

# Site Eligibility Inquiry Requirements

In order for SCE to promptly determine if the proposed location is eligible to participate in the LCR RFO, prospective bidders must provide ONE of the following three items to SCE:

1. Provide SCE with a pole # near the location of the POI. The pole # is located on every SCE pole on the bottom portion of the pole. The pole number is typically composed of up to seven (7) numbers with an "E" at the end (1234567E) An example is shown below:

2. Provide SCE with a padmount structure # near the location of the POI. The structure # is located on every SCE structure (typically green boxes on the ground). The padmount structures #s are composed of a "P" followed by seven (7) digits. An example is shown below:

3. If the project is proposed at the location of an existing customer, provide the SCE meter number serving the existing customer. An example is shown below where the SCE meter number is shown as “V345R-005000”:

Include this information in your email to [LCR.RFO@sce.com](mailto:LCR.RFO@sce.com)
