

December 3, 2014

Dear Neighbor,

The following is an important update about construction of Southern California Edison's (SCE) Saugus System Split Project in the City of Santa Clarita. As you may be aware, equipment upgrades inside several existing SCE electric substations commenced in June of this year and continuing on schedule. SCE's next phase of work consists of constructing an approximately 4.7 mile, new underground 66 kilovolt (kV) electric line, as shown on the route map on the back of this letter. These upgrades will allow SCE to serve growing customer demand and strengthen the safety and reliability of our electrical system in the area.

Here are a few things you should know about the project:

#### **Construction Activities**

- Use of large construction equipment and vehicles along the project route, as shown on the route map below
- Excavation on surface streets along project route
- Installation of one 110 ft. tubular steel pole

#### **Anticipated Construction Schedule\***

- The 66 kV circuit construction will extend from approximately December 8, 2014 through June 2015
- In accordance with City of Santa Clarita requirements, construction hours on surface streets will typically be Monday through Saturday from 8:30 p.m. to 4:30 a.m. This work will require use of artificial lighting.
- Construction hours at project substations will be from 7:00 a.m. to 5:00 p.m.

*\*This schedule may change due to weather and other factors*

#### **What You Can Expect**

- Construction activities may require temporary periods of lane and possibly sidewalk closures. Alternative routes (street and sidewalk) will be set up in the event of these closures.
- SCE will use a combination of traffic control signs and crew members with flags to ensure vehicle and pedestrian safety.
- Excavation sites will be temporarily restored until project is complete at which time permanent restoration will take place.

On behalf of SCE, thank you for your patience as we complete these upgrades and continue to provide safe and reliable electrical service to the area.
