

Rush Creek Project Relicensing

Pre-Application Document Overview / Technical Study Plan Development Webinar

On December 16, 2021, Southern California Edison Company (SCE) filed with the Federal Energy Regulatory Commission (FERC) its Notice of Intent (NOI) to file an Application for New License and Pre-Application Document (PAD) for the Rush Creek Project (Project), FERC Project No. 1389. SCE's filing of the NOI and PAD with FERC formally initiated the relicensing process for the Project and the associated regulatory deadlines specified in the Integrated Licensing Process.

SCE invites all stakeholders to attend a webinar (Microsoft Teams Meeting) on January 20, 2022. The purpose of the webinar is to discuss (1) 2022 FERC relicensing milestones; (2) PAD content and organization, including Draft Technical Study Plans (TSP); and (3) the process for enhanced Stakeholder collaboration to review and discuss Draft TSPs, including establishment of future Technical Working Group (TWG) meetings. SCE will conduct a series of TWG meetings February through April 2022. Information regarding upcoming TWG meetings will be distributed in early January.

Specific webinar details are as follows:

Date:	January 20, 2022
Time:	9:00–11:00 am
Webinar Link:	Provided in Teams Meeting Invitation (to be sent separately)
Dial-in (audio only):	Provided in Teams Meeting Invitation (to be sent separately)

For additional information about the Project and upcoming events, visit the Project website at www.sce.com/rushcreek. If you would like to participate in TWG meetings, please register on the Project website. If you would like to be removed from future communication regarding this Project, please contact Julie Smith at julie.smith@cardno.com.
