Goal/Purpose

This User Guide covers the various features and functions of the Grid Interconnection Processing Tool (GIPT).

Introduction and Key Concepts

This section provides an overview of GIPT and the business processes that use the tool.

What is GIPT?

The Grid Interconnection Processing Tool (GIPT) is a web-based tool that allows you to submit requests to interconnect Distributed Energy Resources (DER) to SCE’s electrical system under SCE’s interconnection tariffs. GIPT streamlines the end-to-end cross organizational and generation interconnection processes and centralizes the DER information that is captured during these processes.

GIPT is released in several Phases, each phase consisting of multiple Drops. This User Guide covers Drops 1, 2, and 3 of Phase 1, which start with the application submittal and ends with the long-term management.

GIPT is initially used for Rule 21 Non-export Interconnection Requests only. All other Interconnection Requests will be submitted using the current methodology.

GIPT is used by both Customers and Internal Users.
Through GIPT, Customers can:

- Enter intake information
- Retrieve and review the results of the analysis performed by SCE
- Submit electronic payment, when required

Through GIPT, Internal Users can:

- Evaluate and approve Customer requests
- Document deficiencies
- Review preliminary study results
- Generate study reports
- Itemize scope of work
- Create cost estimates
- Generate contracts
- Monitor construction activities
- Provide commissioning test updates for Customer
- Perform true-up activities: Assemble all required documents for final billing
- Create final billing
- Perform long-term management activities
# Key Terms

The table below lists key terms used in GIPT and their description.

<table>
<thead>
<tr>
<th>GIPT Term</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>My Projects</td>
<td>All projects that have been assigned to you</td>
</tr>
<tr>
<td>Case</td>
<td>A single Interconnection Request or project submittal, also referred to as “project” or “contract”</td>
</tr>
<tr>
<td>Case 360</td>
<td>At-a-glance view of key information about a case</td>
</tr>
<tr>
<td>Case ID</td>
<td>A system-generated Identification Number associated with a single Interconnection Request or project submittal; generated immediately upon Customer entering a request</td>
</tr>
<tr>
<td>GIPT</td>

</tr>
<tr>
<td>To-Do’s</td>
<td>Items pending your response or action</td>
</tr>
</tbody>
</table>
GIPT Screen Layout

Every GIPT screen consists of a few main sections:

- **Left-hand navigation**, where you select the function to display in the main work area
- **Recents**, which displays your most recent activities
- **Main work area**, which displays information based on the function selected on the left panel

In addition, the top right of every GIPT screen includes the **User’s initials** icon (not shown), which allows the user to log off GIPT.

Online Help

Most screens include one or more Help links that provide help about a specific area of the screen. Click the Help link any time.
Additional Help and SCE Help Line

If you did not get the help needed through the Online Help link, you can contact SCE by email or via phone:

- **interconnectionQA@sce.com**
  This is the preferred method of communication. Detailed email messages allow GIPT team members to route Customer concerns to the correct team member.
- **909-274-1106 or 626-302-3688**
  The phone lines are designated for Rule 21 Export and Non-export calls. Calls will be answered between 7:00AM – 4:00PM PST. Customers may leave a message outside of these hours.

Additional help is available through the Selection Wizard. Refer to the section: [Self Help through the Selection Wizard](#).

Case 360 View

The Case 360 view displays on the bottom of the main work area. It allows you to see various information about a case at any time. The Case 360 view includes the following tabs:

- **Information**: Lists key attributes about the specific case which user has selected.
- **Attachments**: Lists all attachments provided by the Applicant for the selected case.
- **Agreements**: Displays all case artifacts that get generated by the GIPT system such as Agreements and Reports for the Customer.
- **Comments**: Lists all internal and external comments for the selected case.
- **Payments**: Displays details of the payments made by applicant for the selected case.

5 Revision Date: 08/06/2020
Supported Browsers and Devices

You can use GIPT with any browser (e.g., Internet Explorer, Chrome).
You can use GIPT with any mobile device (e.g., laptop, Tablet).

Business Processes

When submitting an Interconnection request, the following business processes take place.

1. Customer completes an Interconnection request along with applicable attachments.
2. Customer reviews the application (request) and acknowledges meeting the acceptable application requirements per Rule 21.
3. Customer submits payment to SCE.
4. SCE reviews the application for completeness. If incomplete, notifies Customer of information needed for completion.
5. Once application is complete, SCE performs a Technical Evaluation and notifies Customer.

In case an application fails the Technical Evaluation, the Customer can:

- Withdraw the application and start over a new application; or
- Modify the original application.

6. Once Technical Evaluation passes, SCE drafts a contract for the Customer to review.
7. Once Customer agrees to the contract, SCE develops a final contract for the Customer to sign.

If Construction of upgrades is needed:

8. The Customer is required to pay the invoice in advance of Construction.
9. SCE puts together a Welcome Package, which includes, as appropriate, a list of required documents from the Customer prior to or during the actual Construction of the project.
10. During the Construction stage SCE reviews and approves the required documents submitted by the Customer.

Following the Construction of upgrades, or if Construction is not needed:

11. Commissioning Testing is performed to verify protective settings and functionality and is required upon initial Parallel Operation of a Generating Facility.
12. SCE delivers to the Customer an invoice of the final cost of construction of the Interconnection Facilities and Distribution Upgrades as provided to the Customer.
Timeline

1. The Customer submits a request and SCE responds within 10 business days, either by approving the request or by sending a first Notification of Deficiency.

2. The Customer can then resubmit the application within 10 business days.

3. SCE reevaluates the application and responds to the Customer within 10 business days, either by approving the request or by sending a second Notification of Deficiency.

4. The Customer can then resubmit the application within 5 business days.

5. SCE reevaluates the application and responds to the Customer within 5 business days, either by approving or declining the request.

6. The Customer may request one Extension of up to 20 business days.

7. SCE generates a construction advance invoice to be sent to the Customer.

8. Customer pays the invoice.

9. SCE generates a Welcome Packet (Package) and sends to the Customer.

10. SCE may set up a kickoff meeting with the Customer to discuss Welcome Package requirements. Customer must accept the meeting preferably within 2 business days.

11. SCE sends a notification to the Insurance Tracking Service (ITS) team and another notification to the Customer informing them about the engagement with ITS to review the Certificate of Liability Insurance.

12. Customer submits all required documents per the Welcome.

13. SCE reviews the documents and approves or rejects them approximately within 15 business days.

14. Once all documents are approved, SCE proceeds to complete the required upgrades and updates the installation/completion dates.

15. SCE initiates Monthly Facilities Charges billing if applicable for the case.

16. SCE completes the final invoice.

17. For long-term management, GIPT sends a renewal notification 60 calendar days prior to the expiration of the Certificate of Liability Insurance.

18. SCE sends yearly notifications on Jan 2nd to the Customer in order to update or add representatives. If no action is taken by Jan 31, it is assumed there is no change to the representative list. Customer can, however, add or update the representatives anytime throughout the year.
Login and Authentication

This section covers the security features of GIPT and explains how to access the tool.

Security Features

Security features are provided through the login of each user.

SCE Customers must use their SCE.com credentials to log in to GIPT.

3rd party agents must register with GIPT first. Once they obtain a User ID and Password, they can log in to GIPT.
Registering to GIPT

Registration is mandatory for first time users. Once you register, you can access and log on to GIPT.

To register to GIPT:

1. Click the URL: http://on.sce.com/gridinterconnections
   The following displays.

2. Use one of two methods:
   a. **Method 1**: Click the link Grid Interconnection Processing Tool (GIPT).
   b. **Method 2**: Scroll down and click the link Rule 21.
The Interconnecting Generation under Rule 21 screen displays.

Click Apply Now.

Regardless of which method you use, the Welcome to GIPT screen displays.

You may want to bookmark the login link as:
https://gridinterconnection.sce.com/prweb?AppName=GIPT
This will allow you easy access to the Welcome to GIPT screen in the future.
3. Click **Register**.

*The following screen displays.*

For SCE Customer Registration, refer to the section: [SCE Customer Registration](#).

If you want to register as a third part, refer to the section: [Third Party Registration](#).
SCE Customer Registration

To register as an individual Customer:

*Once you click Register under the SCE Customer Registration, the User Registration screen displays.*

1. Complete all fields and click **Next**.
The following screen displays.

How would you like to identify your SCE Account?

To ensure the security of your customer account, we use a two-step verification process.

2. Click Service Address or Customer Account Number and complete the applicable information, or click Skip this Step to continue without verification.

The Terms & Conditions screen displays.

3. Read the terms and conditions, then click I have read and agree.
The following screen displays, and an email is sent to your email address.

A verification email has been sent to:
suzan.barazani@sce.com

Please click the link in that email to verify your email address and complete your registration.

<table>
<thead>
<tr>
<th>Your Details</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>First Name</td>
<td>Suzan</td>
</tr>
<tr>
<td>Last Name</td>
<td></td>
</tr>
<tr>
<td>Email</td>
<td><a href="mailto:suzan.barazani@sce.com">suzan.barazani@sce.com</a></td>
</tr>
<tr>
<td>Service Address</td>
<td>3332 DR</td>
</tr>
<tr>
<td></td>
<td>LOS ALAMITOS, CA 90720</td>
</tr>
</tbody>
</table>
4. Check your email. You should receive the following:

Dear Suzan,

Thank you for registering for an sce.com User ID and adding it to your existing Customer Account. Your registration is almost complete. Please click the link below to verify your email address and activate your User ID.

For your security, if your email address is not verified within 3 days, your User ID will expire and you'll need to start the registration process again.

If you did not submit this request, please call us at 1-800-655-4555. Business customers, please call 1-800-990-7788.

5. On the email message, click Activate.

The Activation screen displays.
6. Enter your password.

7. Optional: Check the **Remember me** box so the system remembers your User ID for future use.

8. Click **Login**.

*A screen confirms that you are registered.*
Third Party Registration

To register as a third party:

*Once you click Register under the Third Party Registration, the Welcome, Create Account screen displays.*

1. Complete all fields.
2. Scroll down and click **Register**.

A confirmation message displays, stating that a verification email was sent to the Customer’s email address.
3. Access your email and locate the “Activate Account” email from Okta.

Hi Suzan,

Welcome to Southern California Edison’s new account registration system.

We have received your request to access Grid Interconnection Processing Tool and are currently reviewing it.

- Please click “Verify Email” so that SCE’s review team can confirm this request is linked to your email account.
  - You may disregard any further instructions that show in the browser after you have clicked “Verify Email”.
- Please allow SCE up to two (2) business days to send a response, in the meantime, you will not be able to log into Grid Interconnection Processing Tool.
- You will receive an additional email containing instructions once your account creation request has been reviewed.

If you believe you have received this notification in error, please disregard it. Thank you.

Regards,

Southern California Edison

Grid Interconnection Processing Tool Activation Team

4. Click Verify Email.

The Sign In Denied screen displays.

While the message indicates “Sign In Denied”, the registration request is passed on to SCE.
SCE will contact you using the email provided. Once SCE accepts your registration, you can log on to GIPT.

Dear Customer,

Congratulations! Your registration with Southern California Edison – Grid Interconnection Processing Tool is confirmed. Please click on this link to access Grid Interconnection Processing Tool.

[GIPT Application]

Thanks and Regards,
Grid Interconnection and Modernization,
Southern California Edison
Accessing and Logging on to GIPT

To access and log on to GIPT:

1. Click the URL: http://on.sce.com/gridinterconnections
   The following displays.

2. Use one of two methods:
   a. **Method 1**: Click the link _Grid Interconnection Processing Tool (GIPT)_.

   b. **Method 2**: Scroll down and click the link _Rule 21_.

   [Image of welcome page]
The Interconnecting Generation under Rule 21 screen displays.

Click **Apply Now**.

Regardless of which method you use, the Welcome to GIPT screen displays.

You may want to bookmark the login link as:

https://gridinterconnection.sce.com/prweb?AppName=GIPT

This will allow you easy access to the Welcome to GIPT screen in the future.
3. Click **Log In**.

   *The Sign In screen displays.*

4. Enter your **Username**.

5. Optional: Check the **Remember me** box so the system remembers your Username for future use.
6. Click **Next**.

*GIPT's landing page displays. This page displays every time you log in to GIPT.*

---

**Logging off GIPT**

To log off GIPT:

1. Click your **User initials** icon, on the top right of the screen.

   *A drop-down list displays.*

2. From the drop-down list, select **Log off**.
# The Landing (Welcome) Page

The landing page (screen) includes updates, announcements, and summaries as applicable.

## GRID INTERCONNECTION PROCESSING TOOL (GIPT)

### Welcome

<table>

<tr>
<th>To-Do's</th>
<th>My Projects</th>
<th>Clone Project</th>
<th>Self Help</th>
<th>Bulk Upload</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image1.png" alt="Image" /></td>
<td><img src="image2.png" alt="Image" /></td>
<td><img src="image3.png" alt="Image" /></td>
<td><img src="image4.png" alt="Image" /></td>
<td><img src="image5.png" alt="Image" /></td>
</tr>
</tbody>
</table>

### News

Currently, Grid Interconnection Processing Tool (GIPT) supports only Rule 21 Non Export type of Interconnection requests.

Other Interconnection Tariff Types will be introduced in future releases.

### Guide

- **Create New Request** For single application submission.
- **To-Do's** To review or act on any pending items or in progress requests.
- **My Projects** For review of any projects submitted by you.
- **Self-Help** For any help required to identify the Interconnection Tariff.
- **Bulk Upload** If you wish to submit multiple applications.

### Program Type

- Rule 21 Non Export

### My Projects

- ![Bar Chart](image6.png)

This page also displays the Case Status for all open cases, showing graphically the stage of the open cases:

- Request Submittal
- Review Request
- Technical Evaluation
- Contract Development
- Commissioning Test
User Dashboards

The left-hand navigation consists of various functions. The main work area varies, depending on the function selected in the left-hand navigation.

The functions available on the left-hand navigation include:

- Welcome
- To-Do’s
- My Projects
- Clone Project
- Self Help
- Bulk Upload
To-Do’s

The To-Do’s menu is a list of items where the user has a task to do. If there is a case listed in your To-Do’s menu, you will need to address the task for the case to move forward.

My Projects

The My Projects menu displays all projects that are assigned to you, regardless of whether you have a task due.

Clone Project

The Clone Project menu allows you to clone an existing Project ID (case). Refer to the section: Cloning

Unsubmitted Requests

You can view your Unsubmitted Requests in the To-Do’s menu. You can input data and submit the case or cancel the request.

Checking Statuses

You can open a case any time after submittal and see the status bar. Stages marked in green have been completed, while stages marked in yellow are underway.

Email Notifications

Email notifications are sent whenever a milestone is met, or when an action is needed. You will see these notifications in your Inbox.

Recents

The Recents area displays the recent 5 cases of the user.
Self Help through the Selection Wizard

You can use a selection wizard any time throughout the process to obtain help about certain topics.

To use the Self Help function through the Selection Wizard:

1. Log on to GIPT.
   The landing page displays, listing various functions on the left.

2. Click **Self Help**.
A list of topics displays in the main work area.

### SELF HELP

**What Brings You Here Today?**

- [ ] I am installing a back-up generator.
- [ ] I would like more information regarding a potential project site.
- [ ] I would like to export any portion of my generation for sale.
- [ ] I am planning for generation (and/or storage) that is intended to serve onsite load only.
- [ ] I would like to do a bulk upload of Rule 21 Non-Export requests.
- [ ] I don’t see the topic that I am interested in and I would like to speak to a representative.

3. Select the appropriate radio button.

Depending on the topic selected, a wizard walks you through some questions to get more information, or a message displays, directing you to further actions.

The table below displays the tool’s initial response for each Self Help topic.

<table>
<thead>
<tr>
<th>Topic Selected</th>
<th>System’s Response</th>
</tr>
</thead>
<tbody>
<tr>

Searching for a Case

To search for a case:

1. Log on to GIPT.
   
   *The landing page displays.*

2. Click **My Projects** to display all projects.

3. Click the filtering icon to the right of the column you want to use for your search (e.g., click the filtering icon next to the Project ID column to search for a specific Project ID).

   ![Filter Icon]

   *The filter window displays.*

4. Enter text to search.

5. Click **Apply**.

   *The main work area displays the cases that match your search criteria (e.g., cases with “2”).*
Creating and Submitting Applications

A wizard walks you through the steps of creating a new interconnection request. Once a request is created, it can be submitted immediately. Alternately, you can clone an existing case using the Clone Project function or upload several requests at once using the Bulk Upload function.

Creating a New Request

To create a new interconnection request:

1. Log on to GIPT.
   
   The landing page displays.

2. From the Create New Request drop-down list on the upper right, select Rule 21 Non Export.
The Interconnection Request screen displays, listing various topics on the right.

3. Complete the Inter Connection request.
   - You may use the topics on the right to navigate between the various areas you need to complete.
   - The system displays a message that you are about to change the current window when attempting to navigate to a different area.

Click the Help links throughout to get help about a specific area of a screen.
Request Form Sections – Overview

To create a new interconnection request, you must complete all areas on the right:

- Project Information
- Facility Information
- Generating Unit Details
- Additional Information
- Attachments
- Preliminary Screening
- Checklist
- Forms and Payment
Project Information

To complete this section of the application:

1. Click **Project Information** on the right, if not currently selected. 
   *The Project and Contact Information screen displays.*

<table>
<thead>
<tr>
<th>Project and Contact Information</th>
</tr>
</thead>
<tbody>
<tr>
<td>Project Information</td>
</tr>
<tr>
<td>Project Name:</td>
</tr>
<tr>
<td>Exp. Date: Month/Date/Year:</td>
</tr>
<tr>
<td>Operating Mode:</td>

<tr>
<td>Select the Operating Mode of the Generating Facility:</td>
</tr>
<tr>
<td>- Parallel Operation</td>
</tr>
<tr>
<td>- Momentary Parallel (MP) Operation</td>
</tr>
<tr>
<td>- Isolated Operation</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Operating Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Parallel Operation</td>
<td>The Generating Facility will interconnect and operate &quot;in parallel&quot; with SCE's Distribution System for more than one (1) second</td>
</tr>
<tr>
<td>Momentary Parallel (MP) Operation</td>
<td>The Generating Facility will interconnect and operate on a &quot;momentary parallel&quot; basis with SCE's Distribution System for a duration of one (1) second or less through transfer switches or operating schemes specifically designed and engineered for such operation</td>
</tr>
<tr>
<td>Isolated Operation</td>
<td>The Generating Facility will be &quot;isolated&quot; and prevented from becoming interconnected with SCE's Distribution System through a transfer switch or operating scheme specifically designed and engineered for such operation</td>
</tr>
</tbody>
</table>

2. Complete all information using the Help link as needed.

3. When done, click **Continue** or use the topics on the right to proceed to the next area.
Facility Information

To complete this section of the application:

1. Click **Facility Information** on the right, if not currently selected.
   
   *The Facility Information screen displays.*

   - **Operating Information**
     - **Operating Date**
       - [ ]

   Please indicate how this generating facility will be operated (select all that apply):

<table>
<thead>
<tr>
<th>Operating Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Combined Heat and Power</td>
<td>The operation of the Generating Facility will produce thermal energy for a process other than generating electricity</td>
</tr>
<tr>
<td>Multiple Tariff</td>
<td>The Generating Facility has a combination of non-NEM generator(s) and NEM Generator(s) (i.e., an existing facility with NEM generator(s) and planning to add non-NEM generator(s))</td>
</tr>
<tr>
<td>Peak Shaving/Demand Management</td>
<td>The Generating Facility will be operated primarily to reduce electrical demands of the host Customer facility during SCE's &quot;peak pricing periods&quot;</td>
</tr>
<tr>
<td>Primary Power Source</td>
<td>The Generating Facility will be used as the primary source of electric power and power supplied by SCE to the host Customer's loads will be required for supplemental, standby, or backup power purposes only</td>
</tr>
<tr>
<td>Standby / Emergency / Backup</td>
<td>The Generating Facility will normally be operated only when SCE's electric service is not available</td>
</tr>
</tbody>
</table>

2. Complete all information using the Help link as needed.

3. When done, click **Continue** or use the topics on the right to proceed to the next area.

Generating Unit Details

To complete this section of the application:

1. Click **Generating Unit Details** on the right, if not currently selected.
   
   *The Generating Unit Details screen displays.*

   - **Generating Unit Details**
     - **Existing and New Generator Info**
       - [ ] Add Item
       - [ ] Delete

     | Generator Status | Quantity | Generator Type | Prime Mover Type | Generator Details |
     |------------------|----------|----------------|------------------|-------------------|

     No Items

2. Click **Add Item** to add new generator(s).

3. Complete all information using the Help link as needed.
4. To delete an item, click the **Delete icon** on the right of the item you want to delete.

![Generating Unit Details](image)

5. When done, click **Continue** or use the topics on the right to proceed to the next area.

**Additional Information**

To complete this section of the application:

1. Click **Additional Information** on the right, if not currently selected.
   
   *The Additional Information screen displays.*

![Additional Information](image)

2. Complete all information using the Help link as needed.
3. When done, click **Continue** or use the topics on the right to proceed to the next area.
**Program Participation Section**

Complete the Program Participation section by selecting all programs that your project participants in or intends to participate in. This is not an application for any particular program. However, if you have a standalone Energy Storage system that is less than or equal to 10 kW, and you selected protection option 3 or 6, you may opt to select “Accelerated PTO Process”. For more information on the Accelerated PTO Process, refer to [www.sce.com/gridinterconnection](http://www.sce.com/gridinterconnection).

If you select **Other**, enter the specific program name.

![Program Participation Table](image)
Attachments

To complete this section of the application:

1. Click **Attachments** on the right, if not currently selected.  
   The Attachments screen displays.

2. Drag and drop your attachment file, or click **Browse** and select the file. 
   The Attached file is listed.

3. Optional: Change the Name as needed.
4. From the Category drop-down list, select the appropriate category.

Relay Output Files
Relay Settings (RBD File)
3rd Party Relay Test Reports
Requirements
Scoping Package
Secretary of State
Self Cert Comm Test Report
Sequence of Operation
Sewer and Storm Plot Plans
Short Circuit Duty
Safety Signage
Single Line Diagram
Site/Plot Plan Diagram
SOB 510 Single Line Diagram
SOB510 Form
Specification Sheets
Street Improvement Plans
Streetlight Plans

5. To delete an attachment, click the trash icon on the right.

6. Click **Upload**.

   The Attached file displays.

<table>
<thead>
<tr>
<th>Name</th>
<th>File</th>
<th>Category</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Attachment1</td>
<td>Single Line Diagram</td>
</tr>
</tbody>
</table>

7. Repeat the steps for additional attachments.

8. When done, click **Continue** or use the topics on the right to proceed to the next area.
Preliminary Screening

To view this section of the application:

1. Click **Preliminary Screening** on the right, if not currently selected.
   
   *The Preliminary Screening screen displays.*

   Please note that these are Preliminary Technical Analysis Results only. Upon successful submission of this application, your project will be subject to subsequent screens in accordance with the Rule 21 Fast Track study process. Refer to section F.2 of the Rule 21 Tariff for more information.

   Preliminary Technical Analysis Screen Results

   Screen B - Certified Equipment being used
   
   Based on the information you have provided, it appears your request uses pre-approved certified equipment.

2. Review the screen and note the areas where you may need to revise or add information to your request.

3. When done, click **Continue** or use the topics on the right to proceed to the next area.
Checklist

To complete this section of the application:

1. Click Checklist on the right, if not currently selected.
   
   The Checklist screen displays.

   ![Checklist Table]

   - Is the facility behind a single, clearly marked and accessible disconnect?
   - Is the disconnect visible on your Single Line Diagram and Plot Plan/Site plan?
   - Is any existing generation listed in your interconnection request?
   - Is all generation (new and existing) drawn on your single line diagram?
   - Is the Generating Facility at a single retail meter & Point of Interconnection?
   - Does the generator/inverter/Converter model number on the Interconnection Request match the model number on the Single Line Diagram?

   I hereby attest that all of the data and attachments associated with the Interconnection Request, located at . . . , meets the acceptable Application requirements in section 5.2. of the Rule 21 tariff. I further understand that any data deficiencies could result in the withdrawal of the Interconnection Request if does not, in fact, comply with the requirements established in Rule 21.

2. Answer the questions using the Help link as needed.

3. Click the Add Comment link to add comments. Your comments will be reviewed by SCE.

4. Read the statement on the bottom. Make sure to use the Help link, which explains what you acknowledge continuing.

5. Click Continue or use the topics on the right to proceed to the next area.
Forms and Payment

To complete this section of the application:

1. Click **Forms and Payment** on the right, if not currently selected.

   *The Forms and Payment screen displays.*

Payment is mandatory for Momentary Parallel or Parallel options. It is not mandatory for Isolated Operation.

2. Click **Download** to review the Rule 21 Application Form. It includes all the information you provided. If you have any questions, contact SCE. Otherwise, proceed with completing the payment.

3. Click **Make a Payment** to proceed to payment.

4. Refer to the section: Making a Payment for information on how to make a payment.

5. Click **Save**.

6. Click **Finish**.

   Your payment transaction is incomplete until you click **Finish**; you must click **Finish** for the case to move forward.

   *If there are errors in the application completion (e.g., missing information), a list of errors displays.*
If there are no errors, your request and all information about it display.

What’s Next?

Next, SCE will review your request and will notify you if any additional information is needed. This may take up to 10 business days.

Make sure to note the case ID for your request on the top left corner of the main work area (e.g., GFID-16). This will be important in case of any pending actions on the case.

Errors and Required Fields

All required fields are marked with a red asterisk.

Once you complete the application, if any required fields are incomplete, error messages will display:

**Cogeneration**: Please select Cogeneration, as it is Mandatory  
**IsNEMRenewable**: Please select Yes/No, as it is Mandatory

Make sure to revisit the error message section and revise your application as necessary.
Payments

This section explains how to make payments and handle exceptions during the Request Submittal and/or Technical Evaluation, or during the contract execution.

Payment is required before your Interconnection Request can be submitted to SCE for review.

Identifying a Case that Requires Payment

To identify a case for which a payment is required:

1. Log on to GIPT.
   The landing page displays.
2. Click To-Do’s on the left-hand navigation.
   A list of cases that require your attention (e.g., payment) displays.
Alternately, you can identify a case for which a payment is required by using the Task Name filter.

Filter icons display to the right of the column titles.

1. Click the Task Name filter icon.

   *The following options display:*

   ![Filter Icons](image1)

2. Scroll down and select **Forms and Payment**.

   ![Filter Icons](image2)

3. Click **Apply**.
All the cases that require a payment display.

Making a Payment

To make a payment:

1. Click the Project ID of the case for which you want to make a payment.  
   *The Forms and Payment screen for the case displays.*

2. Click **Make a Payment**.
   *A Confirmation screen displays.*

3. Click **OK**.
The JP Morgan Chase (JPMC) Portal opens in a different tab and displays the landing page.

This screen below opens under a different tab in the browser. Do not close the GIPT browser.

You have the option to log in if you have registered to JPMC or pay without registering. The process and the screens are identical in both cases. However, the system saves the bank account information for registered Customers, and they can also review their payment history. To register to JPMC, refer to the section: Registering to JPMC.
Registered Customers

If you are a registered Customer:

1. Enter your **User ID** and **Password**, then click **Log In**.

   *The Make a Payment screen displays.*
2. Optional:
   a. Click **Manage Accounts** to edit, delete, or add an account.

   ![Manage Accounts](image1)

   b. Click **Pending Payments** to view a list of pending payments.

   ![Pending Payments](image2)
c. Click **Payment History** to view payments you have made in the past.
You may click any payment link to view detailed information about the payment.

<table>

</tr>
</tbody>
</table>

E-mail Address: gerry.********@com
d. Click **Update Profile** to make changes to your payor profile.

3. Click **Make Payment**, if not currently selected.
The Make a Payment screen displays.

To use an existing account for the payment:

4. Under Payment Method, select the **Select** option to use an existing account for the payment.

5. From the drop-down list, select the account to use for the payment.
The selected account displays.

Payments are processed on the following business day.

To use a new account for the payment:

6. Under Payment Method, select eCheck to use a new account.

The ECHECK ACCOUNT INFORMATION screen displays.

Your bank routing number and bank account number can be found on the bottom of your check. Bank routing numbers are always 9 digits long. Account numbers may be up to 17 digits long; there is no specific number of characters for a bank account number. These numbers may appear in different order on your check. Some financial institutions list the routing number first while others list the account number first on the check. Check with your financial institution to make sure that the account is “ACH enabled” or that “debit blocking is removed” so that the debit to your account can be processed.

7. Complete the information.

For both existing and new account:

8. Click Continue.
9. Optional: Enter a different email address if needed. A confirmation will be sent to the email address specified.
10. Scroll down and check the I **Accept** box.

```
DEBIT AUTHORIZATION

PLEASE READ AND APPROVE THE FOLLOWING AUTHORIZATION

By clicking "I Accept", I authorize the payee to electronically debit my bank account for the amount(s) and date set forth above. This authorization is valid for this transaction only.

If a convenience fee is added to the transaction, I understand that the convenience fee displayed will be included in the total payment amount.

In the event that a payment is returned for insufficient funds, I authorize the payee to electronically debit my bank account for the original amount of the transaction, as well as a returned item fee, up to the maximum amount allowed by law.

**PLEASE PRINT A COPY OF THIS AUTHORIZATION FOR YOUR RECORDS**

I Accept*: ☐
```

10. Click **Continue**.
The Payment Confirmation screen displays.

11. Optional: Click the **print** link to print out the confirmation.
12. Click **Continue**.
The Payment screen displays with the Make a Payment button disabled.

13. Click **Finish**.

Your payment transaction is incomplete until you click **Finish**; you must click **Finish** for the case to move forward.

The payment task will no longer display in your To-Do’s list. The submitted payment will display in the Case 360 view with a status of “Successfully submitted”. This status will change to “Sent” after JPMC confirms payment was transmitted to SCE. For more information, refer to: Payment Statuses.

If the payment is rejected (e.g., due to insufficient funds), the project may be withdrawn or terminated depending on the stage when the payment is required.

In case of exceptions, an assigned SCE Project or Contract Manager will inform you of the exception and next steps relative to the stage the payment is required, in accordance with the provisions of the Rule 21 Tariff or GIA.

**Non-registered Customers**

All steps are identical to registered Customers, except that you will need to manually enter all Contact and Account information.
Registering to JMPC

To register to JMPC:

1. Access a case.

   *The Forms and Payment screen for the case displays.*

2. Click **Make a Payment**.
The JP Morgan Chase (JPMC) Portal opens in a different tab and displays the landing page.

This screen below opens under a different tab in the browser. Do not close the GIPT browser.

3. Click Register.
The User Registration screen displays.

**PAYOR IDENTIFICATION**

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>User ID*</td>
<td>Must be between 6 and 12 characters</td>
</tr>
<tr>
<td>Password*</td>
<td>Must be 6-12 characters, at least one number and one letter</td>
</tr>
<tr>

</tr>
</tbody>
</table>

4. Complete all required information (in bold, marked with *).
5. Scroll down and click **Submit**.
   
   *A confirmation message displays.*

You can now return to the Make a Payment screen and add an account.
To add an account from the Make a Payment screen:

1. Click **Manage Accounts**.
The Account List screen displays.

2. Click **Add eCheck Account**.

   The Add New eCheck Account screen displays.

   ![Add New eCheck Account Screen]

   Your bank routing number and bank account number can be found on the bottom of your check. Bank routing numbers are always 9 digits long. Account numbers may be up to 17 digits long; there is no specific number of characters for a bank account number. These numbers may appear in different order on your check. Some financial institutions list the routing number first while others list the account number first on the check. Check with your financial institution to make sure that the account is “ACH enabled” or that “debit blocking is removed” so that the debit to your account can be processed.

3. Complete all required fields and click **Submit**.

   You can add additional accounts and use any of the accounts to make a payment.
Payment Statuses

There are three statuses for payments. These will display in the 360 view under the Payments tab.

- **Payment Initiated:** This occurs when GIPT initiates the payment session with JPMC and the JPMC payment portal is launched.

- **Successfully submitted:** This occurs when JPMC sends the payment acknowledgement to GIPT, which is usually within minutes of making an online payment.

- **Sent:** This occurs when JPMC confirms the payment with GIPT, which is typically the next business day after an online payment is made.

<table>
<thead>
<tr>
<th>Payment Type</th>
<th>Invoice Number</th>
<th>Due Date</th>
<th>Amount Due</th>
<th>Amount Paid</th>
<th>Confirmation Number</th>
<th>Confirmation Date</th>
<th>Payment Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>APPLFEE</td>
<td></td>
<td>11/18/2019</td>
<td>$800.00</td>
<td>$800.00</td>
<td>SC2PAY000001712</td>
<td></td>
<td>Successfully submitted</td>
</tr>
</tbody>
</table>
Inquiring about a Payment

You can inquire about a payment previously made via the JPMC portal, or by calling SCE at (866) 353-3437.

To inquire about a payment previously made, you will need the confirmation number associated with the payment.

1. Access the case.
2. Scroll down to the Case 360 view.
3. Click the Payments tab.
4. Note the Confirmation Number for the payment.
Cloning Projects (Cases)

Customers (usually developers) can use an existing project (case) that has gone through the Review Request stage successfully, and clone certain case details instead of creating a new case from scratch each time. The Customer Information will be revised for each new case, but the technical specifications can be cloned from a successful application. Once a Customer clones a case that was already deemed complete and valid, the number of deficiencies in the newly submitted case is likely to be reduced.

You may clone up to 10 cases with pre-populated fields taken from an existing case.

To clone a case:

1. Log on to GIPT.

   The Customer dashboard displays.

2. Click **Clone Project** on the left panel.

   The Clone Existing Project screen displays.

3. In the Existing Project ID field, enter the Project ID for the case you want to clone.

4. From the Number of Clones drop-down list, select up to 10 clone cases to create.

5. On the bottom, click **Select All** to clone all sections or select specific sections to clone into the newly created case(s).

6. Click **Submit**.
Bulk Upload

You may upload multiple interconnection requests at once. When using the Bulk Upload option, about 50 fields are completed for each case. You will then need to open each case and complete the remaining fields.

There is no limit to the number of requests you can submit using the Bulk Upload tool. However, please contact SCE to coordinate prior to submitting more than 100 new cases using the tool. Phone (909) 274-1106, email InterconnectionQA@sce.com.

To upload multiple interconnection requests at once:

1. Log on to GIPT.
   *The Customer dashboard displays.*

2. Click Bulk Upload.
   *The option to download an Excel Template displays.*

3. Click **Download Template** to download a template.
4. Complete the template, entering all details for the interconnection requests.
5. Click **Browse** on the bottom right (not shown) to upload the completed template.
6. Select the completed Excel file to upload and click **Open**.
   *Your Excel file is listed.*
7. Click **Submit**.
Cloning vs. Bulk Upload

With cloning, the information that can be used to create a new case is anything other than the Customer information. You can choose from your existing cases and copy certain sections of the case.

With a bulk upload, you can create several cases that contain the Customer and account information, but you cannot bulk upload generating unit details.

You can use cloning to create new cases or bulk upload, but not both at the same time for the same set of cases. In other words, you can do one of the following:

- Use cloning and manually enter the Customer details into the new cases; or
- Use bulk upload and manually enter the generating unit details into the new cases.

Typically, it is more challenging and time consuming to enter the technical data, and it is more common that the technical information is similar while the Customer data is different for each case. Hence, you may find the cloning feature more useful than the Bulk Upload feature.
Preliminary Agreement

You have the option to preview a Preliminary Agreement. This is a basic agreement template that is populated with data that you have input into the Interconnection Request form.

A Preliminary Agreement does NOT include a Single Line Diagram.

The purpose of the Preliminary Agreement is to encourage you to make corrections to your data input. You can also share the Preliminary Agreement with other people (e.g., your attorney) and make changes prior to negotiating the Contract with SCE.

A Preliminary Agreement is available upon submittal of the Interconnection Request. If you notice an error in the Preliminary Agreement (and hence, in the Interconnection Request), you will need to correct the error in the Interconnection Request.

Updating the Interconnection Request after the Preliminary Agreement

If you have Application Deficiency, you can make the update once the Deficiency Notice is sent to you.

If the application is “deemed complete” and has moved onto the Technical Evaluation (or beyond) stage, you should request to “modify” your Interconnection Request.

Once the Technical Evaluation has been completed, and your application has moved to the Contract Negotiation stage, the Preliminary Agreement is no longer applicable. After Technical Evaluation, you should review the Draft Agreement, which is very close or identical to the Preliminary Agreement.
Review Request

Once you submit an Interconnection Request, SCE reviews the application to make sure all necessary information is included.

If the request is deemed complete, it continues to the Technical Evaluation. If it is incomplete, SCE communicates the deficiency to you.

Timeline

SCE reviews the request for completeness within 10-15 business days from the date of submittal.

Notifications

Make sure to check your To-Do’s often, as well as your email for any notifications from SCE regarding your application(s).

If an application is complete (i.e., no deficiencies), GIPT triggers an email to notify you of the next steps.

For a sample Notice of Deficiency, refer to the section: Addressing Deficiencies.

Addressing Deficiencies

In case of a deficiency in an application, you will receive an email from SCE with detailed information about the deficiency.

![Email Example]

You have 10 business days to respond to the first Notification of Deficiency, and 5 business days to respond to the second Notification of Deficiency.
You should also log in to GIPT and check the status of your application in the tool.

**Extension Request**

In accordance with Rule 21 E.5, you may request an extension of up to 20 business days to resolve deficiencies in the Interconnection Request.

**Application Deemed Complete & Valid and Queue Position Date**

Rule 21, section E.5. states: “An Interconnection Request will be considered complete and valid when all items required for an Interconnection Request have been received by Distribution Provider and deemed valid by Distribution Provide”.

Queue Position is the date assigned to a project in accordance with section E.5.c. of the Rule 21 tariff, which will then be posted in the public interconnection queue located under “Additional Information” at [www.sce.com/business/generating-your-own-power/Grid-Interconnections](http://www.sce.com/business/generating-your-own-power/Grid-Interconnections).

If an application is complete (i.e., no deficiencies), GIPT triggers an email to notify the Customer of the next steps.

To: Nina Lamb [Nina.Lamb@sce.com]
Subject: Acknowledgment of Receipt/GFID-1083-Scenario 4 Test Project 2

Dear Contractual Notice Recipients Customer Contact Name,

This is to confirm that your Interconnection Request (IR) and payment for project identification number GFID-1083, for Service Account # 1234, Scenario 4 Test Project 2, 123 street address 1 has been received by Southern California Edison.

SCE will perform a preliminary review of your Interconnection Request for completeness. Please allow up to 10 Business Days (15 Business Days if Cost Envelope Option was selected) to receive a status update. Note, you may login at any time to review your project status at: [Link to Project Record].

Please review the preliminary agreement form that has been made available for your project by clicking here. Provide feedback through the form at your earliest convenience.

Note, the preliminary agreement is not a formal Draft agreement. Thank you.

Best regards,

Grid Interconnection & Contract Development
Southern California Edison
Net Generation Output Meter (NGOM) Upgrade

For Interconnection Requests that require or request an NGOM, the following attachments are required when submitting the Interconnection Request:

- Customer/Project Information Sheet (CPIS)
- Single Line Diagram (SLD)
- Meter Socket Specifications (Cut sheets/EUSERCs)

Additional attachments may be required for other project or upgrade types.

Within Additional Information, there is a Help link by the NGOM Details section. Click the Help link to review the criteria for when an NGOM is required prior to submitting your request. Delays in identifying an NGOM requirement may result in delays to cost estimates, procurement, and installation of the proper equipment.
The email will also include the following details:

<table>
<thead>
<tr>
<th>Appendix 1 - Project Details</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>LINK TO THIS PROJECT:</strong> {ProjectLandingPageUrl}</td>
</tr>
<tr>
<td><strong>PROJECT DETAILS</strong></td>
</tr>
<tr>
<td>SCE Project #: GFID-1883</td>
</tr>
<tr>
<td>Service Account #: 123</td>
</tr>
<tr>

</tbody>
</table>

The system changes the stage from Request Review to Technical Evaluation.

If an application is deficient, the Customer receives a Deficiency Notice.

Dear [Customer Name],

SCE has reviewed your Interconnection Request and has identified the following deficiency or deficiencies:

Please add generator model number onto the SLD

Please login to the online application tool to review the comments and make updates. Please provide your updates by 10 Business days from date of email.

Regards,

GIPT_GICD_Advisor2
The Grid Interconnection & Contract Development team
Southern California Edison

manoj.mukulidaran@sce.com

---

Revision Date: 08/06/2020
Technical Evaluation

The Technical Evaluation stage contains the Fast Track screens in accordance with Section G of the Rule 21 Tariff. Fast Track is made up of Initial Review, and, when needed, the Supplemental Review. Initial Review consists of screens A-M, and the Supplemental Review consists of screens N-P.

Once the application is complete, it is time for the Technical Evaluation to assess whether the application passes or fails technical requirements.

Timeline

You will receive the results of the Technical Evaluation within 15 business days.

All timelines are as defined in the Rule 21 Tariff.
Momentary Parallel Operation

If selected Momentary Parallel Operation as the Operating Mode when completing your application, the following screen displays.

You should:

1. Respond to all questions and indicate the length of time that the generator will be connecting in parallel with the Grid during the closed transition.

2. Scroll down, then attach and upload the required documents, based on the transfer function selected (e.g., Control Scheme).

3. Optional: Add comments.
4. **Save** and **Submit** the information.

Your response will be viewed by SCE.

### Technical Evaluation of the Application – Results

If the Technical Evaluation results indicate that your application failed, return to the application and make the necessary changes.

Engineering may reject your application due to missing documents (e.g., Sequence of Operation).

1. Access **My Projects** on GIPT.
2. Locate and click the case that is pending resubmission.

### My Projects

<table>
<thead>
<tr>
<th>Program Type</th>
<th>Stage</th>

</tbody>
</table>

**The Assignments screen displays.**

3. Click **Begin**.
The Project Information for the selected application displays.

4. Click Application Review to get a summary of all issues that need your attention.

5. Take the necessary actions to resolve all items (e.g., attach a missing document).
6. In the Customer Response column, specify the actions you took.
Customer Options when IC Selected “No” to Cost Envelope in the IR and Initial Review Passes with Upgrades

This screen is used to select an option to proceed.
Customer Confirmation to Proceed with Contract Development

This screen summarizes the producer-financed added facilities, and requests confirmation from you to proceed with the Contract Development.

If you select to proceed with Contract Development, the following displays:

1. Select whether you want a replacement coverage.
2. Check the box: **Please confirm to proceed with Contract Development.**
3. Click **Submit.**
Total Cost for an Upgrade

In case of an upgrade, once you specify that you want to proceed with Contract Development, the following options display:

- **I want to proceed with Contract Development**

Producer-Financed Added Facilities

- **Replacement Coverage into Perpetuity**
  (Under this option, Producer shall pay to SCE at SCE’s sole option)
  - A Monthly Charge determined by SCE based upon an initial monthly rate of 0.477% times the total Added Facilities Investment amount
  - A One-Time Payment determined by SCE representing the present value of the sum of the Monthly Charges for the total Added Facilities Investment amount.

- **Replacement Coverage with 20-year Term**

- **Without Replacement Coverage**

You will confirm again that you wish to proceed with Contract Development, and click **Submit**.
Customer Options when IC Selected “Yes” to Cost Envelope in the IR and Initial Review Passes with Upgrades

This screen allows you to select an option when they selected “Yes” to Cost Envelope in their request and the initial review passes with upgrades.

NGOM Upgrade

The Customer reviews the Fast Track results the same way as for all other types of upgrades, and indicates whether to proceed with Contract Development.

1. Click **Preview** to preview the Fast Track Initial Report, or click **Download** to download the report.
2. Select one of the options to proceed further.
3. Click **Submit**.

The case is routed to the Contract Development stage.
Contract Development

During the Technical Evaluation stage, it was determined whether an upgrade is needed.

If upgrade is needed:

1. GICD Assignee or the system sends the generated agreement to the Customer.
2. The Customer approves the Draft Agreement.
3. GICD Assignee manually inputs the agreement into GIPT, and routes it for internal review, as required.
4. GIPT sends the agreement to Docusign for Customer to sign.
   In parallel, also:
   a. The system assigns the case to a GCM Manager.
   b. GCM Manager assigns the case to a Contract Manager.

If upgrade is not needed:

1. GICD Assignee or the system sends the generated agreement to the Customer.
2. The Customer approves the Draft Agreement.
3. GIPT sends the agreement to Docusign for Customer to sign.
   In parallel, also:
   a. The system assigns the case to a GCM Manager.
   b. GCM Manager assigns the case to a Contract Manager.

During the contract development, the following reports are visible to users:

- Fast Track Study Report
- Supplement Review Report
- Draft Interconnection Agreement

Updates to the Draft Agreement

You can use the Modify request to request an update to the Draft Agreement. Refer to the section: Modification.

Once you request a modification, your Advisor will review the request. Once it is approved, you will have a task to make the changes.
Approval Process

Once the case has passed the Technical Evaluation, a Draft Agreement is sent to you for approval.

To review and approve a Draft Agreement:

1. Access GIPT.
2. Click **To-Do’s** on the left-hand navigation. *The cases that need attention display.*

3. Click the case you want to review or approve.
The Review Draft Agreement screen displays.

4. Review all documents.
5. Determine whether you can approve the Draft Agreement:
   - If YES, select Approve. The Draft Agreement will go to SCE for their internal review and approval.
   - If NO, select Reject. The Draft Agreement will return to SCE for their review, and will then return to you again for your review and approval.

If you reject the Draft Agreement, you must include a comment on the bottom right, explaining your decision.
Docusign

When the contract is ready to be signed, you will be notified via email.

1. Click **REVIEW DOCUMENTS**.
   
   The contract displays.

2. Scroll down to the Signatures section.

3. Click the field where you want to electronically sign the document.
The My Signatures and Initials window displays.

4. Click **USE SAVED** to use an existing signature or **ADOPT NEW** to use a new signature.

5. Optional:
   a. Click **Edit** to edit your existing signature.

   b. Edit your Full Name and/or Initials.

   c. Click **ADOPT AND SIGN**.

---

Revision Date: 08/06/2020
Your electronic signature displays.

6. Scroll to the end of the document and click **FINISH**. 
   A confirmation message displays.

7. Click **CONTINUE**.
Optional Actions

You have the following options:

- **Withdraw**: Selecting this option withdraws the application.
- **Modify**: Selecting this option allows the Customer to specify what they want to modify. SCE then reviews the request for modification and if approved, Customer can edit those fields.

  The option to Modify displays after the Application Review stage.

- **Extension**: Selecting this option allows the Customer to request a one-time extension of 20 business days.

Withdrawal

You may request to withdraw your Interconnection Request any time prior to Contract Execution. Post-execution, you will need to work with your Contract Advisor to terminate any Interconnection Agreement.

If you have initiated a withdrawal, then the case will be considered resolved and no further action is needed. If the case was withdrawn in error, then you must reach out to the Contract Advisor as soon as possible to confirm whether a new case needs to be initiated (with a new fee).

If SCE has initiated the withdrawal, which typically occurs when a tariff milestone is not met, then you have 5 business days to respond and cure, or 2 business days to dispute the reason for the withdrawal.

To withdraw an application:

1. Access **My Projects** and click the case you want to withdraw.

2. Click **Withdraw**.
A Withdraw confirmation window displays.

<table>
<thead>
<tr>
<th>Yes</th>
<th>No</th>
</tr>
</thead>
</table>

By selecting "Yes" you acknowledge that you are providing written notice of withdrawal to the Distribution Provider, per section F.6. of the Rule 21 tariff. Should you wish to proceed with this request after the withdrawal is complete, you will need to submit a new Interconnection Request with a new fee.

Please confirm that you want to withdraw the application

3. Click Yes to proceed.

SCE confirms the withdrawal of the application via email.

Dear Interconnection Customer,

This is to acknowledge the withdrawal request for GFID-333 - Hanuman4 as of 11/1/19. At this time, no further action will be taken on this case. If you have requested this withdrawal in error, please reach out to your SCE assignee as soon as possible, as the case will not be permanently retained in the system. We thank you for notifying us of your selection.

Withdrawal Comments - gicd adviser withdrawing case.

Regards,
The Grid Interconnection & Contract Development team
To reinstate a withdrawn application:

1. Access the withdrawn application. 
   *The Reinstall Withdrawn Application screen displays.*

   ![Image of Reinstall Withdrawn Application screen](image)

   **Please select the below option to continue:**

   - **Cure**
   - **Dispute**

   **Comments**

   ![Comments field](image)

2. Select **Cure** to cancel the withdrawal you asked for, or **Dispute** to dispute a withdrawal initiated by SCE.

3. Enter Comments.

4. Click **Submit**.

SCE will review the case and notify the Customer of the action taken.
Modification

To modify an application once the Technical Evaluation results indicate the initial review has failed:

1. Access My Projects and click the case you want to modify.
2. From the Technical Evaluation Results screen, select I want to modify the request.

3. Click Submit.

Alternately, you may select Modify from the Actions drop-down list.
The Project and Contact Information screen for the case displays.

4. Click the page you want to modify (e.g., Project Information).

5. Check the **Modify** checkbox next to the area you want to modify, then click **Continue**.

6. Repeat for all pages that need modification.

7. On the Confirmation Screen, specify the exact modification you wish to make.

8. Click **Finish**.

SCE will review your request for modification. Once it is approved, you will have a task to make the changes.
Extension

You can request an extension to your original request.

Once the Fast Track Initial Review has been completed, you can request an extension of up to 10 business days to decide how to proceed.

Customers can ask for one extension during the Application Review and Technical Evaluation stages, which is automatically granted. Additional requests for extension and requests for extension during other stages must be reviewed and approved by SCE.

To request an extension during the Application Review and Technical Evaluation stages:

1. Access My Projects and click the case for which you want to request an extension.
2. Click Request Extension.

To request an additional extension or an extension during other stages:

1. Access My Projects and click the case for which you want to request an extension.
2. From the Actions drop-down list, select Extension.
The Construction Process

The assigned GCM Contract Manager will be your point of contact throughout the remainder of the life of the project.

The Construction process consists of three stages:

- Construction Initiation
- Pre-Construction
- Construction

Activities included in these stages are customer payment, document submission, review and approval, and construction completion.
Construction Initiation

As part of Construction Initiation, you are required to pay the invoice in advance of construction. GIPT sends you a notification when the advance invoice is ready, and an additional notification reminder when payment is not received within 15 calendar days. If payment is not received within 30 calendar days, GIPT sends a notification to SCE to initiate termination or extension, as appropriate.

Reviewing the Billing Address

To review the billing address:

1. Click My Projects.
2. Click the Project ID of the case for which you want to review the Work Order.

*The Review and Update Billing Address screen displays.*

3. Make changes as needed and click Submit.
Paying the Advance Invoice

To pay the Advance invoice:

1. Click **To-Do’s**.
2. Locate the Pay Invoice task.
3. Click **Begin**.

4. To make a payment through the Automated Clearing House (ACH), click **Yes**. To pay by a wire or a check, click **No**.

   Paying through ACH is done the same way you paid for the application fee. Refer to the section: Payments.
   If selected No, pay by a wire or a check, following the instructions in the invoice.
Pre-Construction

Pre-construction follows the Construction Initiation stage after confirmation that you paid the invoice in advance of Construction. You will receive a Welcome Package formally introducing the SCE team members assigned to the project and an outline of required document, where applicable.

Beginning in this stage, you will submit the required documents to the assigned SCE team for review and approval. If needed, SCE will schedule a kick-off meeting to discuss in more detail the requirements and clarify any questions you or SCE may have regarding the project.

Picking a Time for Kickoff Meeting

The purpose of a kickoff meeting is to discuss in more detail the requirements and clarify any questions you or team members may have regarding the project.

To select a time slot:

1. Access the case and view the meeting schedules provided by SCE.
2. Select from the SCE suggested time slots. If none work for you, click Add Item to propose up to three different time slots.
Welcome Package

GIPT sends the Welcome Package to you. After reviewing the package, you may initiate submission of the required documents. If a kickoff meeting is needed to discuss in more detail the requirements and to clarify any questions you or your team members may have regarding the project, you will receive a meeting request with timeslots to choose from for the meeting.

The documents required prior to commencement of Construction may include:

- Site Plan
- Switchgear Drawing
- Scoping Package

Additional documents may be submitted during Construction.

Submitting Required Documents

The Welcome Package lists all documents you are required to submit to SCE.

To submit the required documents:

1. Access the case for which you want to submit documents.
The Attach Required Documents screen displays.

2. Scroll down to reach the area where you can upload files.

3. Click Select file(s) and add the appropriate file.

4. For each newly added file, make the appropriate selection from the Category drop-down list.
5. Click **Upload**.

*The Status for each uploaded document will change from Not Submitted to Submitted.*

6. Continue uploading files until all required files are uploaded and the Status for all documents indicates Submitted.

<table>
<thead>
<tr>
<th>Protection Package</th>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>One-line Diagram</td>

</tbody>
</table>

<table>
<thead>
<tr>
<th>Customer’s Commissioning Test Documentation</th>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>Certificate of Liability Insurance</td>
<td>Submitted</td>
</tr>
</tbody>
</table>

SCE will review that all required documents are submitted as requested.

**Reviewing Additional Submitted Documents**

SCE may submit additional documents for your review. Access the case and review any additional documents submitted by SCE.
Construction

Construction follows the Pre-Construction stage and includes actual build of needed upgrades as well as ongoing review and approval of the required documents that you have submitted.

The completion of the Construction and install of the upgrades will trigger the Operations and Maintenance (O&M) billing.
Commissioning Test

The Commissioning Test is triggered by SCE acknowledging that Commissioning Test can begin so that the Customer can request a specific time for the test to be conducted, unless SCE has determined that Commissioning Test does not have to be witnessed. Testing is witnessed by Field Engineers during the commissioning of all or part of a Generating Facility. During this test the engineers visually confirm the Generating Facility’s Single Line Diagram, Protection Settings, Ground Banks or Ground Detector Test, and anti-islanding test as specified in the Rule 21 Tariff.

Request to Schedule for SCE to Witness Commissioning Test

The Commissioning Test starts with you providing preferred time slots for the test, unless SCE has determined that Commissioning Test does not have to be witnessed.

To request a Commissioning Test:

1. Access the Commissioning Test screen in GIPT.
2. Check the radio button: SCE witness commissioning test.
3. Select up to three different time slots for the test.
4. Click **Submit**.

*The case is routed to the Engineer, who may either accept any of your requested time slots or counter with other time slots for the test.*
Commissioning Test Results

Commissioning Test can result in one of the following:

- Pass – Full Permission to Operate (PTO); or
- Pass – Conditional PTO; or
- Fail
Commissioning Test PASS Result with Full PTO or Conditional PTO

Upon completion of the Commissioning Test, you will receive an email with the result of the test along with an attached pdf copy of the Conditional or Final PTO Letter authorizing to interconnect and operate the Generating Facility in parallel with SCE’s Distribution System.

Sample email in case of Full PTO:

Dear Interconnection Customer,

Please see enclosed Authorization to Interconnect and Operate Generating Facility for GFID101019.

Sample PDF letter in case of Full PTO:

3/21/2020

First Line
Alert Co.
Address Address 1
City: City
State: California
Zip: 91768

Subject: Authorization to Interconnect and Operate the Generating Facility (GFID1001019)

Dear Mr. /Ms.

On 3/25/20, Southern California Edison Company ("SCE") completed its inspection of First Line's ("Producer") Electrical Components and verified Producer's Generating Facility and reviewed the documentation showing compliance with the technical provisions of SCE's Rule 21 Tariff. Accordingly, as of the date of this letter, Producer is authorized to interconnect and operate its Generating Facility in parallel with SCE's Distribution System subject to the terms of the GFID1001019.

Generating Facility:
- Project Name: Dagr2/CAT - Parallel/Transducer/SCW Witnessed CT/OMA and Final Billing
- Address: Address 1
- City: California
- Zip: 91768
- Technology: Energy Storage
- Capacity: 174 kW
- CA: 1234567899

If you have any questions, please feel free to contact me by e-mail at CAMACHO@sce.com.

Sincerely,

Jason V.

Sample PDF letter in case of Conditional PTO:

3/24/2020

First Last
AW#: First Last
Address: Address 1
City: City
State: California
Zip: 91768

Subject: Conditional Authorization to Interconnect and Operate the Generating Facility (GFID100981)

Dear John Doe:

On 3/23/20, Southern California Edison Company ("SCE") completed its inspection of First Last's ("Producer") Electrical Components serving Producer's Generating Facility and reviewed the documentation showing compliance with the technical provisions of SCE's Rule 21 Tariff. Accordingly, as of the date of this letter, Producer is conditionally authorized to interconnect and operate its Generating Facility in parallel with SCE's Distribution System subject to the terms of the GFIA GFID100981.

Generating Facility:
Project Name: Drnp1 UAT - Parallel/Telemetry/Self Cont CTR
Address: Address 1
City, California: 91768
Technology:
Capacity: 100
SA: 1234567899

The condition(s) for parallel operation are as follows:

Pending installation of Telemetry

Please be advised that failure to complete the above condition may result in SCE revoking its conditional authorization for Producer to interconnect and operate its Generating Facility in parallel with SCE's Distribution System.

If you have any questions, please feel free to contact me by e-mail at CAMACHE@SCE.COM.

Sincerely,

Mr. Getty

CC: File GFID100981
Commissioning Test FAIL Result

If the Commissioning Test result failed, you will also receive an email notification of the result with an explanation of the failure and mitigation needed before another Commissioning Test can be performed.

Sample email in case of Fail condition:

---

GFID101008  Drop2 UAT - Parallel/NGOM/SCE Witnessed CT did not meet the commissioning test requirements conducted 3/24/2020, at 91768  City  California due to the following:

Customer Equipment

Please address the mitigation to be eligible for a re-test.

Upon resolution of the deficiencies identified, you may request for a commissioning re-test. Where applicable, we will invoice you the cost of a re-test in accordance with the Rule 21 Tariff, Section E.2.

Commissioning Re-test Expenses, if Applicable

Additional expenses for SCE Witnessed Commissioning tests may be invoiced to you as provided for in the Rule 21 tariff.
Final Billing

Final Billing delivers to you an invoice of the final cost of construction of the Interconnection Facilities and Distribution Upgrades.

During Final Billing, SCE refunds any amount, by which the actual payment for estimated costs exceeds the actual costs of construction, within thirty (30) Calendar Days of the issuance of the final construction invoice. In the event the actual costs of construction exceed the actual payment for estimated costs, the customer must pay to the SCE any amount by which the actual costs of construction exceed the actual payment for estimated costs within thirty (30) Calendar Days of the issuance of such final construction invoice.

Confirming Billing Address

You should confirm your billing address prior to the Final Invoice being sent to you. To confirm your final billing address:

1. Log on and access the case that is ready for the Final Invoice.

   The Confirm Customer Billing Address screen displays.

   ![Confirm Customer Billing Address Screen]

   2. Confirm that all fields are correctly populated. Make changes as appropriate.

   3. Click Submit.

Final Bill Payment

Once you receive the Final Billing Payment notification via an email generated by GIPT, pay the invoice the same way you paid the application fee. Refer to the section: Payments.

No action is required from you in the case of a refund.
Long-Term Management

Issuing the Final PTO or completion of final billing, where applicable, triggers transition to Long-Term Management. Interconnection Agreements continue to be in effect into perpetuity until terminated in accordance with provisions of the agreement.

Details and updates can be made regarding Operating representatives’ details after contract development all the way through Long-Term Management.

The table below lists what you can do during this stage.

<table>
<thead>
<tr>
<th>You can…</th>

**Renewal of Certificate of Liability Insurance**

Upon approaching the insurance expiration date, GIPT sends you an e-mail notification 60 calendar days prior to that date, requesting that you submit a renewed Certificate of Liability Insurance through GIPT. SCE will review the document for compliance with the requirements of the [Generating Facility Interconnection Agreement](#) (GFIA).
Optional Processes

This section explains how you can update your billing address.

Updating a Billing Address

You can update their billing address any time after the contract is executed. To update the address:

1. Access a case that is past the Contract Development stage.

2. From the Actions drop-down list, select **Update Billing Address**.
The following window displays.

<table>
<thead>
<tr>
<th>Is the Billing Address Correct?</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Billing Address</strong> *</td>
</tr>
<tr>
<td>111 Main St.</td>
</tr>
<tr>
<td><strong>Country</strong> *</td>
</tr>
<tr>
<td>USA</td>
</tr>
<tr>
<td><strong>State</strong> *</td>
</tr>
<tr>
<td>California</td>
</tr>
<tr>
<td><strong>City</strong> *</td>
</tr>
<tr>
<td>Arcadia</td>
</tr>
<tr>
<td><strong>Zip Code</strong> *</td>
</tr>
<tr>
<td>98989</td>
</tr>
</tbody>
</table>

3. Update your billing address.
4. Click **Submit**.
Termination

SCE and Customers may terminate an agreement any time after the Interconnection Agreement is executed.

Once terminated, any Agreements attached to and incorporated into the terminated Agreement shall terminate concurrently with the Agreement.

In case SCE initiates the termination, it may be remediated as determined appropriate by SCE. For example, if an overdue invoice is paid by the Customer.

Monthly Operations and Maintenance (O&M) charges, as applicable, will also terminate on the Agreement’s effective termination date.

Termination Initiated by SCE

Termination is Eligible for Curing

If SCE initiates a termination, you will receive a Notice of Intent to Terminate.

The Notice of Intent to Terminate allows for the Customer to respond within 60 calendar days from the time the notice was sent. If the Customer takes no action or the action taken by the Customer is not acceptable to SCE, the Agreement is officially terminated on the 61st calendar day from the date of the notice.

Dear Interconnection Customer,

This is a notification of SCE’s intent to terminate GFDID05129 - DoNotUse_DemoDataTermination1 due to the following reason/s and, if applicable, mitigation to re-instate the project status to active:

1. Reason: Payment  - Mitigation: Please pay the amount

The project is deemed terminated if an acceptable resolution is not reached or no action is taken by 9/15/2020

Thanks,

GCMManager1

tresa.________@sce.com
Grid Contract Manager
Customer Curing the Termination:

If a termination is eligible for curing and the Customer wants to cure the termination:

1. Log on and access the case for which you want to cure termination.
2. Select **Cure Termination**.
3. In the case where an overdue invoice needs to be paid, click **Make a Payment** and proceed to make the appropriate payment.
4. In the Comments field, enter a comment as needed.

5. Click **Submit**.

The case is routed to SCE.

Customer Proceeding with Termination:

If a Customer chooses to proceed with the termination:

1. Log on and access the case you want to terminate.
2. Select **Proceed with Termination**.
3. Click **Submit**.
Termination Initiated by Customer

This section covers a termination initiated by the Customer, when the removal charges are the responsibility of the Customer, as defined in the Interconnection Agreement.

To terminate an Agreement:

1. Log on and access the case you want to terminate.
2. From the Actions drop-down list, select **Terminate**.

*The Confirm Termination window displays.*
3. Attach the notice of termination with the company letterhead, signed by an authorized representative.

4. Enter a comment as needed.

5. To proceed with the termination, click Yes.

SCE will be notified of your wish to terminate the Agreement.
Updating Project Information Post Contract Execution

Amending Project Information

Customers may amend their project information any time after contract execution. To initiate an amendment:

1. Log on to GIPT and access the case for which you want to initiate an amendment.

2. From the Actions drop-down list, select **Initiate Amendment**. The Assignments screen displays, with the task “Modify change request” assigned to the Customer.

3. Click **Begin**.
## Customer Identifying Change Request

Customers can amend information under any of the areas on the right.

![Image of the Grid Interconnection Processing Tool (GIPT) User Guide for Customers]

1. Locate the area you want to amend and enter the new information (e.g., the Project Name, the Service Account Number, the Name Shown on SCE Service Account).
2. When done with all amendments, click **Amendment Confirmation**.

3. Click **Finish**.

The case is forwarded to SCE for review of the amendment request.

**Customer Making Changes as Required**

To make changes as required by SCE:

1. Access the case for which you want to modify the change request.
2. Access the **Comments** tab in Case 360 to identify the requested changes.

3. Make changes as needed.
4. When done with the amendments, click **Amendment Review**.

5. Attach documents if needed.

6. Click **Finish**.

The case is forwarded to SCE.
Assignment Assumption and Consent Agreement

The Assignment Assumption and Consent Agreement process is an assignment of all rights, title, interest in, and obligations to an Assignee. This includes all terms and conditions of the Assigned Agreement. The assignee assumes the timely performance of all terms, covenants, duties, obligations, and conditions stated in the Assigned Agreement, such as GFIA. SCE must consent to the assignment of all the rights, titles, and interest in and to the Assigned Agreement. Upon completion of the Assignment Assumption and Consent Agreement, the assignee becomes the counterparty to the Assigned Agreement.

Initiating an Assignment Assumption and Consent Agreement

To initiate an Assignment Assumption and Consent Agreement:

1. Log on to GIPT and access the case for which you want to initiate an Assignment Assumption and Consent Agreement.

2. From the Actions drop-down list, select Consent to Assignment.
The Assignment Assumption and Consent Agreement window displays.

3. Click **Yes** to proceed.
Entering New Assignee’s Details

Once you initiate an Assignment Assumption and Consent Agreement, the Enter Assignee Details screen displays.

1. Enter the new assignee’s details.

   You must specify the assignee relationship to the assignor.

   You must also specify the assignee username and email. The new assignee should be registered with GIPT. If an assignee is not registered with GIPT, an error message displays, and you will be unable to move forward.
2. Scroll down to the bottom of the screen.

![Image of the Grid Interconnection Processing Tool (GIPT) User Guide for Customers]

3. Attach the necessary documents:
   a. Assignee’s Secretary of State certificate confirmation
   b. W9 of the assignee
   c. Certificate of Merger
   d. Other documents as applicable

4. Enter a comment as needed, then click **Submit**.

**Revising Assignee’s Details**

If SCE returns the case for corrections, make the necessary revisions and resubmit the case for another review by SCE.
FAQ

For a list of frequently asked questions and answers about GIPT, scroll down on the following page, and access the Frequently Asked Questions (FAQs) link online.
