2020 PROSPECTIVE PRODUCT CONTENT LABEL [1]

SCE's Green Rate program matches 50 or 100% of your electricity usage. In 2020, SCE's Green Rate program will be made up of the following new renewable resources averaged annually.

Green-e Energy Certified New[2] Renewables in Green Rate, 2020		Generation Location
Solar	100%	California
Total Green-e Energy Certified New Renewables	100%	

1. These figures reflect the renewables that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you before August 1 of next year in the form of a Historic Product Content Label the actual resource mix of the electricity you purchased.

2. New Renewables come from generation facilities that first began commercial operation on January 1, 2014 or later.

For comparison, the current average mix of resources supplying SCE includes: Coal (0%), Nuclear (6%), Biomass & Waste (1%), Geothermal (8%), Solar (13%), Wind (13%), Natural Gas (17%), Eligible hydroelectric (1%), Large Hydroelectric (4%), and Unspecified Sources (37%). This resource mix was prepared in accordance with the SCE 2018 Power Content Label.

The average home in SCE's territory uses 506 kWh per month. [Source: SCE, 2018] For more information about SCE's Green Rate Program, please contact SCE at 866-701-7867or visit on.sce.com/greenrate.
