their own assessment of the percentage of this generation they will be allocated
 - Quarterly, SCE will provide updated forecast for balance of allocation year
 - Forecasts will be provided via a secured Microsoft SharePoint site to individual participating LSEs, which can be accessed via a URL
- SCE will provide preliminary actual generation data for each month no later than 20 days after the flow month
- All actual generation data, vintage total load and participant load for the flow year will be finalized no later than May 15th of the following year
 - e.g., flow year 2020 actual generation, vintage total load and participant load will be finalized by May 15, 2021
 - Data will be communicated via "Attachment C" of the GHG Term Sheet

Post 2020 Enrollment

- Enrollment is on an annual basis and Eligible LSEs must re-enroll to receive GHG-Free Energy Allocations in 2021
 - All LSEs will be notified and have a 30-calendar day enrollment period in Q4 2020 for calendar year 2021 allocations
 - This same process will be repeated for 2022 assuming the interim allocation continues into 2022
- SCE's interim GHG-Free Energy allocation is expected to continue until the **earlier of**
 - (1) December 31, 2022; or
 - (2) three full calendar months following the effective date of a Decision issued in the PCIA OIR that denies an ongoing GHG-Free Energy allocation mechanism materially similar to that permanent GHG-free energy allocation proposal put forth within the Working Group 3 Final Report filed in the PCIA OIR; or
 - (3) the effective date upon which an ongoing allocation of GHG-Free Energy generated from SCE's CRS eligible portfolio shall commence pursuant to a Decision issued in the PCIA OIR.
