### October 27, 2017

Hon. Kimberly D. Bose, Secretary Federal Energy Regulatory Commission 888 First Street, N.E. Washington, DC 20426

RE: Southern California Edison Company Docket No. ER18-\_\_\_\_- 000

# Southern California Edison Company's Transmission Owner Tariff Rate Filing

Dear Ms. Bose:

Pursuant to Section 205(d) of the Federal Power Act, 16 U.S.C. § 824d (2012), and Section 35.13 of the Federal Energy Regulatory Commission's ("FERC" or "Commission") regulations (18 C.F.R § 35.13) (2016), Southern California Edison Company ("SCE") tenders for filing revisions to its Transmission Owner Tariff ("TO Tariff"), FERC Electric Tariff, Volume No. 6. The filing includes a formula rate for the costs associated with SCE's transmission facilities (the "proposed Formula Rate" or "TO2018").

SCE is making this filing as required in the Section 2.5 of the Settlement of SCE's currently-effective Formula Rate (the "Original Formula Rate"), which specifies that the

-

SCE's Original Formula Rate was filed on June 3, 2011 in Docket No. ER11-3697, and became effective January 1, 2012 pursuant *Southern California Edison Co*, 136 FERC 61,074, issued August 2, 2011.

Original Formula Rate expires at the end of 2017 unless the rate proposed in this filing had not yet been made effective by the Commission.

Additionally, the protocols to the Original Formula Rate require that SCE must file a replacement rate mechanism to recover SCE's Commission-jurisdictional transmission costs no later than 60 days prior to January 1, 2018, and that SCE shall request an effective date of January 1, 2018 in that filing:

"Except as set forth below, the Formula Rate shall terminate December 31, 2017. SCE shall submit a filing under Section 205 of the Federal Power Act by no later than 60 days prior to December 31, 2017, proposing a transmission rate schedule, which may include revised transmission rates. The rates and other components of such filing shall be at SCE's sole discretion, and may be in the form of a formula rate or a traditional stated rate. Parties retain all rights to oppose the filing. Such filing shall request an effective date of January 1, 2018. In the event that the Commission does not permit the proposed rate schedule and the associated rates to become effective on January 1, 2018, this Formula Rate shall remain in effect until the date that the rate filing is made effective by the Commission. (Original Formula Rate Protocols, Section 2)"

SCE is meeting these requirements by filing a new proposed Formula Rate with a requested effective date of January 1, 2018.

# I. BACKGROUND

SCE herein presents its proposed TO2018 Transmission Formula Rate.

Transmission infrastructure plays a vital role in SCE's commitment to provide its customers with safe, reliable and environmentally responsible power. The backbone for moving electricity to power our domestic economy, energize our workplaces, comfort our homes and enhances the livelihoods of everyone in our communities is the transmission

system. Transmission infrastructure will play a growing and increasingly important role in meeting environmental objectives, interconnecting advanced new generation technologies, powering transportation and enabling an expanded electricity based economy. In fact, SCE has been engaged in a multi-year period of exceptional growth in its transmission investments, driven primarily by renewable goals set by the State of California. However, California is now in the middle of an industry transformation. The influx of Distributed Energy Resources and growth of renewable energy are causing a profound shift from one-way to two-way power flow, changing the timing and nature of load peaks on the system. Integrating distributed generation with SCE's transmission system is capital intensive and complicated, but it is necessary to achieve operational flexibility. This energy revolution provides great opportunities, but also presents a significant amount of uncertainty. The well designed, transparent and equitable rate included in this proposed Formula Rate will help ensure customers realize the benefits of a safe, reliable and environmentally responsible Transmission grid by enabling the continued investment and maintenance necessary to deliver these essential services, conveniences and betterments.

On April 1, 1998, SCE unbundled its retail transmission rates and transferred Operational Control of its network transmission facilities to the California Independent System Operator Corporation ("CAISO"). As the result of these events, the Commission gained jurisdiction over SCE's retail transmission rates, complementing its existing jurisdiction over SCE's wholesale transmission rates. SCE filed its Transmission Owner

Tariff ("TO Tariff") and its first proposed Base Transmission Revenue Requirement ("Base TRR")<sup>2</sup> on March 31, 1997 in Docket No. ER97-2355.

From April 1, 1997 through December 31, 2011, SCE's Base TRR was established through "Stated Rate" TRR filings.<sup>3</sup> On June 3, 2011, SCE filed a TRR filing requesting a formula rate in Docket No. ER11-3697. The filing was accepted and suspended, set for hearing and settlement procedures, and given a January 1, 2012 effective date. The parties to Docket No. ER11-3697 engaged in settlement negotiations and the Commission approved the settlement on October 11, 2013. Beginning on January 1, 2012, SCE's Base TRR has been established pursuant to the Original Formula Rate, with Annual Update filings being submitted each year covering a calendar year term.<sup>4</sup> SCE's Formula Rate consists of two components: 1) the Formula Rate Protocols ("Formula Protocols," Attachment 1 to Appendix IX of SCE's TO Tariff); and 2) the Formula Rate Spreadsheet ("Formula Spreadsheet," Attachment 2 to Appendix IX of SCE's TO Tariff). The

<sup>&</sup>lt;sup>2</sup> The Base TRR reflects SCE's costs of owning and operating its transmission facilities that are under the CAISO's Operational Control.

SCE made five stated rate TRR filings to recover its Base TRR for the period April 1, 1997 through December 1, 2011 in Dockets No. ER97-2355, ER02-925, ER06-186, ER08-1343, and ER09-1534. SCE refers to these filings as TO1 through TO5 (for "Transmission Owner Base TRR filing No. 1", etc.). Additionally, SCE also had a complementary formula mechanism to recover Commission-approved Construction Work In Progress ("CWIP") Base TRR costs from the period March 1, 2008 through December 31, 2011 (see Docket Nos. ER08-375 and EL07-62). The separate CWIP formula mechanism was terminated upon the establishment of the Original Formula Rate, since CWIP costs are included in the Formula Rate.

<sup>&</sup>lt;sup>4</sup> SCE's initial Formula Rate filing is referred to as TO6, and the subsequent Annual Update filings (each submitted in ER11-3697) are referred to as the TO7 through TO11 Annual Updates. SCE's current transmission rates for the 2017 year are as filed in the TO11 Annual Update. SCE is proposing to call this proposed Formula Rate TO2018.

Formula Protocols set forth process-related items, such as the Annual Update filing timeline, as well as various requirements that SCE must meet in Annual Update informational filings or while the Formula Rate is in effect. The Formula Spreadsheet is the set of calculations that SCE must follow in calculating its Base TRR.

### II. PURPOSE OF FILING

As stated above, SCE is required to make a new rate filing pursuant to Section 2 of the protocols of the Original Formula Rate. SCE is filing a successor proposed formula rate for a number of reasons. First, the Commission has supported the use of formula rates by transmission service providers. Second, SCE has gained experience with formula rates throughout the term of the Original Formula Rate, and that experience has been generally positive. SCE's Annual Update process, which takes place each year during the five and one-half month period from June 15 to December 1, has resolved issues identified and raised by transmission customers to the apparent satisfaction of those customers. As evidence, none of SCE's Original Formula Rate Annual Update filings, TO7-TO11, were protested. That is consistent with the reason the Commission generally favors formula rates—they reduce litigation and conserve the parties' and Commission's resources and administrative costs as compared to annual stated rate filings. Finally, formula rates provide both SCE and its customers with greater confidence that costs will be accurately recovered. Compared to a stated rate, the

formula reduces the risk of either over or under recovering cost due to the imprecise nature of forecasts associated with stated rates.

In addition to the proposed Formula Rate, SCE is also including in this filing a proposed TO2018 Base TRR and associated retail and wholesale transmission rates based on the proposed Formula Rate, to be effective January 1, 2018. The proposed TO2018 Base TRR and associated retail and wholesale transmission rates are based on the proposed Formula Rate Spreadsheet, populated with cost and forecast inputs (as shown in Exhibit No. SCE-4).<sup>5</sup>

Under the proposed rates, SCE's proposed Base TRR for calendar year 2018 (effective January 1, 2018) will be \$1,169,306,623. This compares to the current Base TRR of \$1,188,757,628, which includes a positive \$94.2 million True Up Adjustment related to prior years, filed by SCE in its 2016 TO11 Annual Update and in effect for calendar year 2017.<sup>6</sup> SCE is proposing changes to the True Up Adjustment mechanism that will prevent what would otherwise be a positive \$59.6 million True Up Adjustment

As explained below, SCE will be filing a TO12 Annual Update contemporaneously with this filing in Docket No. ER11-3697, as is required by the Original Formula Rate protocols. The Original Formula Rate TO12 filing will only be used to calculate SCE's actual TRR costs for the 2016 year if the Commission accepts this proposed Formula Rate effective January 1, 2018. However, in the event that the Commission does not accept the proposed Formula Rate effective January 1, 2018, then the Original Formula Rate will remain in effect until a new formula rate is accepted by the Commission, and the Original Formula Rate TO12 filing Annual Update will initially set the Base TRR for 2018 (see Section III below).

Even though SCE is proposing revisions to the Formula Rate that will increase SCE's actual costs, as defined by the True Up TRR, SCE's proposed 2018 Base TRR is actually lower than its 2017 Base TRR. In part, this decrease in Base TRR from 2017 to 2018 is related to the operation of the Formula Rate True Up Adjustment mechanism.

(*i.e.*, additional charge) in 2018 that is not necessary to ensure that SCE recovers its cumulative undercollection. Instead, SCE's proposed True Up Adjustment for 2018 is negative \$39.6 million. Mr. Hansen explains the revised True Up Adjustment mechanism in Exhibit No. SCE-3 (pp. 23-24). The major revisions that SCE is proposing to make to the proposed Formula Rate relative to the Original Formula Rate are explained fully in Section V below.

SCE's proposed Formula Rate maintains the same basic structure as the Original Formula Rate (*see* Section IV. A below). However, SCE is proposing several revisions relative to the Original Formula Rate that SCE feels will: 1) Improve the operation of the Formula Rate, including moving SCE's Formula Rate closer to industry standard practice for Formula Rate recovery of certain costs; 2) Reflect what SCE believes is Commission policy with respect to the recovery of certain costs; or 3) Reflect current market and regulatory conditions with respect to certain stated values in the proposed Formula Rate (such as Return on Equity or Depreciation Rates). These revisions incorporated in the proposed Formula Rate are explained in Section V below and in the testimony of Mr. Jeff Nelson, Exhibit No. SCE-1. A full list of all proposed revisions to the Formula Rate is included in Exhibit Nos. SCE-5 (Formula Spreadsheet Revisions) and SCE-6 (Formula Protocol Revisions).

### III. EFFECTIVE DATE

SCE requests that that the Commission accept the proposed Formula Rate set forth in this filing with an effective date of January 1, 2018 without suspension or hearing.

As explained in the testimony of Mr. Jeff Nelson, Section 2 of the protocols to SCE's Original Formula Rate requires that SCE request an effective date of January 1, 2018 in this filing. Section 2 of the Original Formula Rate protocols goes on to state that: In the event that the Commission does not permit the proposed rate schedule and the associated rates to become effective on January 1, 2018, this Formula Rate shall remain in effect until the date that the rate filing is made effective by the Commission.

# IV. DESCRIPTION OF FILING

# A. Overview of the Proposed Formula Rate

SCE's Base TRR is calculated by the Formula Rate according to the following basic formula.8

Base TRR = Prior Year TRR +

Incremental Forecast Period TRR ("IFPTRR") +

SCE's TO12 Annual Update, being filed concurrently with this filing pursuant to the Original Formula Rate determines the Base TRR for 2018 as \$1,175,390,763 (Schedule 1, Line 86).

Under certain conditions, as set forth Section 1 of the Formula Protocols, SCE may also include a "Cost Adjustment" as a fourth component of the Base TRR. The purpose of the Cost Adjustment provision is to allow an adjustment to the Base TRR to reflect known unusual one-time changes to costs. Mr. Hansen fully explains the Cost Adjustment feature of the Formula Rate in his testimony, Exhibit No. SCE-3. Although permitted, SCE has not had a need to include a Cost Adjustment in any of its Annual Update filings under the Original Formula Rate.

# True Up Adjustment

#### Where:

- The Prior Year TRR represents SCE's costs of owning and operating SCE's CAISO-controlled transmission facilities, with rate base components being based on End-of-Year values for the Prior Year.<sup>9</sup>
- The Incremental Forecast Period TRR represents the incremental TRR
  costs that SCE is projected to incur during the Rate Year relative to
  those already included in the Prior Year through the Prior Year TRR
  component.
- The True Up Adjustment component of the Base TRR reflects the difference between SCE's actual costs of owning and operating its CAISO transmission assets during the Prior Year, and the actual retail transmission revenues that SCE received during the Prior Year. It is included as a component of the Base TRR to ensure that SCE recovers its actual costs of owning and operating its transmission system over time. To determine the True Up Adjustment, SCE's Formula Rate

The "Prior Year" is the calendar year previous to the year that the Annual Update is submitted. The Annual Update sets the Base TRR for the "Rate Year," which is the calendar following the year the Annual Update is submitted. There is thus a two-year difference between the Prior Year and the Rate Year.

calculates a "True Up TRR," which is the measure of SCE's actual

Base TRR costs incurred during the Prior Year.

# **B.** The Annual Update Process

The proposed Annual Update process is set forth in the Section 3 of the Formula Protocols, and includes the following aspects:

- 1) On or before June 15 of each year, SCE will post on its website a "Draft Annual Update" which will include substantially all aspects of the Annual Update informational filing (Section 3.a of the proposed Formula Rate Protocols).
- 2) On or before July 15 of each year, a Draft Annual Update conference is to be held, the purpose of which is for SCE to meet with customers to discuss the Draft Annual Update (Section 3.b of proposed Formula Rate Protocols).
- 3) Between the period from June 15 to November 1, customers may submit data requests to SCE, and SCE shall make a good faith effort to respond to information requests in writing within ten business days (Section 3.c of proposed Formula Rate Protocols).
- 4) On or before December 1 of each year, SCE will submit the Annual Update informational filing (Section 3.d of proposed Formula Rate Protocols).

5) On January 1 of the following year, the Base TRR and associated retail and wholesale transmission rates included in the Annual Update filing will be placed into effect (Section 3.d of proposed Formula Rate Protocols).

SCE is not proposing any revisions to the Annual Update process relative to the process in the Original Formula Rate.

### C. Allocation of Costs Between CAISO and Non-CAISO

Not all of the costs that SCE books as Transmission in its accounting system and reports to the Commission in its annual FERC Form No. 1 filings are Commission-jurisdictional. A significant portion of SCE's plant booked as Transmission plant, or costs booked as Transmission Operations and Maintenance ("O&M") costs, represent costs that are under the California Public Utilities Commission ("CPUC") jurisdiction. Accordingly, SCE must determine for ratemaking purposes the portion of Transmission plant and Transmission O&M costs that are Commission jurisdictional.

To determine the portion of plant booked for accounting purposes as Transmission Plant that is under the CAISO's Operational Control and therefore is Commission-jurisdictional (ISO Transmission Plant), SCE performs an annual Transmission Plant Study. The Transmission Plant Study examines all facilities that are booked as Transmission Plant and determines what portion of the facilities are ISO Transmission Plant. Mr. Jacob Moon fully supports and explains the Transmission Plant Study in his testimony, Exhibit No. SCE-9.

SCE's proposed Formula Rate also includes a mechanism to determine the portion of total Transmission O&M expense that is related to the ISO Transmission Plant and will be recovered through the proposed Formula Rate. As explained below, SCE is proposing revisions to the determination of ISO Transmission O&M expense in this proposed Formula Rate relative to the Original Formula Rate in order to better align SCE's Formula Rate with industry practices for Formula Rate recovery of Commission-jurisdictional O&M Expenses. Mr. Daniel Allstun explains how SCE's proposed revisions to O&M Expense recovery are consistent with cost causation, improve transparency and replicability, and better align with industry practices for O&M Expense recovery in his testimony, Exhibit No. SCE-10. Mr. Jacob Moon fully supports and explains the overall Transmission O&M Expense determination in his testimony, Exhibit No. SCE-9.

# D. Transition from the Original Formula Rate to the Proposed Formula Rate

The Original Formula Rate includes a provision for a "Final True Up Adjustment" for the Original Formula Rate, <sup>10</sup> which states that SCE is entitled and required to recover any costs through the term of the Original Formula Rate. Accordingly, although SCE is

See Section 4 of the Original Formula Rate protocols: "If the Final True Up Adjustment reflects an undercollection by SCE, then SCE shall be entitled and required to recover the amount of this Final True Up Adjustment in SCE's successor transmission rates to the Formula Rate. If the Final True Up Adjustment reflects an overcollection by SCE, then SCE shall be required to refund the amount of this Final True Up Adjustment to its customers."

proposing an effective date of January 1, 2018 for this Formula Rate, the Original Formula Rate will still be utilized for the purpose of calculating the True Up TRRs for both the 2016 and 2017 years. The True Up TRR for the 2016 year calculated using the Original Formula Rate is being submitted contemporaneously with this filing, in accordance with Section 4 of the Formula Rate protocols:

"SCE shall file the Annual True Up Adjustment for calendar year 2016 with the Commission concurrently with the Section 205 filing addressed in Section 2 above, which is to replace this Formula Rate, effective on January 1, 2018."

In this filing, SCE is proposing provisions that will ensure that the True Up TRRs for the period of time the Original Formula Rate was in effect are calculated pursuant to the Original Formula Rate. Specifically, revised Section 6 of the proposed Formula Rate protocols ("Transition of the Original Formula Rate to the Formula Rate") explains that "The Formula Rate Base TRR and associated rates for the Rate Years 2018 and 2019 shall reflect a True Up Adjustment that is based on a True Up TRR for the years 2016 and 2017 respectively calculated pursuant to the Original Formula Rate." This requirement is implemented in the calculation of the True Up Adjustment component of the proposed 2018 Base TRR for the proposed Formula Rate. The testimony of Mr. Hansen explains the implementation of this transition provision testimony, Exhibit No. SCE-3.

<sup>1</sup> 

Also, in the event that the Commission does not accept SCE's proposed Formula Rate with an effective date of January 1, 2018, the Original Formula Rate will remain in effect for some period of time in 2018, as explained in Section III. In that event, the True Up TRR for the portion of 2018 that the Original Formula Rate was in effect will also be calculated using the Original Formula Rate.

# E. Return on Equity

The Return on Equity ("ROE") in the proposed Formula Rate reflects a base ROE of 10.3% and a 50 basis point adder for ISO participation as approved by the Commission. <sup>12</sup> It also reflects the specific project incentive adders that SCE has received for certain transmission projects. <sup>13</sup> The base ROE requested by SCE is supported by the analysis and testimony of Dr. Paul Hunt in Exhibit Nos. SCE-17-21. Dr. Hunt provides an appraisal of the cost of equity to SCE and concludes that a base ROE of 10.3% is just and reasonable and will allow SCE to attract capital on reasonable terms.

Dr. Hunt's evaluation and recommendation is based on using SCE's expanded two-step Discounted Cash Flow (DCF) methodology. This methodology is based on the Commission's two-step DCE methodology from Opinion No. 531<sup>14</sup> but uses enhanced input assumptions which result in an expanded proxy group and additional sources of short-term growth rates. Dr. Hunt also offers an enhanced approach to removing outlying utilities from the proxy group. Dr. Hunt evaluates the Commission's most recent guidance and policy objectives, including the guidance provided in Opinion Nos. 531

 $<sup>^{12}</sup>$  Southern California Edison Co., 121 FERC  $\P$  61,168 (2007) at P 158.

The Commission has authorized the following transmission project adders: the Rancho Vista, 0.75 percent; Tehachapi, 1.25 percent; and Devers-Colorado River, 1.00 percent. *See, Southern California Edison Co.*, 121 FERC ¶ 61,168 (2007) at P 129 and *Southern California Edison Co.*, 132 FERC ¶ 61,213 (2010).

<sup>&</sup>lt;sup>14</sup> Martha Coakley et al. v. Bangor Hydro-Electric Co. et al., Opinion No. 531, 147 FERC 61,234 (2014) ("Opinion No. 531").

and 551. 15 examines the recent D.C. Circuit court decision in *Emera Maine* 16 and reviews alternative methods to determine Return on Equity in addition to those applied by the Commission in Opinion Nos. 531 and 551. To determine whether SCE's requested 10.3% base ROE was just and reasonable, Dr. Hunt first assembled a proxy group of comparable electric utilities using the proxy group screening criteria set forth in Opinion Nos. 531 and 551. Those proxy group screening criteria, however, produced a proxy group of just ten utilities. Dr. Hunt determined that the proxy group parameters set forth in Opinion Nos. 531 and 551 were overly stringent in these circumstances and that many companies that are comparable to SCE fell out of the proxy group. A sample size of only 10 utilities undermined the reliability of the estimated outcome. Therefore, Dr. Hunt increases the proxy group size by including all electric companies that are within investment grade. Further, Dr. Hunt incorporates more growth rate assumptions that are representative of investors' expectations. This includes Bloomberg, Morningstar, S&P Capital IQ, Value Line and Zacks in addition to IBES short-term growth rates.

Dr. Hunt also considers the results of the alternative benchmark methods in evaluating a just and reasonable ROE from within the upper end of the results produced by the two-step DCF method. Dr. Hunt evaluated the cost of equity for SCE using the risk premium approach, the Capital Asset Pricing Model ("CAPM") and the empirical Capital Asset Pricing Model ("eCAPM") – which inform the placement of the base ROE

<sup>&</sup>lt;sup>15</sup> See Testimony of Dr. Paul T. Hunt, Exhibit No. SCE-17 ("Hunt Testimony") at pp. 30-42.

<sup>&</sup>lt;sup>16</sup> Hunt Testimony at p. 27.

within the zone of reasonableness implied by Dr. Hunt's expanded two-step DCF analysis. He also evaluated the state-approved ROEs for integrated utilities as another benchmark, and discusses that SCE's state-approved ROE for 2018 and 2019 is 10.3%. He further describes risks and uncertainties unique to California transmission investment including an ever expanding role of distributed generation resources, and environmental policy designed to dramatically reduce carbon emissions. Finally, Dr. Hunt discusses that there continues to be anomalous market conditions that result in the DCF analysis understating SCE's cost of equity capital. Looking at all of the evidence, he concludes that a 10.3% base ROE is just and reasonable and would satisfy *Hope* and *Bluefield*. 17

Dr. Hunt's testimony also explains that the 50 basis point adder for ISO/RTO membership has been approved by the Commission, recognizing the benefits that flow from membership in an ISO/RTO. Further, Dr. Hunt explains the specific transmission project adders that SCE has received for three of its transmission projects. Dr. Hunt testifies that the combined ROE, which consists of the base ROE, ISO adder and specific project adders falls below the upper boundaries produced by his alternative application of the two-step DCF method.

<sup>&</sup>lt;sup>17</sup> Federal Power Comm'n v. Hope Natural Gas Co., 320 U.S. 591 (1944) (Hope); Bluefield Water Works and Improvement Co. v. Public Service Commission of the State of West Virginia, 262 U.S. 679 (1923) (Bluefield).

# F. Proposed Depreciation Rates

SCE is proposing to revise the depreciation rates used in the Original Formula Rate associated with ISO Transmission plant to be in alignment with the rates that SCE has proposed in its recent CPUC 2018 General Rate Case ("GRC"). The depreciation rates requested by SCE are supported by the testimony of Mr. David Gunn in Exhibit Nos. SCE-7 and SCE-8. Mr. Gunn explains that in SCE's 2018 GRC filing, SCE submitted a detailed depreciation study that ascertained that SCE's currently-effective transmission rates do not adequately recover depreciation expense. The detailed study represents SCE's current best estimate of the life and net salvage parameters necessary to allocate the cost of Transmission plant over its useful life. Finally, Mr. Gunn explains that the study results were moderated by SCE's application of "gradualism." Specifically, SCE capped its depreciation rates by limiting increases in net salvage rates to no more than 25% of the currently authorized values. As a result, SCE's depreciation rate proposal is both a conservative and a well-supported means of calculating Transmission Plant – ISO depreciation expense. SCE's proposal will result in an increase in its transmission depreciation rates. Although the increase differs from account to account, on a weighted average basis, SCE is proposing an increase from about 2.54% (which was the result of settlement adopted in the Original Formula Rate) to 2.73%. Notably, however, had SCE not voluntarily chosen to implement the gradualism approach, the composite depreciation rate would be 3.87% – a result mandated by the strict application of the methodology of SCE's deprecation analysis.

# V. PROPOSED REFINEMENTS TO THE FORMULA RATE

SCE has, over the last five years, gained significant experience in administering a formula rate. Through regular and productive interactions with the stakeholders, SCE and its customers have gained an opportunity to understand and identify changes which have the potential to benefit all parties, provide for a more efficient process, ensure compliance with evolving rules, and improve the treatment of certain costs. With that in mind, below is a short discussion of the key changes to the Original Formula Rate that are included in this filing. There are many less significant revisions that SCE is proposing to make to the Formula Rate. Exhibit Nos. SCE-5 and SCE-6, supported by Mr. Hansen, present a listing of all proposed revisions to the Formula Spreadsheet and Formula Protocols, and the witness supporting each.

### A. Refinements to the Proposed Formula Rate

Simplification of the Calculation of Operations and Maintenance
 Expense ("O&M Expense")

SCE's proposed Formula Rate simplifies the calculation of the O&M Expense so that the calculation of the ISO O&M expense recovered in the Formula will rely on fewer allocation factors and be more readily understood by the stakeholders while continuing to adhere to cost causation principles. SCE's Original Formula Rate uses 23 different allocation factors to apply to 58 Transmission and Distribution O&M accounts and subaccounts to determine the portion of total recorded Transmission and Distribution O&M expense that is associated with ISO transmission. In the proposed Formula Rate,

SCE has reduced the number of allocation factors to 6 and reduced the number of accounts and sub accounts to 35. As described by Mr. Allstun in Exhibit No. SCE-10, the reduction in the allocation factors and accounts will more closely align SCE's Formula Rate with industry standard practice, while still resulting in a just and reasonable determination of ISO O&M expense.

# 2. Cost of Capital Changes

SCE's proposed Formula Rate revises the calculation of the cost of debt and preferred stock components of the cost of capital to consider the net proceeds of each debt and preferred stock issuance. For each issuance, a percentage cost of debt or preferred stock will be calculated based on a "Yield to Maturity" methodology. For comparison, the Original Formula Rate cost of debt and preferred stock was based on an aggregated calculation of total annual costs of all issuances divided by the gross proceeds of all issuances. Additionally, SCE has excluded certain debt issuances that do not finance Rate Base from the calculation of the cost of debt, such as debt that funds long term fuel expenses and debt related to the San Onofre Nuclear Generation Station regulatory asset. These modifications are supported by Dr. Hunt in Exhibit No. SCE-17.

<sup>&</sup>lt;sup>18</sup> The YTM methodology determines an interest rate that is the yield over the life of the issuance considering the net proceeds of the issuance and the interest or dividend obligations over the life of the issuance.

# 3. PBOPs Annual Filing

SCE's proposed Formula Rate simplifies the mechanism to determine the amount of Post Retirement Benefits Other than Pensions Expense ("PBOPs Expense") to be recovered. Under the proposed Formula Rate, SCE will make an annual filing to revise the Authorized PBOPs Expense Amount. In the Original Formula Rate, there was a threshold test performed every other year to determine whether SCE was required to file a new Authorized PBOPs Expense Amount at the Commission. <sup>19</sup> A mandatory annual filing is less complicated and give customers greater assurance such costs are accurately reflected in rates. This modification is supported by Mr. Hansen in Exhibit No. SCE-3.

# 4. ADIT Changes

SCE has revised the calculation of Accumulated Deferred Income Taxes ("ADIT") to be calculated using a "pro rata weighted average tax normalization calculation" consistent with guidance provide for by the Internal Revenue Service normalization rules. These proposed revisions to the calculation of ADIT (new Section 5 of Schedule 9, Lines 805 through 819 of Exhibit No. SCE-4) are supported by Mr. Alfred Lopez in Exhibit No. SCE-11.

<sup>&</sup>lt;sup>19</sup> The Authorized PBOPs Expense Amount is a stated value in the Formula Rate which specifies the amount of PBOPs expense recovery that SCE will recover through A&G expenses. It may only be revised by SCE pursuant to a Section 205 filing and Commission acceptance of the filing.

# 5. True-Up Adjustment Revisions

The proposed Formula Rate includes a simplification and revision of the True Up Adjustment component of the Base TRR (Schedule 3 of the Formula Spreadsheet), which should yield an easier to understand mechanism that will continue to accurately track SCE's cumulative over or under recovery of actual TRR costs, and also reduce the magnitude of the True Up Adjustments in Annual Updates, either in the positive or negative direction. The modifications to Schedule 3 of the Formula Spreadsheet (Exhibit No. SCE-4) are supported by Mr. Hansen in Exhibit No. SCE-3.

# 6. Modification to Incentive Compensation

SCE's proposed Formula Rate includes revisions to recover certain incentive compensation costs that are not recovered in the Original Formula Rate. In the proposed Formula Rate, SCE has eliminated any caps or limits upon its incentive compensation recovery, so that it will be able to collect costs incurred in a manner consistent with FERC policy. This change ensures that SCE is able to recover the correct amount of incentive compensation expense amounts that are actually incurred.<sup>20</sup> The modifications to the proposed Formula Rate required to ensure that SCE correctly recovers incentive compensation costs are supported by Mr. Mindess in Exhibit No. SCE-12.

Under the Original Formula Rate, SCE agreed in settlement to exclude from recovery certain incentive compensation costs (which include items such as annual bonuses to employees and long term incentive compensation to executives), consistent with SCE's CPUC 2015 GRC decision.

# 7. Modification to Cash Working Capital Determination

Consistent with Commission policy, the proposed Formula Rate calculates the Cash Working Capital component of Rate Base to be based on 1/8 of O&M and A&G expenses. In the Original Formula Rate, the number used was a result of the settlement between the parties. However, it is Commission policy to use a 1/8 of O&M and A&G expenses (45 days) in the absence of a lead-lag study for the applicable service. SCE does not have a lead-lag study for its FERC jurisdictional services, nor does it have a study that can be modified in this way. This modification is supported by Mr. David Gunn in Exhibit No. SCE-7.

8. Intra-Year Balances of ISO Transmission Plant and ISO Accumulated

Depreciation

SCE has revised the calculations of monthly balances of ISO Transmission Plant and ISO Accumulated Depreciation. The revisions to the calculation of these values, performed on Schedules 6 and 8 of the Formula Spreadsheet (Exhibit No. SCE-4), will improve the formula rate transparency and understandability, and align the calculation methodologies used in each schedule to be more consistent with each other, while resulting in no actual change in the calculated monthly amounts of ISO Transmission Plant and minimal changes in Accumulated Depreciation. This change is supported by Mr. Gunn in Exhibit No. SCE-7.

#### **B.** Revisions to the Formula Rate Protocols

1. Removal of Periodic Information Submittals

Section 12 of the Original Formula Rate Protocols detailed certain periodic submissions to the CPUC. Section 12 also detailed an annual Transmission Capital Review process pursuant to which the CPUC reviewed certain of SCE's planned and in-process capital projects. SCE is removing these obligations as the periodic submissions and review were part of the negotiated settlement and are not required pursuant to any FERC policy or practice. However, SCE understands that certain stakeholders have expressed an increased interest in transparency of SCE's planned capital investments that are beyond the purview of the CAISO's annual transmission planning process. To that end, SCE anticipates proposing enhancements to its TO Tariff to provide for additional transparency regarding the process SCE uses to identify such planned capital additions. SCE anticipates making that filing in a separate docket from this proposed Formula Rate in the near future.

### 2. Removal of O&M Protocols

The Original Formula Rate Protocols included the methodology for the determination of ISO O&M expense. However, this methodology was also set forth in the Original Formula Rate (Schedules 19 and 27). SCE is removing this information from the proposed Formula Rate Protocols to reduce unnecessary duplication and the likelihood of error that comes with the duplication.

# 3. Termination of Proposed Formula Rate

The proposed Formula Rate does not include a termination date.<sup>21</sup> The Original Formula Rate worked well and the Commission has recognized the benefits of formula rates to consumers and transmission service providers alike.

### VI. CONTENTS OF THIS FILING

The documents submitted with this filing consist of this letter of transmittal and the following documents:

- 1. A revised clean version of SCE's TO Tariff sheets reflecting the proposed Formula Rate:
- 2. A red-lined version of the revised TO Tariff sheets reflecting the proposed Formula Rate;
- 3. The relevant Cost of Service Statements;
- 4. Attestation by Constance J. Erickson, Vice President;
- 5. Prepared Direct Testimony, Exhibits, and Workpapers of the following witnesses:
  - a. Exhibits SCE-1 through SCE-2: testimony of Mr. Jeffrey L. Nelson and exhibits thereto;
  - b. Exhibits SCE-3 through SCE-6: testimony of Mr. Berton J. Hansen and exhibits thereto;
  - c. Exhibits SCE-7 through SCE-8: testimony of Mr. David Gunn and exhibits thereto;
  - d. Exhibit SCE-9: testimony of Mr. Jacob Moon;
  - e. Exhibit SCE-10: testimony of Mr. Daniel J. Allstun;
  - f. Exhibit SCE-11: testimony of Mr. Alfred Lopez;
  - g. Exhibit SCE-12: testimony of Mr. Robert G. Mindess;

<sup>&</sup>lt;sup>21</sup> The Original Formula Rate was in effect for six years as a result of settlement between the parties at the time.

Hon. Kimberly D. Bose October 27, 2017 Page 25 of 27

- h. Exhibits SCE-13 through SCE-14: testimony of Ms. Jee Kim and exhibits thereto;
- i. Exhibit SCE-15: testimony of Mr. Antonio Ocegueda;
- j. Exhibit SCE-16: testimony of Mr. Robert A. Thomas;
- k. Exhibits SCE-17 through SCE-21: testimony of Dr. Paul T. Hunt and exhibits thereto;
- 1. Exhibit SCE-22: Workpapers supporting all witnesses

### VII. COMMUNICATIONS

SCE requests that all correspondence, pleadings and other communications concerning this filing be served upon:

Rebecca Furman
Law Department
Southern California Edison Company
P.O. Box 800
2244 Walnut Grove Avenue
Rosemead, CA 91770
Tel. (626) 302-3475
Rebecca.Furman@sce.com

Anna J. Valdberg Law Department Southern California Edison Company P.O. Box 800 2244 Walnut Grove Avenue Rosemead, CA 91770 Tel. (626) 302-1058 Anna. Valdberg@sce.com

Jeff Nelson<sup>22</sup>
Director, FERC Rates & Regulation
Southern California Edison Company
P.O. Box 800
2244 Walnut Grove Avenue
Rosemead, CA 91770
Jeff.Nelson@sce.com

<sup>22</sup> SCE requests waiver of Section 385.203(b)(3) of the Commission's Regulations to allow three people to be on this list.

# VIII. REQUEST FOR WAIVERS

To the extent that waivers of the Commission's cost support regulations, in 18 C.F.R. § 35.13 (2010), are necessary, <sup>23</sup> SCE respectfully requests such waivers, including waiver of the full Period I and Period II data requirements. Good cause exists for such waiver. The statements, testimony and exhibits accompanying this filing, together with SCE's publicly-available FERC Form 1 information, provide ample support for the reasonableness of the proposed formula rates. Detailed statements of the applicant's cost of service are not needed where the proposed rates are formulary and will be based on actual costs as reflected in the applicant's audited books and records. Further, such waiver would be consistent with Commission precedent in SCE's Original Formula Rate and other formula rates of this nature. <sup>24</sup>

<sup>&</sup>lt;sup>23</sup> 18 C.F.R. § 35.13.

Southern California Edison Co., 136 FERC ¶ 61,074 at P 29 (2011)( granting waiver of request for waiver of the requirements under section 35.13 regarding the filing of a full Period I and Period II study); Pub. Serv. Elec. and Gas Co., 124 FERC ¶ 61,303 at PP 23-24 (2008) (granting waiver of Sections 35.13(d)(1)-(2), 35.13(d)(5), and 35.13(h)); Okla. Gas & Elec. Co., 122 FERC ¶ 61,071 at P 41 (2008) (same); Am. Elec. Power Serv. Corp., 120 FERC ¶ 61,205 at P 41 (2007) (granting waiver of Period I and II data); Commonwealth Edison Co., 119 FERC ¶ 61,238 at PP 92-94 (2007) (granting waiver of Period I and II data and cost-of-service statements); Trans-Allegheny Interstate Line Co., 119 FERC ¶ 61,219 at P 57 (2007) (same); Duquesne Light Co., 118 FERC ¶ 61,087 at P 79 (2007) (granting waiver of Sections 35.13(d)(1)-(2) and 35.13(h)); Idaho Power Co., 115 FERC ¶ 61,281 at P 20 (2006) (granting waiver of Period II data); Allegheny Power Sys. Operating Cos., 111 FERC ¶ 61,308 at PP 55-56 (2005) (granting waiver of Period I and II data).

IX. OTHER FILING REQUIREMENTS

No expenses or costs included in the cost of service statements tendered herein

have been alleged or judged in any administrative or judicial proceeding to be illegal,

duplicative or unnecessary costs that are demonstrably the product of discriminatory

employment practices.

SCE believes this filing conforms to any rule of general applicability and to any

Commission order specifically applicable to SCE, and has made copies of this letter and

all enclosures available for public inspection in SCE's principal office located in

Rosemead, California. SCE has e-mailed a link to this filing to those persons who are on

the service lists for Docket No. ER11-3697.

Respectfully submitted,

/s/ Rebecca A. Furman\_

#### **Statement BM**

# **Southern California Edison Company**

# **Construction Program Statement**

Statement BM is a summary of data and supporting assumptions relating to the economics of any construction program to replace or expand the utility's power supply that shall be filed if the utility is filing for construction work in progress in rate base under § 35.25(c)(3) of this chapter. The filing utility shall describe generally its program for providing reliable and economic power for the period beginning with the date of the filing and ending with the tenth year after the test period. The statement shall include an assessment of the relative costs of adopting alternative strategies including an analysis of alternative production plant, *e.g.*, cogeneration, small power production, heightened load management and conservation efforts, additions to transmission plant or increased purchases of power, and an explanation of why the program adopted is prudent and consistent with a least-cost energy supply program.

Southern California Edison Company ("SCE") is currently authorized to recover through rates the Construction Work in Progress ("CWIP") expenditures related to seven transmission projects – the Devers-Colorado River Transmission Project (formerly Devers-Palo Verde II Project ("DPV2"); only the California portion of DPV2 and the unexpanded Colorado River Substation) ("DCR"), the Tehachapi Renewable Transmission Project ("Tehachapi"), Red Bluff Substation Project ("Red Bluff"), Calcite Substation Project (formerly Jasper; part of South of Kramer Transmission Project) ("Calcite"), West of Devers Transmission Project ("West of Devers"), Whirlwind Substation Expansion Project ("Whirlwind Expansion"), and Colorado River Substation Expansion Project ("CRS Expansion") (collectively, "Projects"). Authorization to recover 100% of prudently-incurred CWIP associated with the Projects was granted by the Federal Energy Regulatory Commission ("FERC" or "Commission") in Docket Nos. EL07-62 in November 2007, EL10-81 in October 2010, and EL11-10 in March 2011.

<sup>&</sup>lt;sup>1</sup> Southern California Edison Co., 121 FERC ¶ 61,168 (2007); Southern California Edison Co., 133 FERC ¶ 61,108 (2010); Southern California Edison Co., 133 FERC ¶ 61,107 (2010); and Southern California Edison Co., 134 FERC ¶ 61,181 (2011).

Currently, and over the next several years, SCE is engaging in a transmission infrastructure expansion in order to enlarge, improve, and reinforce the California Independent System Operator Corporation's ("CAISO") grid to maintain reliable service to customers and provide increased access to renewable generation sources. These projects will significantly improve the reliability of the CAISO bulk power transmission system and reduce the cost of power by reducing transmission congestion on the CAISO-controlled transmission grid. The Projects will also help SCE and other California utilities to meet the goals of the State of California's Renewable Portfolio Standards ("RPS").

In order to develop the DCR, Tehachapi, and West of Devers projects, SCE worked closely with the CAISO, the California Public Utilities Commission ("CPUC"), and other stakeholders to determine whether these three projects would provide reliable and economic power to California. Alternatives for each project were considered and the projects were approved by both the CAISO and the CPUC Certificates of Public Convenience and Necessity ("CPCN") process. The CPCN process is extremely thorough and requires both the applicant and the CPUC to consider alternatives to each of the proposed Projects. The CPCN process evaluates a number of factors including, but not limited to, impacts on the transmission grid and other transmission users, cost-effectiveness, reasonable and prudent costs, alternative routes and configurations, non-wires alternatives, and impacts on the environment. The CPUC deemed that DCR, Tehachapi, and West of Devers are preferable to all considered alternatives and approved the projects.

The Red Bluff, Calcite, West of Devers, Whirlwind Expansion, and CRS Expansion projects ("Interconnection Projects") were developed primarily to allow for interconnection and delivery of renewable generation projects. The need for the Interconnection Projects was identified in the interconnection studies sponsored by the CAISO in connection with the CAISO's interconnection planning process and the development of the Large Generator Interconnection Agreements ("LGIAs"), which are approved and executed by the CAISO.

All of the Projects will be placed under the CAISO's Operational Control once each Project is placed in-service. SCE has described below the process by which each of the Projects was developed including the consideration of alternatives. Additionally, a more detailed explanation of the Projects can be found in SCE's petitions in Docket Nos. EL07-62, EL10-81, and EL11-10.

## **DCR**

The development of the DPV2 Project originated in a transmission group process called the Southwest Transmission Expansion Plan ("STEP"), a group

having approximately 300 general members. In developing a transmission plan to further the development of a robust transmission system between the Arizona, Nevada, Mexico, and southern California areas, STEP analyzed 26 different combinations of facilities and proposed a series of projects. One of these projects was DPV2.

On April 11, 2005, after review, analysis and approval by the CAISO, SCE filed a CPCN application with the CPUC, which included an updated analysis that demonstrated that DPV2 provides benefits in excess of \$1.1 billion to California consumers over the life of the Project and has a benefit-to-cost ratio of 1.7. The CAISO was a party to the CPCN proceedings and it reported the results of its evaluation process to the CPUC in recommending that the CPUC grant a CPCN.

On January 25, 2007, in Decision No. 07-01-040, the CPUC issued a CPCN for DPV2. In its evaluation of DPV2, the CPUC found that additional development of energy efficiency, demand response, and renewable generation beyond the targets already set in SCE's Long-Term Procurement Plan was not a feasible or cost-effective alternative to DPV2:

The CAISO submits that California needs to add 5,000 MW or more in the next five years due to load growth and generation retirement. In its opinion, both additional generation in southern California and interregional transmission upgrades including DPV2 should be pursued. SCE concurs with the CAISO that both generation and transmission options are needed, and submits that non-transmission alternatives could not meet all of the project objectives and/or could not be counted on to develop fast enough or in enough magnitude to avoid need for the DPV2 project.<sup>2</sup>

On May 1, 2006, SCE filed an application for a Certificate of Environmental Compatibility ("CEC") to construct the Arizona portion of DPV2. The Arizona Power Plant and Transmission Line Siting Committee held extensive public hearings in mid to late 2006 and early 2007. On March 21, 2007, the Siting Committee found that the proposed project was environmentally compatible and voted to grant SCE a CEC. Despite the Siting Committee approval, the Arizona Corporation Commission ("ACC") decided on June 6, 2007 to deny SCE's application. In a letter dated May 15, 2009 to the ACC, SCE indicated that SCE's updated economic analysis did not support a re-filing at this time for ACC authorization to construct the Arizona portion of the Project.

<sup>&</sup>lt;sup>2</sup> See CPUC Decision 07-01-040, January 25, 2007 at pp. 51-54.

On May 14, 2008, as the Arizona portion of DPV2 became delayed, SCE filed with the CPUC a petition requesting modification of the original DPV2 decision to allow SCE to first proceed with construction of the California portion of DPV2 otherwise known as Devers-Colorado River Transmission Project ("DCR"). On November 20, 2009, the CPUC issued Decision 09-11-007, which concluded that construction of DCR is required to meet future public convenience and necessity and will allow access to significant potential renewable resources. The decision allowed SCE to construct DCR contingent upon the CAISO approval. On August 5, 2010, CAISO sent a letter to the CPUC stating that the CAISO analysis demonstrated a need for DCR.<sup>3</sup> On August 9, 2010, the CPUC informed SCE via letter that the conditions set forth in Ordering Paragraph 4 of Decision 09-11-007 had been met and that SCE could commence construction of DCR.<sup>4</sup>

Pursuant to a settlement in Docket No. ER10-160, SCE agreed to exclude from its CWIP balancing account mechanism the CWIP associated with Arizona segment of DPV2, effective June 1, 2010.<sup>5</sup>

On October 28, 2011, SCE filed a request under section 205 of the Federal Power Act ("FPA") to recover in SCE's Transmission Owner Tariff ("TO Tariff") formula rate the prudently-incurred abandoned plant costs associated with the Arizona segment of the Devers-Palo Verde II transmission project.<sup>6</sup>

<sup>&</sup>lt;sup>3</sup> See Docket No. ER11-1952, Exhibit SCE-5: CAISO letter dated August 5, 2010 from Keith E. Casey to Paul Clanon (CPUC), Re: Updated Information Regarding Construction of Devers-Palo Verde No.2 Transmission Project (A.05-04-015).

<sup>&</sup>lt;sup>4</sup> *See* Docket No. ER11-1952, Exhibit SCE-6: CPUC letter dated August 9, 2010 from Paul Clanon to James A. Kelly (SCE).

<sup>&</sup>lt;sup>5</sup> If, no later than September 30, 2011, SCE files either a new application for the Arizona segment of DPV2 with the ACC, or files with the ACC an application to amend its prior DPV2 order, and the ACC, no later than December 31, 2012, approves a Certificate of Environmental Compatibility for the Arizona segment of DPV2, then SCE may include in its CWIP rates all expenditures incurred by SCE on and after June 1, 2010, in connection with the Arizona segment of DPV2. If SCE makes such filing and the ACC fails to approve a Certificate of Environmental Compatibility for the Arizona segment of DPV2 by December 31, 2012, then SCE shall submit a Section 205 filing for recovery of its prudently-incurred costs associated with abandonment of the Arizona segment of DPV2 by January 31, 2013 or lose the right to recover 100% abandoned plant granted under Docket No. EL07-62. *See* Docket No. ER10-2053, SCE Offer of Settlement, filed July 29, 2010. The Commission approved this Offer of Settlement in an order issued Sept. 10, 2010. *Southern California Edison Co.*, 132 FERC ¶ 61,213 (2010).

<sup>6</sup> *See* Docket No. ER12-239.

On July 2, 2012, SCE filed an offer of settlement with the Commission and the settlement was subsequently approved by the FERC on August 30, 2012.<sup>7</sup>

# **Tehachapi**

The CAISO studied the Tehachapi Transmission Project as part of its CAISO South Regional Transmission Plan for 2006 ("CSRTP-2006") and developed a least-cost solution for the network component of the transmission infrastructure that will interconnect planned transmission projects in the Tehachapi Wind Resource Area ("TWRA") to the CAISO Controlled Grid.

The CAISO found that in addition to interconnecting several projects in the interconnection queue, the Tehachapi Project will provide system reliability and efficiency benefits. On January 24, 2007, the CAISO Board of Governors approved the entire Tehachapi Transmission Project and directed SCE, as the project sponsor, to proceed with the permitting and construction of the project. The CAISO found, among other things, that the Tehachapi Project would lay the groundwork to integrate large amounts of planned geothermal, solar, and wind generation and would make possible in the future a low cost expansion of the transfer capability of Path 26, a major north-south transmission corridor.

The CPUC issued its final approval of the CPCN for Tehachapi Segment 1 on March 1, 2007;<sup>9</sup> the CPCN for Tehachapi Segments 2 and 3 on March 15, 2007;<sup>10</sup> and the CPCN for Tehachapi Segments 4-11 on December 17, 2009.<sup>11</sup> The CPUC found the proposed Project will: 1) support compliance with the State's RPS goals; 2) enable interconnection of wind generation projects in the Tehachapi region to SCE's transmission system; 3) eliminate existing constraints to the transmission of renewable energy from the Tehachapi region to southern California; and 4) eliminate potential system-wide power flow and reliability problems due to overloading of the existing transmission system.

In its evaluation of Tehachapi Segments 1-3, the CPUC also studied energy efficiency and demand response alternatives. The CPUC concluded that, even with an increasing emphasis on energy efficiency and demand response,

<sup>&</sup>lt;sup>7</sup> Southern California Edison Co., 140 FERC ¶ 61,157 (2012).

<sup>&</sup>lt;sup>8</sup> *See* CAISO Board of Governors Approval, SCE Application in Docket No. EL07-62, filed May 18, 2007, at Exhibit I.

<sup>&</sup>lt;sup>9</sup> See CPUC Decision 07-03-012, March 1, 2007.

<sup>&</sup>lt;sup>10</sup> See CPUC Decision 07-03-045, March 15, 2007.

<sup>&</sup>lt;sup>11</sup> See CPUC Decision 09-12-044, December 17, 2009.

investments in transmission projects such as the proposed Antelope-Pardee Transmission Project (Segment 1) and the proposed Tehachapi-Vincent Transmission Project (Segments 2 and 3) will be needed both to enable California to meet RPS goals as well as to assure the continuing reliability and safety of the transmission grid in southern California as renewable power generation and SCE customer demands increase. They further concluded that there is no alternative that can meet these needs better than the proposed Segments 1-3. Segments 1-3A entered into service in 2009 and SCE is no longer collecting CWIP on these segments of the Tehachapi Project.

In addition, the CPUC concurred that Segments 4-11 would: (a) provide the electrical facilities necessary to reliably interconnect and integrate in excess of 700 megawatts ("MW") and up to approximately 4,500 MW of new wind generation in the TWRA currently being planned or expected in the future, thereby helping SCE and other California utilities in meeting California RPS goals; (b) further address the reliability needs of the CAISO-controlled grid due to projected load growth in the Antelope Valley; and (c) address the South of Lugo transmission constraints, an ongoing source of concern for the Los Angeles Basin. <sup>13</sup>

## **Red Bluff**

On October 7, 2010, the FERC conditionally accepted the "Standard Large Generator Interconnection Agreement (LGIA) Among Desert Sunlight Holdings, LLC and Southern California Edison Company and California Independent System Operator Corporation" for interconnection of a 550 MW solar generating facility SCE's electrical system via a new substation, which was later named Red Bluff substation. On February 17, 2011, the FERC conditionally accepted the "Standard Large Generator Interconnection Agreement (LGIA) Among Palen Solar II, LLC and Southern California Edison Company and California Independent System Operator Corporation" for interconnection of a 500 MW solar thermal generating facility to SCE's planned Red Bluff substation.

<sup>&</sup>lt;sup>12</sup> See CPUC Segment 1 Approval, at p. 22, and CPUC Segments 2-3 Approval, at pp. 20-21.

<sup>&</sup>lt;sup>13</sup> See CPUC Decision 09-12-044, Finding of Fact #18, page 93.

<sup>&</sup>lt;sup>14</sup> Southern California Edison Co., 133 FERC ¶ 61,019 (2010). The LGIA was conditionally accepted subject to the Commission decision regarding SCE's requested abandoned plant approval incentive in Docket No. EL10-81-000, which was approved on October 29, 2010. Southern California Edison Co., 133 FERC ¶ 61,107 (2010).

<sup>15</sup> Southern California Edison Co., 134 FERC ¶ 61,108 (2011). The LGIA was conditionally accepted subject to the subject to the Commission decision regarding SCE's requested abandoned plant approval incentive in Docket No. EL11-10-000, which was

SCE has proposed construction of Red Bluff in order to remedy the reliability and congestion problems that would result from the development and interconnection of an initial 1,050 MW of solar generation. Red Bluff will be located near Desert Center in Riverside County of California. Two of the three proposed generation projects seeking interconnection with Red Bluff are solar and one is pumped hydro. The initial facilities at Red Bluff will accommodate two solar projects consisting of 1,050 MW of generation and may be expanded later as additional resources develop.

With the introduction of the proposed development of renewable generation in the area, SCE's existing transmission facilities are inadequate to ensure reliability of the grid. Interconnection studies have been performed for the new generation projects requesting interconnection to the CAISO-controlled grid. To address system impacts, a recommendation was made that involved development of a plan of service to reliably interconnect the project in a manner that: addresses the generation needs in the area; avoids short-lived "piece-meal" solutions; minimizes environmental impacts; minimizes overall cost exposure to ratepayers; minimizes service interruptions to local area load; and provides the minimum set of facilities. This plan of service called for the construction of a new collector substation (Red Bluff Substation) that would be connected to the CAISOcontrolled grid by looping the existing Devers-Palo Verde 500 kV Transmission Line. The System Impact Study concluded that the Red Bluff 500/220 kV Substation and proposed method of service into the existing Devers-Palo Verde 500 kV Transmission Line would fully mitigate the identified system reliability problems.

On November 17, 2010, SCE filed an application for a permit to construct ("PTC") the Red Bluff Substation project and in the following July, the CPUC granted SCE a permit to construct the Red Bluff Substation project.<sup>16</sup>

## **Calcite**

On January 28, 2011, the FERC conditionally accepted the "Standard Large Generator Interconnection Agreement (LGIA) Among Abengoa Solar Inc. and Southern California Edison Company and California Independent System

approved on March 11, 2011. *Southern California Edison Co.*, 134 FERC  $\P$  61,181 (2011).

<sup>&</sup>lt;sup>16</sup> See CPUC Decision 11-07-020, July 14, 2011.

Operator Corporation"<sup>17</sup> for interconnection of a 250 MW solar thermal generating facility to SCE's existing Cool Water-Kramer No.1 220 kV line at a new SCE-owned 220 kV substation. On January 20, 2011, the FERC conditionally accepted the "Standard Large Generator Interconnection Agreement (LGIA) Among Granite Wind, LLC. and Southern California Edison Company and California Independent System Operator Corporation"<sup>18</sup> for interconnection of a 60 MW wind generating facility to SCE's transmission system at the proposed Jasper 220 kV Substation.

SCE proposed construction of South of Kramer in order to remedy the reliability and congestion problems that would result from the development and interconnection of at least 591 MW of renewable solar and wind generation. The proposed facilities will be located in the Mojave Desert region of southern California. Five projects had entered the CAISO interconnection process seeking interconnection, which triggered the need for the South of Kramer transmission facilities.

South of Kramer will also provide incremental transfer capability for other generation projects in the greater Mojave Desert region located near the Cool Water-Lugo and Lugo-Pisgah corridors. The South of Kramer project is complementary to SCE's Lugo-Pisgah project in a way that it provides additional transfer capability and collector substations to allow interconnection of currently proposed and future potential generation situated in the Barstow and Lucerne Competitive Renewable Energy Zones, as identified in reports prepared by the Renewable Energy Transmission Initiative ("RETI"). The Cool Water-Lugo transmission corridor has been identified by RETI and by the California

<sup>&</sup>lt;sup>17</sup> Southern California Edison Co., 134 FERC ¶ 61,059 (2011). The LGIA was conditionally accepted subject to the subject to the Commission decision regarding SCE's requested abandoned plant approval incentive in Docket No. EL11-10-000, which was approved on March 11, 2011. *Southern California Edison Co.*, 134 FERC ¶ 61,181 (2011).

<sup>&</sup>lt;sup>18</sup> Southern California Edison Co., 134 FERC ¶ 61,032 (2011). The LGIA was conditionally accepted subject to the subject to the Commission decision regarding SCE's requested abandoned plant approval incentive in Docket No. EL11-10-000, which was approved on March 11, 2011. *Southern California Edison Co.*, 134 FERC ¶ 61,181 (2011).

<sup>&</sup>lt;sup>19</sup> RETI is a statewide initiative intended to help identify the transmission projects needed to accommodate California's renewable energy goals. Background information about the purpose and formation of RETI, its mission statement, membership information, and all RETI documents are available at www.energy.ca.gov/reti.

Transmission Planning Group<sup>20</sup> as an important path for the transfer of location constrained renewable generation resources in the sparsely populated Mojave Desert to population centers in southern California.

Through the CAISO's Interconnection System Impact Studies, SCE's existing transmission facilities were found to be inadequate to handle the proposed development of renewable generation in the area. In response to these studies, SCE proposed South of Kramer, which is needed to ensure reliability and full delivery of the renewable generation in the area as it is integrated into the grid.

Due to timing circumstances for the various elements of the South of Kramer Project, SCE modified the project during preparation of the CPCN application with the CPUC. The project was renamed the Coolwater-Lugo Transmission Project ("CWLTP") and a new substation, called Desert View, was added to the CPCN application to address load growth in the Victorville area along the path from Coolwater to Lugo Substation. Additionally, SCE did not include the Jasper Substation as part of the CPCN application because withdrawals from the CAISO's generator interconnection queue had eliminated the immediate need for SCE to move forward to license and develop that substation concurrently with CWLTP. However, the remaining elements of the CWLTP were the same as the originally proposed South of Kramer Project. SCE and generator signed LGIA in February 2016. The Jasper Substation was renamed the Calcite Substation and project development and licensing coordination are in progress.

On August 28, 2013, SCE filed with the CPUC a CPCN application and Proponent's Environmental Assessment for the CWLTP. While the CPCN Application was pending before the CPUC, the CPUC and the CAISO received a letter stating that the Coolwater Generating Station would be shut down effective January 1, 2015. On March 17, 2015, the CAISO concluded that sufficient capacity was available in the area such that the CWTLP was no longer needed. On May 21, 2015, the CPUC dismissed SCE's CPCN application without prejudice. Subsequently, on February 26, 2016, SCE filed a request under section 205 of the FPA to recover in its TO Tariff formula\_rate the prudently-incurred abandoned plant costs associated with the CWTLP.

On January 10, 2017, SCE submitted an uncontested offer of settlement in the abandoned plant cost recovery proceeding between SCE and the intervening

<sup>&</sup>lt;sup>20</sup> CTPG is a forum for conducting joint transmission planning and coordination in transmission activities in California. Background information on CTPG and all CTPG documents are available at ctpg.us/public/index.php.

<sup>&</sup>lt;sup>22</sup> See Docket No. ER16-1025.

parties. Subsequently, on February 28, 2017, the settlement judge certified the settlement to the FERC as uncontested<sup>23</sup> and the uncontested settlement was approved by the Commission on April 10, 2017.<sup>24</sup>

# **West of Devers**

On February 4, 2011, the FERC conditionally accepted the "Standard Large Generator Interconnection Agreement (LGIA) Among Palo Verde Solar II, LLC and Southern California Edison Company and California Independent System Operator Corporation"<sup>25</sup> for interconnection of a 1,000 MW solar thermal generating facility to SCE's transmission system at the proposed Colorado River 220 kV Substation. In order to fully deliver this generating facility's output, additional network upgrades to SCE's transmission system are needed in Eastern Riverside County.

West of Devers will allow the delivery of at least 2200 MW of renewable solar generation. The proposed facilities will be located in Eastern Riverside County, California. Five projects have entered the CAISO interconnection process seeking interconnection that trigger the need for West of Devers. Solar generation projects account for all of the 2,200 MW of proposed generation triggering the need for West of Devers. CAISO Phase II Studies have been performed for five new generation projects that will utilize West of Devers via the CAISO's cluster interconnection process. Additionally, the CAISO performed deliverability studies as part of Phase II, and determined that without West of Devers, the generation projects in queue utilizing West of Devers would not be fully deliverable.

The interconnection studies identified West of Devers as needed to enable fully deliverable renewable generation. West of Devers does not directly interconnect any new sources of generation; however, the upgrades are needed to allow full delivery of multiple generation projects interconnecting at SCE's new Colorado River and Red Bluff Substations.

<sup>&</sup>lt;sup>23</sup> *Southern California Edison Co.*, 158 FERC ¶ 63,006 (2017).

<sup>&</sup>lt;sup>24</sup> S. Cal. Edison Co., 159 FERC ¶ 62,038 (2017).

<sup>&</sup>lt;sup>25</sup> S. Cal. Edison Co., 134 FERC ¶ 61,087 (2011). The LGIA was conditionally accepted subject to the subject to the Commission decision regarding SCE's requested abandoned plant approval incentive in Docket No. EL11-10-000, which was approved on March 11, 2011. Southern California Edison Co., 134 FERC ¶ 61,181 (2011).

On October 25, 2013, SCE filed a CPCN application with the CPUC. The proposed project has been reviewed under both the California Environmental Quality Act ("CEQA") and the National Environmental Policy Act ("NEPA").

On August 18, 2016, the CPUC approved the project in Decision D.16-08-017, including two alternatives.<sup>26</sup> Subsequently, the Bureau of Land Management ("BLM") approved the project with its Record of Decision ("ROD") on December 27, 2016.<sup>27</sup> The ROD includes a right-of-way grant decision and it applies only to BLM-administered lands.

# **Whirlwind Substation Expansion**

On February 17, 2011, the FERC conditionally accepted the "Standard Large Generator Interconnection Agreement (LGIA) Among AV Solar Ranch I, LLC and Southern California Edison Company and California Independent System Operator Corporation"<sup>28</sup> to interconnect a 250 MW solar photovoltaic generating facility to SCE's transmission system at the proposed Whirlwind Substation.

The expansion at Whirlwind provides capacity for an additional 2,000 megawatts (MW) of new generation resources. Whirlwind was originally planned as part of the Tehachapi project and was originally designed for eventual expansion. At the time of SCE's petition in Docket No. EL07-62-000, however, the generators requesting interconnection at Whirlwind required a smaller subset of facilities to be constructed.

As of the end of 2010, additional generation resources have requested interconnection at Whirlwind, including four renewable generation projects, with a total capacity of 1,550 MW in the transition cluster, and an additional eight wind and solar generation projects, with a total capacity of 2,451 MW. The transition cluster is comprised of interconnection requests that were submitted on or before June 2, 2008, which are studied under a slightly modified version of the generation interconnection process reform. These additional resources have triggered the

<sup>&</sup>lt;sup>26</sup> See CPUC Decision 16-08-017, August 18, 2016.

<sup>&</sup>lt;sup>27</sup> See BLM Decision DOI-BLM-CA-060-0015-0021, CACA-055285

<sup>&</sup>lt;sup>28</sup> Southern California Edison Co., 134 FERC ¶ 61,107 (2011). The LGIA was conditionally accepted subject to the subject to the Commission decision regarding SCE's requested abandoned plant approval incentive in Docket No. EL11-10-000, which was approved on March 11, 2011. Southern California Edison Co., 134 FERC ¶ 61,181 (2011).

need for an expansion of Whirlwind. The Whirlwind expansion has already been approved by the CAISO and the CPUC as part of the Tehachapi project.

# **Colorado River Substation Expansion**

As indicated above, the FERC conditionally accepted on February 4, 2011, the "Standard Large Generator Interconnection Agreement (LGIA) Among Palo Verde Solar II, LLC and Southern California Edison Company and California Independent System Operator Corporation" for interconnection of a 1,000 MW solar thermal generating facility to SCE's transmission system at the proposed Colorado River 220 kV Substation.

Colorado River expansion will provide capacity for up to 2,000 MW of new generation resources at Colorado River. The expansion will include both reliability network upgrades and delivery network upgrades. Colorado River was originally proposed to be configured as a 500 kV switchyard as a component of DPV2 and designed to be expanded as additional resources requested interconnection to the substation. Additional renewable generation projects have requested interconnection to the Colorado River 500 kV switchyard, including solar generation projects in the CAISO's transition cluster and additional interconnection requests for solar generation in subsequent queue clusters. Consequently, Colorado River needs to be expanded to accommodate such requests. The CPUC has previously approved Colorado River, however, the proposed expansion will require enlargement of the previously-approved project's footprint.

On November 3, 2010, SCE sought a PTC from the CPUC to construct an expansion to the Colorado River Substation in order to interconnect the 1,000 MW Blythe Solar Power Project and the 250 MW Genesis Solar Energy Project to the CAISO-controlled transmission grid. No protests were filed.

On July 14, 2011, the CPUC granted SCE a permit to construct the Colorado River Substation expansion project with the mitigation measures attached to this order.<sup>29</sup>

<sup>&</sup>lt;sup>29</sup> See CPUC Decision 11-07-011, July 14, 2011.

ATTESTATION BY					
CONSTANCE J. ERICKSON					
VICE PRESIDENT					

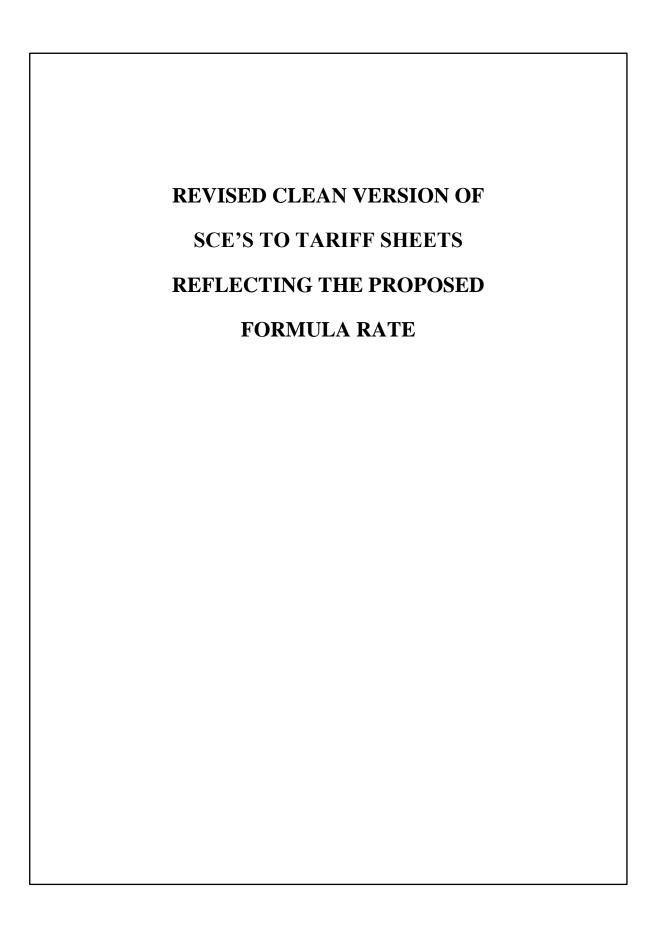

#### **ATTESTATION**

Constance J. Erickson attests that she is Vice President of Southern California Edison Company, and that the cost of service statements and supporting data submitted as a part of this filing which purport to reflect the books of Southern California Edison Company are true, accurate, and current representations of the utility's books and other corporate documents to the best of her knowledge and belief.

Constance J. Erickson

Vice President

Dated: October 23, 2017

#### APPENDIX II

# **Charges for Wholesale Transmission Services**

<u>Low Voltage Access Charge</u>: Equals the Low Voltage Transmission Revenue Requirement divided by Gross Load.

High Voltage Wheeling Access Charge: Assessed by ISO, See ISO Tariff

Low Voltage Wheeling Access Charge: Assessed by ISO, See ISO Tariff

<u>High Voltage Utility-Specific Rate</u>: Equals the High Voltage Transmission Revenue Requirement divided by Gross Load.

High Voltage Existing Contracts Access Charge: Equals the High Voltage Transmission Revenue Requirement divided by the sum of the twelve monthly retail system peak demands measured at the ISO Controlled Grid level.

The High Voltage Existing Contracts Access Charge is applicable to the following Existing Contracts Customers commencing on the applicable implementation date:

Existing Contract Customer	Rate Schedule FERC	Implementation
	No.	Date
City of Azusa	373, 374, 375	January 1, 2003
City of Banning	379, 380	January 1, 2003
City of Colton	362, 363, 365	January 1, 2003
City of Riverside	390, 391, 392	January 1, 2003
City of Vernon	207, 360	January 1, 2013
City of Los Angeles,	219	January 1, 2003
Department of Water and		
Power		

SCE shall post these rates on its website: www.sce.com.

Option Code: A

#### **APPENDIX IX**

#### **ATTACHMENT 1**

#### FORMULA RATE PROTOCOLS

#### 1. INTRODUCTION

SCE shall calculate its Base Transmission Revenue Requirement ("Base TRR"), as defined in Section 3.6 of the main definitions section of this TO Tariff, using the formula rate that is presented in spreadsheet format in Attachment 2 to Appendix IX ("Formula Rate Spreadsheet"). The Formula Rate Spreadsheet contains fixed formulae that are only subject to change pursuant to Sections 205 and 206 of the Federal Power Act, and will be populated with data from SCE's annual Federal Energy Regulatory Commission ("FERC" or the "Commission") Form 1 filing or from other SCE records. The sources of the data used in the Formula Rate will be: (a) identified in the Formula Rate Spreadsheet by fixed references to specific locations in FERC Form 1, or (b) provided by SCE in accordance with Section 3 of these Protocols.

The Base TRR shall be calculated annually in accordance with the Formula Rate and shall be equal to the sum of the Prior Year TRR, the Incremental Forecast Period TRR, and the True Up Adjustment. Additionally, SCE shall include a Cost Adjustment in the Base TRR for the upcoming Rate Year in the event that a discrete cost of service item (e.g., individual O&M expense, tax expense, or revenue credit) incurred anytime between the beginning of the Prior Year and the September 30 immediately preceding the Annual Update filing (i.e., a 21 month window) is a one-time item that will not recur in such Rate Year. Individual items shall not be aggregated for purpose of determining a discrete cost of service item. The discrete cost of service item must amount to at least 3% of the Base TRR in such Annual Update filing in order for a Cost Adjustment to be included as a component of the Base TRR. The Cost Adjustment shall be handled as follows:

a) If the discrete cost of service item occurred during the Prior Year, then the Cost Adjustment component of the Base TRR shall be an amount with the same magnitude but of the opposite sign as the discrete cost of service item. For example, if the discrete cost of service item is a \$100 million one-time property tax refund (a negative item) received during 2012 but which will not recur during 2014, + \$100 million will be included as a Cost Adjustment component of the Base TRR in the Annual Update for the 2014 Rate Year. If the discrete cost of

Tariff Record Proposed Effective Date: 01/01/2018 Version Number: 4.0.0 Option Code: A

<sup>&</sup>lt;sup>1</sup> Attachment 2 consists of thirty-four (34) individual Schedules. All references in the Formula Rate Protocols ("Protocols") to Schedules refer to Schedules in the Formula Rate Spreadsheet. The Formula Rate Spreadsheet and Formula Rate Protocols together comprise the "Formula Rate." The formula rate that was in effect from January 1, 2012 through December 31, 2017 pursuant to Docket No. ER11-3697 shall be referred to herein as the "Original Formula Rate".

service item is a \$100 million one-time O&M cost (a positive item) incurred during 2012 that will not recur in 2014, - \$100 million will be included as a Cost Adjustment component of the Base TRR in the Annual Update for the 2014 Rate Year. Both examples assume the 3% threshold is met.

b) If the discrete cost of service item occurred between January 1 and September 30 of the year in which the Annual Update filing is submitted to FERC (i.e., the year before the upcoming Rate Year), then the Cost Adjustment component of the Base TRR shall be an amount with the same magnitude and the same sign as the discrete cost of service item. For example, if the discrete cost of service item is a \$100 million one-time property tax refund (a negative item) received during the first nine months of 2013 but which will not recur during 2014, - \$100 million will be included as a Cost Adjustment component of the Base TRR in the Annual Update for the 2014 Rate Year. If the discrete cost of service item is a \$100 million one-time O&M cost (a positive item) incurred during the first nine months of 2013 that will not recur in 2014, + \$100 million will be included as a Cost Adjustment component of the Base TRR in the Annual Update for the 2014 Rate Year. Both examples assume the 3% threshold is met.

If SCE includes a Cost Adjustment in its Base TRR, SCE shall include with its Annual Update an explanation of its belief that the discrete cost of service item that is the subject of such Cost Adjustment will not recur in the upcoming Rate Year.

The Wholesale Base TRR is equal to the Base TRR adjusted as follows (as set forth in Schedule 25): (1) Uncollectibles Expense is not included in the Wholesale Base TRR; (2) the Wholesale Rate Base Adjustment and associated Wholesale Expense Difference is included in the Wholesale TRR; (3) EEI dues and EPRI dues are excluded from the Wholesale Base TRR; and (4) Franchise Fees Expense included in the Wholesale Base TRR is lower than that included in the Base TRR due to the Franchise Fee Factor being applied to a lower Base TRR.

#### 2. TERM OF THE FORMULA RATE

The Formula Rate shall become effective on January 1, 2018, and SCE's Base TRR shall be subject to true up beginning on that date in accordance with these Protocols. Retail and Wholesale transmission rates shall become effective on January 1, 2018, and shall be redetermined annually in accordance with these Protocols and the Formula Rate Spreadsheet. The Formula Rate will remain in effect without termination unless and until SCE files pursuant to Section 205 of the Federal Power Act to replace the Formula Rate with a successor transmission rate mechanism and the Commission accepts such successor transmission rate mechanism. This Formula Rate shall remain in effect until the date that the successor rate mechanism filing is made effective by the Commission.

#### 3. PROCEDURES FOR UPDATING THE BASE TRR

For as long as this Formula Rate is in effect, SCE shall update its Base TRR for the upcoming Rate Year<sup>2</sup> according to the timeline and procedures described in this Section. A summary of the procedures for updating the Base TRR is set forth in the following table:

Event	Date	
Posting Date of Draft Annual Update	June 15	
Start of Information Requests	June 15	
Draft Annual Update Conference	June 15 – July 15	
End of Information Requests	November 1	
Annual Update filed with FERC	December 1	
Rate Goes into Effect	January 1	

# a) Draft Annual Update

On or before June 15 of each year, SCE will post to its website (www.sce.com) its Draft Annual Update and will provide electronic notice of such posting to the Service List.<sup>3</sup> The Draft Annual Update shall set forth the Base TRR for the upcoming Rate Year, and shall include populated versions of all Schedules comprising the Formula Rate in their native format with all formulas and links intact. In addition to the foregoing, the Draft Annual Update shall include the following:

- 1) All workpapers used in the calculation of the Base TRR. The workpapers shall be provided in their native format, with all formulas and links intact.
- 2) The Plant Study described in Section 9 of the Protocols in native format with all formulas and links intact, along with all workpapers prepared in support of the plant study, and a description of any changes in the methodology used to perform the Plant Study as compared with the Prior Year's Annual Update.

<sup>&</sup>lt;sup>2</sup> "Rate Year" shall mean the twelve consecutive month period of January 1 through December 31 that corresponds to the year for which charges are assessed under the Formula Rate.

<sup>&</sup>lt;sup>3</sup> The "Service List" includes (1) any state regulatory agency with jurisdiction over the rates, charges or services of SCE; (2) any person or entity admitted as a party to this Formula Rate proceeding; and (3) any person or entity admitted as a party in any Annual Update proceeding filed by SCE in accordance with these Protocols. For purposes of communications with parties on the Service List, SCE will include the individuals on the service list in the Docket in which this Formula Rate is filed, and parties that are admitted in future FERC proceedings involving Formula Rate Annual Updates. Any references to a "party" in these Protocols shall mean any party to the Docket in which this Formula Rate is filed and any party admitted to future FERC proceedings involving Formula Rate Annual Updates.

- 3) Workpapers supporting the inputs that appear in Schedule 27 in equivalent form to the workpapers provided in FERC Docket No. ER11-3697, Volume 4, Workpapers for Exhibit SCE-600, pages 1-268.
- 4) Workpapers that demonstrate the historical corporate overhead expenses recorded for ISO projects by Project Identification Number (PIN) that closed in the prior year and have accumulated ISO project costs greater than \$5 million.
- 5) Workpapers that demonstrate the derivation of the AFUDC rates applicable to all projects in the prior year.
- 6) Workpapers supporting the forecasted gross plant expenditures shown on Schedule 16.
- 7) A statement that identifies each ISO project (PIN) with total direct expenditures (recorded and forecast) greater than \$5 million projected to go into rate base during the forecast period. The statement will also include the monthly budgeted direct expenditures, to the extent such currently projected costs are shown on the most recent applicable SCE budget documents, and the total project cost of each project.
- 8) Workpapers showing the beginning of year and end of year outstanding network upgrade credits, as well as interest on network upgrade credits that is recorded in Account 252 listed by entity due those credits. The workpapers shall be provided in equivalent form to the workpapers entitled "Workpapers for Exhibit SCE-800" provided by SCE in FERC Docket No. ER11-3697.
- 9) Workpapers showing forecast period incentive Construction Work in Progress ("CWIP") projects by PIN and by month that support the values in Schedule 10 at lines 29-70 in equivalent form to the workpapers provided in FERC Docket No. ER11-3697, Volume 3, Workpapers for Exhibit SCE-500, pages 149-175.
- 10)A description of any Material Accounting Changes contained in the Draft Annual Update.<sup>4</sup>

\_

<sup>&</sup>lt;sup>4</sup> "Material Accounting Changes" shall mean any material change in SCE's (i) accounting policies and practices from those in effect for the Prior Year upon which the immediately preceding Annual Update was based, or (ii) internal corporate cost allocation policies or practices from those policies and/or practices in effect for the Prior Year upon which the immediately preceding Annual Update was based.

- 11) A workpaper describing the nature and amount of each project/activity, the costs of which are booked to Account 930.2 and which are recovered under the Formula Rate. The workpaper shall include, for each account 930.2 line item cost shown in FERC Form 1, the following information: 1) Total FERC Form 1 cost; 2) Amount Included; 3) Amount Excluded; and 4) Formula rate reference to the reason for the exclusion(s).
- 12) A workpaper identifying each discrete A&G cost item that has been excluded from Schedule 20 of the Formula Rate (including both "positive exclusions" and "negative exclusions"), together with a summation of such items by account.
- 13) A description of any facilities SCE projects will change classification between CPUC and CAISO jurisdictions through the Rate Year. This description should include an estimated date for when the project will change classification, the reason for the classification change, and the proposed future rate recovery (*i.e.*, whether through FERC or CPUC rates).

### b) Draft Annual Update Conference

SCE will provide notice to parties on the Service List of a one-day meeting, to take place on or before July 15 of each year, to discuss the Draft Annual Update. By mutual agreement of SCE and the parties on the Service List, such a meeting may take place in-person, via telephone, or video-conference. SCE shall make appropriate personnel available for such meeting. Additional meetings to discuss the Draft Annual Update shall be scheduled as SCE and the parties on the Service List may mutually agree.

#### c) Information Requests

- 1) At any time from June 15 until November 1, parties on the Service List may submit reasonable information requests to SCE regarding the Draft Annual Update.
- 2) SCE shall make a good faith effort to respond to information requests in writing within ten (10) business days of receipt. Alternatively, if SCE in good faith believes that the information request is unreasonable, SCE may object to the request. SCE shall contemporaneously provide copies of all responses to all parties on the Service List that have indicated to SCE that they wish to receive such copies. If SCE objects to an information request, then SCE shall make a good faith effort to provide its objections within ten (10) business days of receipt of the information requests to the party serving the request. SCE shall include in its objection the basis for the objection. SCE and the party serving the information request on SCE will work cooperatively and in good

faith to resolve any questions, objections, or disputes relating to the information requests.

- 3) Responses to information requests shall not be designated as settlement communications or produced under the Commission's rules and regulations governing settlements, unless provided as a privileged settlement communication in a Commission proceeding being conducted under the Commission's settlement rules. SCE may mark materials provided in response to an information request as Protected Materials in accordance with Exhibit A to the Protocols. To the extent an information request response calls for the production of Protected Materials, SCE will only provide such materials to the parties with whom it has entered into a non-disclosure agreement that is included in Exhibit A.
- 4) To the extent SCE and any interested party(ies) are unable to resolve disputes related to information requests submitted in accordance with these Protocols, SCE or any interested party may petition the FERC to appoint an Administrative Law Judge as a discovery master. Neither SCE nor any interested party shall object to a request for a Discovery Master. The discovery master shall have the power to issue orders to resolve discovery disputes, as appropriate, in accordance with these Protocols and consistent with the FERC's discovery rules. The discovery master's orders shall be subject to appeal to the Commission and to the courts to the same extent and under the same rules as would be applicable to an Initial Decision issued under Rule 708 of the Commission's Rules of Practice and Procedure. In the event the Commission establishes hearing procedures for an Annual Update, the discovery master's responsibilities shall be transferred to the Presiding Judge for such hearing effective upon his or her appointment.

# d) Annual Update

- 1) On or before December 1 of each year, SCE shall file with the Commission its Annual Update setting forth the Base TRR and associated rates for the upcoming Rate Year. It is expressly intended by these Protocols that the Commission will issue public notice of the Annual Update inviting public comment, and SCE shall request in its Annual Update filing that the Commission issue public notice of the Annual Update inviting public comment.
- 2) SCE shall identify in the Annual Update any corrections or other changes to the Draft Annual Update, and shall provide an explanation of the reason for the changes. SCE shall also include in the Annual Update any changes to the Draft Annual Update that it and any other party have agreed upon as of November 15.

- 3) The Annual Update shall not modify the Formula Rate or subject the Formula Rate to modification, and shall not constitute a rate change filing under Section 205 of the Federal Power Act. Any party may challenge the justness and reasonableness of SCE's implementation of its Formula Rate with respect to: (a) whether SCE has properly and reasonably applied the Formula Rate Spreadsheet and the procedures in these Protocols; (b) whether the costs to be recovered have been accurately stated, properly recorded and accounted for pursuant to applicable FERC accounting practices and procedures; (c) whether the costs to be recovered through the Base TRR and associated rates have been or will be prudently incurred; (d) whether SCE's projections have been reasonably made; (e) whether its calculation methodologies are consistent with the Formula Rate; (f) whether SCE has made the required filings under Section 8(a) of these Protocols to reflect any intervening change(s) to the Uniform System of Accounts or FERC Form 1; and (g) whether any Material Accounting Changes are reasonable and consistent with the Uniform System of Accounts.
- 4) The Base TRR set forth in the Annual Update and associated rates shall be effective on January 1 of the upcoming Rate Year.
- 5) Any party may comment on or protest the Annual Update. Any party may request that FERC establish hearing and/or settlement procedures regarding an Annual Update, and all parties reserve their rights to oppose such requests on their merits, but may not object to such requests on the basis that hearing and/or settlement procedures are prohibited by these Protocols or the Formula Rate Spreadsheet. Nothing in these Protocols shall act as a bar to a party raising an issue in comments or in protests to the Annual Update that it has not raised in a prior Annual Update proceeding (including pre-filing phases of such proceeding) or with respect to which it has not previously exercised its rights under the Federal Power Act. It is expressly intended by these Protocols that FERC issue an order taking action, assuming any action is requested, on the Annual Update if protests and/or comments on the Annual Update are filed.
- 6) In any Annual Update proceeding, SCE shall bear the burden, consistent with Section 205 of the Federal Power Act, of showing the justness and reasonableness of the implementation of its Formula Rate by demonstrating that: (a) it has properly and reasonably applied the Formula Rate Spreadsheet and the procedures in these Protocols; (b) the costs to be recovered have been accurately stated, properly recorded and accounted for pursuant to applicable FERC accounting practices and procedures; (c) its projections have been reasonably made; (d) its calculation methodologies are consistent with the Formula Rate; and (e) any Material Accounting Changes are reasonable and consistent with the Uniform System of Accounts; Nothing herein is intended to alter the burden of proof applied by the Commission with respect to prudence.

- 7) SCE will make any revisions to the Base TRR and associated rates that are required by a final<sup>5</sup> Commission order with respect to each Annual Update. Unless otherwise ordered by the Commission, such revisions shall be effective as of the first day of the applicable Rate Year and shall be reflected, with interest calculated pursuant to the interest rate in Section 35.19a of the Commission's regulations, in the next subsequent Annual Update as a component of the True Up Adjustment. If the term of the Formula Rate is expiring so that there will be no future Annual Update, SCE shall include the TRR difference in the Final True Up Adjustment.
- 8) If SCE determines or concedes that a previously-filed Annual Update with a Prior Year not more than two years previous to the Prior Year of the current Annual Update contained errors that affected the True Up TRR calculated in that Annual Update, including but not limited to filed corrections to its FERC Form 1 that affect inputs to the Formula Rate, or errors in other input data used in determining the True Up TRR, SCE shall promptly serve notice to the Commission in the docket of the affected Annual Update that SCE intends to file an Amended Annual Update, with a brief description of the errors to be corrected in such filing. SCE shall additionally notify the entities that have participated in SCE's Annual Update filings of the errors and the upcoming Amended Annual Update. The Amended Annual Update shall:
  - i recalculate the True Up TRR for all affected Prior Years;
  - ii compare, on a monthly basis, the difference between the initial incorrect True Up TRR and the revised correct True Up TRR; and
  - iii determine the cumulative amount of the difference in (ii), including interest calculated pursuant to the interest rate in 18 C.F.R. § 35.19a.

The difference in (iii) shall be included as an additional component to SCE's True Up Adjustment in the subsequent Annual Update as a One Time True Up Adjustment in accordance with the Formula Rate.

If the difference in (iii) would not result in an increase to the True-Up TRR of more than \$1 million, however, then SCE need not submit to the Commission an Amended Annual Update, as described above, but may include the difference in (iii) in its Draft Annual Update, or, if the error is discovered after the posting of a Draft Annual Update on June 15, in an amended Draft Annual Update posted on SCE's website no later than October 31.

<sup>&</sup>lt;sup>5</sup> All references in these Protocols to Commission orders or actions refer to the final form of such orders or actions (in accordance with the Federal Power Act and applicable Commission regulations, including without limitation Commission regulations with respect to a stay of a Commission order upon rehearing and/or an appeal), including as they may be modified as a result of a request for rehearing or Court appeal.

In the event that SCE has identified multiple input errors, SCE shall identify each such error and its correction individually. The amount proposed to be included in an Amended Annual Update, a Draft Annual Update, or an amended Draft Annual Update as a One Time True Up Adjustment shall be subject to scrutiny through the information exchange process and annual update procedures described in this Section 3.

# 4. THE ANNUAL TRUE UP ADJUSTMENT AND THE FINAL TRUE UP ADJUSTMENT

The Annual True Up Adjustment component of the Base TRR ensures that during the time the Formula Rate is in effect, SCE will recover its actual costs of owning and operating its ISO transmission facilities, as defined by the True Up TRR. The Annual True Up Adjustment is calculated for each Annual Update for the previous calendar year (the "Prior Year"), if the Formula Rate was in effect during some or all of that year, through the following steps:

- a) Calculate SCE's actual costs during the Prior Year, as measured by the "True Up TRR." The True Up TRR, as defined in the Formula Rate, is equal to the Prior Year TRR as defined in the Formula Rate, except that all of the Rate Base components used in the True Up TRR are based on 13-month average values or beginning-of-year and end-of-year average values.
- b) Attribute the True Up TRR to each month of the Prior Year as specifically defined in the Formula Rate.
- c) Determine SCE's actual retail base transmission revenues attributable to the Formula Rate on a monthly basis for each month of the Prior Year, in accordance with the Formula Rate.
- d) Compare SCE's monthly True Up TRR to SCE's monthly actual retail base transmission revenues. Each monthly difference shall be cumulated, including interest calculated on a monthly basis using the interest rate specified in the regulations of the Commission at 18 C.F.R § 35.19a, through the end of the Prior Year, in accordance with the Formula Rate to determine a "Shortfall or Excess Revenue in the Prior Year". The "Shortfall or Excess Revenue in the Prior Year" shall also include the "Shortfall or Excess Revenue in the Prior Year" from the previous Annual Update, as specifically included in Schedule 3 of the Formula Rate Spreadsheet, Schedule 3, Line 11, and any applicable One Time Adjustments.
- e) As stated in Section 6 below, the True Up Adjustment included in the Base TRR effective January 1, 2018 shall include the Final True Up Adjustment for the 2016 year calculated pursuant to the Original Formula Rate. The Final True Up Adjustment for the 2017 year calculated pursuant to the Original Formula Rate shall be included in the True Up Adjustment for the Annual Update submitted by December 1, 2018.

In the event that this Formula Rate terminates, SCE shall calculate a Final True Up Adjustment. The Final True Up Adjustment shall cover the period of time ending on the expiration of the Formula Rate and beginning on the day after the period covered by the most recent Annual True Up Adjustment that was included in the Base TRR. For example, if the Formula Rate terminates on December 31, 2030, SCE will determine a Final True Up Adjustment in 2031 for calendar year 2030. Except as otherwise stated in this paragraph, the Final True Up Adjustment shall be determined using the same calculation methodology as the Annual True Up Adjustment.

Interest included in the Final True Up Adjustment shall be calculated through the date of the termination of the Formula Rate (or, in the event of a partial determination of the Final True Up Adjustment, through the end of the period covered by that partial determination). The Final True Up Adjustment shall be subject to the procedures described in Section 3 of the Protocols. If the Final True Up Adjustment reflects an undercollection by SCE, then SCE shall be entitled and required to recover the amount of this Final True Up Adjustment in SCE's successor transmission rates to this Formula Rate. If the Final True Up Adjustment reflects an overcollection by SCE, then SCE shall be required to refund the amount of this Final True Up Adjustment to its customers.

#### 5. THE INCREMENTAL FORECAST PERIOD TRR

The Incremental Forecast Period TRR ("IFPTRR"), calculated in Schedule 2 (Incremental Forecast Period TRR) of the Formula Rate Spreadsheet, is a component of SCE's Base TRR that represents the amount of transmission revenue requirement that SCE anticipates during the upcoming Rate Year that is incremental to that reflected in the Prior Year TRR as a result of additions of plant in service (identified in Schedule 16 (Plant Additions) of the Formula Rate) and/or CWIP expenditures (identified in Schedule 10 (CWIP) of the Formula Rate) to Rate Base. The IFPTRR shall be calculated in accordance with the Formula Rate.

# 6. TRANSITION OF THE ORIGINAL FORMULA RATE TO THE FORMULA RATE

Pursuant to Section 4 of the Formula Rate Protocols for the Original Formula Rate, SCE is entitled and required to reflect the amount of any Final True Up Adjustment from the Original Formula Rate for the 2016 and 2017 years in its successor transmission rates. This Section 6 ensures that this requirement from the Original Formula Rate is implemented accurately.

The Formula Rate Base TRR and associated rates for the Rate Years 2018 and 2019 shall reflect a True Up Adjustment that is based on a True Up TRR for the years 2016 and 2017 respectively calculated pursuant to the Original Formula Rate. This shall be implemented in the rate filing for the 2018 Rate Year and the Annual Update for the 2019 Rate Year by including as a "One Time Adjustment" any difference in the True Up TRR for the Prior Years of 2016 and 2017 calculated under this Formula Rate and the True Up TRR amounts calculated pursuant to the Original Formula Rate in Column 4 of Schedule 3 of the Formula Rate Spreadsheet. The One Time Adjustment included in the 2018 Rate Year filing will reflect the difference between the 2016 year True Up TRR

calculated pursuant to this Formula Rate and the Original Formula Rate. The Annual Update for the 2019 Rate Year will reflect the difference between the 2017 year True Up TRR calculated pursuant to this Formula Rate and the Original Formula Rate. In the event that this Formula Rate does not become effective until after January 1, 2018, so that the Original Formula Rate remained in effect throughout part or all of 2018, the calculation of the True Up TRR for 2018 shall be based on a weighted average of the True Up TRRs calculated pursuant to the Original Formula Rate and this Formula Rate, with the weighting being based on the number of days during the 2018 year each was in effect (and any years after 2018 will be treated similarly). The One Time Adjustment for any such years with two formula rates in effect shall be calculated based on the difference between the weighted average True Up TRRs and the True Up TRR calculated pursuant to this Formula Rate. Additionally, the True Up Adjustment submitted in the filing for Rate Year 2018 shall include as a One Time Adjustment any "Cumulative Excess or Shortfall in Revenue with Interest" through the end of 2015 calculated pursuant to the Original Formula Rate, as reflected in SCE's Annual Update Filing submitted in ER11-3697 on November 30, 2016, Schedule 3, Line 34, Column 8. The 2018 Rate Year filing and the 2019 Annual Update shall include as a workpaper a calculation of these One Time Adjustments.

#### 7. DEPRECIATION RATES

Depreciation rates for Transmission Plant, Distribution Plant, General Plant, and Intangible Plant shall be as stated in the Formula Rate Spreadsheet.

#### 8. REVISIONS TO CERTAIN FORMULA RATE PROVISIONS

SCE will be required to make single-issue Section 205 filings to change the Formula Rate as provided in Section 8, parts (a) through (e). In addition to the single-issue filings provided for in this Section 8 and subject to the limitations set forth in Section 11, SCE may make Section 205 filings that present only a single issue or limited discrete issues for consideration by the Commission, *i.e.*, proposing to change any one or more elements of its Formula Rate. Such filings shall not be governed by the provisions of this Section 8, and the parties and SCE reserve their rights with respect to any such filing.

In a proceeding commenced by such a single-issue Section 205 filing under Section 8, parts (a) and (b), the sole issues that can or shall be addressed are whether the changes proposed by SCE are consistent with these Protocols and are just and reasonable.

In a proceeding commenced by a single-issue filing under Section 8, part (c), the sole issues that can or shall be addressed are whether the changes proposed by SCE are just and reasonable and correctly implement the applicable California Public Utilities Commission ("CPUC") order.

In a proceeding commenced by a single-issue filing under Section 8, parts (d) and (e), the sole issue that can or shall be addressed is whether the changes proposed by SCE correctly implement the applicable CPUC order.

The proceedings commenced in response to the filings described in this Section shall not include or allow for consideration or examination of any other aspects of the Formula Rate or other issues associated with the Formula Rate, except to the extent that the proposed changes directly impact other Formula Rate components that are not the subject of the single-issue filing. All parties will have all applicable rights under the Federal Power Act and FERC's regulations with respect to such single-issue Section 205 filings, except as limited by this Section 8.

- a) SCE will make a single-issue Section 205 filing to update the references in the Formula to reflect any changes to the format and/or content of the FERC Form 1 or the Uniform System of Accounts that affect the calculations set forth in the Formula in the event that a Commission order revises the format and/or content of the FERC Form 1 or the Uniform System of Accounts. This filing shall be submitted within sixty days of the implementation of any FERC decision to revise the FERC Form 1 or the Uniform System of Accounts, and shall be effective on the date of the revisions to the FERC Form 1 or Uniform System of Accounts, as applicable.
- b) With respect to Post-Retirement Benefits Other than Pensions ("PBOPs"), the Formula Rate identifies an Authorized PBOPs Expense Amount in Note 3 on Schedule 20 (Administrative and General Expenses), which is initially stated as \$40,171,333. Beginning in 2019, SCE shall make a single-issue Section 205 filing by April 1 of each year to revise the Authorized PBOPs Expense Amount, seeking an effective date of January 1 of the year of the filing.
- c) SCE will make a single-issue Section 205 filing seeking Commission approval to put in effect conforming changes to Schedule 21 of the Formula Rate any time that the CPUC adopts revisions to the Gross Revenue Sharing Mechanism ("GRSM"). SCE will make its filing with the Commission, as set forth in this Section, between January 1 and March 1 of the year following the year that the CPUC order became effective.
- d) SCE will make a single-issue Section 205 filing to revise Schedule 33 of the Formula Rate determination of retail transmission rates to reflect any change in Rate Groups, Rate Schedules, or the design of retail rates applicable to each Rate Schedule subsequent to any final CPUC order that affects these aspects of retail transmission rates. SCE will make such a filing only if and when the change in Rate Groups, Rate Schedules, or the design of retail rates cannot otherwise be reflected through the normal operation of the Formula Rate. In the single-issue Section 205 filing to the Commission, SCE will propose revisions to Schedule 33 of the Formula Rate that conform to the CPUC order. SCE will make a filing under this Section 8(d) by the later of either the filing date for the next Annual Update following the CPUC ruling or sixty days after the CPUC ruling.

e) SCE will make a single-issue Section 205 filing to change the depreciation rates for General, Intangible or Distribution plant in Schedule 18 upon approval by the CPUC of revised depreciation rates for these plant categories. SCE shall make a filing at the Commission, as set forth in this section, between January 1 and March 1 of the year following the year that the CPUC order became effective.

# 9. DETERMINATION OF AMOUNT OF TRANSMISSION PLANT - ISO AND DISTRIBUTION PLANT - ISO

SCE shall perform for the Prior Year a study ("Plant Study") to determine:

- The amount of plant classified as Transmission in SCE's annual FERC Form 1 filing that is under the Operational Control of the ISO. Such amount shall be called Transmission Plant - ISO; and
- The amount of plant classified as Distribution in SCE's annual FERC Form 1 filing that is under the Operational Control of the ISO. Such amount shall be called Distribution Plant - ISO.

The Plant Study determination of Transmission Plant - ISO and Distribution Plant - ISO will correspond to the end-of-year plant values for transmission and distribution published in SCE's FERC Form 1, and also shall be based on actual end-of-year ISO Operational Control of facilities. SCE will identify in the Plant Study major transmission facilities that have moved to or from ISO Operational Control in the Prior Year. Additionally, in submitting its future CPUC General Rate Case applications, SCE shall exclude from its CPUC-jurisdictional cost of service forecast, the cost of transmission and distribution facilities that SCE projects will be under the Operational Control of the ISO during the test year.

The methodology used in the Plant Study to determine Transmission Plant - ISO and Distribution Plant - ISO shall be as follows:

- a) For each Transmission account 350-359 and Distribution account 360-362, identify the year-end recorded gross plant amount.
- b) For Transmission accounts 350-359 and Distribution accounts 360-362, classify the assets by each location into one of the following categories:
  - 1) All ISO: All Transmission or Distribution assets at the location are under the Operational Control of the ISO.
  - 2) Non-ISO: No Transmission or Distribution assets at the location are under the Operational Control of the ISO.
  - 3) Mixed ISO and Non-ISO Substation: The Transmission or Distribution substation location has a mixture of assets under the Operational Control of the ISO and assets that are not under the Operational Control of the ISO.

- 4) Mixed ISO and Non-ISO Line: Transmission line locations that have a mixture of assets under the Operational Control of the ISO and assets that are not under the Operational Control of the ISO that need to be analyzed using the Transmission Line methodology.
- 5) Other: Assets for which there is not sufficient data to categorize into one of the above categories.

For all plant costs classified as (1) "All ISO", classify all such plant costs as Transmission Plant - ISO or Distribution Plant - ISO, as appropriate. For all plant costs classified as (2) "Non-ISO", classify none of such plant costs as "Transmission Plant - ISO" or "Distribution Plant - ISO."

For all plant costs classified as (3) "Mixed ISO and Non-ISO Substation," perform an analysis of plant costs based on individual components of the substation. Component plant costs that are under the Operational Control of the ISO shall be attributed to either Transmission Plant - ISO or Distribution Plant - ISO, as appropriate. Component plant costs that are not under the Operational Control of the ISO shall not be attributed to either Transmission Plant - ISO or Distribution Plant - ISO. Dual Use assets (supporting both ISO and non-ISO plant) shall be allocated to Transmission Plant - ISO or Distribution Plant - ISO based on the percentage of ISO assets for the location.

For all plant costs classified as (4) "Mixed ISO and Non-ISO Line," apply the methodology set forth in Section 9(c) below to classify such costs.

For all plant costs classified as (5) "Other" in a location, classify such costs as Transmission Plant - ISO or Distribution Plant - ISO in proportion to the total percentage of Transmission Plant - ISO or Distribution Plant - ISO determined in parts (1) through (4) for that location.

- c) Transmission line costs (including any amounts in accounts 350, 352, and 353) required to be analyzed under the Transmission Line methodology pursuant to (b) (4) above shall be attributed to Transmission Plant ISO according to the following methodology:
  - For each location, determine the total line miles and total line miles that are under the Operational Control of the ISO. Determine the percent of total line miles under the Operational Control of the ISO to total line miles at that location. This calculation shall be done separately for overhead and underground facilities in the location.
  - 2) Determine the amount of Transmission Plant ISO by applying the percent determined in (1) to the appropriate plant costs by account at that location.

SCE shall present a summary of the Plant Study for the Prior Year in each annual Draft Annual Update, in accordance with the Formula Rate.

# 10. DETERMINATION OF AMOUNT OF ISO OPERATION AND MAINTENANCE EXPENSE

SCE shall annually determine the amount of recorded Transmission and Distribution Operation and Maintenance ("O&M") expenses that is attributable to facilities under the Operational Control of the ISO ("ISO O&M Expense"). The method used to determine ISO O&M Expense shall be to allocate total recorded O&M Expenses as stated in FERC Form 1 based on specific allocation factors applied to the expenses recorded to the O&M accounts set forth in Schedule 19 of the Formula Rate Spreadsheet.

In the event that SCE experiences an extraordinary event, resulting in costs otherwise recoverable through the Formula Rate in a year to be recorded to Account 435 (Extraordinary Deductions) of the Uniform System of Accounts, SCE shall recover the full amount of such Account 435 costs, including any expenses or return on capital, in accordance with the Commission Order authorizing such recovery.

#### 11. RESERVATION OF RIGHTS

- a) Nothing in these Protocols shall be deemed to limit in any way the right of any party admitted as an intervenor to this Formula Rate proceeding or admitted as an intervenor to any future proceeding involving an Annual Update to file a request for relief under any applicable provision of the FPA and/or the Commission's regulations or participate in Annual Update proceedings.
- b) Nothing in these Protocols shall be deemed to limit in any way SCE's right to file unilaterally, pursuant to Section 205 of the FPA and the regulations thereunder, to seek to change or cancel the Formula Rate, or to submit any other request for relief under any applicable provision of the FPA and/or the Commission's regulations.
- c) The party filing a proposed change to the Formula Rate Spreadsheet or Formula Rate Protocols under Section 205 or 206 of the FPA bears the standard burdens associated with such a filing.

#### 12. USE OF INFORMATION

Information produced pursuant to these Protocols may be used in any proceeding concerning the Formula Rate Spreadsheet, the Protocols, or the Annual Update; provided, however, that to the extent that any information provided pursuant to these Protocols has been designated and provided as Protected Materials, subject to the provisions of Exhibit A to these Protocols, the use of such information shall be governed by Exhibit A.

This section shall not apply to any information produced in the course of Commissionestablished settlement proceedings pursuant to the Commission's rules and regulations governing settlement.

### **EXHIBIT A**

# UNITED STATES OF AMERICA FEDERAL ENERGY REGULATORY COMMISSION

# PROTECTIVE ORDER APPLICABLE TO INFORMATION PRODUCED BY SOUTHERN CALIFORNIA EDISON COMPANY PURSUANT TO THE FORMULA RATE PROTOCOLS

- 1. This Exhibit (hereinafter referred to as the "Protective Order") shall govern the use of all Protected Materials produced by, or on behalf of, Southern California Edison Company ("SCE") pursuant to the SCE Formula Rate Protocols.
- 2. This Protective Order applies to the following two categories of materials: (A) A Participant may designate as protected those materials which customarily are treated by that Participant as sensitive or proprietary, which are not available to the public, and which, if disclosed freely, would subject that Participant or its customers to risk of competitive disadvantage or other business injury; and (B) A Participant shall designate as protected those materials which contain critical energy infrastructure information, as defined in 18 CFR§ 388.113(c)(1) ("Critical Energy Infrastructure Information").
- 3. Definitions -- For purposes of this Order:
- (a) The term "Participant" shall mean a Participant as defined in 18 CFR § 385.102(b).
- (b) (1) The term "Protected Materials" means (A) materials (including depositions) provided by a Participant in response to discovery requests and designated by such Participant as protected; (B) any information contained in or obtained from such designated materials; (C) any other materials which are made subject to this Protective Order by the Presiding Administrative Law Judge appointed upon the Annual Update being set for hearing and/or settlement procedures or by the Discovery Master appointed pursuant to the Formula Rate Protocols (both referred to herein as the "Presiding Judge"), by the Commission, by any court or other body having appropriate authority, or by agreement of the Participants; (D) notes of Protected Materials; and (E) copies of Protected Materials. The Participant producing the Protected Materials shall physically

mark them on each page as "PROTECTED MATERIALS" or with words of similar import as long as the term "Protected Materials" is included in that designation to indicate that they are Protected Materials. If the Protected Materials contain Critical Energy Infrastructure Information, the Participant producing such information shall additionally mark on each page containing such information the words "Contains Critical Energy Infrastructure Information B Do Not Release".

- (2) The term "Notes of Protected Materials" means memoranda, handwritten notes, or any other form of information (including electronic form) which copies or discloses materials described in Paragraph 3(b)(1). Notes of Protected Materials are subject to the same restrictions provided in this order for Protected Materials except as specifically provided in this order.
- (3) Protected Materials shall not include (A) any information or document that has been filed with and accepted into the public files of the Commission, or contained in the public files of any other federal or state agency, or any federal or state court, unless the information or document has been determined to be protected by such agency or court, or (B) information that is public knowledge, or which becomes public knowledge, other than through disclosure in violation of this Protective Order. Protected Materials do include any information or document contained in the files of the Commission that has been designated as Critical Energy Infrastructure Information.
- (c) The term "Non-Disclosure Certificate" shall mean the certificate annexed hereto by which Participants who have been granted access to Protected Materials shall certify their understanding that such access to Protected Materials is provided pursuant to the terms and restrictions of this Protective Order, and that such Participants have read the Protective Order and agree to be bound by it. All Non-Disclosure Certificates shall be served on all parties on the Service List, as defined in the SCE Formula Rate Protocols.
- (d) The term "Reviewing Representative" shall mean a person who has signed a Non-Disclosure Certificate and who is:
  - (1) Commission Trial Staff;
  - (2) an attorney who has made an appearance for a Participant;
- (3) attorneys, paralegals, and other employees associated with an attorney described in Subparagraph (2);

- (4) an expert or an employee of an expert retained by a Participant for the purpose of advising, preparing for or testifying in connection with the Annual Update for which the information was requested;
- (5) a person designated as a Reviewing Representative by order of the Presiding Judge or the Commission; or
- (6) employees or other representatives of Participants with significant responsibility for SCE's Formula Rate.
- 4. Protected Materials shall be made available under the terms of this Protective Order only to Participants and only through their Reviewing Representatives as provided in Paragraphs 7-9.
- 5. Protected Materials shall remain available to Participants until the date that any Commission proceeding relating to the Protected Material is concluded and no longer subject to judicial review. If requested to do so in writing after that date, the Participants shall, within fifteen days of such request, return the Protected Materials (excluding Notes of Protected Materials) to the Participant that produced them, or shall destroy the materials, except that copies of filings, official transcripts and exhibits in this proceeding that contain Protected Materials, and Notes of Protected Material may be retained, if they are maintained in accordance with Paragraph 6, below. Within such time period each Participant, if requested to do so, shall also submit to the producing Participant an affidavit stating that, to the best of its knowledge, all Protected Materials and all Notes of Protected Materials have been returned or have been destroyed or will be maintained in accordance with Paragraph 6. To the extent Protected Materials are not returned or destroyed, they shall remain subject to the Protective Order.
- 6. All Protected Materials shall be maintained by the Participant in a secure place. Access to those materials shall be limited to those Reviewing Representatives specifically authorized pursuant to Paragraphs 8-9. The Secretary shall place any Protected Materials filed with the Commission in a non-public file. By placing such documents in a non-public file, the Commission is not making a determination of any claim of privilege. The Commission retains the right to make determinations regarding any claim of privilege and the discretion to release information necessary to carry out its jurisdictional responsibilities. For documents submitted to Commission Trial Staff ("Staff"), Staff shall follow the notification procedures of 18 CFR § 388.112 before making public any Protected Materials.
- 7. Protected Materials shall be treated as confidential by each Participant and by the Reviewing Representative in accordance with the certificate executed pursuant to

Paragraph 9. Protected Materials shall not be used except as necessary under SCE's Formula Rate Protocols, nor shall they be disclosed in any manner to any person except a Reviewing Representative who is engaged in working on SCE's Annual Update for which the information was requested and who needs to know the information in order to carry out such responsibilities. Reviewing Representatives may make copies of Protected Materials, but such copies become Protected Materials. Reviewing Representatives may make notes of Protected Materials, which shall be treated as Notes of Protected Materials if they disclose the contents of Protected Materials.

- 8. (a) If a Reviewing Representative's scope of employment includes the marketing of energy, the direct supervision of any employee or employees whose duties include the marketing of energy, the provision of consulting services to any person whose duties include the marketing of energy, or the direct supervision of any employee or employees whose duties include the marketing of energy, such Reviewing Representative may not use information contained in any Protected Materials obtained under SCE's Formula Rate Protocols to give any Participant or any competitor of any Participant a commercial advantage.
- (b) In the event that a Participant wishes to designate as a Reviewing Representative a person not described in Paragraph 3 (d) above, the Participant shall seek agreement from the Participant providing the Protected Materials. If an agreement is reached that person shall be a Reviewing Representative pursuant to Paragraphs 3(d) above with respect to those materials. If no agreement is reached, the Participant shall submit the disputed designation to the Presiding Judge for resolution.
- 9. (a) A Reviewing Representative shall not be permitted to inspect, participate in discussions regarding, or otherwise be permitted access to Protected Materials pursuant to this Protective Order unless that Reviewing Representative has first executed a Non-Disclosure Certificate; <u>provided</u>, that if an attorney qualified as a Reviewing Representative has executed such a certificate, the paralegals, secretarial and clerical personnel under the attorney's instruction, supervision or control need not do so. A copy of each Non-Disclosure Certificate shall be provided to counsel for the Participant asserting confidentiality prior to disclosure of any Protected Material to that Reviewing Representative.
- (b) Attorneys qualified as Reviewing Representatives are responsible for ensuring that persons under their supervision or control comply with this order.

- 10. Any Reviewing Representative may disclose Protected Materials to any other Reviewing Representative as long as the disclosing Reviewing Representative and the receiving Reviewing Representative both have executed a Non-Disclosure Certificate. In the event that any Reviewing Representative to whom the Protected Materials are disclosed ceases to be engaged in working on the Annual Update, as set forth above, or is employed or retained for a position whose occupant is not qualified to be a Reviewing Representative under Paragraph 3(d), access to Protected Materials by that person shall be terminated. Even if no longer engaged in this proceeding, every person who has executed a Non-Disclosure Certificate shall continue to be bound by the provisions of this Protective Order and the certification.
- 11. Subject to Paragraph 18, the Presiding Administrative Law Judge shall resolve any disputes arising under this Protective Order. Prior to presenting any dispute under this Protective Order to the Presiding Administrative Law Judge, the parties to the dispute shall use their best efforts to resolve it. Any participant that contests the designation of materials as protected shall notify the party that provided the protected materials by specifying in writing the materials the designation of which is contested. This Protective Order shall automatically cease to apply to such materials five (5) business days after the notification is made unless the designator, within said 5-day period, files a motion with the Presiding Administrative Law Judge, with supporting affidavits, demonstrating that the materials should continue to be protected. In any challenge to the designation of materials as protected, the burden of proof shall be on the participant seeking protection. If the Presiding Administrative Law Judge finds that the materials at issue are not entitled to protection, the procedures of Paragraph 18 shall apply. The procedures described above shall not apply to protected materials designated by a Participant as Critical Energy Infrastructure Information. Materials so designated shall remain protected and subject to the provisions of this Protective Order, unless a Participant requests and obtains a determination from the Commission's Critical Energy Infrastructure Information Coordinator that such materials need not remain protected.
- 12. All copies of all documents reflecting Protected Materials, including the portion of the hearing testimony, exhibits, transcripts, briefs and other documents which refer to Protected Materials, shall be filed and served in sealed envelopes or other appropriate containers endorsed to the effect that they are sealed pursuant to this Protective Order. Such documents shall be marked "PROTECTED MATERIALS" and shall be filed under seal and served under seal upon the Presiding Judge and all Reviewing Representatives who are on the service list. Such documents containing Critical Energy Infrastructure Information shall be additionally marked "Contains Critical Energy Infrastructure Information Do Not Release". For anything filed under seal, redacted versions or, where an entire

document is protected, a letter indicating such, will also be filed with the Commission and served on all parties on the service list and the Presiding Judge. Counsel for the producing Participant shall provide to all Participants who request the same, a list of Reviewing Representatives who are entitled to receive such material. Counsel shall take all reasonable precautions necessary to assure that Protected Materials are not distributed to unauthorized persons.

- 13. If any Participant desires to include, utilize or refer to any Protected Materials or information derived therefrom in testimony or exhibits during a hearing under the SCE Formula Rate Protocols in such a manner that might require disclosure of such material to persons other than reviewing representatives, such participant shall first notify both counsel for the disclosing participant and the Presiding Judge of such desire, identifying with particularity each of the Protected Materials. Thereafter, use of such Protected Material will be governed by procedures determined by the Presiding Judge.
- 14. Nothing in this Protective Order shall be construed as precluding any Participant from objecting to the use of Protected Materials on any legal grounds.
- 15. Nothing in this Protective Order shall preclude any Participant from requesting the Presiding Judge, the Commission, or any other body having appropriate authority, to find that this Protective Order should not apply to all or any materials previously designated as Protected Materials pursuant to this Protective Order. The Presiding Judge may alter or amend this Protective Order as circumstances warrant at any time during the course of this proceeding.
- 16. Each party governed by this Protective Order has the right to seek changes in it as appropriate from the Presiding Judge or the Commission.
- 17. All Protected Materials filed with the Commission, the Presiding Judge, or any other judicial or administrative body, in support of, or as a part of, a motion, other pleading, brief, or other document, shall be filed and served in sealed envelopes or other appropriate containers bearing prominent markings indicating that the contents include Protected Materials subject to this Protective Order. Such documents containing Critical Energy Infrastructure Information shall be additionally marked "Contains Critical Energy Infrastructure Information Do Not Release."
- 18. If the Presiding Judge finds at any time in the course of a proceeding that all or part of the Protected Materials need not be protected, those materials shall, nevertheless, be subject to the protection afforded by this Protective Order for three (3) business days from the date of issuance of the Presiding Judge's determination, and if the Participant seeking protection files an interlocutory

appeal or requests that the issue be certified to the Commission, for an additional seven (7) business days. None of the Participants waives its rights to seek additional administrative or judicial remedies after the Presiding Judge's decision respecting Protected Materials or Reviewing Representatives, or the Commission's denial of any appeal thereof. The provisions of 18 CFR §§ 388.112 and 388.113 shall apply to any requests under the Freedom of Information Act. (5 U.S.C. § 552) for Protected Materials in the files of the Commission.

- 19. Nothing in this Protective Order shall be deemed to preclude any Participant from independently seeking through discovery in any other administrative or judicial proceeding information or materials produced under the SCE Formula Rate Protocols under this Protective Order.
- 20. None of the Participants waives the right to pursue any other legal or equitable remedies that may be available in the event of actual or anticipated disclosure of Protected Materials.
- 21. The contents of Protected Materials or any other form of information that copies or discloses Protected Materials shall not be disclosed to anyone other than in accordance with this Protective Order and shall be used only in connection with this (these) proceeding(s). Any violation of this Protective Order and of any Non-Disclosure Certificate executed hereunder shall constitute a violation of an order of the Commission.

# UNITED STATES OF AMERICA FEDERAL ENERGY REGULATORY COMMISSION

# NON-DISCLOSURE CERTIFICATE

I hereby certify my understanding that access to Protected Materials is provided to me pursuant to the terms and restrictions of the Protective Order under the Southern California Edison Formula Rate Protocols, that I have been given a copy of and have read the Protective Order, and that I agree to be bound by it. I understand that the contents of the Protected Materials, any notes or other memoranda, or any other form of information that copies or discloses Protected Materials shall not be disclosed to anyone other than in accordance with that Protective Order. I acknowledge that a violation of this certificate constitutes a violation of an order of the Federal Energy Regulatory Commission.

### Overview

### Overview of SCE Retail Base TRR

SCE's retail Base Transmission Revenue Requirement is the sum of the following components:

TRR Component	<u>Amount</u>
Prior Year TRR	\$ -
Incremental Forecast Period TRR	\$ -
True-Up Adjustment	\$ -
Cost Adjustment	\$ -
Base TRR (retail)	\$ -

These components represent the following costs that SCE incurs:

- 1) The Prior Year TRR component is the TRR associated with the Prior Year (most recent calendar year).

  The Prior Year TRR is calculated using End-of-Year Rate Base values, as set forth in the "1-BaseTRR" Worksheet.
- 2) The Incremental Forecast Period TRR is the component of Base TRR associated with forecast additions to in-service plant or CWIP, as set forth in the "2-IFPTRR" Worksheet.
- 3) The True Up Adjustment is a component of the Base TRR that reflects the difference between projected and actual costs, as set forth in the "3-TrueUpAdjust" Worksheet.
- 4) The Cost Adjustment component may be included as provided in the Tariff protocols.

### Notes

- 1) Any amount of "Sub-Total Local Taxes" or "Payroll Taxes Expense" may be excluded if appropriate with the provision of a workpaper showing the reason for the exclusion and the amount of the exclusion.
- 2) No change in Return on Common Equity will be made absent a Section 205 filing at the Commission.

Does not include any project-specific ROE adders.

89 Wholesale Base Transmission Revenue Requirement

88 Wholesale Difference to the Base TRR

In the event that the Return on Common Equity is revised from the initial value, enter cite to Commission Order approving the revised ROE on following line.

Order approving revised ROE:

- order approving revised ROE: 3-13

  No change in Amortization of Excess Deferred Tax Liability or South Georgia Income Tax Adjustment "Credits and Other" terms will be made absent a filing at the Commission. Investment Tax Credit Flowed Through amount shall be negative \$520,000 through the Prior Year of 2018, negative \$183,000 for the Prior Year of 2019, and \$0 thereafter.
- 4) Cost Adjustment may be included as provided in the Tariff protocols.

### Schedule 2 Incremental Forecast Period TRR

### Calculation of Incremental Forecast Period TRR ("IFPTRR")

```
The IFP TRR is equal to the sum of:
```

57

- 1) Forecast Plant Additions \* AFCR
- 2) Forecast Period Incremental CWIP \* AFCR for CWIP

### 1) Calculation of Annual Fixed Charge Rates:

```
a) Annual Fixed Charge Rate for CWIP ("AFCRCWIP")
2
       AFCRCWIP represents the return and income tax costs associated with $1 of CWIP,
3
       expressed as a percent.
4
5
       AFCRCWIP = CLTD + (COS * (1/(1 - CTR)))
6
7
8
         CLTD = Weighted Cost of Long Term Debt
         COS = Weighted Cost of Common and Preferred Stock
9
10
         CTR = Composite Tax Rate
11
                                                                          Reference
12
                  Wtd. Cost of Long Term Debt:
                                                             - % 1-BaseTRR, Line 51
                                                                   1-BaseTRR, Line 55
            Wtd. Cost of Common + Pref. Stock:
13
                                                             - %
                          Composite Tax Rate:
                                                                   1-BaseTRR, Line 59
14
                                                             - %
15
                                 AFCRCWIP =
                                                             - % Line 12 + (Line 13 * (1/(1 - Line 14)))
16
17
18
     b) Annual Fixed Charge Rate ("AFCR")
19
       The AFCR is calculated by dividing the Prior Year TRR (without CWIP related costs)
20
21
       by Net Plant:
22
23
         AFCR = (Prior Year TRR - CWIP-related costs) / Net Plant
24
25
     Determination of Net Plant:
26
                                                                          Reference
                                                                   6-PlantInService, Line 13
27
                      Transmission Plant - ISO: $
28
                        Distribution Plant - ISO: $
                                                                   6-PlantInService, Line 16
29
              Transmission Dep. Reserve - ISO: $
                                                                   8-AccDep, Line 13
                Distribution Dep. Reserve - ISO: $
30
                                                                   8-AccDep, Line 16
                                    Net Plant: $
31
                                                                   (L27 + L28) - (L29 + L30)
32
     Determination of Prior Year TRR without CWIP related costs:
33
34
35
      a) Determination of CWIP-Related Costs
       1) Direct (without ROE adder) CWIP costs
36
37
                       CWIP Plant - Prior Year: $

### Schedule 3 True Up Adjustment

### Calculation of True Up Adjustment Component of TRR

### 1) Summary of True Up Adjustment calculation:

- a) Attribute True Up TRR to months in the Prior Year (see Note #1) to determine "Monthly True Up TRR" for each month (see Note #2).
- b) Determine monthly retail transmission revenues attributable to this formula transmission rate received during Prior Year.
- c) Compare costs in (a) to revenues in (b) on a monthly basis and determine "Cumulative Excess (-) or Shortfall (+) in Revenue with Interest".
- d) Include previous Annual Update Cumulative Excess or Shortfall in Prior Year (from Previous Annual Update Line 23) and any One-Time Adjustments in Column 4 (Lines 11 and 12 respectively).
- e) Continue interest calculation through the end of the Prior Year (Line 23) to determine Cumulative Excess or Shortfall for this Annual Update.

# 2) Comparison of True Up TRR and Actual Retail Transmission Revenues received during the Prior Year, Including previous Annual Update Cumulative Excess or Shortfall in Revenue.

32 4) Final True Up Adjustment

True Up Adjustment: \$

The Final True Up Adjustment begins on the month after the last True Up Adjustment and extends through the termination date of this formula transmission rate.

The Final True Up Adjustment shall be calculated as above, with interest to the termination date of the Formula Transmission Rate.

# Schedule 3 True Up Adjustment

### Instructions:

- 1) Enter applicable years on Column 1, Lines 11-23 (Prior Year and December of the year previous to the Prior Year).
- 2) Enter Previous Annual Update True Up Adjustment (if any) on Line 27.

Enter with the same sign as in previous Annual Update. If there is no Previous Annual Update True Up Adjustment, then enter \$0.

- 3) Enter monthly interest rates in accordance with interest rate specified in the regulations of FERC at
- 18 C.F.R. §35.19a on lines 12 to 23, Column 6.
- 4) Enter any One Time Adjustments on Column 4, Line 12 (or other appropriate). If SCE is owed enter as positive, if SCE is to return to customers enter as negative. One Time Adjustments include:
  - a) In the event that a Commission Order revises SCE's True Up TRR for a previous Prior Year,
  - SCE shall include that difference in the True Up Adjustment, including interest, at the first opportunity, in accordance with tariff protocols.
  - Entering on Line 12 (or other appropriate) ensures these One Time Adjustments are recovered from or returned to customers.
  - b) Any refunds attributable to SCE's previous CWIP TRR cases (Docket Nos. ER08-375, ER09-187, ER10-160, and ER11-1952), not previously returned to customers.
  - c) Amounts resulting from input errors impacting the True Up TRR in a previous Formula Rate Annual Update pursuant to Protocol Section 3(d)(8).
- 5) Fill in matrix of all retail revenues from Prior Year in table on lines 63 to 74.
- 6) Enter Total Sales to Ultimate Consumers on line 77 and verify that it equals the total on line 75.
- 7) If true up period is less than entire calendar year, then adjust calculation accordingly by including \$0 Monthly True Up TRR and \$0 Actual Retail Base Transmission Revenues for any months not included in True Up Period.

### Notes:

- 1) The true up period is the portion (all or part) of the Prior Year for which the Formula Transmission Rate was in effect.
- 2) The Monthly True Up TRR is derived by multiplying the annual True Up TRR on Line 1 by 1/12, if formula was in effect. In the event of
- a Partial Year True Up, use the Partial Year TRR Attribution Allocation Factors on Lines 40 to 51 for each month of Partial Year True Up.
- Only enter in the Prior Year, Lines 12 to 23, or portion of year formula was in effect in case of Partial Year True Up.
- Partial Year True Up Allocation Factors calculated based on three years (2008-2010) of monthly SCE retail base transmission revenues.
- 3) "Actual Retail Base Transmission Revenues" are SCE retail transmission revenues attributable to this formula transmission rate. as shown on Lines 63 to 74, Column 1.
- 4) Enter "Shortfall or Excess Revenue in Previous Annual Update" on Line 11, or other appropriate (from Previous Annual Update, Line 23, Column 9).
- 5) Monthly Interest Rates in accordance with interest rate specified in the regulations of FERC (See Instruction #3).
- 6) "Cumulative Excess (-) or Shortfall (+) in Revenue wo Interest for Current Month" is, beginning for the January month,
- the amount in Column 9 for previous month plus the current month amount in Column 5. For the first December, it is the amount in Column 5.
- 7) Interest for Current Month is calculated on average of beginning and ending balances (Column 9 previous month and Column 7 current month). No interest is applied for the first December.
- 8) Only provide if formula was in effect during Prior Year.
- 9) Only include Base Transmission Revenue attributable to this formula transmission rate.
- Any other Base Transmission Revenue or refunds is included in "Other".
- The Base Transmission Revenues shown in Column 1 shall be reduced to reflect any retail customer refunds provided by SCE associated with the formula transmission rate that are made through a CPUC-authorized mechanism.
- 10) Other Transmission Revenue includes the following:
- a) Transmission Revenue Balancing Account Adjustment revenue.
- b) Transmission Access Charge Balancing Account Adjustment.
- c) Reliability Services Revenue.
- d) Any Base Transmission Revenue not attributable to this formula.

## Schedule 4 True Up TRR

### Instructions:

1) Use weighted average (by time) of the Return on Equity in effect during the Prior Year in determining the "Cost of Capital Rate" on Line 19 and the "Equity Rate of Return Including Preferred Stock" on Line 23 in the event that the ROE is revised during the Prior Year. In this event, the ROE used in Schedule 1 will differ from the ROE used in this Schedule 4, because the Schedule 1 ROE will be the most recent ROE, whereas the Schedule 4 Cost of Capital Rate and Equity Rate of Return including Com. + Pref. Stock will be based on the weighted-average ROE.

Calculation of weighted average Cost of Capital Rate in Prior Year:

If ROE does not change during year, then attribute all days to Line a "ROE at end of Prior Year" and none to "ROE at start of PY"

	g,g,	Percentage	Reference:	<u>From</u>	<u>To</u>	Days ROE <u>In Effect</u>
а	ROE at end of Prior Year	- 0	See Line e below			
b	ROE start of Prior Year	- 0	See Line f below			
С					Total days in y

### Instructions:

1) Enter 13 months of balances for capital structure for Prior Year and December previous to Prior Year in Columns 2-14. Beginning and End of year amounts in Columns 2 and 14 are from FERC Form 1, as referenced in below notes.

- 1) Amount in Column 2 from FF1 112.18d, amount in Column 14 from FF1 112.18c, amounts in columns 3-13 from SCE internal records.
- 2) Amount in Column 2 from FF1 112.19d, amount in Column 14 from FF1 112.19c, amounts in columns 3-13 from SCE internal records.
- 3) Amount in Column 2 from FF1 112.20d, amount in Column 14 from FF1 112.20c, amounts in columns 3-13 from SCE internal records. 4) Amount in Column 2 from FF1 112.21d, amount in Column 14 from FF1 112.21c, amounts in columns 3-13 from SCE internal records.
- 5) Amount in Column 2 from FF1 112.22c, amount in Column 14 from FF1 112.22d, amounts in columns 3-13 from SCE internal records. 6) Amount in Column 2 from FF1 112.23c, amount in Column 14 from FF1 112.23d, amounts in columns 3-13 from SCE internal records.
- 7) Amount in Column 2 from FF1 111.69c, amount in Column 14 from FF1 111.69d, amounts in columns 3-13 from SCE internal records.
- 8) Amount in Column 2 from FF1 111.81c, amount in Column 14 from FF1 111.81d, amounts in columns 3-13 from SCE internal records.
- 9) Amounts in Columns 2-14 are from SCE internal records.
- 10) Amounts in Columns 2-14 are from SCE internal records.
- 11) Amount in Column 2 from FF1 112.3d, amount in Column 14 from FF1 112.3c, amounts in columns 3-13 from SCE internal records.
- 12) Amounts in Columns 2-14 are from SCE internal records.
- 13) Amounts in Columns 2-14 are from SCE internal records.
- 14) Amount in Column 2 from FF1 112.16c, amount in Column 14 from FF1 112.16d, amounts in columns 3-13 from SCE internal records.
- 15) Amount in Column 2 from FF1 112.12c, amount in Column 14 from FF1 112.12d, amounts in columns 3-13 from SCE internal records.
- 16) Amount in Column 2 from FF1 112.15c, amount in Column 14 from FF1 112.15d, amounts in columns 3-13 from SCE internal records.

### Notes:

1) Amounts on Line 13 from corresponding account Schedule 7, column 2.

Amounts on Line 1 must match corresponding account Schedule 7, Column 2 for previous year.

The amounts for each month on the remaining lines are calculated by summing the following values:

- a) Other ISO Transmission Activity without Incentive Plant Activity on Lines 108-119 for the same month;
- b) ISO Incentive Plant Activity on Lines 67 to 78 for the same month; and
- c) The previous month balance of the Transmission Plant ISO amounts on Lines 1-13.

For instance, the amount for May of the Prior Year (on Line 6) for Account 353 (Column 5) is the sum of the following values:

- a) the "Other ISO Transmission Activity without Incentive Plant Activity" for May of the Prior Year (on Line 112, Column 5);
- b) the "ISO Incentive Plant Activity" for May of the Prior Year (on Line 71, Column 5),
- c) and the "Transmission Plant ISO" amount for April of the Prior Year (on Line 5, Column 5).
- 2) Amounts on Line 15 must match 6-Plant Study amounts for Distribution Plant ISO for previous year. Amounts on Line 16 must match amounts on 6-PlantStudy for Distribution Plant ISO.
- 3) Reconciles to BOY and EOY FERC Form 1 (FF1 207, Lines 48-56, Column q).
- 4) Includes recorded Transmission Plant-In-Service additions, retirements, transfers and adjustments. From SCE internal acounting records.
- 5) Includes balances for SCE Incentive Projects.
- 6) Monthly differences from previous matrix. Other columns from SCE internal accounting records.
- 7) Amount in matrix on lines 41 to 52 minus amount in matrix on lines 67 to 78
- 8) Amount in "Total Transmission Activity Not Including Incentive Plant Activity" matrix divided by Total on Line 92 for each account/month.
- 9) Amount on Line 13 less amount on Line 1 for each account.
- 10) Line 79
- 11) Amount on Line 105 less amount on Line 106 for each account.
- 12) For each column (FERC Account) divide Line 107 by Line 92 to arrive at a ratio for each column.

Apply the ratio of each column to each monthly value from Lines 80-91 to calculate the values for the corresponsing months listed in Lines 108-119.

# Schedule 7 Transmission Plant Study Summary

# B) Plant Classified as Distribution in FERC Form 1:

<u>Line</u> 22 23	Account Land:	Total <u>Plant</u>		<u>Data Source</u>	Distribution Plant - ISO		ISO % of Total
24	360	\$	-	FF1 207.60g	\$	-	- %
25	Structures:						
26	361	\$	-	FF1 207.61g	\$	-	- %
27	362	\$		FF1 207.62g	\$		- %
28	<b>Total Structures</b>	\$	-	L 26 + L 27	\$	-	- %
29							
30	<b>Total Distribution</b>	\$	-	L 24 + L 28	\$	-	- % Note 2

### Notes:

- 1) Total transmission does not include account 359.1 "Asset Retirement Costs for Transmission Plant" Total on this line is also equal to FF1 207.58g (Total Transmission Plant) less FF1 207.57g (Asset Retirement Costs for Transmission Plant).
- 2) Only accounts 360-362 included as there is no ISO plant in any other Distribution accounts.

### Instructions:

- 1) Perform annual Transmission Study pursuant to instructions in tariff.
- 2) Enter total amounts of plant from FERC Form 1 in Column 1, "Total Plant".
- 3) Enter ISO portion of plant in Column 2, "Transmission Plant ISO, or "Distribution Plant ISO".

# Schedule 8 Accumulated Depreciation

#### Notes:

1) Amounts on Line 13 based on current year Plant Study. Amounts on Line 1 shall be based on previous year Plant Study, and shall match amounts on Line 13 in previous year Annual Update.

The amounts for each month on the remaining lines are calculated by summing the following values:

- a) Depreciation Expense (on Lines 27 to 38) for the same month;
- b) Other Transmission Activity (on Lines 55 to 66) for the same month; and
- c) Balances for Transmission Depreciation Reserve (on Lines 1 to 13) for the previous month.

For instance, the amount for May of the Prior Year (on Line 6) for Account 353 (Column 5) is the sum of the following values:

- a) Depreciation Expense for May of the Prior Year (on Line 44, Column 5);
- b) Other Transmission Activity for May of the Prior Year (on Line 59, Column 5); and
- c) The balances for Transmission Depreciation Reserve for April of the Prior Year (on Line 5, column 5).
- 2) Amounts on Line 15 derived from Plant Study for previous year Prior Year.

Amounts on Line 16 derived from Plant Study for Prior Year.

- 3) From 17-Depreciation, Lines 24 to 35.
- 4) From 6-PlantInService, Lines 93 to 104.
- 5) Line 13 Line 1.
- 6) Line 39.
- 7) Line 52 Line 53.
- 8) Multiply the montly "Total Transmission Allocation Factors" ratios found in Lines 40-51 by the "Other Activity" on Line 54.

Instruction 1: For any "Company Wide" ADIT line item balance (i.e., that include Catalina Gas or Water costs), indicate in Column 7 with a leading "C:".

Instruction 2: For any Company Wide ADIT balance items, include a portion of the total Column 2 balance in Column 3 "Gas, Generation, or Other Related" based on the following percentages.

1) For Line items allocated based on the Wages and Salaries Allocation Factor:

	FERC Form 1 Reference or Instruction		r Year alue
A:Total Electric Wages and Salaries	FF1 354.28b	\$	-
B:Gas Wages and Salaries	FF1 355.62b	\$	-
C:Water Wages and Salaries	FF1 355.64b	\$	-
D:Total Electric, Gas, and Water Wages and Salaries	A+B+C	\$	-
E:Labor Percentage "Gas, Generation, or Other"	(B+C) / D		- %
2) For Line items allocated based on the Transmission Plant Allo	ocation Factor or "ISO Only":		
	FERC Form 1 Reference	Prio	r Year
	or Instruction	<u>Va</u>	alue
F:Total Electric Plant In Service	FF1 207.104g	\$	-
G:Total Gas Plant In Service	FF1 201.8d	\$	-
H:Total Water Plant in Service	FF1 201.8e	\$	-
I:Total Electric, Gas, and Water Plant In Service	F+G+H	\$	-
J:Plant Percentage "Gas, Generation, or Other"	(G+H) / I		- %
Instruction 3: Classify any ADIT line items relating to refunding a	nd retirement of debt as Plant related (Colur	mn 5).	

- 1) The monthly deferred tax amounts are equal to the ending ADIT balance minus the beginning ADIT balance, divided by 12 months.
- 2) For January through December = previous month balance plus amount in Column 2.
- 3) The weighted average ADIT Balance is equal to the summation of Col. 8, Lines 805 through 817, divided by 13 months.

#### Prior Year CWIP and Forecast Period Incremental CWIP by Project

Prior Year CWIP is the amount of Construction Work In Progress for projects that have received Commission approval to include CWIP in Rate Base.

#### Notes

- 1) Forecast Period is the calendar year two years after the Prior Year (i.e., PY+2).
- 2) Sum of project specific values from lines 55-79, 81-105, 107-131, 133-157, 159-183, 185-209, 211-235, 237-261, 263-287, 289-313,...

#### Instructions:

- 1) Enter recorded amounts of CWIP during Prior Year on Lines 1-13, 15-27 (including December of year previous to Prior Year).
- 2) Enter forecast project specific values on lines 55-79, 81-105, 107-131, 133-157, 159-183, 185-209, 211-235, 237-261, 263-287, 289-313, ...
- 3) If Commission approval is granted to include CWIP in Rate Base for additional projects, include additional tables for each of those additional projects.

# Schedule 11 Plant Held for Future Use

#### TRANSMISSION PLANT HELD FOR FUTURE USE

Inputs are shaded yellow

Transmission Plant Held for Future Use shall be amounts of Electric Plant Held for Future Use (account 105) intended to be placed under the Operational Control of the ISO, plus an allocated amount of any General Electric Plant Held for Future Use, with the allocation factor being the Transmission Wages and Salaries AF.

Line	<u>)</u>	Beginning of Year Balance	End of Year Balance	<u>Source</u>
1	Total Electric PHFU	- \$	-	FF1 page 214.47d

Plant intended to be placed under the Operational Control of the ISO:

### Calculation of Gain or Loss on Transmission Plant Held for Future Use -- Land

#### Instructions:

- 1) For any Electric Plant Held for Future Use intended to be placed under the Operational Control of the ISO, list on lines 2a, 2b, etc. Provide description in Column 1. Note type of plant (land or other) in Column 2. Under "Source" (Column 5), state the line number on FERC Form 1 page 214 from which the amount is derived. BOY amount will be EOY value from previous year FERC Form 1, EOY amount will be in current year FF1.
- 2) For any Electric Plant Held for Future Use classified as General note amount on Line 4.
- 3) Add additional lines 2 i, j, k, etc. as necessary to include additional projects intended to be placed under the Operational Control of the ISO.
- 4) Gains and Losses on Transmission Plant Held for Future Use Land is treated in accordance with Commission policy. Any gain or loss on non-land portions of Transmission Plant Held for Future Use is not included.

#### **Notes**

1) Amount of Line 1 not intended to be placed under the Operational Control of the ISO.

# Schedule 12 Abandoned Plant

#### Determination of amount of Abandoned Plant and Abandoned Plant Amortization Expense

Input data is shaded yellow

Initially Abandoned Plant Amortization Expense and Abandoned Plant are both zero.

Upon Commission approval of recovery of abandoned plant costs for a specific project or projects, SCE will complete this worksheet in accordance with that Order.

Orders Providing for Abandoned Plant Cost Recovery:

Project Commission Order
--- ----- ---

Amount for

Abandoned Plant for each project represents the amount of costs that the Order approves for inclusion in Rate Base.

Abandoned Plant Amortization Expense for each project represents the annual amortization of abandoned costs that the Order approves as an annual expense.

Prior Ye	ar	Note:
Abandoned Plant Amortization Expense: \$	-	Sum of projects below for PY.
Abandoned Plant (BOY): \$	-	Sum of projects below for PY.
Abandoned Plant (EOY): \$	-	Sum of projects below for PY.
Abandoned Plant (BOY/EOY Average): \$	-	Average of Lines 2 and 3.
HV Abandoned Plant (BOY): \$	-	Sum of projects below for PY.
	Abandoned Plant Amortization Expense: \$ Abandoned Plant (BOY): \$ Abandoned Plant (EOY): \$ Abandoned Plant (BOY/EOY Average): \$	Abandoned Plant (BOY): \$ - Abandoned Plant (EOY): \$ - Abandoned Plant (BOY/EOY Average): \$ -

18													

## Notes:

1) "EOY HV Abandoned Plant" is amount of "EOY Abandoned Plant" that would have been High Voltage (>= 200 kV).

#### Instructions:

- 1) Upon Commission approval of recovery of abandoned plant costs for a project:
- a) Fill in the name the project in order (First Project, Second Project, etc.).
- b) Fill in the table with annual End of Year ("EOY") Abandoned Plant, EOY HV Abandoned Plant, and

Abandoned Plant Amortization Expense amounts in Accordance with the Order.

- If table can not be filled out completely, fill out at least through the Prior Year at issue.
- c) Sum project-specific amounts for each project and enter in lines 1, 2, and 3 for the Prior Year at issue.
- (BOY value is EOY value from previous year)
- 2) Add additional projects if necessary in same format.
- 3) Add additional years past 2025 if necessary.

## Schedule 13 Working Capital

# **Calculation of Components of Working Capital**

Inputs are shaded yellow

# 1) Calculation of Materials and Supplies

Materials and Supplies is the amount of total Account 154 Materials and Supplies times the Transmission Wages and Salaries AF

# Schedule 14 Incentive Plant

Plant Balances For Incentive Projects Receiving either ROE Incentives ("Transmission Incentive Plant") or CWIP ("CWIP Plant")

Input data is shaded yellow

- A) Summary of Incentive Project plant balances receiving ROE incentives
  - ("Transmission Incentive Plant") and/or CWIP ("CWIP Plant") and calculation
  - of balances needed to determine the following:
    - 1) Rate Base in Prior Year
    - 2) Prior Year Incentive Rate Base End of Year
    - 3) Prior Year Incentive Rate Base 13-Month Average

Transmission Incentive Project plant balances and CWIP Plant may affect the following:

- a) CWIP Plant during the Prior Year is included in Rate Base (used in Prior Year TRR and True Up TRR).
- b) Forecast Period Incremental CWIP contributes to Incremental Forecast Period TRR
- c) CWIP Plant receiving an ROE adder contributes to Prior Year Incentive Rate Base EOY, or Prior Year Incentive Rate Base 13 Month Average as appropriate.
- d) "TIP Net Plant In Service" at EOY Prior Year is used to calculate the PY Incentive Rate Base (on EOY basis).
- e) "TIP Net Plant In Service" in PY is used to calculate the Prior Year Incentive Rate Base (on 13-month average basis).

Instructions:1) Upon Commission approval of any incentives for additional projects, add additional projects and provide cite to the Commission decision.

## Schedule 15 Incentive Adders

#### **Determination of Incentive Adders Components of the TRR**

Input data is shaded yellow

Two Incentive Adders are calculated:

- a) The Prior Year Incentive Adder is a component of the Prior Year TRR.
- b) The True Up Incentive Adder is a component of the True Up TRR.

# 1) Calculation of Incremental Return on Equity Factor

The Incremental Return on Equity Factor is the incremental Prior Year TRR expressed per 100 basis points of ROE incentive, for each million dollars of Incentive Net Plant. It is calculated according to the following formula:

<u>Line</u>	where:	<u>\</u>	<u>/alue</u>	<u>Source</u>
1	CSCP = Common Stock Capital Percentage		- %	1-BaseTRR, L 47
2	CTR = Composite Tax Rate		<u>- %</u>	1-BaseTRR, L 59
3		IREF = \$	-	Above formula

#### 2) Determination of multiplicative factors for use in calculating Incentive Adders:

Multiplicative factors are used to calculate the Incentive Adders on an Transmission Incentive Project specific basis. Multiplicative factor for each project is the ratio of its ROE adder to 1%.

			Multiplicative	
<u>Line</u>		ROE Adder	<b>Factor</b>	<u>Source</u>
4	1) Rancho Vista	- %		14-IncentivePlant, L 184
5	2) Tehachapi	- %		14-IncentivePlant, L 187
6	3) Devers to Col. River	- %		14-IncentivePlant, L 190
7				
8				

#### 3) Calculation of Prior Year Incentive Adder (EOY)

- 1) Determine Prior Year Incentive Adder for each Incentive Project by multiplying the IREF, the Multiplicative Factor, and the million \$ of Prior Year Incentive Rate Base.
- 2) Sum project-specific Incentive Adders to yield the total Prior Year Incentive Adder.

<u>Line</u>		Incentive Rate Base	Multiplicative Factor	Prior Ye Incentiv Adder		<u>Source</u>
9	1) Rancho Vista	\$ 		\$	-	14-IncentivePlant, L 13, Col. 1
10	2) Tehachapi	\$ -		\$	-	14-IncentivePlant, L 14, Col. 1
11	<ol><li>Devers to Col. River</li></ol>	\$ -		\$	-	14-IncentivePlant, L 15, Col. 1
12						
13						
14		Prior Yea	r Incentive Adder =	= \$	-	Sum of above PY Incentive Adders for each individual project

# 4) Calculation of True-Up Incentive Adder

- 1) Determine True Up Incentive Adder for each Incentive Project by multiplying the IREF, the Multiplicative Factor, and the million \$ of True Up Incentive Net Plant.
- 2) Sum project-specific Incentive Adders to yield the total True Up Incentive Adder.

Line		True-Up Incentive <u>Net Plant</u>	Multiplicative <u>Factor</u>		True-Up Incentive <u>Adder</u>		<u>Source</u>
15	1) Rancho Vista	\$ -		\$	<del></del>	-	14-IncentivePlant, L 19, Col. 1
16	2) Tehachapi	\$ -		\$		-	14-IncentivePlant, L 20, Col. 1
17	<ol><li>Devers to Col. River</li></ol>	\$ -		\$		-	14-IncentivePlant, L 21, Col. 1
18							
19							
20		True-U	p Incentive Adder	= \$		-	Sum of above PY Incentive Adders for each individual project

## Schedule 15 Incentive Adders

# 5) Calculation of Total ROE for Plant-In Service in the True Up TRR

# a) Transmission Incentive Plant Net Plant In Service

<u>Line</u>	Incentive <u>Project</u>	13-Month Ave TIP Net Plan <u>In Service</u>	_	<u>Source</u>
21	1) Rancho Vista	\$	-	14-IncentivePlant, L 19, Col. 3
22	2) Tehachapi	\$	-	14-IncentivePlant, L 20, Col. 3
23 24	3) Devers to Col. River	\$	-	14-IncentivePlant, L 21, Col. 3

#### b) Calculation of ROE Adders on TIP Net Plant In Service

		<u>Col 1</u>	Col 2 After-Tax

33	Plant In Service Rate Base:	\$	-	Line 31 - Line 32
34	Equity percentage:		- %	1-BaseTRR, Line 47
35	Equity Portion of Plant In Service Rate Base:	\$	-	Line 33 * Line 34

	d) Total ROE for Plant In Service in the True Up TRR		
<u>Line</u>			
36	Plant In Service ROE Adder Percentage:	- %	Line 30 / Line 35
37	Base ROE (Including 50 basis point		
38	CAISO Participation Adder):	<u>- %</u>	1-BaseTRR, Line 50
39	Total ROE for Plant In Service in True Up TRR:	- %	Line 36 + Line 38
	•		

# Instructions:

1) If additional projects receive ROE adders, add to end of lists, and include in calculation of each Incentive Adder.

#### Notes:

1) Column 1: The True Up Incentive Adder for each Incentive Project equals the IREF on Line 3, times the applicable Multiplicative Factor on Lines 15 to 18, times the million \$ of TIP Net Plant In Service on Lines 21 to 24.

Column 2: The After Tax True Up Incentive Adder is derived by multiplying the amounts in Column 1 by (1 - CTR) (Where the CTR is on Line 2).

#### Forecast Plant Additions for In-Service ISO Transmission Plant

Forecast Plant Additions represents the total increase in ISO Transmission Net Plant, not including CWIP, during the Rate Year, incremental to the year-end Prior Year amount.

It is calculated on a 13-Month Average Rasis during the Rate Year. It is calculated on a 13-Month Average Basis during the Rate Year.

Total Annual Depreciation Expense for Transmission Plant - ISO: \$ (equals sum of monthly amounts)

#### Schedule 17 **Depreciation Expense**

#### 39 2) Calculation of Depreciation Expense for Distribution Plant - ISO 40 41 Source 42 Distribution Plant - ISO BOY 6-PlantInService Line 15. 43 Distribution Plant - ISO EOY 6-PlantInService Line 16. 44 Average BOY/EOY: 45 46 Depreciation Rates (Percent per year) See "18-DepRates". <u>360</u> 362 48 49 Depreciation Expense for Distribution Plant - ISO See Note 2 and Instruction 2 50 51 52 Total is sum of Depreciation Expense for accounts 53 54 360, 361, and 362 55 56 3) Calculation of Depreciation Expense for General Plant and Intangible Plant 57 FF1 336.10f 58 Total General Plant Depreciation Expense 59 Total Intangible Plant Depreciation Expense FF1 336.1f 60 Sum of Total General and Total Intangible Depreciation Expense Line 58 + Line 59 Transmission Wages and Salaries Allocation Factor 27-Allocators, Line 9 61 62 General and Intangible Depreciation Expense Line 60 \* Line 61 63 64 4) Depreciation Expense 65 66 Depreciation Expense is the sum of: Amount Source 1) Depreciation Expense for Transmission Plant - ISO Line 37, Col 12 2) Depreciation Expense for Distribution Plant - ISO - Line 53 69 3) General and Intangible Depreciation Expense Line 62 70 Depreciation Expense: \$ Line 67 + Line 68 + Line 69 1) Depreciation Expense for each account for each month is equal to the previous month balance of Transmission Plant - ISO for that

- same account, times the Monthly Depreciation Rate for that account. Monthly rate = annual rates on Line 17a etc. divided by 12. 2) Depreciation Expense for each account is equal to the Average BOY/EOY value on Line 44 times the
- Depreciation Rate on Line 48.

## Instructions:

- 1) Depreciation rates on Lines 17a-17m input from Schedule 18. However, in the event of a change in depreciation rates approved by the Commission, use Commission-approved depreciation rates that were in effect during the Prior Year.
- 2) In the event that depreciation rates stated on Schedule 18 to be applied to Distribution Plant ISO are revised mid-year, calculate Depreciation Expense for for Distribution Plant - ISO on Line 53 utilizing the weighted-average (by time) of the annual depreciation rates in effect in the Prior Year.

92	Line 80 + Line 88													

#### Notes:

- 1) "Adjusted Operations and Maintenance Expenses for each account" are the total amounts of O&M costs booked to each Transmission or Distribution account, less adjustments as noted.
- 2) Reasons for excluded amounts:
- A: Exclude entire amount, all attributable to CAISO costs recovered in Energy Resource Recovery Account.
- B: Exclude amount related to MOGS Station Expense.
- C: Exclude amount attributable to CAISO costs recovered in Energy Resource Recovery Account.
- D: Exclude amount recovered through to Reliability Services Balancing Account, the Transmission Access Charge Balancing Account Adjustment, and the American Reinvestment Recovery Act for the Tehachapi Wind Energy Storage Project.
- E: Exclude amount of costs transfered to account from A&G Account 920 pursuant to Order 668
- F: Excludes shareholder funded costs

3) Total TDBU NOIC is allocated to Transmission and Distribution in proportion to labor in the respective functions. Transmission NOIC ("Non-Officer Incentive Compensation") equals Total TDBU NOIC times the Transmission NOIC Percentage calculated below. Distribution NOIC equals Total TDBU NOIC times the Distribution NOIC Percentage below.

- 4) NOIC attributable to ISO Transmission (Column 7) is calculated utilizing a percentage equal to the ratio of total ISO O&M Labor Expenses in column 7 (exclusive of NOIC) to the total labor expenses in column 3 (exclusive of NOIC). That allocator, which is identified below, is then applied to the value in Column 3 to arrive at the NOIC attributable to ISO Transmission in Column 7. Resulting Percentage is:
- 5) "ISO Operations and Maintenance Expenses" is the amount of costs in each Transmission or Distribution account related to ISO Transmission Facilities.
- 6) See Column 9 for references to source of each Percent ISO.
- 7) SCE shall make no adjustments to recorded labor amounts related to non-labor labor and/or Indirect labor in Schedule 19.

## Schedule 20 Administrative and General Expenses

#### Note 2: Non-Officer Incentive Compensation ("NOIC") Adjustment

Adjust NOIC by excluding accrued NOIC Amount and replacing with the actual non-capitalized A&G NOIC payout.

					<u>Amo</u>	unt	Source			
а				Accr	ued NOIC Amount: \$	-	SCE Records			
b			Actual A&G NOIC payout: \$ - Note							
С					Adjustment: \$	-				
Ac	tual non-capitalized NOIC Payouts:				-					
	<u>Department</u>		<u>Amou</u>	<u>nt</u>	<u>Source</u>					
d	A&G		\$	-	SCE Records and Workpap	ers				
е	Other		\$	-	SCE Records and Workpap	ers				
f	Trans. And Dist. Business Unit		\$	_	SCE Records and Workpap	ers				
а		Total:	\$	_	Sum of d to f					

#### **Note 3: PBOPs Exclusion Calculation**

		Amount	Note:
а	Current Authorized PBOPs Expense Amount:	\$40,171,333	See instruction #4
b	Prior Year Authorized PBOPs Expense Amount	\$ -	Authorized PBOPs Expense Amount during Prior Year
С	Prior Year FF1 PBOPs expense:	\$ 	SCE Records
d	PBOPs Expense Exclusion:	\$ -	c - b
Not	e 4:		

Amount in Line 31, column 2 equals amount in Line 8, column 1 because all Franchise Requirements Expenses are excluded Franchise Fees Expenses component of the Prior Year TRR are based on Franchise Fee Factors.

#### Instructions:

- 1) Enter amounts of A&G expenses from FERC Form 1 in Lines 1 to 14.
- 2) Fill out "Itemization of Exclusions" table for all input cells. NOIC amount in

Column 3. Line 24

- is calculated in Note 2. The PBOPs exclusion in Column 4, Line 30 is calculated in Note 3.
- a) Exclude amount of any Shareholder Adjustments, costs incurred on behalf of SCE shareholders, from relevant account in Column 1.
- b) Include as an adjustment in Column 1 for Account 920 any amount excluded from Accounts 569.100, 569.200, and 569.300
- in Schedule 19 (OandM) related to Order 668 costs transferred.
- c) Exclude entire amount of account 927 "Franchise Requirements" in Column 2, as those costs are recovered through the Franchise Fees Expense item.
- d) Exclude any amount of Account 930.1 "General Advertising Expense" not related to advertising for safety,
- siting, or informational purposes in column 1.
  e) Exclude any amount of expense relating to secondary land use and audit expenses not directly benefitting utility customers.
- f) Exclude from account 930.2:
- 1) Nuclear Power Research Expenses.
- 2) Write Off of Abandoned Project Expenses.
- 3) Any advertising expenses within the Consultants/Professional Services category.
- g) Exclude the following costs included in any account 920-935:
- 1) Any amount of "Provision for Doubtful Accounts" costs.
- 2) Any amount of "Accounting Suspense" costs.
- 3) Any penalties or fines.
- 4) Any amount of costs recovered 100% through California Public Utilities Commission ("CPUC") rates.
- 3) NOIC adjustment in Column 3, Line 24 is made by determining the difference between the total accrued NOIC amount included in the FERC Form 1 recorded cost amounts and the actual A&G NOIC payout (see note 2).

NOIC adjustment in column 3. Line 26 is made by entering the amount of accrued NOIC that is capitalized.

- 4) Determine the PBOPs exclusion. The authorized amount of PBOPs expense (line a) may only be revised pursuant to Commission acceptance of an SCE FPA Section 205 filing to revise the authorized PBOPs expense.
- in accordance with the tariff protocols. Accordingly, any amount different than the authorized PBOPs expense
- during the Prior Year is excluded from account 926 (see note 3). Docket or Decision approving authorized PBOPs amount:
- 5) SCE shall make no adjustments to recorded labor amounts related to non-labor labor and/or Indirect labor in Schedule 20.

Amount Calculation

44 Total Revenue Credits: Sum of Column D, Line 43 and Column G, Line 32

#### Notes:

- CPUC Jurisdictional service related.
- 2- Subject to sharing per the Gross Revenue Sharing Mechanism (GRSM), adopted in CPUC D.99-09-070. On an annual basis, once SCE obtains \$16,671,389.55 (Threshold Revenue) in NTP&S Revenues, any additional revenues (Incremental Gross Revenues) that SCE receives are shared between shareholders and ratepayers. For GRSM categories deemed Active, the Incremental Gross Revenues are shared 90/10 between shareholders and ratepayers. For those categories deemed Passive, the Incremental Gross Revenues are shared 70/30 between shareholders and ratepayers.
- Generation related.
- 4- Non-ISO facilities related.
- ISO transmission system related.
- 6- Subject to balancing account treatment
- 7- Allocated based on CPUC GRC allocator in effect during the Prior Year. The weighted average (by time) shall be used if more than one allocator is in effect during the Prior Year.
- network.
  9- Edison ESI is a subsidiary company. Gross revenues are not reported in FF-1, only net earnings. Net Earnings for ESI are
- reported on Acct 418.1, pg 225.5e.

  The first \$18.671.390 million in group revenues concreted by CBSM activities are sutemptically classified as Threshold.
- 10- The first \$16,671,389 million in gross revenues generated by GRSM activities are automatically classified as Threshold Revenue.
- 11- Allocator is equal to the jurisdictional split of the Threshold Revenue, which is jurisdictionalized as \$5.425M to FERC ratepayers and \$11.246M to CPUC ratepayers per the 2009 CPUC General Rate Case (D. 09-03-025). The ISO ratepayers' share of ratepayer revenue is \$5.425M/\$16.071M = 32.54%.
- 13- Mono Power Company is a subsidiary company. Net Earnings are reported on Acct 418.1, pg 225.11e. Revenues and costs shall be non-ISO.
- 14- SCE Capital Company is a subsidiary company. Net Earnings are reported on Acct 418.1, pg 225.23e. Revenues and costs shall be non-ISO.
- 15-Southern States Realty is a subsidiary company. Gross revenues are not reported in FF-1, only net earnings. Net Earnings for Southern States Realty are reported on Acct 418.1, pg 225.17e.
- 6- For subsidiaries that are subject to GRSM, Column D contains gross revenues. Input on Line 30D contains the associated expenses.
- 17- Per GRC Decision D.87-12-066, for ratemaking purposes EMS financials are consolidated with SCE's. See FERC Form 1 page 123.3 under "Equity Investment Differences". Consequently, net income of EMS is not reported separately in FERC Form 1 and is not a part of FERC Account 418.1 totals. To ensure that ratepayers receive the net income from this subsidiary SCE includes EMS net income in the formula on line 28f. This amount is reversed as part of line 30 to remain consistent with the totals reported in FERC Form 1.

#### Schedule 22 Network Upgrade Credits and Interest Expense

#### **NETWORK UPGRADE CREDIT AND INTEREST EXPENSE**

		Prior Year:	-
	1) Beginning of Year Balances: (Note 1)		
Line		<u>Balance</u>	<u>Notes</u>
1	Outstanding Network Upgrade Credits Recorded in FERC Acct 252	\$ -	See Note 1
2	Acct 252 Other	\$ -	Line 3 - Line 1
3	Total Acct 252 - Customer Advances for Construction	\$ -	FF1 113.56d
	2) End of Year Balances: (Note 2)

5	Acct 252 Other	\$ -	Line 6 - Line 4
6	Total Acct 252 - Customer Advances for Construction	-	FF1 113.56c
7	Average Outstanding Network Upgrade Credits Beginning and End of Year	\$ -	(Line 1 + Line 4) / 2
8	Interest On Network Upgrade Credits Recorded in FERC Acct 242	\$ -	See Note 4
9	Acct 242 Other	\$ -	Line 10 - Line 8

### Notes:

- 1 Beginning of Year Balances are from December of the year previous to the Prior Year.
- 2 End of Year Balances are from December of the Prior Year.

10 Total Acct 242 - Miscellaneous Current and Accrued Liabilities

- 3 Only projects that are in Rate Base in the year reported are included.
- 4 Interest relates to refund of facility and one-time payments by generator. For facility costs, pre-in-service date interest is excluded. For one-time costs, pre-in-service and post-in-service interest is included.

# Schedule 23 Regulatory Assets and Liabilities

### Determination of Regulatory Assets/Liabilities and Associated Amortization and Regulatory Debits/Credits

#### Line

Other Regulatory Assets/Liabilities are a component of Rate Base representing costs that are created resulting from the ratemaking actions of regulatory agencies. Pursuant to the Commission's Uniform System of Accounts, these items include amounts recorded in accounts 182.x and 254. This Schedule shall not include any costs recovered through Schedule 12.

4

SCE shall include a non-zero amount of Other Regulatory Assets/Liabilities only with Commission approval received subsequent to an SCE Section 205 filing requesting such treatment.

7

Amortization and Regulatory Debits/Credits are amounts approved for recovery in this formula transmission rate representing the approved annual recovery of Other Regulatory Assets/Liabilities as an expense item in the Base TRR, consistent with a Commission Order.

11

12		Prior `	Year	
13		<u>Amo</u>	<u>unt</u>	Calculation or Source
14	Other Regulatory Assets/Liabilities (EOY):	\$	-	Sum of Column 2 below
15	Other Regulatory Assets/Liabilities (BOY/EOY average):	\$	-	Avg. of Sum of Cols. 1 and 2 below
16	Amortization and Regulatory Debits/Credits:	\$	-	Sum of Column 3 below

	Description of Issue Resulting in Other Regulatory Asset/Liability	Col 1 Prior Year BOY Other Reg Asset/Liabilit	Y	Col 2 Prior Year EOY Other Reg Asset/Liability	Col 3 Prior Year ortization or Regulatory Debit/Credit	Commission Order Granting Approval of Regulatory Liability
17	Issue #1	\$	-	\$ -	\$ -	
18	Issue #2	\$	-	\$ -	\$ -	
19	Issue #3	\$	_	\$ -	\$ _	
20	Totals:	\$	-	\$ -	\$ -	Sum of above

#### Instructions:

- 1) Upon Commission approval of recovery of Other Regulatory Assets/Liabilities, Amortization and Regulatory Debits/Credits costs through this formula transmission rate:
  - a) Fill in Description for issue in above table.
- b) Enter costs in columns 1-3 in above table for the applicable Prior Year.
- 2) Add additional lines as necessary for additional issues.

- 6) Same as Note 5 except no Uncollectibles Expense in Column 3.

#### Schedule 25 Wholesale Differences to Base TRR

### Calculation of Wholesale Difference to the Base TRR

Inputs are shaded vellow

Expense

Col 1

Col 2

The Wholesale Difference to the Base TRR represents the amount by which the Wholesale Base TRR differs as compared to the Retail Base TRR. This difference is attributable to differences in the following six items, as approved by Commission Order 86 FERC ¶ 63,014 in Docket No. ER97-2355.

These six items may affect the Base TRR by affecting Rate Base, or affecting an annual expense (amortization). If the annual amortization affects Income Taxes, there is an additional annual Income Tax Effect. The table summarizes these impacts for each item:

			=xpoi.ico	
Line		Rate Base <u>Difference</u>	(Amortization) <u>Difference</u>	Expense Tax Impact
1	a) Depreciation	Yes	Yes	No
2	b) Taxes Deferred -Make Up Adjustment (South Georgia)	Yes	Yes	Yes
3	c) Excess Deferred Taxes	Yes	Yes	Yes
4	d) Taxes Deferred - Acct. 282 ACRS/MACRS	Yes	Yes	No
5	e) Uncollectibles Expense	No	Yes	No
6	f) EPRI and EEI Dues	No	Yes	No

#### 1) Calculation of Wholesale Rate Base Difference and Wholesale Rate Base Adjustment

#### a) Quantification of the Initial 2010 Wholesale Rate Base Difference and annual change

The difference between Retail and Wholesale Rate Base is attributable to the following four items, with the Initial Prior Year 2010 Rate Base differences and annual changes as follows:

		Data <u>Source</u>		2010 Rate Base Difference (Wholesale less Retail)	Annual Change (Amortization)
7	Accumulated Depreciation	Fixed values		\$31,556,000	-\$2,176,300
8	2) Taxes Deferred - Make Up Adjustment	Fixed values		-\$35,044,000	\$2,503,000
9	3) Excess Deferred Taxes	Fixed values		-\$624,650	\$43,100
10	4) Taxes Deferred - Acct. 282 ACRS/MACRS	Fixed values		<u>-\$7,410,000</u>	<u>\$511,200</u>
11			Totals:	-\$11,522,650	\$881,000

#### b) Quantification of the Wholesale Rate Base Adjustment

The Wholesale Rate Base Adjustment represents the impact on the Wholesale Base TRR relative to the Retail Base TRR of the Wholesale Rate Base Difference for the Prior Year.

		Data				
		<u>Source</u>	<u>Value</u>	Note	s/Instructions	<u> </u>
12	Fixed Charge Rate	2-IFPTRR Line 16	_ 9	%	1	
13	Prior Year		-		2	
14	Wholesale Rate Base Difference for Prior Year		\$	-	3	
15	Wholesale Rate Base Adjustment	Line 14 * Line 12	\$	-		

#### 2) Calculation of Wholesale Expense Difference

The annual Wholesale Expense Difference impact is the negative of amounts stated in Lines 7 to 10 above, Column 2. It represents the effect on expenses (Wholesale less Retail) of amortizing the associated balances each year. If an annual amortization amount affects Income Taxes, the expense difference must be grossed up for income taxes.

#### a) Calculation of the Wholesale South Georgia Income Tax Adjustment to the TRR

<u>From</u>	<u>To</u>	<u>Prior Year</u>

#### 3) FF and U Factors

	Prior		
	<u>Year</u>	FF Factor	<b>U</b> Factor
5		- %	- %

### <u>Notes</u>

Calculated according to Instruction 3

#### Notes:

3 4

1) Franchise Fees represent payments that SCE makes to municipal entities for the right to locate facilities within the municipality.

#### Instructions:

- 1) Enter Franchise Fee and Uncollectibles Factors as approved by the California Public Utilities Commission ("CPUC") in modules 1 and 2 above pursuant to Instruction 2. If approved factors changed during Prior Year, enter both, and note period of time for which each applies in "From" and "To" columns, and number of days each was in effect during the Prior Year in "Days in Prior Year" Column.
- 2) Franchise Fees Factor is calculated from CPUC Decision by dividing adopted Franchise Fees by Total Operating Revenues less Franchise Fees. Uncollectibles Factor is calculated by dividing adopted Uncollectibles expense by Total Operating revenues less Uncollectibles Expense. Resulting FF & U Factors represent factors that, when applied to TRR without FF and U will correctly determine FF and U expense.
- 3) Calculate in module 3 the weighted average FF and U factors from the factors in modules 1 and 2 based on the number of days each FF and U factor was in effect during the Prior Year at issue.

	Percent	<u>Calculation</u>
Prior Year FF Factor:	- %	((L1 FF Factor * L1 Days) + (L2 FF Factor * L2 Days))/(L1+L2 Days)
Prior Year U Factor:	- %	((L3 U Factor * L3 Days) + (L4 U Factor * L4 Days))/(L3+L4 Days)

#### Notes:

- 1) TRBAA is "Transmission Revenue Balancing Account Adjustment". The TRBAA is determined pursuant to SCE's Transmission Owner Tariff and may be revised each January 1, upon commission acceptance of a revised TRBAA amount, or upon the date the Commission orders.
- 2) From 33-RetailRates. See Line:
- 3) Column 1 is from Line 1.

Column 2 equals Column 1 \* Line 6.

Column 3 equals Column 1 \* Line 7.

- 4) From 24-CWIPTRR, Line 88. All High Voltage.
- 5) Line 8 Line 9
- 6) Column 1 is from Line 5.

Column 2 equals Column 1 \* Line 6.

Column 3 equals Column 1 \* Line 7.

#### Schedule 30 Wholesale Rates

### Calculation of SCE Wholesale Rates (See Note 1)

SCE's wholesale rates are as follows:

- 1) Low Voltage Access Charge
- 2) High Voltage Utility-Specific Rate
- 3) HV Existing Contracts Access Charge

### Calculation of Low Voltage Access Charge:

<u>Line</u>				<u>Source</u>
1	LV TRR = \$	-		29-WholesaleTRRs, Line 13, C3
2	Gross Load =	N	ЛWh	32-Gross Load, Line 3
3	Low Voltage Access Charge = \$	- p	er kWh	Line 1 / (Line 2 * 1000)

### Calculation of High Voltage Utility Specific Rate:

(used by ISO in billing of ISO TAC)

4	SCE HV TRR = \$	-		29-WholesaleTRRs, Line 13, C2
5	Gross Load =		MWh	32-Gross Load, Line 3
6	High Voltage Utility-Specific Rate = \$	-	per kWh	Line 4 / (Line 5 * 1000)

Source

### Calculation of High Voltage Existing Contracts Access Charge:

			<u>Jource</u>
7	HV Wholesale TRR = \$	-	29-WholesaleTRRs, Line 13, C2
8	Sum of Monthly Peak Demands:	MW	32-Gross Load, Line 4
9	HV Existing Contracts Access Charge: \$	<ul> <li>per kW</li> </ul>	Line 7 / (Line 8 * 1000)

### Notes:

1) SCE's wholesale rates are subject to revision upon acceptance by the Commission of a revised TRBAA amount. See Note 1 on 29-WholesaleTRRs.

#### Schedule 31 **High and Low Voltage Gross Plant**

**39** LV Allocation Factor)

Derivation of High Voltage and Low Voltage Gross Plant Percentages

Determination of HV and LV Gross Plant Percentages for ISO Transmission Plant in accordance with ISO Tariff Appendix F, Schedule 3, Section 12.

Input cells are shaded yellow

#### 19 Notes:

- 1) See Col 9 of Lines 35a, 35b, 35c, etc.
- 2) Sales forecast in total Giga-watt hours usage, represents the customers' total annual GWh usage. Based on same forecast as Gross Load forecast in Schedule 32, Line 1, but at customer meter level. Does not include Backup GWh included in Column 4 (the sum of Column 3 and 4 equals total Sales Forecast).
- 3) Backup GWh represents the amount of electric service that is provided by SCE to a customer who has an onsite generating facility during unscheduled outages of the customer's on-site generator. Only applies to TOU-8-Standby-SEC, TOU-8-Standby-PRI, TOU-8-Standby-SUB Rate Groups.
- 4) Amount of energy included in the sales forecast that is not subject to transmission charges pursuant to the California Public Utilities Commission ("CPUC") approved Net Energy Metering Program.
- 5) Sales forecast pertaining to the sum of monthly maximum supplemental Mega-watt demand, applies to demand charge schedules
- 6) Sales forecast pertaining to the sum of monthly contracted standby Mega-watt demand, applies to standby schedules
- 7) Net Forecast in total Giga-watt hours usage represents the customers' annual Net GWh, applicable to Non-Demand Charge Schedules such as Residential or Small General Service 8) Recorded sales from Sample meters adjusted for population use to set the total demand rate for the optional time-of-use schedules within the GS-1 rate group
- 9) Line 1b2, Col11 = Line 1b Col9 \* Line 1b Col11 \* 10^6
- 10) Total demand rate for the optional time-of-use schedules within the GS-1 rate group, Line 1b2:Col10 = Line 1b2:Col12 ( which = Line 1b2:Col11 / ((Line1b:Col12 + Line1b:Col13) \* 10^3)
- 11) Sum of the TOU-8 Standby and TOU-8 Non-Standby billing determinants in Line1:Col6

#### Schedule 33 Retail Transmission Rates

- 12) For TOU-8 Rates revenue = Supplemental Demand Charge on Line 9 Column 8 \* Maximum Demand on Lines 1 Column 6
- 13) For optional time-of-use schedules within the GS-1 rate group (Line16b:Col6), = (Line1b2:Col11 Line16:Col3) / Line1b:Col12 / 10^3
- 14) For the non TOU-8-Standby rate group, it is the minimum of Line16i:Col7, or the total demand rate in Line1:Col109
- 15) Applicable to time-of-use schedules within the GS-1 rate group
- 16) Applicable to the optional schedules that contain horse power charge such as PA-1
  17) GWh for TOU-8-Standby-SEC, TOU-8-Standby-PRI, TOU-8-Standby-SUB Rate Groups are placed in TOU-8-SEC, TOU-8-PRI, TOU-8-SUB Rate Groups respectively.

### APPENDIX II

### **Charges for Wholesale Transmission Services**

<u>Low Voltage Access Charge</u>: Equals the Low Voltage Transmission Revenue Requirement divided by Gross Load.

High Voltage Wheeling Access Charge: ..... Assessed by ISO, See ISO Tariff

Low Voltage Wheeling Access Charge: Assessed by ISO, See ISO Tariff Equals the Low Voltage Transmission Revenue Requirement divided by Gross Load.

<u>High Voltage Utility-Specific Rate</u>: Equals the High Voltage Transmission Revenue Requirement divided by Gross Load.

High Voltage Existing Contracts Access Charge: Equals the High Voltage Transmission Revenue Requirement divided by the sum of the twelve monthly retail system peak demands measured at the ISO Controlled Grid level.

The High Voltage Existing Contracts Access Charge is applicable to the following Existing Contracts Customers commencing on the applicable implementation date:

Existing Contract Customer	Rate Schedule FERC	Implementation
	No.	Date
City of Azusa	<del>372,</del> 373, 374, 375	January 1, 2003
City of Banning	<del>378,</del> 379, 380	January 1, 2003
City of Colton	<del>361,</del> 362, 363, 365	January 1, 2003
City of Riverside	390, 391, 392	January 1, 2003
City of Vernon	207, 360	January 1, 2013
City of Los Angeles,	219	January 1, 2003
Department of Water and		
Power		

<u>Low Voltage Existing Contracts Access Charge</u>: Equals the Low Voltage Transmission Revenue Requirement divided by the sum of the twelve monthly retail system peak demands measured at the ISO Controlled Grid level.

The Low Voltage Existing Contracts Access Charge is applicable to the following Existing Contracts Customers commencing on the applicable implementation date:

Existing Contract Customer	Rate Schedule FERC	<b>Implementation</b>
	No.	<del>Date</del>
City of Banning	<del>378, 379, 380</del>	<del>January 1, 2003</del>

SCE shall post these rates on its website: www.sce.com.

### **APPENDIX IX**

#### **ATTACHMENT 1**

### FORMULA RATE PROTOCOLS

#### 1. INTRODUCTION

SCE shall calculate its Base Transmission Revenue Requirement ("Base TRR"), as defined in Section 3.6 of the main definitions section of this TO Tariff, using the formula rate that is presented in spreadsheet format in Attachment 2 to Appendix IX ("Formula Rate Spreadsheet"). The Formula Rate Spreadsheet contains fixed formulae that are only subject to change pursuant to Sections 205 and 206 of the Federal Power Act, and will be populated with data from SCE's annual Federal Energy Regulatory Commission ("FERC" or the "Commission") Form 1 filing or from other SCE records. The sources of the data used in the Formula Rate will be: (a) identified in the Formula Rate Spreadsheet by fixed references to specific locations in FERC Form 1, or (b) provided by SCE in accordance with Section 3 of these Protocols.

The Base TRR shall be calculated annually in accordance with the Formula Rate and shall be equal to the sum of the Prior Year TRR, the Incremental Forecast Period TRR, and the True Up Adjustment. Additionally, SCE shall include a Cost Adjustment in the Base TRR for the upcoming Rate Year in the event that a discrete cost of service item (e.g., individual O&M expense, tax expense, or revenue credit) incurred anytime between the beginning of the Prior Year and the September 30 immediately preceding the Annual Update filing (i.e., a 21 month window) is a one-time item that will not recur in such Rate Year. Individual items shall not be aggregated for purpose of determining a discrete cost of service item. The discrete cost of service item must amount to at least 3% of the Base TRR in such Annual Update filing in order for a Cost Adjustment to be included as a component of the Base TRR. The Cost Adjustment shall be handled as follows:

a) If the discrete cost of service item occurred during the Prior Year, then the Cost Adjustment component of the Base TRR shall be an amount with the same magnitude but of the opposite sign as the discrete cost of service item. For example, if the discrete cost of service item is a \$100 million one-time property tax refund (a negative item) received during 2012 but which will not recur during 2014, + \$100 million will be included as a Cost Adjustment component of the Base TRR in the Annual Update for the 2014 Rate Year. If the discrete cost of

<sup>&</sup>lt;sup>1</sup> Attachment 2 consists of thirty-fourive (345) individual Schedules. All references in the Formula Rate Protocols ("Protocols") to Schedules refer to Schedules in the Formula Rate Spreadsheet. The Formula Rate Spreadsheet and Formula Rate Protocols together comprise the "Formula Rate." The formula rate that was in effect from January 1, 2012 through December 31, 2017 pursuant to Docket No. ER11-3697 shall be referred to herein as the "Original Formula Rate".

service item is a \$100 million one-time O&M cost (a positive item) incurred during 2012 that will not recur in 2014, - \$100 million will be included as a Cost Adjustment component of the Base TRR in the Annual Update for the 2014 Rate Year. Both examples assume the 3% threshold is met.

b) If the discrete cost of service item occurred between January 1 and September 30 of the year in which the Annual Update filing is submitted to FERC (i.e., the year before the upcoming Rate Year), then the Cost Adjustment component of the Base TRR shall be an amount with the same magnitude and the same sign as the discrete cost of service item. For example, if the discrete cost of service item is a \$100 million one-time property tax refund (a negative item) received during the first nine months of 2013 but which will not recur during 2014, - \$100 million will be included as a Cost Adjustment component of the Base TRR in the Annual Update for the 2014 Rate Year. If the discrete cost of service item is a \$100 million one-time O&M cost (a positive item) incurred during the first nine months of 2013 that will not recur in 2014, + \$100 million will be included as a Cost Adjustment component of the Base TRR in the Annual Update for the 2014 Rate Year. Both examples assume the 3% threshold is met.

If SCE includes a Cost Adjustment in its Base TRR, SCE shall include with its Annual Update an explanation of its belief that the discrete cost of service item that is the subject of such Cost Adjustment will not recur in the upcoming Rate Year.

The Wholesale Base TRR is equal to the Base TRR adjusted as follows (as set forth in Schedule 25): (1) Uncollectibles Expense is not included in the Wholesale Base TRR; (2) the Wholesale Rate Base Adjustment and associated Wholesale Expense Difference is included in the Wholesale TRR; (3) EEI dues and EPRI dues Expenses are excluded from the Wholesale Base TRR; and (4) Franchise Fees Expense included in the Wholesale Base TRR is lower than that included in the Base TRR due to the Franchise Fee Factor being applied to a lower Base TRR.

#### 2. TERM OF THE FORMULA RATE

The Formula Rate shall become effective on January 1, 20182, and SCE's Base TRR shall be subject to true up beginning on that date in accordance with these Protocols. Retail and Wholesale transmission rates shall become effective on January 1, 20182, and shall be redetermined annually in accordance with these Protocols and the Formula Rate Spreadsheet. The Formula Rate will remain in effect without termination unless and until SCE files pursuant to Section 205 of the Federal Power Act to replace the Formula Rate with a successor transmission rate mechanism and the Commission accepts such successor transmission rate mechanism. Except as set forth below, the Formula Rate shall terminate December 31, 2017. SCE shall submit a filing under Section 205 of the Federal Power Act by no later than 60 days prior to December 31, 2017, proposing a transmission rate schedule, which may include revised transmission rates. The rates and other components of such filing shall be at SCE's sole discretion, and may be in the form of a formula rate or a traditional stated rate. Parties retain all rights to oppose the filing.

Such filing shall request an effective date of January 1, 2018. In the event that the

Commission does not permit the proposed rate schedule and the associated rates to become effective on January 1, 2018, tThis Formula Rate shall remain in effect until the date that the <u>successor</u> rate <u>mechanism</u> filing is made effective by the Commission.

### 3. PROCEDURES FOR UPDATING THE BASE TRR

For as long as this Formula Rate is in effect, SCE shall update its Base TRR for the upcoming Rate Year<sup>2</sup> according to the timeline and procedures described in this Section. A summary of the procedures for updating the Base TRR is set forth in the following table:

Event	Date		
Posting Date of Draft Annual Update	June 15		
Start of Information Requests	June 15		
Draft Annual Update Conference	June 15 – July 15		
End of Information Requests	November 1		
Annual Update filed with FERC	December 1		
Rate Goes into Effect	January 1		

### a) Draft Annual Update

On or before June 15 of each year, SCE will post to its website (www.sce.com) its Draft Annual Update and will provide electronic notice of such posting to the Service List.<sup>3</sup> The Draft Annual Update shall set forth the Base TRR for the upcoming Rate Year, and shall include populated versions of all Schedules comprising the Formula Rate in their native format with all formulas and links intact. In addition to the foregoing, the Draft Annual Update shall include the following:

- 1) All workpapers used in the calculation of the Base TRR. The workpapers shall be provided in their native format, with all formulas and links intact.
- 2) The Plant Study described in Section 9 of the Protocols in native format with all formulas and links intact, along with all workpapers prepared in support of

<sup>&</sup>lt;sup>2</sup> "Rate Year" shall mean the twelve consecutive month period of January 1 through December 31 that corresponds to the year for which charges are assessed under the Formula Rate.

<sup>&</sup>lt;sup>3</sup> The "Service List" includes (1) any state regulatory agency with jurisdiction over the rates, charges or services of SCE; (2) any person or entity admitted as a party to <a href="this Formula Rate proceedingFERC Docket-No. ER11-3697">this Formula Rate proceedingFERC Docket-No. ER11-3697</a>; and (3) any person or entity admitted as a party in any Annual Update proceeding filed by SCE in accordance with these Protocols. For purposes of communications with parties on the Service List, SCE will include the individuals on the service list in <a href="the Docket in which this Formula Rate is filedDocket No. ER11-3697">the Docket in the Docket in which this Formula Rate is filedDocket No. ER11-3697</a> and any party admitted to future FERC proceedings involving Formula Rate Annual Updates.

the Plant Study, and a description of any changes in the methodology used to perform the Plant Study as compared with the Prior Year's Annual Update.

- 3) Workpapers supporting the inputs that appear in Schedule 27 in equivalent form to the workpapers provided in FERC Docket No. ER11-3697, Volume 4, Workpapers for Exhibit SCE-600, pages 1-268.
- 4) Workpapers that demonstrate the historical corporate overhead expenses recorded for ISO projects by Project Identification Number (PIN) that closed in the prior year and have accumulated ISO project costs greater than \$5 million.
- 5) Workpapers that demonstrate the derivation of the AFUDC rates applicable to all projects in the prior year.
- 6) Workpapers supporting the forecasted gross plant expenditures shown on Schedule 16.
- 7) A statement that identifies each ISO project (PIN) with total direct expenditures (recorded and forecast) greater than \$5 million projected to go into rate base during the <u>forecast periodupcoming Rate Year</u>. The statement will also include the monthly budgeted direct expenditures, to the extent such currently projected costs are shown on the most recent applicable SCE budget documents, and the total project cost of each project.
- 8) Workpapers showing the beginning of year and end of year outstanding network upgrade credits, as well as interest on network upgrade credits that is recorded in Account 252 listed by entity due those credits. The workpapers shall be provided in equivalent form to the workpapers entitled "Workpapers for Exhibit SCE-800" provided by SCE in FERC Docket No. ER11-3697.
- 9) Workpapers showing forecast period incentive Construction Work in Progress ("CWIP") projects by PIN and by month that support the values in Schedule 10 at lines 29-70 in equivalent form to the workpapers provided in FERC Docket No. ER11-3697, Volume 3, Workpapers for Exhibit SCE-500, pages 149-175.
- 40)9) A description of any Material Accounting Changes contained in the Draft Annual Update.4

<sup>&</sup>lt;sup>4</sup> "Material Accounting Changes" shall mean any material change in SCE's (i) accounting policies and practices from those in effect for the <u>PriorRate</u> Year upon which the immediately preceding Annual Update was based, or (ii) internal corporate cost allocation policies or practices from those policies and/or practices in effect for the <u>PriorRate</u> Year upon which the immediately preceding Annual Update was based.

- 41)10 A workpaper describing the nature and amount of each project/activity, the costs of which are booked to Account 930.2 and which are recovered under the Formula Rate. The workpaper shall include, for each account 930.2 line item cost shown in FERC Form 1, the following information: 1) Total FERC Form 1 cost; 2) Amount Included; 3) Amount Excluded; and 4) Formula rate reference to the reason for the exclusion(s).
- 42)11) A workpaper identifying each discrete A&G cost item that has been excluded from Schedule 20 of the Formula Rate (including both "positive exclusions" and "negative exclusions"), together with a summation of such items by account, and incentive compensation workpapers related to instructions 2.h.1-4 of Schedule 20 regarding Incentive Compensation.
- 13)12) A description of any facilities SCE projects will change classification between CPUC and CAISO jurisdictions through the Rate Year the next five years. This description should include an estimated date for when the project will change classification, the reason for the classification change, and the proposed future rate recovery (i.e., whether through FERC or CPUC rates).

### b) Draft Annual Update Conference

SCE will provide notice to parties on the Service List of a one-day meeting, to take place on or before July 15 of each year, to discuss the Draft Annual Update. By mutual agreement of SCE and the parties on the Service List, such a meeting may take place in-person, via telephone, or video-conference. SCE shall make appropriate personnel available for such meeting. Additional meetings to discuss the Draft Annual Update shall be scheduled as SCE and the parties on the Service List may mutually agree.

### c) Information Requests

- At any time from June 15 until November 1, parties on the Service List may submit reasonable information requests to SCE regarding the Draft Annual Update.
- 2) SCE shall make a good faith effort to respond to information requests in writing within ten (10) business days of receipt. Alternatively, if SCE in good faith believes that the information request is unreasonable, SCE may object to the request. SCE shall contemporaneously provide copies of all responses to all parties on the Service List that have indicated to SCE that they wish to receive such copies. If SCE objects to an information request, then SCE shall make a good faith effort to provide its objections within ten (10) business days of receipt of the information requests to the party serving the request. SCE shall include in its objection the basis for the objection. SCE and the party serving the information request on SCE will work cooperatively and in good

Option Code: A

faith to resolve any questions, objections, or disputes relating to the information requests.

- 3) Responses to information requests shall not be designated as settlement communications or produced under the Commission's rules and regulations governing settlements, unless provided as a privileged settlement communication in a Commission proceeding being conducted under the Commission's settlement rules. SCE may mark materials provided in response to an information request as Protected Materials in accordance with Exhibit A to the Protocols. To the extent an information request response calls for the production of Protected Materials, SCE will only provide such materials to the parties with whom it has entered into a non-disclosure agreement that is included in Exhibit A.
- 4) To the extent SCE and any interested party(ies) are unable to resolve disputes related to information requests submitted in accordance with these Protocols, SCE or any interested party may petition the FERC to appoint an Administrative Law Judge as a discovery master. Neither SCE nor any interested party shall object to a request for a Discovery Master. The discovery master shall have the power to issue orders to resolve discovery disputes, as appropriate, in accordance with these Protocols and consistent with the FERC's discovery rules. The discovery master's orders shall be subject to appeal to the Commission and to the courts to the same extent and under the same rules as would be applicable to an Initial Decision issued under Rule 708 of the Commission's Rules of Practice and Procedure. In the event the Commission establishes hearing procedures for an Annual Update, the discovery master's responsibilities shall be transferred to the Presiding Judge for such hearing effective upon his or her appointment.

### d) Annual Update

- 1) On or before December 1 of each year, SCE shall file with the Commission its Annual Update setting forth the Base TRR and associated rates for the upcoming Rate Year. It is expressly intended by these Protocols that the Commission will issue public notice of the Annual Update inviting public comment, and SCE shall request in its Annual Update filing that the Commission issue public notice of the Annual Update inviting public comment.
- 2) SCE shall identify in the Annual Update any corrections or other changes to the Draft Annual Update, and shall provide an explanation of the reason for the changes. SCE shall also include in the Annual Update any changes to the Draft Annual Update that it and any other party have agreed upon as of November 15.

- 3) The Annual Update shall not modify the Formula Rate or subject the Formula Rate to modification, and shall not constitute a rate change filing under Section 205 of the Federal Power Act. Any party may challenge the justness and reasonableness of SCE's implementation of its Formula Rate with respect to: (a) whether SCE has properly and reasonably applied the Formula Rate Spreadsheet and the procedures in these Protocols; (b) whether the costs to be recovered have been accurately stated, properly recorded and accounted for pursuant to applicable FERC accounting practices and procedures; (c) whether the costs to be recovered through the Base TRR and associated rates have been or will be prudently incurred; (d) whether SCE's projections have been reasonably made; (e) whether its calculation methodologies are consistent with the Formula Rate; (f) whether SCE has made the required filings under Section 8(a) of these Protocols to reflect any intervening change(s) to the Uniform System of Accounts or FERC Form 1; and
  - (g) whether any Material Accounting Changes are reasonable and consistent with the Uniform System of Accounts; and (h) whether SCE's implementation of the Formula Rate Spreadsheet and these Protocols is consistent with the settlement approved by the Commission in Docket No. ER11-3697.
- 4) The Base TRR set forth in the Annual Update and associated rates shall be effective on January 1 of the upcoming Rate Year.
- 5) Any party may comment on or protest the Annual Update. Any party may request that FERC establish hearing and/or settlement procedures regarding an Annual Update, and all parties reserve their rights to oppose such requests on their merits, but may not object to such requests on the basis that hearing and/or settlement procedures are prohibited by these Protocols or the Formula Rate Spreadsheet. Nothing in these Protocols shall act as a bar to a party raising an issue in comments or in protests to the Annual Update that it has not raised in a prior Annual Update proceeding (including pre-filing phases of such proceeding) or with respect to which it has not previously exercised its rights under the Federal Power Act. It is expressly intended by these Protocols that FERC issue an order taking action, assuming any action is requested, on the Annual Update if protests and/or comments on the Annual Update are filed.
- 6) In any Annual Update proceeding, SCE shall bear the burden, consistent with Section 205 of the Federal Power Act, of showing the justness and reasonableness of the implementation of its Formula Rate by demonstrating that: (a) it has properly and reasonably applied the Formula Rate Spreadsheet and the procedures in these Protocols; (b) the costs to be recovered have been accurately stated, properly recorded and accounted for pursuant to applicable FERC accounting practices and procedures; (c) its

Option Code: A

projections have been reasonably made; (d) its calculation methodologies are consistent with the Formula Rate; and (e) any Material Accounting Changes are reasonable and consistent with the Uniform System of Accounts; and f) its implementation of the Formula Rate Spreadsheet and these Protocols are consistent with the settlement approved by the Commission in Docket No. ER11-3697. Nothing herein is intended to alter the burden of proof applied by the Commission with respect to prudence.

- 7) SCE will make any revisions to the Base TRR and associated rates that are required by a final<sup>5</sup> Commission order with respect to each Annual Update. Unless otherwise ordered by the Commission, such revisions shall be effective as of the first day of the applicable Rate Year and shall be reflected, with interest calculated pursuant to the interest rate in Section 35.19a of the Commission's regulations, in the next subsequent Annual Update as a component of the True Up Adjustment. If the term of the Formula Rate is expiring so that there will be no future Annual Update, SCE shall include the TRR difference in the Final True Up Adjustment.
- 8) If SCE determines or concedes that a previously-filed Annual Update with a Prior Year not more than two years previous to the Prior Year of the current Annual Update contained errors that affected the True Up TRR calculated in that Annual Update, including but not limited to filed corrections to its FERC Form 1 that affect inputs to the Formula Rate, or errors in other input data used in determining the True Up TRR, SCE shall promptly serve notice to the Commission in the docket of the affected Annual Update that SCE intends to file an Amended Annual Update, with a brief description of the errors to be corrected in such filing. SCE shall additionally notify the entities that have participated in SCE's Annual Update filings of the errors and the upcoming Amended Annual Update. The Amended Annual Update shall:
  - recalculate the True Up TRR for all affected Prior Years;
  - ii compare, on a monthly basis, the difference between the initial incorrect True Up TRR and the revised correct True Up TRR; and
  - iii determine the cumulative amount of the difference in (ii), including interest calculated pursuant to the interest rate in 18 C.F.R. § 35.19a.

<sup>&</sup>lt;sup>5</sup> All references in these Protocols to Commission orders or actions refer to the final form of such orders or actions (in accordance with the Federal Power Act and applicable Commission regulations, including without limitation Commission regulations with respect to a stay of a Commission order upon rehearing and/or an appeal), including as they may be modified as a result of a request for rehearing or Court appeal.

The difference in (iii) shall be included as an additional component to SCE's True Up Adjustment in the subsequent Annual Update as a One Time True Up Adjustment in accordance with the Formula Rate.

If the difference in (iii) would not result in an increase to the True-Up TRR of more than \$1 million, however, then SCE need not submit to the Commission an Amended Annual Update, as described above, but may include the difference in (iii) in its Draft Annual Update, or, if the error is discovered after the posting of a Draft Annual Update on June 15, in an amended Draft Annual Update posted on SCE's website no later than October 31.

In the event that SCE has identified multiple input errors, SCE shall identify each such error and its correction individually. The amount proposed to be included in an Amended Annual Update, a Draft Annual Update, or an amended Draft Annual Update as a One Time True Up Adjustment shall be subject to scrutiny through the information exchange process and annual update procedures described in this Section 3.

# 4. THE ANNUAL TRUE UP ADJUSTMENT AND THE FINAL TRUE UP ADJUSTMENT

The Annual True Up Adjustment component of the Base TRR ensures that during the time the Formula Rate is in effect, SCE will recover its actual costs of owning and operating its ISO transmission facilities, as defined by the True Up TRR. The Annual True Up Adjustment is calculated for each Annual Update for the previous calendar year (the "Prior Year"), if the Formula Rate was in effect during some or all of that year, through the following steps:

- a) Calculate SCE's actual costs during the Prior Year, as measured by the "True Up TRR." The True Up TRR, as defined in the Formula Rate, is equal to the Prior Year TRR as defined in the Formula Rate, except that all of the Rate Base components used in the True Up TRR are based on 13-month average values or beginning-of-year and end-of-year average values.
- b) Attribute the True Up TRR to each month of the Prior Year as specifically defined in the Formula Rate.
- c) Determine SCE's actual retail base transmission revenues attributable to the Formula Rate on a monthly basis for each month of the Prior Year, in accordance with the Formula Rate.
- d) Compare SCE's monthly True Up TRR to SCE's monthly actual retail base transmission revenues. Each monthly difference shall be cumulated, including interest calculated on a monthly basis using the interest rate specified in the regulations of the Commission at 18 C.F.R § 35.19a, through the end of the Prior Year, in accordance with the Formula Rate to determine a "Shortfall or Excess Revenue in the Prior Year". The "Shortfall or Excess Revenue in the Prior Year" Prior Year" shall also include the "Shortfall or Excess Revenue in the Prior Year" Tariff Record Proposed Effective Date: 01/01/2018

from the previous Annual Update, as specifically included in Schedule 3 of the Formula Rate Spreadsheet, Schedule 3, Line 11, and any applicable One Time Adjustments.

Interest shall be added to the cumulative total from the end of the Prior Year to the beginning of the Rate Year, in accordance with the Formula Rate. This balance at the beginning of the Rate Year shall then be amortized over the Rate Year so that the balance at the end of the Rate Year is \$0, in accordance with the Formula Rate. The sum of the monthly amounts in the Rate Year required to amortize the balance to \$0 shall be the True Up Adjustment. Interest shall be calculated on a monthly basis using the interest rate specified in the regulations of the Commission at 18 C.F.R. § 35.19a.

- e) The 12 values of the previous Annual True Up Adjustment shall be included in the same months (corresponding to the previous Rate Year) of the calculation in Section 4 (d) in accordance with the Formula Rate, thus ensuring that the previous True Up Adjustment amounts are in fact collected from or returned to transmission customers.
- f)e)As stated in Section 6 below, the initial-True Up Adjustment included in the Base TRR effective January 1 October 1, 20182 shall include the Final True Up Adjustment for the 2016 year calculated pursuant to the Original Formula Rateending balance of SCE's existing CWIP Ratemaking Mechanism balancing account. The Final True Up Adjustment for the 2017 year calculated pursuant to the Original Formula Rate shall be included in the True Up Adjustment for the Annual Update submitted by December 1, 2018.

Since this Formula Rate terminates on December 31, 2017, the Annual Update in 2017—shall be limited to the Annual True Up Adjustment component of the Base TRR—determined under this Formula Rate for calendar year 2016. Such Annual True Up—Adjustment shall be posted by SCE on its website by June 15, 2017, and the review of—such posting shall be limited to that information associated with the determination of the—Annual True Up Adjustment for calendar year 2016. SCE shall file the Annual True Up—Adjustment for calendar year 2016 with the Commission concurrently with the Section—205 filing addressed in Section 2 above, which is to replace this Formula Rate, effective—on January 1, 2018. This Annual True Up Adjustment shall result in an annual—surcharge or credit, as applicable, to the otherwise-applicable January 1, 2018 Base—TRR authorized by the Commission.

In the event that this After expiration of the Formula Rate terminates, SCE shall calculate a Final True Up Adjustment. The Final True Up Adjustment shall cover the period of time ending on the expiration of the Formula Rate and beginning on the day after the period covered by the most recent Annual True Up Adjustment that was included in the Base TRR. For example, if the Formula Rate terminates as scheduled on December 31, 203017, SCE will determine a Final True Up Adjustment in 203118 for calendar year 203017. Except as otherwise stated in this paragraph, the Final True Up Adjustment shall be determined using the same calculation methodology as the Annual True Up Adjustment.

Interest included in the Final True Up Adjustment shall be calculated through the date of the termination of the Formula Rate (or, in the event of a partial determination of the Final True Up Adjustment, through the end of the period covered by that partial determination). The Final True Up Adjustment shall be Tariff Record Proceed Effective Date: 01/01/2018 determination).

described in Section 3 of the Protocols. If the Final True Up Adjustment reflects an undercollection by SCE, then SCE shall be entitled and required to recover the amount of this Final True Up Adjustment in SCE's successor transmission rates to thise Formula Rate. If the Final True Up Adjustment reflects an overcollection by SCE, then SCE shall be required to refund the amount of this Final True Up Adjustment to its customers.

### 5. THE INCREMENTAL FORECAST PERIOD TRR

The Incremental Forecast Period TRR ("IFPTRR"), calculated in Schedule 2 (Incremental Forecast Period TRR) of the Formula Rate Spreadsheet, is a component of SCE's Base TRR that represents the amount of transmission revenue requirement that SCE anticipates during the upcoming Rate Year that is incremental to that reflected in the Prior Year TRR as a result of additions of plant in service (identified in Schedule 16 (Plant Additions) of the Formula Rate) and/or CWIP expenditures (identified in Schedule 10 (CWIP) of the Formula Rate) to Rate Base. The IFPTRR shall be calculated in accordance with the Formula Rate.

### 6. TRANSITION OF <u>THE ORIGINAL FORMULA RATE TO EXISTING CWIP</u> RATEMAKING MECHANISM INTO THE FORMULA RATE

Pursuant to Section 4 of the Formula Rate Protocols for the Original Formula Rate, SCE is entitled and required to reflect the amount of any Final True Up Adjustment from the Original Formula Rate for the 2016 and 2017 years in its successor transmission rates. This Section 6 ensures that this requirement from the Original Formula Rate is implemented accurately.

The Formula Rate Base TRR and associated rates for the Rate Years 2018 and 2019 shall reflect a True Up Adjustment that is based on a True Up TRR for the years 2016 and 2017 respectively calculated pursuant to the Original Formula Rate. This shall be implemented in the rate filing for the 2018 Rate Year and the Annual Update for the 2019 Rate Year by including as a "One Time Adjustment" any difference in the True Up TRR for the Prior Years of 2016 and 2017 calculated under this Formula Rate and the True Up TRR amounts calculated pursuant to the Original Formula Rate in Column 4 of Schedule 3 of the Formula Rate Spreadsheet. The One Time Adjustment included in the 2018 Rate Year filing will reflect the difference between the 2016 year True Up TRR calculated pursuant to this Formula Rate and the Original Formula Rate. The Annual Update for the 2019 Rate Year will reflect the difference between the 2017 year True Up TRR calculated pursuant to this Formula Rate and the Original Formula Rate. In the event that this Formula Rate does not become effective until after January 1, 2018, so that the Original Formula Rate remained in effect throughout part or all of 2018, the calculation of the True Up TRR for 2018 shall be based on a weighted average of the True Up TRRs calculated pursuant to the Original Formula Rate and this Formula Rate, with the weighting being based on the number of days during the 2018 year each was in effect (and any years after 2018 will be treated similarly). The One Time Adjustment for any such years with two formula rates in effect shall be calculated based on the difference between the weighted average True Up TRRs and the True Up TRR calculated pursuant to this Formula Rate. Additionally, the True Up Adjustment submitted in the filing for Rate Year 2018 shall include as a One Time Adjustment any "Cumulative Excess or Shortfall in Revenue with Interest through the end version Number: 4.0.0 calculated pursuant to the Original Formula Rate, as reflected in SCE's Annual Update Filing submitted in ER11-3697 on November 30, 2016, Schedule 3, Line 34, Column 8. The 2018 Rate Year filing and the 2019 Annual Update shall include as a workpaper a calculation of these One Time Adjustments. provides for inclusion of CWIP in rate base for projects for which SCE has received Commission approval for such treatment. Accordingly, the existing CWIP Ratemaking Mechanism, as approved in FERC Docket No. ER08-375, will be terminated on December 31, 2011. SCE shall implement the following procedures to assure that the transition to including Commission-approved CWIP in the Formula Rate occurs in a manner that recovers a return on SCE's Commission-approved CWIP costs, without duplication of recovery of any costs already recovered through the existing CWIP Ratemaking Mechanism:

- a) SCE shall terminate its existing CWIP Ratemaking Mechanism on December 31, 2011.
- b)—SCE shall include the final CWIP balance (consisting of the amount in the CWIP balancing account as of December 31, 2011) in the True Up Adjustment included in the September 2012 Annual Update, as provided in the Offer of Settlement filed in FERC Docket No. ER11-1952.6
- c) The True Up TRR Rate Base shall not include CWIP for any period of time during which the CWIP Ratemaking Mechanism was in effect.

See Offer of Settlement, S. Cal. Edison Co., Docket Nos. ER11-1952-000, et al. (filed Dec. 23, 2011) at

<sup>¶ 3;</sup> S. Cal. Edison Co., 139 FERC ¶ 61,021 (2012) (approving Offer of Settlement).

d) The impact of a final resolution of SCE's CWIP Ratemaking Mechanism Dockets (FERC Docket Nos. ER08-375, ER09-187, ER10-160, and ER11-1952) shall be included as a "One Time True Up Adjustment" amount in the True Up Adjustment Calculation in the Annual Update following such final resolution, if such impact—was not previously reflected in the CWIP Ratemaking Mechanism final balance—initially included in the Formula Rate pursuant to Section 6 (b). This impact shall be quantified by recalculating SCE's final CWIP balance based on the final resolution of the CWIP Ratemaking Mechanism Dockets and comparing this final balance to the amount originally included in Section 6 (b) above. Any difference, including interest calculated in accordance with Section 35.19a of the Commission's regulations, shall be the One Time True Up Adjustment associated—with the final resolution of SCE's CWIP Ratemaking Mechanism.

### 7. DEPRECIATION RATES

Depreciation rates for Transmission Plant, Distribution Plant, General Plant, and Intangible Plant shall be as stated in the Formula Rate Spreadsheet.

### 8. REVISIONS TO CERTAIN FORMULA RATE PROVISIONS

SCE will be required to make single-issue Section 205 filings to change the Formula Rate as provided in Section 8, parts (a) through (e). In addition to the single-issue filings provided for in this Section 8 and subject to the limitations set forth in Section 11, SCE may make Section 205 filings that present only a single issue or limited discrete issues for consideration by the Commission, *i.e.*, proposing to change any one or more elements of its Formula Rate. Such filings shall not be governed by the provisions of this Section 8, and the parties and SCE reserve their rights with respect to any such filing.

In a proceeding commenced by such a single-issue Section 205 filing under Section 8, parts (a) and (b), the sole issues that can or shall be addressed are whether the changes proposed by SCE are consistent with these Protocols and are just and reasonable.

In a proceeding commenced by a single-issue filing under Section 8, part (c), the sole issues that can or shall be addressed are whether the changes proposed by SCE are just and reasonable and correctly implement the applicable California Public Utilities Commission ("CPUC") order.

In a proceeding commenced by a single-issue filing under Section 8, parts (d) and (e), the sole issue that can or shall be addressed is whether the changes proposed by SCE correctly implement the applicable CPUC order.

The proceedings commenced in response to the filings described in this Section shall not include or allow for consideration or examination of any other aspects of the Formula Rate or other issues associated with the Formula Rate, except to the extent that the proposed changes directly impact other Formula Rate components that are not the subject of the single-issue filing. All parties will have all applicable rights under the Federal Power Act and FERC's regulations with respect to such single-issue Section 205 filings, except as limited by this Section 8.

- a) SCE will make a single-issue Section 205 filing to update the references in the Formula to reflect any changes to the format and/or content of the FERC Form 1 or the Uniform System of Accounts that affect the calculations set forth in the Formula in the event that a Commission order revises the format and/or content of the FERC Form 1 or the Uniform System of Accounts. This filing shall be submitted within sixtythirty days of the implementation of any FERC decision to revise the FERC Form 1 or the Uniform System of Accounts, and shall be effective on the date of the revisions to the FERC Form 1 or Uniform System of Accounts, as applicable.
- b) With respect to Post-Retirement Benefits Other than Pensions ("PBOPs"), the Formula Rate identifies an Authorized PBOPs Expense Amount in Note 3 on Schedule 20 (Administrative and General Expenses), which is initially stated as \$40,171,333. Beginning in 2019, SCE shall make a single-issue Section 205 filing by April 1 of each year to revise the Authorized PBOPs Expense Amount, seeking an effective date of January 1 of the year of the filing. 52,707,000. Beginning with the Draft Annual Update and Annual Update filing submitted in 2014 (for the Rate Year beginning on January 1, 2015), and every two years thereafter, SCE shall include in its Draft Annual Update and Annual Update filing an independently prepared actuarial report that includes (a) a calculation of the cumulative over-recovery or under-recovery of SCE's actual PBOPs expense during the period beginning on the date the currently-effective. Authorized-PBOPs Expense Amounts became effective and ending on December 31 of the Prior Year ("Prior PBOPs Recovery Period") and (b) a forecast of SCE's annual PBOPs expense for the five-year period beginning January 1 of the current calendar year. The cumulative over-recovery or under- recovery of SCE's actual PBOPs expense for the Prior PBOPs Recovery Period shall be determined by subtracting SCE's Authorized PBOPs Expense Amount (adjusted to remove any amounts related to a PBOPs over- or under-recovery determined in a previous-Annual Update for that same Prior PBOPs Recovery Period) recovered under its Formula Rate from SCE's PBOPs expense as recorded on its books and records for each year in the Prior PBOPs Recovery Period, and shall be referred to asthe "Cumulative PBOPs Recovery Difference." Interest shall not be added to the Cumulative PBOPs Recovery Difference. SCE shall also calculate the Future PBOPs Recovery Difference for the current calendar year and the upcoming Rate Year. The Future PBOPs Recovery Difference shall be equal to (a) the sum of SCE's forecast PBOPs expense for the current calendar year and the upcoming Rate Year minus (b) the sum of SCE's Authorized PBOPs Expense Amount to be recovered under its Formula Rate for the current calendar yearand the upcoming Rate Year. If the absolute

value of the sum of the Cumulative PBOPs Recovery Difference and the Future PBOPs Recovery Difference is greater than twenty (20) percent of the sum of SCE's forecast PBOPs expense for the current calendar year and the upcoming Rate Year, SCE will make a single-issue Section 205 filing to adjust the Authorized PBOPs Expense Amounts. The need for such filing shall be assessed in the Draft Annual Update, and the filing shall be made prior to the Annual Update filing. In such filing, (a) the Authorized PBOPs Expense Amount for the current calendar year and the upcoming Rate Year will be set equal to the forecast PBOPs expense level for each such year plus one-half of the Cumulative PBOPs Recovery Difference, and (b) the Authorized PBOPs Expense Amount for the year following the Rate Year (i.e., the second year following the current calendar year) and thereafter will be set equal to the average forecast PBOPs expense level for the three years beginning with the year following the Rate Year. In the single issue filing, SCE shall seek to make the revised Authorized PBOPs Expense Amounts effective beginning on January 1 of the current year (i.e., year before the Rate Year associated with that Annual Update). Neither SCE nor any party may raise in connection with such filing any issue affecting the Formula Rate other than the level of the Authorized PBOPs Expense Amounts. SCE will additionally include in each Annual Update a PBOPs True Up TRR Adjustment in the calculation of the True Up TRR for the Prior Year, as calculated in Schedule 35, which will ensure that the True Up TRR for the Prior Year will be based on the Authorized PBOPs Expense Amount in effect during that year. Illustrative examples showing the operation of this provision are attached as Exhibit B.

- c) SCE will make a single-issue Section 205 filing seeking Commission approval to put in effect conforming changes to Schedule 21 of the Formula Rate any time that the CPUC adopts revisions to the Gross Revenue Sharing Mechanism ("GRSM"). SCE will make its filing with the Commission, as set forth in this Section, between January 1 and March 1 of the year following the year that the CPUC order became effective. by the later of either the filing date for the next Annual Update following the CPUC ruling or sixty days after the CPUC ruling.
- d) SCE will make a single-issue Section 205 filing to revise Schedule 33 of the Formula Rate determination of retail transmission rates to reflect any change in Rate Groups, Rate Schedules, or the design of retail rates applicable to each Rate Schedule subsequent to any final CPUC order that affects these aspects of retail transmission rates. SCE will make such a filing only if and when the change in Rate Groups, Rate Schedules, or the design of retail rates cannot otherwise be reflected through the normal operation of the Formula Rate. In the single-issue Section 205 filing to the Commission, SCE will propose revisions to Schedule 33 of the Formula Rate that conform to the CPUC order. SCE will make a filing under this Section 8(d) by the later of either the filing date for the next Annual Update following the CPUC ruling or sixty days after the CPUC ruling.

e) SCE will make a single-issue Section 205 filing to change the depreciation rates for General, Intangible or Distribution plant in Schedule 18 upon approval by the CPUC of revised depreciation rates for these plant categories. SCE shall make a filing at the Commission, as set forth in this section, between January 1 and March 1 of the year following the year that the CPUC order became effective.by the later of either the filing date for the next Annual Update following the CPUC ruling or sixty days after the CPUC ruling.

# 9. DETERMINATION OF AMOUNT OF TRANSMISSION PLANT - ISO AND DISTRIBUTION PLANT - ISO

SCE shall perform for the Prior Year a study ("Plant Study") to determine:

- The amount of plant classified as Transmission in SCE's annual FERC Form 1 filing that is under the Operational Control of the ISO. Such amount shall be called Transmission Plant - ISO; and
- The amount of plant classified as Distribution in SCE's annual FERC Form 1 filing that is under the Operational Control of the ISO. Such amount shall be called Distribution Plant - ISO.

The Plant Study determination of Transmission Plant - ISO and Distribution Plant - ISO will correspond to the end-of-year plant values for transmission and distribution published in SCE's FERC Form 1, and also shall be based on actual end-of-year ISO Operational Control of facilities; provided, however, that the facilities affected by SCE's—Devers-Mirage split project shall not be included as Transmission Plant - ISO. SCE will identify in the Plant Study major transmission facilities that have moved to or from ISO Operational Control in the Prior Year. Additionally, in submitting its future CPUC General Rate Case applications, SCE shall exclude from its CPUC-jurisdictional cost of service forecast, the cost of transmission and distribution facilities that SCE projects will be under the Operational Control of the ISO during the test year.

The methodology used in the Plant Study to determine Transmission Plant - ISO and Distribution Plant - ISO shall be as follows:

- a) For each Transmission account 350-359 and Distribution account 360-362, identify the year-end recorded gross plant amount.
- b) For Transmission accounts 350-359 and Distribution accounts 360-362, classify the assets by each location into one of the following categories:
  - 1) All ISO: All Transmission or Distribution assets at the location are under the Operational Control of the ISO.

- Non-ISO: No Transmission or Distribution assets at the location are under the Operational Control of the ISO.
- Mixed ISO and Non-ISO Substation: The Transmission or Distribution substation location has a mixture of assets under the Operational Control of the ISO and assets that are not under the Operational Control of the ISO.
- 4) Mixed ISO and Non-ISO Line: Transmission line locations that have a mixture of assets under the Operational Control of the ISO and assets that are not under the Operational Control of the ISO that need to be analyzed using the Transmission Line methodology.
- 5) Other: Assets for which there is not sufficient data to categorize into one of the above categories.

For all plant costs classified as (1) "All ISO", classify all such plant costs as Transmission Plant - ISO or Distribution Plant - ISO, as appropriate. For all plant costs classified as (2) "Non-ISO", classify none of such plant costs as "Transmission Plant - ISO" or "Distribution Plant - ISO."

For all plant costs classified as (3) "Mixed ISO and Non-ISO Substation," perform an analysis of plant costs based on individual components of the substation. Component plant costs that are under the Operational Control of the ISO shall be attributed to either Transmission Plant - ISO or Distribution Plant - ISO, as appropriate. Component plant costs that are not under the Operational Control of the ISO shall not be attributed to either Transmission Plant - ISO or Distribution Plant - ISO. Dual Use assets (supporting both ISO and non-ISO plant) shall be allocated to Transmission Plant - ISO or Distribution Plant - ISO based on the percentage of ISO assets for the location.

For all plant costs classified as (4) "Mixed ISO and Non-ISO Line," apply the methodology set forth in Section 910(c) below to classify such costs.

For all plant costs classified as (5) "Other" in a location, classify such costs as Transmission Plant - ISO or Distribution Plant - ISO in proportion to the total percentage of Transmission Plant - ISO or Distribution Plant - ISO determined in parts (1) through (4) for that location.

c) Transmission line costs (including any amounts in accounts 350, 352, and 353) required to be analyzed under the Transmission Line methodology pursuant to (b) (4) above shall be attributed to Transmission Plant - ISO according to the following methodology:

- For each location, determine the total line miles and total line miles that are under the Operational Control of the ISO. Determine the percent of total line miles under the Operational Control of the ISO to total line miles at that location. This calculation shall be done separately for overhead and underground facilities in the location.
- 2) Determine the amount of Transmission Plant ISO by applying the percent determined in (1) to the appropriate plant costs by account at that location.

SCE shall present a summary of the Plant Study for the Prior Year in each annual Draft Annual Update, in accordance with the Formula Rate.

# 10. DETERMINATION OF AMOUNT OF TRANSMISSION OPERATION AND MAINTENANCE - ISO AND DISTRIBUTION ISO OPERATION AND MAINTENANCE - ISO EXPENSE

SCE shall annually determine the amount of recorded Transmission and Distribution Operation and Maintenance ("O&M") expenses that is attributable to facilities under the Operational Control of the ISO ("ISO O&M Expense"). The method used to determine ISO O&M Expense shall be to allocate total recorded O&M Expenses as stated in FERC Form 1 based on specific allocation factors applied to the expenses recorded to the O&M accounts set forth in Schedule 19 of the Formula Rate Spreadsheet the following:

- a) For each Transmission O&M account 560-574 and for each Distribution O&M account 580-598, identify the total recorded O&M costs reported on SCE's FERC Form 1, and separate each O&M account into subcategories for purposes of determining the allocation of costs to ISO and non-ISO, as described below.
  - 1) Identify the amount for each Transmission and Distribution O&M account that has ISO-related costs.
  - 2) For accounts with no ISO-related costs, show the subtotal of those Transmission and Distribution O&M accounts.
- b) The following adjustments shall be made to Transmission and Distribution FERC Form 1 recorded expense to determine Adjusted Recorded O&M Expense:
  - 1) Remove all O&M expenses recovered through other FERC-authorized ratemechanisms.
  - 2) Remove all O&M expenses that are recovered through CPUC-authorized ratemechanisms, and any shareholder-funded O&M expenses.
  - 3) Add the Non-Officer Incentive Compensation ("NOIC") amount from Schedule 20 (A&G), Note 2.f., for employees of the Transmission and Distribution—Business Unit ("TDBU"), further adjusted as follows.

- i The annual NOIC expense for Transmission will be based on the ratio of Transmission labor expense to the total of Transmission and Distribution labor expense reported in FERC Form 1.
- ii The annual NOIC expense for Distribution will be based on the ratio of Distribution labor expense to the total of Transmission and Distribution labor expense reported in FERC Form 1.
- iii The ISO portion of the Transmission NOIC shall be based on the ratio of ISO labor for Accounts 560-573 to the total Transmission-labor for Accounts 560-573, and the ISO labor amounts are calculated using the allocations described in the next section.
- iv None of the Distribution NOIC should be allocated as ISO O&M-expenses.
- c) Classify each Adjusted Recorded O&M Expense into one of the following three categories (All ISO O&M, All Non-ISO O&M, or Dual Use O&M), and allocate each Adjusted Recorded O&M Expense included in each category between ISO and non-ISO in accordance with the following allocation principles:
  - 1) All ISO O&M: O&M expenses attributable to assets and/or entitlements under the Operational Control of the ISO shall be allocated 100% to ISO O&M-Expense. The following activities in these accounts are All ISO O&M:
    - i Account 560 Sylmar/Palo Verde;
       ii Account 561.500 Reliability, Planning and Standards Development
       iii Account 562 Sylmar/Palo Verde;
       iv Account 565 Transmission for Four Corners;
       v Account 566 Sylmar/Palo Verde;
       vi Account 567 Eldorado;
       vii Account 567 Sylmar/Palo Verde;
    - viii Account 568 Sylmar/Palo Verde;
    - ix Account 569 Sylmar/Palo Verde; x Account 570 - Sylmar/Palo Verde;
    - xi Account 571 Sylmar/Palo Verde;
    - xii Account 572 Sylmar/Palo Verde
  - 2) All Non-ISO O&M: Expenses that are not associated with O&M attributable to assets and/or entitlements under the Operational Control of the ISO shall be allocated 0% to ISO O&M Expense. Such expenses are subject to the jurisdiction of the CPUC. The following accounts are All Non-ISO O&M:
    - Account 565 WAPA Transmission for Remote Service
    - ii All Distribution O&M Accounts not listed as Dual Use O&M in Part 3. below.

- 3) Dual Use O&M: O&M expenses attributable to both ISO-Controlled and non-ISO Controlled assets and/or entitlements and shall be allocated to ISO O&M-Expense based on the allocation methodology for each expense item set forth-below. The allocation methodology shall establish annually a percentage of the Adjusted Recorded O&M Expense for each account, based on Prior Year-data, that shall be attributable to ISO O&M Expense ("Percentage ISO"). The following sub-categories are Dual Use O&M and the allocation methodology used to determine their Percentage ISO is as set forth below:
  - i Account 560 Operations Engineering is allocated based on the percentage of ISO Labor to total Labor contained within Accounts 561, 562, 563, 564, 566, 570, 571, and 572.
  - ii Account 561.000 Load Dispatching is allocated based on ISO-related outages as a percentage of total transmission outages.
  - iii Account 561.100 Load Dispatching-Reliability and Account 561.200 Load Dispatching-Monitor and Operate Transmission System are allocated based on ISO-related outages as a percentage of total transmission outages.
  - iv Account 562 Operating Transmission Stations is allocated based on the number of ISO transmission circuits as a percentage of the total number of transmission circuits.
  - Account 562 Routine Testing and Inspection is allocated based on ISO-related relay routines as a percentage of total transmission relayroutines.
  - vi Account 563 Inspect and Patrol Lines is allocated based on ISO-Controlled transmission line miles as a percentage of total transmission line miles.
  - vii Account 564 Underground Line Expense is allocated based on ISO-Controlled underground transmission line miles as a percentage of total transmission underground line miles.
  - viii Account 566 Training is allocated based on the percentage of ISO Labor to total Labor contained within accounts 561, 562, 563, 564, 566, 570, 571, and 572.
  - ix Account 566 Other is allocated based on the percentage of ISO Labor to total Labor contained within accounts 561, 562, 563, 564, 566, 570, 571 and 572.
  - x Account 566 FERC Regulation and Contracts is allocated based on the percentage of ISO Transmission Plant to Total Transmission Plant as reported in Schedule 7.
  - xi Account 566 Grid Contract Management is allocated based on the percentage of ISO Transmission Plant to Total Transmission Plant as reported in Schedule 7.

- xii Account 566 NERC/CIP Compliance is allocated based on the percentage of ISO Transmission Plant to Total Transmission Plant as reported in Schedule 7.
- xiii Account 566 Transmission Regulatory Policy is allocated is on the percentage of ISO Transmission Plant to Total Transmission Plant as reported in Schedule 7.
- Account 567 Line Rents is allocated based on the percentage of recorded expense that is related to ISO transmission lines. This is accomplished by identifying each of the recorded line rents as either ISO or Non-ISO based on the specific transmission line that is identified by the agreement.
- xv Account 567 Morongo Lease is allocated based on a ratio derived by taking the total acreage of land involved in the Morongo lease payment divided into ISO and Non-ISO segments. This is done by assigning an acreage value to the ISO-controlled transmission lines and Non-ISO controlled transmission lines.
- xvi Account 568 Maintenance and Supervision Engineering is allocated based on the percentage of ISO Labor to total Labor contained within Account 570.
- xvii Account 569 Maintenance of Structures is allocated based on the percentage of ISO Labor to total Labor contained within Accounts 562 and 570.
- xviii Account 569.100 Hardware, Account 569.200 Software, and Account 569.300 Communication are allocated based on the percentage of ISO Labor to total Labor contained within Accounts 561, 562, 563, 564, 566, 570, 571, and 572.
- xix Account 570 Maintenance of Power Transformers is allocated based on the number of ISO-related transformers as a percentage of the total number of transmission transformers.
- xx Account 570 Maintenance of Transmission Circuit Breakers is allocated based on the number of ISO-related circuit breakers as a percentage of the total number of transmission circuit breakers.
- xxi Account 570 Maintenance of Transmission Voltage Equipment is allocated based on the number of ISO-related voltage control equipment as a percentage of the total number of transmission voltage control equipment.
- xxii Account 570 Maintenance of Miscellaneous Transmission Equipment is allocated based on the percentage of ISO Labor to total Labor contained in the above activities within Account 570.
- Account 570 Substation Work Order-Related Expense is allocated based on the percentage of work orders identified as ISO. This is accomplished by examining each individual capital work order with a related O&M expense component and determining whether that specific work scope is ISO or Non-ISO.

- xxiv Account 571 Poles and Structures, Insulators and Conductors, and Transmission Line Rights of Way are allocated based on ISO-Controlled overhead transmission line miles as a percentage of total overhead transmission line miles.
- Account 571 Transmission Work Order-Related Expense is allocated based on the percentage of work orders identified as ISO. This is accomplished by examining each individual capital work order with a related O&M expense component and determining whether that specific work scope is ISO or Non-ISO.
- xxvi Account 572 Maintenance of Underground Transmission Lines is allocated based on total ISO-Controlled transmission line miles as a percentage of total transmission line miles.
- Account 573 Provision for Property Damage Expense to
  Transmission Facilities is allocated by first splitting the recorded costs
  into transmission lines and transmission substations. Transmission
  lines are then allocated based on ISO-Controlled transmission line
  miles as a percentage of total transmission line miles. The
  transmission substation portion is allocated based on the total number
  of ISO- related transmission circuit breakers, transformers, and voltage
  control equipment as a percentage of the total number of transmission
  circuit breakers, transformers, and voltage control equipment.
- xxviii Account 582 Operation and Relay Protection of Distribution—
  Substations and Testing and Inspecting Distribution—Substation—
  Equipment is allocated based on the percentage of ISO Labor to total—Labor contained within Account 592.
- xxix Account 590 Maintenance Supervision and Engineering is allocated based on the percentage of ISO Labor to total Labor contained within Account 592.
- xxx Account 591 Maintenance of Structures is allocated based on the percentage of ISO Labor to total Labor contained within Account 592.
- xxxi Account 592 Maintenance of Distribution Transformers is allocated based on the number of ISO-related distribution transformers as a percentage of the total number of distribution transformers.
- xxxii Account 592 Maintenance of Circuit Breakers is allocated based on the number of ISO-related distribution circuit breakers as a percentage of the total number of distribution circuit breakers.
- xxxiii Account 592 Maintenance of Voltage Control Equipment isallocated based on the number of ISO-related distribution voltage control equipment as a percentage of the total number of distribution voltage control equipment.
- xxxiv Account 592 Maintenance of Miscellaneous Distribution Equipment is allocated based on the percentage of ISO Labor to total Labor contained in the other activities listed above within Account 592.

SCE shall determine ISO O&M Expense for the Dual Use portion of each O&M account each year by applying the Percentage ISO allocation factors calculated pursuant to the methodologies stated above to the amounts of Dual Use Adjusted Recorded O&M Expense for each account. Total ISO O&M Expense shall be the sum of ISO O&M Expense associated with "All ISO O&M" accounts determined in part c.1 above and ISO O&M Expense associated with "Dual Use O&M" accounts in part c.3 above.

In the event that SCE experiences an extraordinary event, resulting in costs otherwise recoverable through the Formula Rate in a year to be recorded to Account 435 (Extraordinary Deductions) of the Uniform System of Accounts, SCE shall recover the full amount of such Account 435 costs, including any expenses or return on capital, in accordance with the Commission Order authorizing such recovery.

### 11. RESERVATION OF RIGHTS

- a) Except as provided in part (c) below, nNothing in these Protocols shall be deemed to limit in any way the right of any party admitted as an intervenor to this Formula Rate proceeding Docket No. ER11-3697 or admitted as an intervenor to any future proceeding involving an Annual Update to file a request for relief under any applicable provision of the FPA and/or the Commission's regulations or participate in Annual Update proceedings.
- b) Except as provided in part (c) below, nNothing in these Protocols shall be deemed to limit in any way SCE's right to file unilaterally, pursuant to Section 205 of the FPA and the regulations thereunder, to seek to change or cancel the Formula Rate, or to submit any other request for relief under any applicable provision of the FPA and/or the Commission's regulations.
- c) Except as provided for under Section 8 of these Protocols, neither SCE nor any other party shall make a unilateral filing, with a proposed effective date prior to July 1, 2015, at the Commission under Section 205 or Section 206 of the FPA proposing revisions to the Formula Rate, including these Protocols and the Formula Rate Spreadsheet attached to Appendix IX of SCE's TO Tariff as Attachment 2. Notwithstanding the foregoing, SCE may make a Section 205 filing revising the Formula Rate, including these Protocols and the Formula Rate Spreadsheet attached to Appendix IX of SCE's TO Tariff as Attachment 2 if such revisions are supported or unopposed by the parties to Docket No. ER11-3697 as identified in the Offer of Settlement filed by SCE in Docket No. ER11-3697.
- d)c) The party filing a proposed change to the Formula Rate Spreadsheet or Formula Rate Protocols under Section 205 or 206 of the FPA bears the standard burdens associated with such a filing.

### 12. PERIODIC INFORMATIONAL SUBMITTALS

- a) Quarterly Tracking Reports: On a quarterly basis, SCE shall provide Quarterly Tracking Reports to the CPUC and any other interested party that so requests. The Quarterly Tracking Reports will be accompanied by workpapers and supporting documentation as appropriate and shall provide:
  - 1) Recorded in-service monthly transmission plant additions for ISO projects with a total cost exceeding \$3 million;
  - 2) Reports on the status of CWIP projects, including any non-confidential information that SCE may have regarding any potential delays associated with such projects that have not been reported in previous Quarterly Tracking Reports; and
  - 3) Identification of recorded ISO Transmission O&M costs for the FERC subaccounts shown in Schedule 19 of the Formula Rate Spreadsheet for the quarter.
  - 4) The Quarterly Tracking Reports will be provided on the following dates:

May 1, for the quarter ending March 31
August 1, for the quarter ending June 30
November 1, for the quarter ending September 30
February 1, for the quarter ending December 31

- b) Transfer of Control Informational Submission: No later than December 1 of each year that the Formula Rate remains in effect, SCE shall provide the CPUC, through a letter to the CPUC Energy Division, with a list of each transmission and distribution facility that has, in the course of the prior twelve months, changed Operational Control to or from the CAISO.
- c) Transmission Capital Review ("Review"): SCE shall cooperate in an annual review ("Review") of its forecasted capital additions by the CPUC and, to aid the CPUC in such Review process, shall provide \$ 275,000 per year in each of 2014, 2015, 2016 and 2017, which amounts will be recovered by SCE through the Base TRR. The first Review shall be in 2014. The Review will be conducted under Section 3 (c) of the Formula Rate Protocols, except that:
  - 1) The CPUC may elect to utilize the services of a consultant or consultants to conduct the Review, and if so, the CPUC will select one or more competent consultants by May 15 of each year. The consultant(s) shall have the appropriate professional background and experience to conduct the

assessments of the type contemplated. The consultant(s) will contract—directly with, and be paid by, SCE, provided, however, that no party hereto—may argue that SCE has approved, agreed to or endorsed in any way either—the consultant selected by the CPUC or any recommendations made or work—product generated by such a consultant.

- 2) By June 1 each year, SCE shall provide to the consultant(s) a list of all projects estimated to cost \$3,000,000 or more that are projected to go into-service during the current, and the two subsequent, calendar years.
- 3) The CPUC, in consultation with the selected consultant(s), will select the individual projects to be reviewed, but SCE will have no payment responsibility for the Review work in a particular year beyond the amounts specified above. Projects that have previously received a CPCN shall not be eligible for the Review.
- 4) Over the course of the Review, the consultant(s) may submit to SCE Information Requests, in accordance with the provisions set forth in the Protocols, regarding the selected projects.
- 5) By October 1 each year, the consultant(s) may provide recommendations to SCE and the CPUC with respect to the proposed capital projects, which recommendations SCE may accept or elect not to implement, in its discretion.
- 6) The consultant may also participate in the CAISO annual planning process.

### 13.12. USE OF INFORMATION

Information produced pursuant to these Protocols may be used in any proceeding concerning the Formula Rate Spreadsheet, the Protocols, or the Annual Update; provided, however, that to the extent that any information provided pursuant to these Protocols has been designated and provided as Protected Materials, subject to the provisions of Exhibit A to these Protocols, the use of such information shall be governed by Exhibit A.

This section shall not apply to any information produced in the course of Commissionestablished settlement proceedings pursuant to the Commission's rules and regulations governing settlement.

### EXHIBIT A

### UNITED STATES OF AMERICA FEDERAL ENERGY REGULATORY COMMISSION

### PROTECTIVE ORDER APPLICABLE TO INFORMATION PRODUCED BY SOUTHERN CALIFORNIA EDISON COMPANY PURSUANT TO THE FORMULA RATE PROTOCOLS

- 1. This Exhibit (hereinafter referred to as the "Protective Order") shall govern the use of all Protected Materials produced by, or on behalf of, Southern California Edison Company ("SCE") pursuant to the SCE Formula Rate Protocols.
- 2. This Protective Order applies to the following two categories of materials: (A) A Participant may designate as protected those materials which customarily are treated by that Participant as sensitive or proprietary, which are not available to the public, and which, if disclosed freely, would subject that Participant or its customers to risk of competitive disadvantage or other business injury; and (B) A Participant shall designate as protected those materials which contain critical energy infrastructure information, as defined in 18 CFR§ 388.113(c)(1) ("Critical Energy Infrastructure Information").
- 3. Definitions -- For purposes of this Order:
- (a) The term "Participant" shall mean a Participant as defined in 18 CFR § 385.102(b).
- (b) (1) The term "Protected Materials" means (A) materials (including depositions) provided by a Participant in response to discovery requests and designated by such Participant as protected; (B) any information contained in or obtained from such designated materials; (C) any other materials which are made subject to this Protective Order by the Presiding Administrative Law Judge appointed upon the Annual Update being set for hearing and/or settlement procedures or by the Discovery Master appointed pursuant to the Formula Rate Protocols (both referred to herein as the "Presiding Judge"), by the Commission, by any court or other body having appropriate authority, or by agreement of the Participants; (D) notes of Protected Materials; and (E) copies of Protected Materials. The Participant producing the Protected Materials shall physically

Option Code: A

mark them on each page as "PROTECTED MATERIALS" or with words of similar import as long as the term "Protected Materials" is included in that designation to indicate that they are Protected Materials. If the Protected Materials contain Critical Energy Infrastructure Information, the Participant producing such information shall additionally mark on each page containing such information the words "Contains Critical Energy Infrastructure Information B Do Not Release".

- (2) The term "Notes of Protected Materials" means memoranda, handwritten notes, or any other form of information (including electronic form) which copies or discloses materials described in Paragraph 3(b)(1). Notes of Protected Materials are subject to the same restrictions provided in this order for Protected Materials except as specifically provided in this order.
- (3) Protected Materials shall not include (A) any information or document that has been filed with and accepted into the public files of the Commission, or contained in the public files of any other federal or state agency, or any federal or state court, unless the information or document has been determined to be protected by such agency or court, or (B) information that is public knowledge, or which becomes public knowledge, other than through disclosure in violation of this Protective Order. Protected Materials do include any information or document contained in the files of the Commission that has been designated as Critical Energy Infrastructure Information.
- (c) The term "Non-Disclosure Certificate" shall mean the certificate annexed hereto by which Participants who have been granted access to Protected Materials shall certify their understanding that such access to Protected Materials is provided pursuant to the terms and restrictions of this Protective Order, and that such Participants have read the Protective Order and agree to be bound by it. All Non-Disclosure Certificates shall be served on all parties on the Service List, as defined in the SCE Formula Rate Protocols.
- (d) The term "Reviewing Representative" shall mean a person who has signed a Non-Disclosure Certificate and who is:
  - (1) Commission Trial Staff;
  - (2) an attorney who has made an appearance for a Participant;
- (3) attorneys, paralegals, and other employees associated with an attorney described in Subparagraph (2);

- (4) an expert or an employee of an expert retained by a Participant for the purpose of advising, preparing for or testifying in connection with the Annual Update for which the information was requested;
- (5) a person designated as a Reviewing Representative by order of the Presiding Judge or the Commission; or
- (6) employees or other representatives of Participants with significant responsibility for SCE's Formula Rate.
- 4. Protected Materials shall be made available under the terms of this Protective Order only to Participants and only through their Reviewing Representatives as provided in Paragraphs 7-9.
- 5. Protected Materials shall remain available to Participants until the date that any Commission proceeding relating to the Protected Material is concluded and no longer subject to judicial review. If requested to do so in writing after that date, the Participants shall, within fifteen days of such request, return the Protected Materials (excluding Notes of Protected Materials) to the Participant that produced them, or shall destroy the materials, except that copies of filings, official transcripts and exhibits in this proceeding that contain Protected Materials, and Notes of Protected Material may be retained, if they are maintained in accordance with Paragraph 6, below. Within such time period each Participant, if requested to do so, shall also submit to the producing Participant an affidavit stating that, to the best of its knowledge, all Protected Materials and all Notes of Protected Materials have been returned or have been destroyed or will be maintained in accordance with Paragraph 6. To the extent Protected Materials are not returned or destroyed, they shall remain subject to the Protective Order.
- 6. All Protected Materials shall be maintained by the Participant in a secure place. Access to those materials shall be limited to those Reviewing Representatives specifically authorized pursuant to Paragraphs 8-9. The Secretary shall place any Protected Materials filed with the Commission in a non-public file. By placing such documents in a non-public file, the Commission is not making a determination of any claim of privilege. The Commission retains the right to make determinations regarding any claim of privilege and the discretion to release information necessary to carry out its jurisdictional responsibilities. For documents submitted to Commission Trial Staff ("Staff"), Staff shall follow the notification procedures of 18 CFR § 388.112 before making public any Protected Materials.
- 7. Protected Materials shall be treated as confidential by each Participant and by the Reviewing Representative in accordance with the certificate executed pursuant to

Paragraph 9. Protected Materials shall not be used except as necessary under SCE's Formula Rate Protocols, nor shall they be disclosed in any manner to any person except a Reviewing Representative who is engaged in working on SCE's Annual Update for which the information was requested and who needs to know the information in order to carry out such responsibilities. Reviewing Representatives may make copies of Protected Materials, but such copies become Protected Materials. Reviewing Representatives may make notes of Protected Materials, which shall be treated as Notes of Protected Materials if they disclose the contents of Protected Materials.

- 8. (a) If a Reviewing Representative's scope of employment includes the marketing of energy, the direct supervision of any employee or employees whose duties include the marketing of energy, the provision of consulting services to any person whose duties include the marketing of energy, or the direct supervision of any employee or employees whose duties include the marketing of energy, such Reviewing Representative may not use information contained in any Protected Materials obtained under SCE's Formula Rate Protocols to give any Participant or any competitor of any Participant a commercial advantage.
- (b) In the event that a Participant wishes to designate as a Reviewing Representative a person not described in Paragraph 3 (d) above, the Participant shall seek agreement from the Participant providing the Protected Materials. If an agreement is reached that person shall be a Reviewing Representative pursuant to Paragraphs 3(d) above with respect to those materials. If no agreement is reached, the Participant shall submit the disputed designation to the Presiding Judge for resolution.
- 9. (a) A Reviewing Representative shall not be permitted to inspect, participate in discussions regarding, or otherwise be permitted access to Protected Materials pursuant to this Protective Order unless that Reviewing Representative has first executed a Non-Disclosure Certificate; <u>provided</u>, that if an attorney qualified as a Reviewing Representative has executed such a certificate, the paralegals, secretarial and clerical personnel under the attorney's instruction, supervision or control need not do so. A copy of each Non-Disclosure Certificate shall be provided to counsel for the Participant asserting confidentiality prior to disclosure of any Protected Material to that Reviewing Representative.
- (b) Attorneys qualified as Reviewing Representatives are responsible for ensuring that persons under their supervision or control comply with this order.

- 10. Any Reviewing Representative may disclose Protected Materials to any other Reviewing Representative as long as the disclosing Reviewing Representative and the receiving Reviewing Representative both have executed a Non-Disclosure Certificate. In the event that any Reviewing Representative to whom the Protected Materials are disclosed ceases to be engaged in working on the Annual Update, as set forth above, or is employed or retained for a position whose occupant is not qualified to be a Reviewing Representative under Paragraph 3(d), access to Protected Materials by that person shall be terminated. Even if no longer engaged in this proceeding, every person who has executed a Non-Disclosure Certificate shall continue to be bound by the provisions of this Protective Order and the certification.
- 11. Subject to Paragraph 18, the Presiding Administrative Law Judge shall resolve any disputes arising under this Protective Order. Prior to presenting any dispute under this Protective Order to the Presiding Administrative Law Judge, the parties to the dispute shall use their best efforts to resolve it. Any participant that contests the designation of materials as protected shall notify the party that provided the protected materials by specifying in writing the materials the designation of which is contested. This Protective Order shall automatically cease to apply to such materials five (5) business days after the notification is made unless the designator, within said 5-day period, files a motion with the Presiding Administrative Law Judge, with supporting affidavits, demonstrating that the materials should continue to be protected. In any challenge to the designation of materials as protected, the burden of proof shall be on the participant seeking protection. If the Presiding Administrative Law Judge finds that the materials at issue are not entitled to protection, the procedures of Paragraph 18 shall apply. The procedures described above shall not apply to protected materials designated by a Participant as Critical Energy Infrastructure Information. Materials so designated shall remain protected and subject to the provisions of this Protective Order, unless a Participant requests and obtains a determination from the Commission's Critical Energy Infrastructure Information Coordinator that such materials need not remain protected.
- 12. All copies of all documents reflecting Protected Materials, including the portion of the hearing testimony, exhibits, transcripts, briefs and other documents which refer to Protected Materials, shall be filed and served in sealed envelopes or other appropriate containers endorsed to the effect that they are sealed pursuant to this Protective Order. Such documents shall be marked "PROTECTED MATERIALS" and shall be filed under seal and served under seal upon the Presiding Judge and all Reviewing Representatives who are on the service list. Such documents containing Critical Energy Infrastructure Information shall be additionally marked "Contains Critical Energy Infrastructure Information Do Not Release". For anything filed under seal, redacted versions or, where an entire

document is protected, a letter indicating such, will also be filed with the Commission and served on all parties on the service list and the Presiding Judge. Counsel for the producing Participant shall provide to all Participants who request the same, a list of Reviewing Representatives who are entitled to receive such material. Counsel shall take all reasonable precautions necessary to assure that Protected Materials are not distributed to unauthorized persons.

- 13. If any Participant desires to include, utilize or refer to any Protected Materials or information derived therefrom in testimony or exhibits during a hearing under the SCE Formula Rate Protocols in such a manner that might require disclosure of such material to persons other than reviewing representatives, such participant shall first notify both counsel for the disclosing participant and the Presiding Judge of such desire, identifying with particularity each of the Protected Materials. Thereafter, use of such Protected Material will be governed by procedures determined by the Presiding Judge.
- 14. Nothing in this Protective Order shall be construed as precluding any Participant from objecting to the use of Protected Materials on any legal grounds.
- 15. Nothing in this Protective Order shall preclude any Participant from requesting the Presiding Judge, the Commission, or any other body having appropriate authority, to find that this Protective Order should not apply to all or any materials previously designated as Protected Materials pursuant to this Protective Order. The Presiding Judge may alter or amend this Protective Order as circumstances warrant at any time during the course of this proceeding.
- 16. Each party governed by this Protective Order has the right to seek changes in it as appropriate from the Presiding Judge or the Commission.
- 17. All Protected Materials filed with the Commission, the Presiding Judge, or any other judicial or administrative body, in support of, or as a part of, a motion, other pleading, brief, or other document, shall be filed and served in sealed envelopes or other appropriate containers bearing prominent markings indicating that the contents include Protected Materials subject to this Protective Order. Such documents containing Critical Energy Infrastructure Information shall be additionally marked "Contains Critical Energy Infrastructure Information Do Not Release."
- 18. If the Presiding Judge finds at any time in the course of a proceeding that all or part of the Protected Materials need not be protected, those materials shall, nevertheless, be subject to the protection afforded by this Protective Order for three (3) business days from the date of issuance of the Presiding Judge's determination, and if the Participant seeking protection files an interlocutory

appeal or requests that the issue be certified to the Commission, for an additional seven (7) business days. None of the Participants waives its rights to seek additional administrative or judicial remedies after the Presiding Judge's decision respecting Protected Materials or Reviewing Representatives, or the Commission's denial of any appeal thereof. The provisions of 18 CFR §§ 388.112 and 388.113 shall apply to any requests under the Freedom of Information Act. (5 U.S.C. § 552) for Protected Materials in the files of the Commission.

- 19. Nothing in this Protective Order shall be deemed to preclude any Participant from independently seeking through discovery in any other administrative or judicial proceeding information or materials produced under the SCE Formula Rate Protocols under this Protective Order.
- 20. None of the Participants waives the right to pursue any other legal or equitable remedies that may be available in the event of actual or anticipated disclosure of Protected Materials.
- 21. The contents of Protected Materials or any other form of information that copies or discloses Protected Materials shall not be disclosed to anyone other than in accordance with this Protective Order and shall be used only in connection with this (these) proceeding(s). Any violation of this Protective Order and of any Non-Disclosure Certificate executed hereunder shall constitute a violation of an order of the Commission.

### UNITED STATES OF AMERICA FEDERAL ENERGY REGULATORY COMMISSION

### NON-DISCLOSURE CERTIFICATE

I hereby certify my understanding that access to Protected Materials is provided to me pursuant to the terms and restrictions of the Protective Order under the Southern California Edison Formula Rate Protocols, that I have been given a copy of and have read the Protective Order, and that I agree to be bound by it. I understand that the contents of the Protected Materials, any notes or other memoranda, or any other form of information that copies or discloses Protected Materials shall not be disclosed to anyone other than in accordance with that Protective Order. I acknowledge that a violation of this certificate constitutes a violation of an order of the Federal Energy Regulatory Commission.

### EXHIBIT B

Examples demonstrating the Post-Retirement Benefits Other than Pensions ("PBOPs") mechanism set forth in Section 8.b of the protocols (Appendix IX, Attachment 1)

### Example 1:

Current Rate Year (i.e., current calendar year):

Year that Current Authorized PBOPs Expense Amount became effective:

Current Authorized PBOPs Expense Amount:

\$52

PBOPs Recorded and Forecast Expenses:

<del>Year</del>	Actual or Forecast	Amount
<del>2012</del>	Actual	<del>\$60</del>
<del>2013</del>	Actual	<del>\$50</del>
2014	Forecast	<del>\$62</del>
<del>2015</del>	Forecast	<del>\$68</del>
<del>2016</del>	Forecast	<del>\$74</del>
<del>2017</del>	Forecast	<del>\$75</del>
<del>2018</del>	Forecast	<del>\$76</del>

- a) Calculation of Cumulative PBOP Recovery Difference:

  Actual Authorized = (\$60 + \$50) (\$52 + \$52) = \$110 \$104 = \$6
- b) Calculation of Future PBOP Recovery Difference: Forecast - Authorized = (\$62 + \$68) - (\$52 + \$52) = \$130 - \$104 = \$26
- c) Check of whether filing to revise Authorized PBOPs Expense Amount is required.
  - 1) Absolute value of Cumulative PBOP Recovery Difference plus Future PBOP Recovery Difference = ABS(\$6 + \$26) = \$32
  - 2) 20% of sum of Forecast PBOP Expense for next two years = (\$62 + \$68) \* 0.2 = \$26
  - 3) Is amount in 1 is greater than amount in 2? Yes, so filing is required.
- d) Amounts to file to revise Authorized PBOPs Expense Amount to:

	C1	<del>C2</del>	<del>C3</del>
		50% of Cumulative	Filing
	Forecast -	PBOP Recovery	<b>PBOP</b>
<b>Year</b>	PBOP Expenses	<b>Difference</b>	Amount*
<del>2014</del>	<del>\$62</del>	<del>\$3</del>	<del>\$65</del>
<del>2015</del>	<del>\$68</del>	<del>\$3</del>	<del>\$71</del>
<del>2016</del>	<del>\$74</del>	NA	<del>\$75</del>
<del>2017</del>	<del>\$75</del>	NA	<del>\$75</del>
<del>2018</del>	<del>\$76</del>	NA	<del>\$75</del>

\*For 2014 and 2015, C3 = C1 + C2. For 2016-2018, C3 = Average of C1.

### Example 2:

Current Rate Year (i.e., current calendar year):

Year that Current Authorized PBOPs Expense Amount became effective:

Current Authorized PBOPs Expense Amount:

PBOPs Recorded and Forecast Expenses:

Year	Actual or Forecast	Amount
<del>2012</del>	<del>Actual</del>	<del>\$60</del>
<del>2013</del>	<del>Actual</del>	<del>\$50</del>
<del>2014</del>	Forecast	<del>\$40</del>
<del>2015</del>	Forecast	<del>\$45</del>
<del>2016</del>	Forecast	<del>\$50</del>
<del>2017</del>	Forecast	<del>\$55</del>
<del>2018</del>	Forecast	<del>\$55</del>

- a) Calculation of Cumulative PBOP Recovery Difference: Actual - Authorized = (\$60 + \$50) - (\$52 + \$52) = \$110 - \$104 = \$6
- b) Calculation of Future PBOP Recovery Difference: Forecast - Authorized = (\$40 + \$45) - (\$52 + \$52) = \$85 - \$104 = \$19
- c) Check of whether filing to revise Authorized PBOPs Expense Amount is required.
  - 1) Absolute value of Cumulative PBOP Recovery Difference plus Future PBOP Recovery Difference = ABS (\$6 \$19) = \$13
  - 2) 20% of sum of Forecast PBOP Expense for next two years = (\$40 + \$45) \* 0.2= \$17
  - 3) Is amount in 1 is greater than amount in 2? No, so filing is not required.

### Example 3:

Current Rate Year (i.e., current calendar year):

Year that Current Authorized PBOPs Expense Amount became effective:

Current Authorized PBOPs Expense Amount:

PBOPs Recorded and Forecast Expenses:

Year	<b>Actual or Forecast</b>	Amount
<del>2012</del>	<del>Actual</del>	<del>\$30</del>
<del>2013</del>	<del>Actual</del>	<del>\$40</del>
<del>2014</del>	Forecast	<del>\$50</del>
<del>2015</del>	Forecast	<del>\$50</del>
<del>2016</del>	Forecast	<del>\$74</del>
<del>2017</del>	Forecast	<del>\$75</del>
<del>2018</del>	Forecast	<del>\$76</del>

- a) Calculation of Cumulative PBOP Recovery Difference: Actual - Authorized = (\$30 + \$40) - (\$52 + \$52) = \$70 - \$104 = -\$34
- b) Calculation of Future PBOP Recovery Difference: Forecast - Authorized = (\$50 + \$50) - (\$52 + \$52) = \$100 - \$104 = \$4
- c) Check of whether filing to revise Authorized PBOPs Expense Amount is required.
  - 1) Absolute value of Cumulative PBOP Recovery Difference plus Future PBOP Recovery Difference = ABS(-\$34-\$4) = \$38
  - 2) 20% of sum of Forecast PBOP Expense for next two years = (\$50 + \$50) \* 0.2 = \$20
  - 3) Is amount in 1 is greater than amount in 2? Yes, so filing is required.
- d) Amounts to file to revise Authorized PBOPs Expense Amount to:

	<del>C1</del>	C2	C3
		50% of Cumulative	<del>Filing</del>
	Forecast -	PBOP Recovery	<del>PBOP</del>
<del>Year</del>	PBOP Expenses	<b>Difference</b>	Amount*
<del>2014</del>	<del>\$50</del>	<del>-\$17</del>	<del>\$33</del>
<del>2015</del>	<del>\$50</del>	<del>-\$17</del>	<del>\$33</del>
<del>2016</del>	<del>\$74</del>	NA	<del>\$75</del>
<del>2017</del>	<del>\$75</del>	NA	<del>\$75</del>
<del>2018</del>	<del>\$76</del>	NA	<del>\$75</del>

\*For 2014 and 2015, C3 = C1 + C2. For 2016-2018, C3 = Average of C1.

#### Overview

### Overview of SCE Retail Base TRR

SCE's retail Base Transmission Revenue Requirement is the sum of the following components:

TRR Component	<u>Amount</u>
Prior Year TRR	\$ -
Incremental Forecast Period TRR	\$ -
True-Up Adjustment	\$ -
Cost Adjustment	\$ -
Base TRR (retail)	\$ -

These components represent the following costs that SCE incurs:

- 1) The Prior Year TRR component is the TRR associated with the Prior Year (most recent calendar year).

  The Prior Year TRR is calculated using End-of-Year Rate Base values, as set forth in the "1-BaseTRR" Worksheet.
- 2) The Incremental Forecast Period TRR is the component of Base TRR associated with forecast additions to in-service plant or CWIP, as set forth in the "2-IFPTRR" Worksheet.
- 3) The True Up Adjustment is a component of the Base TRR that reflects the difference between projected and actual costs, as set forth in the "3-TrueUpAdjust" Worksheet.
- 4) The Cost Adjustment component may be included as provided in the Tariff protocols.

### 89 Wholesale Base Transmission Revenue Requirement

88

Notes:

1) Any amount of "Sub-Total Local Taxes" or "Payroll Taxes Expense" may be excluded if appropriate with the provision of a workpaper showing the reason for the exclusion and the amount of the exclusion.

Note 3

Note 4

For Retail Purposes

42) No change in Return on Common Equity will be made absent a Section 205 filing at the Commission.

Initial Prior Year?: — If Initial Prior Year, enter "Yes"

Does not include any project-specific ROE adders.

86 Base Transmission Revenue Requirement (Retail)

Wholesale Difference to the Base TRR

Wholesale Base Transmission Revenue Requirement Base TRR (Retail)

- In the event that the Return on Common Equity is revised from the initial value, enter cite to Commission Order approving the revised ROE on following line.

  Order approving revised ROE:

  ---
- 23) No change in Amortization of Excess Deferred Tax Liability or South Georgia Income Tax Adjustment "Credits and Other" terms will be made absent a filing at the Commission. Investment Tax Credit Flowed Through amount shall be negative \$520,000 through the Prior Year of 2018, negative \$183,000 for the Prior Year of 2019, and \$0 thereafter.
- 3) The True Up Adjustment for the initial Base TRR is \$0.
- 4) Cost Adjustment may be included as provided in the Tariff protocols.

### Schedule 2 Incremental Forecast Period TRR

### Calculation of Incremental Forecast Period TRR ("IFPTRR")

```
The IFP TRR is equal to the sum of:
```

57

- 1) Forecast Plant Additions \* AFCR
- 2) Forecast Period Incremental CWIP \* AFCR for CWIP

### 1) Calculation of Annual Fixed Charge Rates:

```
a) Annual Fixed Charge Rate for CWIP ("AFCRCWIP")
2
       AFCRCWIP represents the return and income tax costs associated with $1 of CWIP,
3
       expressed as a percent.
4
5
       AFCRCWIP = CLTD + (COS * (1/(1 - CTR)))
6
7
8
         CLTD = Weighted Cost of Long Term Debt
         COS = Weighted Cost of Common and Preferred Stock
9
10
         CTR = Composite Tax Rate
11
                                                                          Reference
12
                  Wtd. Cost of Long Term Debt:
                                                             - % 1-BaseTRR, Line 51 50
                                                             - %
                                                                   1-BaseTRR, Line 55 54
            Wtd. Cost of Common + Pref. Stock:
13
                          Composite Tax Rate:
                                                                   1-BaseTRR, Line 59 58
14
                                                             - %
15
                                 AFCRCWIP =
                                                             - % Line 12 + (Line 13 * (1/(1 - Line 14)))
16
17
18
     b) Annual Fixed Charge Rate ("AFCR")
19
       The AFCR is calculated by dividing the Prior Year TRR (without CWIP related costs)
20
21
       by Net Plant:
22
23
         AFCR = (Prior Year TRR - CWIP-related costs) / Net Plant
24
25
     Determination of Net Plant:
26
                                                                          Reference
                                                                   6-PlantInService, Line 13
27
                      Transmission Plant - ISO: $
28
                        Distribution Plant - ISO: $
                                                                   6-PlantInService, Line 16
29
              Transmission Dep. Reserve - ISO: $
                                                                   8-AccDep, Line 13
                Distribution Dep. Reserve - ISO: $
30
                                                                   8-AccDep, Line 16
                                    Net Plant: $
31
                                                                   (L27 + L28) - (L29 + L30)
32
     Determination of Prior Year TRR without CWIP related costs:
33
34
35
      a) Determination of CWIP-Related Costs
       1) Direct (without ROE adder) CWIP costs
36
37
                       CWIP Plant - Prior Year: $
                                                                   10-CWIP, L 13 C1
                                  AFCRCWIP:
38

#### Calculation of True Up Adjustment Component of TRR

#### 1) Summary of True Up Adjustment calculation:

- a) Attribute True Up TRR to months in the Prior Year (see Note #1) to determine "Monthly True Up TRR" for each month (see Note #2). If formula was not in effect in Prior Year, do not populate Column 2 or 3, Lines 11 to 22.
- b) Determine monthly retail transmission revenues attributable to this formula transmission rate received during Prior Year.
- c) Compare costs in (a) to revenues in (b) on a monthly basis and determine "Cumulative Excess (-) or Shortfall (+) in Revenue with Interest".
- d) Continue interest calculation through the end of the previous Rate Effective Period (Line 31).

Include previous Annual Update Cumulative Excess or Shortfall in Prior Year (from Previous Annual Update Line 23) and any One-Time Adjustments in Column 4 (Lines 11 and 12 respectively).

- e) Amortize this ending balance from (d) over the current Rate Effective Period so that the ending balance on Line 54 is equal to \$0.
- Continue interest calculation through the end of the Prior Year (Line 23) to determine Cumulative Excess or Shortfall for this Annual Update.

# 2) Comparison of True Up TRR and Actual Retail Transmission Revenues received during the Prior Year, Including previous Annual Update Cumulative Excess or Shortfall in Revenueyear True Up Adjustment.

#### Instructions:

- 1) Enter applicable years on Column 1, Lines 11-23 34 and 43-54 (Prior Year and December of the year previous to the Prior Year)
- 2) Enter Previous Annual UpdatePeriod True Up Adjustment (if any) on Column 4, Lines 2723-34. See Note 4 for definition of Previous Period True Up Adjustment. Enter with the same sign as in previous Informational Annual Update. If there is no Previous Annual UpdatePeriod True Up Adjustment, then enter \$0 in these cells.
- 3) Enter monthly interest rates in accordance with interest rate specified in the regulations of FERC at
- 18 C.F.R. §35.19a on lines 1211 to 2334, Column 6. If interest rate for any months not known, use most recent known month.
- 4) Enter "Total Amortization" amount on Line 57, column 6 to set September Month Ending Balance Column 7, Line 54 equal to \$0. Iterate if necessary to solve.
- (i.e., so that the Month Beginning Balance in Column 3, Line 43 is completely amortized away by the Amortization amounts in Column 4).
- This instruction requires that the amount on Line 57 Column 6 be calculated so that any over or under collection at the beginning of the Rate Effective Period is completely amortized over the following 12 months, as reflected by the Line 54, Column 7 amount being equal to zero. It may be necessary to iterate for
- the formula to calculate the correct value in that cell, which can be accomplished in Excel using the Goal Seek function.
- 45) Enter any One Time Adjustments on Column 4, Line 1241 (or other appropriate). If SCE is owed enter as positive, if SCE is to return to customers enter as negative. One Time Adjustments include:
  - a) Enter CWIP mechanism final balance in first True Up Adjustment calculation in accordance with tariff protocols.
  - ab) In the event that a Commission Order revises SCE's True Up TRR for a previous Prior Year,
  - SCE shall also-include that difference in the True Up Adjustment, including interest, at the first opportunity, in accordance with tariff protocols.
  - Entering on Line 1244 (or other appropriate) ensures these One Time Adjustments are recovered from or returned to customers.
  - be) Any refunds attributable to SCE's previous CWIP TRR cases (Docket Nos. ER08-375, ER09-187, ER10-160, and ER11-1952), not previously returned to customers.
  - cd) Amounts resulting from input errors impacting the True Up TRR in a previous Formula Rate filing Annual Update pursuant to Protocol Section 3(d)(8).
- 56) Fill in matrix of all retail revenues from Prior Year in table on lines 6395 to 74106.
- 67) Enter Total Sales to Ultimate Consumers on line 77109 and verify that it equals the total on line 75107.
- 78) If true up period is less than entire calendar year, then adjust calculation accordingly by including \$0 Monthly True Up TRR and Officer Actual Retail Base Transmission Revenues for any months not included in True Up Period.

#### Notes:

- 1) The true up period is the portion (all or part) of the Prior Year for which the Formula Transmission Rate was in effect.
- 2) The Monthly True Up TRR is derived by multiplying the annual True Up TRR on Line 1 by 1/12, if formula was in effect. In the event of
- a Partial Year True Up, use the Partial Year TRR Attribution Allocation Factors on Lines 4072 to 5183 for each month of Partial Year True Up.
- Only enter in the Prior Year, Lines 1211 to 2322, or portion of year formula was in effect in case of Partial Year True Up.
- Partial Year True Up Allocation Factors calculated based on three years (2008-2010) of monthly SCE retail base transmission revenues.
- 3) "Actual Retail Base Transmission Revenues" are SCE retail transmission revenues attributable to this formula transmission rate. as shown on Lines 6395 to 74106, Column 1.
- 4) The "Previous Period True Up Adjustment" are the values of the "True Up Adjustment Received/Returned" in the previous Informational Filing (Same sign).
  - These are the 12 monthly values of the "True Up Adjustment Received/Returned" in Column 8, Lines 43 54 from the previous Informational Filing,
  - They are input into Column 4, lines 23-34 of this current Informational Filing, corresponding to the Rate Effective Period of the previous Informational Filing.
- In the event that the Formula Rate timelines in effect during the previous Informational Filing differ from this Informational Filing, enter the Previous Period True Up Adjustment
- in this Informational Filing on the lines corrresponding to the Rate Effective Period from the previous Informational Filing.
- One Time True Up Adjustment amounts (see Instruction #5) attributable to a previous Prior Year are entered on Column 4, Line 11 (or other appropriate).
- 4) Enter "Shortfall or Excess Revenue in Previous Annual Update" on Line 11, or other appropriate (from Previous Annual Update, Line 23, Column 9).
- 5) Monthly Interest Rates in accordance with interest rate specified in the regulations of FERC (See Instruction #3).
- 6) "Cumulative Excess (-) or Shortfall (+) in Revenue wo Interest for Current Month" is beginning for the January month; 1) in month 1, the amount in Column 5; and 2) in subsequent months is the amount in Column 9 for previous month plus the current month amount in Column 5. For the first December, it is the amount in Column 5.
- 7) Interest for Current Month is calculated on average of beginning and ending balances (Column 9 previous month and Column 7 current month).

  (First month average is 1/2 of ending balance). No interest is applied for the first December.
- 8) The Interest Rate in Rate Effective Period is equal to average of interest rates in previous 12 months (lines 23-34).
- 9) The "Month Beginning Balance" is Month Ending Balance from previous month in Column 7 (January is from Column 9, Line 34).
- 10) Amortization equals amount in Line 57 divided by 12 each month. See Instruction #4 also for further detail
- 41) Interest for Current Month is calculated on average of beginning and end balances (wo interest) in Columns 3 and 5.
- <u>812</u>) Only provide if formula was in effect during Prior Year.
- 913) Only include Base Transmission Revenue attributable to this formula transmission rate.
- Any other Base Transmission Revenue or refunds is included in "Other".
- The Base Transmission Revenues shown in Column 1 shall be reduced to reflect any retail customer refunds provided by SCE associated with the formula transmission rate that are made through a CPUC-authorized mechanism.
- 1014) Other Transmission Revenue includes the following:
- a) Transmission Revenue Balancing Account Adjustment revenue.
- b) Transmission Access Charge Balancing Account Adjustment.
- c) Reliability Services Revenue.
- d) Any Base Transmission Revenue not attributable to this formula.

#### Schedule 4 True Up TRR

#### Instructions:

1) Use weighted average (by time) of the Return on Equity in effect during the Prior Year in determining the "Cost of Capital Rate" on Line 1918 and the "Equity Rate of Return Including Preferred Stock" on Line 23 22 in the event that the ROE is revised during the Prior Year. In this event, the ROE used in Schedule 1 will differ from the ROE used in this Schedule 4, because the Schedule 1 ROE will be the most recent ROE, whereas the Schedule 4 Cost of Capital Rate and Equity Rate of Return including Com. + Pref. Stock will be based on the weighted-average ROE.

Calculation of weighted average Cost of Capital Rate in Prior Year:

If ROE does not change during year, then attribute all days to Line a "ROE at end of Prior Year" and none to "ROE at start of PY"

	Yellow shade added	<u>Percentage</u>	Reference:	<u>From</u>	<u>To</u>	Days ROE <u>In Effect</u>

Calculation of Equity Rate of Return Including Common and Preferred Stock:

Cost of Capital Rate

k Reference:
- % Sum of Lines h to i

2) Beginning with the True Up Adjustment calculation for 2012 utilizing the True Up TRR for 2012, exclude from CWIP recovery the capital cost of facilities that were purchased for the portion of Tehachapi Segment 8 near the Chino Airport, but due to the April 25, 2011 Notice of Presumed-Hazard issued to SCE by the FAA are not used in the construction of Tehachapi or in any other CWIP incentive project. Additionally, SCE will permanently exclude from Plant In Service, Rate Base, and transmission rates these capital costs if the facilities are not used in the construction of any SCE transmission project.

- % Sum of Lines q to i

Instructions:

1) Enter 13 months of balances for capital structure for Prior Year and December previous to Prior Year in Columns 2-14.

Beginning and End of year amounts in Columns 2 and 14 are from FERC Form 1, as referenced in below notes.

2) NOT USED

3) Update notes 9 and 10 as necessary.

#### Schedule 5 ROR-2 **Return and Capitalization**

#### Notes:

- 1) Amount in Column 2 from FF1 112.18d, amount in Column 14 from FF1 112.18c, amounts in columns 3-13 from SCE internal records.
- 2) Amount in Column 2 from FF1 112.19d, amount in Column 14 from FF1 112.19c, amounts in columns 3-13 from SCE internal records.
- 32a) Amount in Column 2 from FF1 112.20d, amount in Column 14 from FF1 112.20c, amounts in columns 3-13 from SCE internal records.
- 43) Amount in Column 2 from FF1 112.21d, amount in Column 14 from FF1 112.21c, amounts in columns 3-13 from SCE internal records.
- 5) Amount in Column 2 from FF1 112.22c, amount in Column 14 from FF1 112.22d, amounts in columns 3-13 from SCE internal records. NOT USED
- 6) Amount in Column 2 from FF1 112.23c, amount in Column 14 from FF1 112.23d, amounts in columns 3-13 from SCE internal records. NOT USED
- 7) Amount in Column 2 from FF1 111.69c, amount in Column 14 from FF1 111.69d, amounts in columns 3-13 from SCE internal records. NOT USED 8) Amount in Column 2 from FF1 111.81c, amount in Column 14 from FF1 111.81d, amounts in columns 3-13 from SCE internal records. NOT USED
- 9) Amounts in Columns 2-14 are from SCE internal records.
- 10) Amounts in Columns 2-14 are from SCE internal records.
- 118) Amount in Column 2 from FF1 112.3d, amount in Column 14 from FF1 112.3c, amounts in columns 3-13 from SCE internal records.
- 129) Amounts in columns 2-14 are from SCE internal records.

#### Notes:

1) Amounts on Line 13 from corresponding account Schedule 7, column 2.

Amounts on Line 1 must match corresponding account Schedule 7, Column 2 for previous year.

The amounts for each month on the remaining lines are calculated by summing the following values:

- a) Other ISO Transmission Activity without Incentive Plant Activity on Lines 10870-11981 for the same month;
- b) ISO Incentive Plant Activity on Lines 6741 to 7852 for the same month; and
- c) The previous month balance of the Transmission Plant ISO amounts on Lines 1-13.
- For instance, the amount for May of the Prior Year (on Line 6) for Account 353 (Column 5) is the sum of the following values:
- a) the "Other ISO Transmission Activity without Incentive Plant Activity" for May of the Prior Year (on Line 11274, Column 5);
- b) the "ISO Incentive Plant Activity" for May of the Prior Year (on Line 7145, Column 5),
- c) and the "Transmission Plant ISO" amount for April of the Prior Year (on Line 5, Column 5)."
- 2) Amounts on Line 15 must match 6-Plant Study amounts for Distribution Plant ISO for previous year.

Amounts on Line 16 must match amounts on 6-PlantStudy for Distribution Plant - ISO.

- 3) Reconciles to BOY and EOY FERC Form 1 (FF1 207, Lines 48-56, Column g).
- 43) Includes recorded Transmission Plant-In-Service additions, retirements, transfers and adjustments. From SCE internal acounting records.
- 5) Includes balances for SCE Incentive Projects.
- 64) Monthly differences from previous matrix. Column 12 matches 'Activity for Incentive Projects' on 14-IncentivePlant, Lines 39 to 52...

Other columns from SCE internal accounting records.

- 75) Amount in matrix on lines 4128 to 5240 minus amount in matrix on lines 6741 to 7852
- 8) Amount in "Total Transmission Activity Not Including Incentive Plant Activity" matrix divided by Total on Line 92 for each account/month.
- 96) Amount on Line 13 less amount on Line 1 for each account.
- 107) Line 7953
- 118) Amount on Line 10567 less amount on Line 10668 for each account.
- 129) For each column (FERC Account) divide Line 10769 by Line 9266 to arrive at a ratio for each column.
- Apply the ratio of each column to each monthly value from Lines 8054-9165 to calculate the values for the corresponde months listed in Lines 10870-11981.

#### B) Plant Classified as Distribution in FERC Form 1:

<u>Line</u> 22 23	Account Land:	Total <u>Plant</u>		<u>Data Source</u>	Distribution Plant - ISO		ISO % of Total
24	360	\$	-	FF1 207.60g	\$	-	- %
25	Structures:						
26	361	\$	-	FF1 207.61g	\$	-	- %
27	362	\$		FF1 207.62g	\$		- %
28	<b>Total Structures</b>	\$	-	L 26 + L 27	\$	-	- %
29							
30	<b>Total Distribution</b>	\$	-	L 24 + L 28	\$	-	- % Note 2

#### Notes:

- 1) Total transmission does not include account 359.1 "Asset Retirement Costs for Transmission Plant" Total on this line is also equal to FF1 207.58g (Total Transmission Plant) less FF1 207.57g (Asset Retirement Costs for Transmission Plant).
- 2) Only accounts 360-362 included as there is no ISO plant in any other Distribution accounts.

#### Instructions:

- 1) Perform annual Transmission Study pursuant to instructions in tariff.
- 2) Enter total amounts of plant from FERC Form 1 in Column 1, "Total Plant".
- 3) Enter ISO portion of plant in Column 2, "Transmission Plant ISO, or "Distribution Plant ISO".

#### Notes:

1) Amounts on Line 13 based on current year Plant Study. Amounts on Line 1 shall be based on previous year Plant Study, and shall match amounts on Line 13 in previous year Annual Update.

The amounts for each month on the remaining lines are calculated by summing the following values:

- a) Depreciation Expense (on Lines 2740 to 3851) for the same month;
- b) Other Transmission Activity (on Lines <u>5569</u> to <u>6680</u>) for the same month; and
- c) Balances for Transmission Depreciation Reserve (on Lines 1 to 13) for the previous month.

For instance, the amount for May of the Prior Year (on Line 6) for Account 353 (Column 5) is the sum of the following values:

- a) Depreciaiton Depreciation Expense for May of the Prior Year (on Line 44, Column 5);
- b) Other Transmission Activity for May of the Prior Year (on Line 5973, Column 5); and
- c) The balances for Transmission Depreciation Reserve for April of the Prior YeaerYear (on Line 5, column 5).
- 2) Amounts on Line 15 derived from Plant Study for previous year Prior Year.

Amounts on Line 16 derived from Plant Study for Prior Year.

- 3) Total Transmission Activity by Account represents accumulated depreciation changes for all Transmission plant.
- 34) From 17-Depreciation, Lines 24 to 35.
- 4) From 6-PlantInService, Lines 93 to 104.
- 5) Amount in matrix on lines 27 to 38 minus amount in matrix on lines 2740 to 3851.
- 56) Line 13 Line 1.
- 67) Line 3952.
- 78) Line 5266 Line 5367.
- 8) Multiply the montly "Total Transmission Allocation Factors" ratios found in Lines 40-51 by the

"Other Activity" on Line 54.

9) For each column (FERC Account) divide Line 5468 by Line 65 to arrive at a ratio for each column.

Apply the ratio of each column to each monthly value from Lines 4053-5164 to calculate the values for the corresponsing months listed in Lines 5569-6680.

Instruction 1: For any "Company Wide" ADIT line item balance (i.e., that include Catalina Gas or Water costs), indicate in Column 7 with a leading "C:".

Instruction 2: For any Company Wide ADIT balance items, include a portion of the total Column 2 balance in Column 3 "Gas, Generation, or Other Related" based on the following percentages.

1) For Line items allocated based on the Wages and Salaries Allocation Factor:

1) I of Life items allocated based of the wages and Salaries A	illocation ractor.		
	FERC Form 1 Reference	Prior	Year
	or Instruction	<u>Va</u>	lue
A:Total Electric Wages and Salaries	FF1 354.28b	\$	-
B:Gas Wages and Salaries	FF1 355.62b	\$	-
C:Water Wages and Salaries	FF1 355.64b	\$	-
D:Total Electric, Gas, and Water Wages and Salaries	A+B+C	\$	-
E:Labor Percentage "Gas, Generation, or Other"	(B+C) / D		- %

2) For Line items allocated based on the Transmission Plant Allocation Factor or "ISO Only":

	FERC Form 1 Reference	Prior	r Year
	or Instruction	<u>Va</u>	lue
F:Total Electric Plant In Service	FF1 207.104g	\$	-
G:Total Gas Plant In Service	FF1 201.8d	\$	-
H:Total Water Plant in Service	FF1 201.8e	\$	-
I:Total Electric, Gas, and Water Plant In Service	F+G+H	\$	-
J:Plant Percentage "Gas. Generation, or Other"	(G+H) / I		- %

Instruction 3: For any balances in account 190 relating to "Executive Incentive Comp" or "Executive Incentive Plan", the amount included in Column 3."Gas, Generation or Other Related" shall be 50% of the total balance in Column 1, plus an amount equal to the "Labor Percentage Gas, Generation, or Other" shown on Line E of Instruction 1 times 50% of the total balance in Column 1.

The remaining amount shall be included in Column 6. "Labor Related".

Instruction 3 4: Classify any ADIT line items relating to refunding and retirement of debt as Plant related (Column 5

Instruction 5: For any balances in account 190 relating to stock options, the entire amount is included in Column 3 "Gas, Generation or Other Related."

#### Notes:

- 1) The monthly deferred tax amounts are equal to the ending ADIT balance minus the beginning ADIT balance, divided by 12 months.
- 2) For January through December = previous month balance plus amount in Column 2.
- 3) The weighted average ADIT Balance is equal to the summation of Col. 8, Lines 805 through 817, divided by 13 months.

#### Prior Year CWIP and Forecast Period Incremental CWIP by Project

Prior Year CWIP is the amount of Construction Work In Progress for projects that have received Commission approval to include CWIP in Rate Base.

314 13-Month	Averages	s:												\$	-

- 1) Forecast Period is the calendar year two years after the Prior Year (i.e., PY+2).
  2) Sum of project specific values from lines 55-79, 81-105, 107-131, 133-157, 159-183, 185-209, 211-235, 237-261, 263-287, 289-313,...

- 1) Enter recorded amounts of CWIP during Prior Year on Lines 1-13, 15-27 (including December of year previous to Prior Year).
- 2) Enter forecast project specific values on lines 55-79, 81-105, 107-131, 133-157, 159-183, 185-209, 211-235, 237-261, 263-287, 289-313, ...
  3) If Commission approval is granted to include CWIP in Rate Base for additional projects, include additional tables for each of those additional projects.

# Schedule 11 Plant Held for Future Use

#### TRANSMISSION PLANT HELD FOR FUTURE USE

Inputs are shaded yellow

Transmission Plant Held for Future Use shall be amounts of Electric Plant Held for Future Use (account 105) intended to be placed under the Operational Control of the ISO, plus an allocated amount of any General Electric Plant Held for Future Use, with the allocation factor being the Transmission Wages and Salaries AF.

Line	<u>)</u>	Beginning of Year Balance	End of Year Balance	<u>Source</u>
1	Total Electric PHFU	- \$	-	FF1 page 214.47d

Plant intended to be placed under the Operational Control of the ISO:

9	Average of BOY and EOY Transmission PHFU:	\$ -			Sum of Line 8 / 2

#### Calculation of Gain or Loss on Transmission Plant Held for Future Use -- Land

#### Instructions:

- 1) For any Electric Plant Held for Future Use intended to be placed under the Operational Control of the ISO, list on lines 2a, 2b, etc. Provide description in Column 1. Note type of plant (land or other) in Column 2. Under "Source" (Column 5), state the line number on FERC Form 1 page 214 from which the amount is derived. BOY amount will be EOY value from previous year FERC Form 1, EOY amount will be in current year FF1.
- 2) For any Electric Plant Held for Future Use classified as General note amount on Line 4.
- 3) Add additional lines 2 i, j, k, etc. as necessary to include additional projects intended to be placed under the Operational Control of the ISO.
- 4) Gains and Losses on Transmission Plant Held for Future Use Land is treated in accordance with Commission policy. Any gain or loss on non-land portions of Transmission Plant Held for Future Use is not included.

#### **Notes**

1) Amount of Line 1 not intended to be placed under the Operational Control of the ISO.

### Schedule 12 Abandoned Plant

#### Determination of amount of Abandoned Plant and Abandoned Plant Amortization Expense

Input data is shaded yellow

Initially Abandoned Plant Amortization Expense and Abandoned Plant are both zero.

Upon Commission approval of recovery of abandoned plant costs for a specific project or projects, SCE will complete this worksheet in accordance with that Order.

Orders Providing for Abandoned Plant Cost Recovery:

2nd Project: Fill in Name

Abandoned Plant for each project represents the amount of costs that the Order approves for inclusion in Rate Base.

Abandoned Plant Amortization Expense for each project represents the annual amortization of abandoned costs that the Order approves as an annual expense.

		Amount for		
<u>Line</u>		Prior Year		Note:
1	Abandoned Plant Amortization Expense:	\$	-	Sum of projects below for PY.
2	Abandoned Plant (BOY):	\$	-	Sum of projects below for PY.
3	Abandoned Plant (EOY):	\$	-	Sum of projects below for PY.
4	Abandoned Plant (BOY/EOY Average):	\$	-	Average of Lines 2 and 3.
<u>5</u>	HV Abandoned Plant (BOY):	\$	=	Sum of projects below for PY.
2 3 4 <u>5</u>	Abandoned Plant (EOY): Abandoned Plant (BOY/EOY Average):	\$ \$	- - -	Sum of projects below for PY. Average of Lines 2 and 3.

#### Notes:

1) "EOY HV Abandoned Plant" is amount of "EOY Abandoned Plant" that would have been High Voltage (>= 200 kV).

#### Instructions:

- 1) Upon Commission approval of recovery of abandoned plant costs for a project:
- a) Fill in the name the project in order (First Project, Second Project, etc.).
- b) Fill in the table with annual End of Year ("EOY") Abandoned Plant, EOY HV Abandoned Plant, and

Abandoned Plant Amortization Expense amounts in Accordance with the Order.

- If table can not be filled out completely, fill out at least through the Prior Year at issue.
- c) Sum project-specific amounts for each project and enter in lines 1, 2, and 3 for the Prior Year at issue. (BOY value is EOY value from previous year)
- 2) Add additional projects if necessary in same format.
- 3) Add additional years past  $\underline{2025}$   $\underline{2035}$  if necessary.

#### Schedule 13 **Working Capital**

### **Calculation of Components of Working Capital**

Inputs are shaded yellow

### 1) Calculation of Materials and Supplies

Materials and Supplies is the amount of total Account 154 Materials and Supplies times the Transmission Wages and Salaries AF

			Data		Total Materials and	
Line	<u>Month</u>	<u>Year</u>	<u>Source</u>		Supplies Balances	<u>Notes</u>
1	December	-	FF1 227.12b	\$	-	Beginning of year ("BOY") amount
2	January	-	SCE Records	\$	-	
3	February	-	SCE Records	\$	-

EOY Prepayments Amount: \$

Plant Balances For Incentive Projects Receiving either ROE Incentives ("Transmission Incentive Plant") or CWIP ("CWIP Plant")

Input data is shaded yellow

- A) Summary of Incentive Project plant balances receiving ROE incentives
  - ("Transmission Incentive Plant") and/or CWIP ("CWIP Plant") and calculation
  - of balances needed to determine the following:
    - 1) Rate Base in Prior Year
  - 2) Prior Year Incentive Rate Base End of Year
  - 3) Prior Year Incentive Rate Base 13-Month Average

Transmission Incentive Project plant balances and CWIP Plant may affect the following:

- a) CWIP Plant during the Prior Year is included in Rate Base (used in Prior Year TRR and True Up TRR).
- b) Forecast Period Incremental CWIP contributes to Incremental Forecast Period TRR
- c) CWIP Plant receiving an ROE adder contributes to Prior Year Incentive Rate Base EOY, or Prior Year Incentive Rate Base 13 Month Average as appropriate.
- d) "TIP Net Plant In Service" at EOY Prior Year is used to calculate the PY Incentive Rate Base (on EOY basis).
- e) "TIP Net Plant In Service" in PY is used to calculate the Prior Year Incentive Rate Base (on 13-month average basis).

#### ... Instructions:

<sup>1)</sup> Upon Commission approval of any incentives for additional projects, add additional projects and provide cite to the Commission decision.

#### Schedule 15 Incentive Adders

#### **Determination of Incentive Adders Components of the TRR**

Input data is shaded yellow

Two Incentive Adders are calculated:

- a) The Prior Year Incentive Adder is a component of the Prior Year TRR.
- b) The True Up Incentive Adder is a component of the True Up TRR.

### 1) Calculation of Incremental Return on Equity Factor

The Incremental Return on Equity Factor is the incremental Prior Year TRR expressed per 100 basis points of ROE incentive, for each million dollars of Incentive Net Plant. It is calculated according to the following formula:

<u>Line</u>	where:	<u> </u>	<u>Value</u>	<u>Source</u>
1	CSCP = Common Stock Capital Percentage		- %	1-BaseTRR, L 47 46
2	CTR = Composite Tax Rate		<u>- %</u>	1-BaseTRR, L 59 58
3		IREF = \$	=	Above formula

#### 2) Determination of multiplicative factors for use in calculating Incentive Adders:

Multiplicative factors are used to calculate the Incentive Adders on an Transmission Incentive Project specific basis. Multiplicative factor for each project is the ratio of its ROE adder to 1%.

			Multiplicative	
<u>Line</u>		ROE Adder	<b>Factor</b>	<u>Source</u>
4	1) Rancho Vista	- %		14-IncentivePlant, L 184
5	2) Tehachapi	- %		14-IncentivePlant, L 187
6	3) Devers to Col. River	- %		14-IncentivePlant, L 190
7				
8				

#### 3) Calculation of Prior Year Incentive Adder (EOY)

- 1) Determine Prior Year Incentive Adder for each Incentive Project by multiplying the IREF, the Multiplicative Factor, and the million \$ of Prior Year Incentive Rate Base.
- 2) Sum project-specific Incentive Adders to yield the total Prior Year Incentive Adder.

<u>Line</u>		Prior Year Incentive Rate Base	Multiplicative <u>Factor</u>	Prior Year Incentive <u>Adder</u>		<u>Source</u>
9	1) Rancho Vista	\$ -		\$ · <u> </u>	-	14-IncentivePlant, L 13, Col. 1
10	2) Tehachapi	\$ _		\$	-	14-IncentivePlant, L 14, Col. 1
11	3) Devers to Col. River	\$ _		\$	-	14-IncentivePlant, L 15, Col. 1
12						
13						
14		Prior Year	Incentive Adder =	\$	-	Sum of above PY Incentive Adders for each individual project

### 4) Calculation of True-Up Incentive Adder

- 1) Determine True Up Incentive Adder for each Incentive Project by multiplying the IREF, the Multiplicative Factor, and the million \$ of True Up Incentive Net Plant.
- 2) Sum project-specific Incentive Adders to yield the total True Up Incentive Adder.

<u>Line</u>		True-Up Incentive <u>Net Plant</u>	N	lultiplicative <u>Factor</u>	True-Up Incentive <u>Adder</u>		<u>Source</u>
15	1) Rancho Vista	\$ -			\$ <u> </u>	-	14-IncentivePlant, L 19, Col. 1
16	2) Tehachapi	\$ -			\$	-	14-IncentivePlant, L 20, Col. 1
17	<ol><li>Devers to Col. River</li></ol>	\$ -			\$	-	14-IncentivePlant, L 21, Col. 1
18							
19							
20		True-L	Jp Inc	entive Adder =	\$	-	Sum of above PY Incentive Adders for each individual project

#### Schedule 15 Incentive Adders

### 5) Calculation of Total ROE for Plant-In Service in the True Up TRR

### a) Transmission Incentive Plant Net Plant In Service

	Incentive	13-Month Ave	_	
<u>Line</u>	<u>Project</u>	In Service		<u>Source</u>
21	1) Rancho Vista	\$	-	14-IncentivePlant, L 19, Col. 3
22	<ol><li>Tehachapi</li></ol>	\$	-	14-IncentivePlant, L 20, Col. 3
23	3) Devers to Col. River	\$	-	14-IncentivePlant, L 21, Col. 3
24

27	3) Devers to Col. River	\$ -	\$	-	See Note 1
28					See Note 1
29	•••				
30		Total:	\$	_	

#### c) Equity Portion of Plant In Service Rate Base

		<u>Amount</u>	<u>Source</u>
Total Rate Base:	\$	-	<ul> <li>4-TUTRR, Line <u>18</u> <del>17</del></li> </ul>
CWIP Portion of Rate Base:	\$	-	4-TUTRR, Line 14
Plant In Service Rate Base:	\$	-	Line 31 - Line 32
Equity percentage:		- %	6 1-BaseTRR, Line 47 46
Equity Portion of Plant In Service Rate Base:	\$	-	Line 33 * Line 34
	CWIP Portion of Rate Base: Plant In Service Rate Base: Equity percentage:	Total Rate Base: \$ CWIP Portion of Rate Base: \$ Plant In Service Rate Base: \$ Equity percentage: Equity Portion of Plant In Service Rate Base: \$	Total Rate Base: \$ - CWIP Portion of Rate Base: \$ - Plant In Service Rate Base: \$ - Equity percentage: - 9

#### d) Total ROE for Plant In Service in the True Up TRR

<u>Line</u>			
36	Plant In Service ROE Adder Percentage:	- %	Line 30 / Line 35
37	Base ROE (Including 50 basis point		
38	CAISO Participation Adder):	<u>- %</u>	1-BaseTRR, Line 50 49
39	Total ROE for Plant In Service in True Up TRR:	- %	Line 36 + Line 38

### Instructions:

1) If additional projects receive ROE adders, add to end of lists, and include in calculation of each Incentive Adder.

#### Notes:

1) Column 1: The True Up Incentive Adder for each Incentive Project equals the IREF on Line 3, times the applicable Multiplicative Factor on Lines 15 to 18, times the million \$ of TIP Net Plant In Service on Lines 21 to 24.

Column 2: The After Tax True Up Incentive Adder is derived by multiplying the amounts in Column 1 by (1 - CTR) (Where the CTR is on Line 2).

#### Forecast Plant Additions for In-Service ISO Transmission Plant

Forecast Plant Additions represents the total increase in ISO Transmission Net Plant, not including CWIP, during the Rate Year, incremental to the year-end Prior Year amount.

It is calculated on a 13-Month Average Rasis during the Rate Year. It is calculated on a 13-Month Average Basis during the Rate Year.

# Schedule 17 Depreciation Expense

#### 39 2) Calculation of Depreciation Expense for Distribution Plant - ISO 40 41 Source 42 Distribution Plant - ISO BOY 6-PlantInService Line 15. 43 Distribution Plant - ISO EOY 6-PlantInService Line 16. 44 Average BOY/EOY: 45 46 Depreciation Rates (Percent per year) See "18-DepRates". <u>360</u> 362 48 49 Depreciation Expense for Distribution Plant - ISO See Note 2 and Instruction 2 50 51 52 Total is sum of Depreciation Expense for accounts 53 54 360, 361, and 362 55 56 3) Calculation of Depreciation Expense for General Plant and Intangible Plant 57 58 Total General Plant Depreciation Expense FF1 336.10f 59 Total Intangible Plant Depreciation Expense FF1 336.1f 60 Sum of Total General and Total Intangible Depreciation Expense Line 58 + Line 59 Transmission Wages and Salaries Allocation Factor 27-Allocators, Line 9 61 62 General and Intangible Depreciation Expense Line 60 \* Line 61 63 64 4) Depreciation Expense 65 66 Depreciation Expense is the sum of: Amount Source 1) Depreciation Expense for Transmission Plant - ISO Line 37, Col 12 2) Depreciation Expense for Distribution Plant - ISO - Line 53 69 3) General and Intangible Depreciation Expense Line 62 70 Depreciation Expense: \$ Line 67 + Line 68 + Line 69 1) Depreciation Expense for each account for each month is equal to the previous month balance of Transmission Plant - ISO for that same account, times the Monthly Depreciation Rate for that account. Monthly rate = annual rates on Line 17a etc. divided by 12. 2) Depreciation Expense for each account is equal to the Average BOY/EOY value on Line 44 times the Depreciation Rate on Line 48. Instructions:

1) Depreciation rates on Lines 17a-17m input from Schedule 18. However, in the event of a <u>change mid year change</u> in depreciation rates approved by the Commission, <u>use Commission-approved depreciation rates that were in effect during the Prior Year.</u>

the rates stated on Schedule 18 will represent end of Prior Year rates. To correctly calculate depreciation expense for Transmission Plant - ISO for the entire

Prior Year, input depreciation rates from Schedule 18 only for those months during which the new rates were in effect, and input previous effective rates in the months for which they were in effect.

2) In the event that depreciation rates stated on Schedule 18 to be applied to Distribution Plant - ISO are revised mid-year, calculate Depreciation Expense for for Distribution Plant - ISO on Line 53 utilizing the weighted-average (by time) of the annual depreciation rates in effect in the Prior Year.

#### Notes:

- 1) "Adjusted Operations and Maintenance Expenses for each account" are the total amounts of O&M costs booked to each Transmission or Distribution account, less adjustments as noted.
- 2) Reasons for excluded amounts:
- A: Exclude entire amount, all attributable to CAISO costs recovered in Energy Resource Recovery Account.
- B: Exclude amount related to MOGS Station Expense.
- C: Exclude amount attributable to CAISO costs recovered in Energy Resource Recovery Account.
- D: Exclude amount recovered through to Reliability Services Balancing Account, the Transmission Access Charge Balancing Account Adjustment, and the American Reinvestment Recovery Act for the Tehachapi Wind Energy Storage Project.

E: Add NOIC annual payout

- EF: Exclude amount of costs transfered to account from A&G Account 920 pursuant to Order 668
- G: Exclude any amount of ACE awards or Spot Bonuses in O&M accounts 560-592...
- FH: Excludes shareholder funded costs
- 3) Total TDBU NOIC is allocated to Transmission and Distribution in proportion to labor in the respective functions. Transmission NOIC ("Non-Officer Incentive Compensation") equals Total TDBU NOIC times the Transmission NOIC Percentage calculated below. Distribution NOIC equals Total TDBU NOIC times the Distribution NOIC Percentage below.

- 4) NOIC attributable to ISO Transmission (Column 7) is calculated utilizing a percentage equal to the ratio of total ISO 0&M Labor Expenses in column 7 (exclusive of NOIC) to the total labor expenses in column 3 (exclusive of NOIC). That allocator, which is identified below, is then applied to the value in Column 3 to arrive at the NOIC attributable to ISO Transmission in Column 7. Resulting Percentage is:
- 5) "ISO Operations and Maintenance Expenses" is the amount of costs in each Transmission or Distribution account related to ISO Transmission Facilities.
- 6) "Percent ISO" percentages are calculated in accordance with the method set forth in SCE's TO Tariff protocols. See Column 9 for references to source of each Percent ISO.

Certain "Percent ISO percentages are calculable based on other "Percent ISO" amounts, as follows:

a) Accounts 560 - Operations Engineering, 566 - Training, 566 - Other, 569.100 Hardware, 569.200 Software, and 569.300 Comunication:

Percent ISO for these accounts is equal to total ISO labor in accounts 561, 562, 563, 564, 566 (except Training and Other), 570, 571, and 572 (Column 7)

divided by total labor in these same accounts (column 3):

b) Account 569 - Maintenance of Structures

Percent ISO for this account is equal to the total ISO labor in accounts 562 and 570 (Column 7) divided by total labor in this same account (Column 3).

c) Account 570 - Maintenance of Miscellaneous Transmission Equipment and Account 568 - Maintenance Supervision and Engineering

Percent ISO for this account is equal to the total ISO labor in accounts listed below (Column 7) divided by total labor in these same accounts (Column 3).

570 - Maintenance of Power Transformers

570 - Substation Work Order Related Expense

570 - Maintenance of Transmission Voltage Equipment

570 - Maintenance of Transmission Circuit Breakers

d) Accounts 582, 590, 591, and 592 - Maintenance of Miscellaneous Distribution Equipment

Percent ISO for these accounts is equal to the total ISO labor in accounts 592, exclusive of Maintenance of Miscellaneous Distribution Equipment (Column 7)

divided by total labor in this same account (Column 3).

7) SCE shall make no adjustments to recorded labor amounts related to non-labor labor and/or Indirect labor in Schedule 19.

#### Schedule 20 Administrative and General Expenses

#### Note 2: Non-Officer Incentive Compensation ("NOIC") Adjustment

(NOIC includes Results Sharing, Management Incentive Program, and Non-Officer Executive Incentive Compensation). Adjust NOIC by excluding accrued NOIC Amount and replacing with the

actual **non-capitalized** A&G NOIC payout.

				Amount		<u>Source</u>
а			Accr	rued NOIC Amount: \$	-	SCE Records
b			Actual	A&G NOIC payout: \$		Note 2, d
С				Adjustment: \$	-	
Actu	ual non-capitalized NOIC Payouts:			-		
	<u>Department</u>		<u>Amount</u>	<u>Source</u>		
d	A&G	\$	-	SCE Records and Workpapers	3	
е	Other	\$	-	SCE Records and Workpapers	6	
f	Trans. And Dist. Business Unit	\$	<u>-</u>	SCE Records and Workpapers	6	
g		Total: \$	-	Sum of d to f		

#### Note 3: PBOPs Exclusion Calculation

		<u>Amount</u>	Note:
а	<u>Current</u> Authorized PBOPs <u>E</u> expense <u>A</u> amount:	\$40,171,333	See instruction #4
<u>b</u>	Prior Year Authorized PBOPs Expense Amount	\$ -	Authorized PBOPs Expense Amount during Prior Year
<u>c</u> b	Prior Year FF1 PBOPs expense:	\$ 	SCE Records
<u>d</u> e	PBOPs Expense Exclusion:	\$ -	<u>c</u> b- <u>b</u> a
NI-	4- 4.		

Amount in Line 31, column 2 equals amount in Line 8, column 1 because all Franchise Requirements Expenses are excluded Franchise Fees Expenses component of the Prior Year TRR are based on Franchise Fee Factors.

# Schedule 20 Administrative and General Expenses

#### Instructions:

- 1) Enter amounts of A&G expenses from FERC Form 1 in Lines 1 to 14.
- 2) Fill out "Itemization of Exclusions" table for all input cells. NOIC amount in Column 3, Line 24
- is calculated in Note 2. The PBOPs exclusion in Column 4, Line 30 is calculated in Note 3.
- a) Exclude amount of any Shareholder Adjustments, costs incurred on behalf of SCE shareholders, from relevant account in Column 1.
- b) Include as an adjustment in Column 1 for Account 920 any amount excluded from Accounts 569.100, 569.200, and 569.300
- in Schedule 19 (OandM) related to Order 668 costs transferred.
- c) Exclude entire amount of account 927 "Franchise Requirements" in Column 2, as those costs are recovered through the Franchise Fees Expense item.
- d) Exclude any amount of Account 930.1 "General Advertising Expense" not related to advertising for safety, siting, or informational purposes in column 1.
- e) Exclude any amount of expense relating to secondary land use and audit expenses not directly benefitting utility customers.
- f) Exclude from account 930.2:
- 1) Nuclear Power Research Expenses.
- 2) Write Off of Abandoned Project Expenses.
- 3) Any advertising expenses within the Consultants/Professional Services category.
- g) Exclude the following costs included in any account 920-935:
- 1) Any amount of "Provision for Doubtful Accounts" costs.
- 2) Any amount of "Accounting Suspense" costs.
- 3) Any penalties orf fines.
- 4) Any amount of costs recovered 100% through California Public Utilities Commission ("CPUC") rates.
- h) Exclude the following amounts of employee incentive compensation from any account 920-935:
- 1) Any Long Term Incentive Compensation ("LTI") costs.
- 2) Beginning with Prior Year 2012, any amount of Officer Executive Incentive Compensation ("OEIC") in excess of the amount
- authorized by the CPUC in Decision D.12-11-051 or subsequent decision.
- 3) Beginning with Prior Year 2012, any amount of Supplemental Executive Retirement Plan ("SERP") in excess of the amount
- authorized by the CPUC in Decision D.12-11-051 or subsequent decision.
- 4) Beginning with Prior Year 2012, any amount of NOIC in excess of the amount authorized by the CPUC in Decision D.12-11-051 or subsequent decision.
- 5) Any Spot Bonus costs.
- 6) Any Awards to Celebrate Excellence ("ACE") costs.
- 3) NOIC adjustment in Column 3, Line 24 is made by determining the difference between the total accrued NOIC amount
- included in the FERC Form 1 recorded cost amounts and the actual A&G NOIC payout (see note 2).
- NOIC adjustment in column 3, Line 26 is made by entering the amount of accrued NOIC that is capitalized.

  4) Determine the PBOPs exclusion. The authorized amount of PBOPs expense (line a) may only be revised.
- pursuant to Commission acceptance of an SCE FPA Section 205 filing to revise the authorized PBOPs expense,
- in accordance with the tariff protocols. Accordingly, any amount different than the authorized PBOPs
- expense during the Prior Year is excluded from account 926 (see note 3). Docket or Decision approving authorized PBOPs
- 5) SCE shall make no adjustments to recorded labor amounts related to non-labor labor and/or Indirect labor in Schedule 20.

Total Revenue Credits:

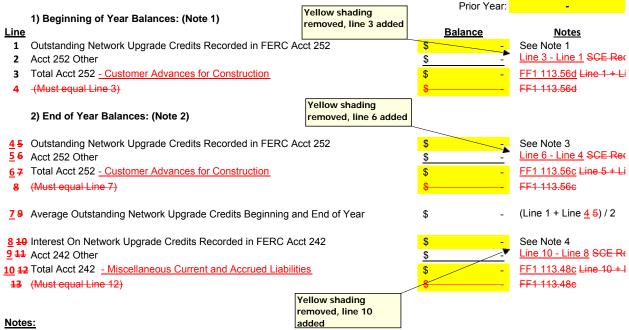

Amount Calculation
Sum of Column D, Line 43 and Column G, Line 32

#### Notes:

- CPUC Jurisdictional service related.
- Subject to sharing per the Gross Revenue Sharing Mechanism (GRSM), adopted in CPUC D.99-09-070. On an annual basis, once SCE obtains \$16,671,389.55 (Threshold Revenue) in NTP&S Revenues, any additional revenues (Incremental Gross Revenues) that SCE receives are shared between shareholders and ratepayers. For GRSM categories deemed Active, the Incremental Gross Revenues are shared 90/10 between shareholders and ratepayers. For those categories deemed Passive, the Incremental Gross Revenues are shared 70/30 between shareholders and ratepayers.
- Generation related.
- 4- Non-ISO facilities related.
- ISO transmission system related.
- 6- Subject to balancing account treatment
- 7- Allocated based on CPUC GRC allocator in effect during the Prior Year. The weighted average (by time) shall be used if more than one allocator is in effect during the Prior Year.
- 8- ISO portion of Traditional OOR relates to monthly revenues received from customers for facilities that are part of the ISO network.
- 9- Edison ESI is a subsidiary company. Gross revenues are not reported in FF-1, only net earnings. Net Earnings for ESI are reported on Acct 418.1, pg 225.5e.
- 10- The first \$16,671,389 million in gross revenues generated by GRSM activities are automatically classified as Threshold
- 11- Allocator is equal to the jurisdictional split of the Threshold Revenue, which is jurisdictionalized as \$5.425M to FERC ratepayers and \$11.246M to CPUC ratepayers per the 2009 CPUC General Rate Case (D. 09-03-025). The ISO ratepayers' share of ratepayer revenue is \$5.425M/\$16.671M = 32.54%.
- 13. Mono Power Company is a subsidiary company. Net Earnings are reported on Acct 418.1, pg 225.11e. Revenues and costs shall be non-ISO.
- SCE Capital Company is a subsidiary company. Net Earnings are reported on Acct 418.1, pg 225.23e. Revenues and costs shall be non-ISO.
- 15- Southern States Realty is a subsidiary company. Gross revenues are not reported in FF-1, only net earnings. Net Earnings for Southern States Realty are reported on Acct 418.1, pg 225.17e.
- 16- For subsidiaries that are subject to GRSM, Column D contains gross revenues. Input on Line 30D contains the associated expenses.
- Per GRC Decision D.87-12-066, for ratemaking purposes EMS financials are consolidated with SCE's. See FERC Form 1 page 123.3 under "Equity Investment Differences". Consequently, net income of EMS is not reported separately in FERC Form 1 and is not a part of FERC Account 418.1 totals. To ensure that ratepayers receive the net income from this subsidiary SCE includes EMS net income in the formula on line 28f. This amount is reversed as part of line 30 to remain consistent with the totals reported in FERC Form 1.

#### Schedule 22 Network Upgrade Credits and Interest Expense

#### **NETWORK UPGRADE CREDIT AND INTEREST EXPENSE**

- 1 Beginning of Year Balances are from December of the year previous to the Prior Year.
- 2 End of Year Balances are from December of the Prior Year.
- 3 Only projects that are in Rate Base in the year reported are included.
- 4 Interest relates to refund of facility and one-time payments by generator. For facility costs, pre-in-service date interest is excluded. For one-time costs, pre-in-service and post-in-service interest is included.

# Schedule 23 Regulatory Assets and Liabilities

## Determination of Regulatory Assets/Liabilities and Associated Amortization and Regulatory Debits/Credits

### Line

Other Regulatory Assets/Liabilities are a component of Rate Base representing costs that are created resulting from the ratemaking actions of regulatory agencies. Pursuant to the Commission's Uniform System of Accounts, these items include amounts recorded in accounts 182.x and 254. This Schedule shall not include any costs recovered through Schedule 12.

4

SCE shall include a non-zero amount of Other Regulatory Assets/Liabilities only with Commission approval received subsequent to an SCE Section 205 filing requesting such treatment.

7

Amortization and Regulatory Debits/Credits are amounts approved for recovery in this formula transmission rate representing the approved annual recovery of Other Regulatory Assets/Liabilities as an expense item in the Base TRR, consistent with a Commission Order.

11

12		Prior `	Year	
13		<u>Amo</u>	<u>unt</u>	Calculation or Source

18	Issue #2	\$ -	\$ -	\$ -	
19	Issue #3	\$ -	\$ -		
20	Totals:	\$ -	\$ -	\$ -	Sum of above

#### Instructions:

- 1) Upon Commission approval of recovery of Other Regulatory Assets/Liabilities, Amortization and Regulatory Debits/Credits costs through this formula transmission rate:
  - a) Fill in Description for issue in above table.
  - b) Enter costs in columns 1-3 in above table for the applicable Prior Year.
- 2) Add additional lines as necessary for additional issues.

#### Notes:

- 1) (Sum Lines 33 to 36) \* (FF + U Factors from 28-FFU) for Prior Year TRR (Sum Lines 34 to 37) \* (FF Factor from 28-FFU) for True Up TRR
- 2) Project Cost of capital is a fraction of total Cost of Capital on Line 15 based on fraction of project CWIP Balances on Lines 1 to 12, Col 1. Project Income Taxes is a fraction of total Income on Line 19 based on fraction of project CWIP Balances on Lines 1 to 12, Col 1. ROE Adder is from Lines 35 and 36. FF&U Expenses are based on FF&U Factors on 28-FFU.
- 3) Project Cost of capital is a fraction of total Cost of Capital on Line 15 based on fraction of project CWIP Balances on Lines 1 to 12, Col 2. Project Income Taxes is a fraction of total Income on Line 19 based on fraction of project CWIP Balances on Lines 1 to 12, Col 2. ROE Adder is from Lines 35 and 36. FF&U Expenses are is based on FF&U Factors on 28-FFU.
- 4) Project contribution to total IFPTRR is based on fraction of Forecast Period CWIP Balances on Lines 1 to 12, Col 3.
- 5) Column 1 is from Lines 39 to 49, Sum of Column 1-3 (no FF&U).
- Column 2 is from Lines 68 to 78 (no FF&U).
- Column 3 is the product of (C1 + C2) and the sum of FF and U factors (28-FFU, L5)
- 6) Same as Note 5 except no Uncollectibles Expense in Column 3.

# Schedule 25 Wholesale Differences to Base TRR

#### Calculation of Wholesale Difference to the Base TRR

Inputs are shaded vellow

**Expense** 

The Wholesale Difference to the Base TRR represents the amount by which the Wholesale Base TRR differs as compared to the Retail Base TRR. This difference is attributable to differences in the following six items, as approved by Commission Order 86 FERC ¶ 63,014 in Docket No. ER97-2355.

These six items may affect the Base TRR by affecting Rate Base, or affecting an annual expense (amortization). If the annual amortization affects Income Taxes, there is an additional annual Income Tax Effect. The table summarizes these impacts for each item:

			Expense	
		Rate Base	(Amortization)	Expense
Line		<u>Difference</u>	<u>Difference</u>	Tax Impact
1	a) Depreciation	Yes	Yes	No
2	b) Taxes Deferred -Make Up Adjustment (South Georgia)	Yes	Yes	Yes
3	c) Excess Deferred Taxes	Yes	Yes	Yes
4	d) Taxes Deferred - Acct. 282 ACRS/MACRS	Yes	Yes	No
5	e) Uncollectibles Expense	No	Yes	No
6	f) EPRI and EEI <u>Dues</u> Expenses	No	Yes	No

#### 1) Calculation of Wholesale Rate Base Difference and Wholesale Rate Base Adjustment

#### a) Quantification of the Initial 2010 Wholesale Rate Base Difference and annual change

The difference between Retail and Wholesale Rate Base is attributable to the following four items, with with the Initial Prior Year 2010 Rate Base differences and annual changes as follows:

		· ·		<u>Col 1</u> 2010 Rate Base	<u>Col 2</u>
		Data		Difference (Wholesale	Annual Change
		<u>Source</u>		less Retail)	(Amortization)
7	Accumulated Depreciation	Fixed values		\$31,556,000	-\$2,176,300
8	2) Taxes Deferred - Make Up Adjustment	Fixed values		-\$35,044,000	\$2,503,000
9	3) Excess Deferred Taxes	Fixed values		-\$624,650	\$43,100
10	4) Taxes Deferred - Acct. 282 ACRS/MACRS	Fixed values		<u>-\$7,410,000</u>	\$511,200
11			Totals:	-\$11,522,650	\$881,000

#### b) Quantification of the Wholesale Rate Base Adjustment

The Wholesale Rate Base Adjustment represents the impact on the Wholesale Base TRR relative to the Retail Base TRR of the Wholesale Rate Base Difference for the Prior Year.

		Data <u>Source</u>	<u>Value</u>	Notes/In:	structions
12	Fixed Charge Rate	2-IFPTRR Line 16	- %	6 1	
13	Prior Year		-	2	2
14	Wholesale Rate Base Difference for Prior Year		\$ -	. 3	}
15	Wholesale Rate Base Adjustment	Line 14 * Line 12	\$ -		

# 2) Calculation of Wholesale Expense Difference

The annual Wholesale Expense Difference impact is the negative of amounts stated in Lines 7 to 10 above, Column 2. It represents the effect on expenses (Wholesale less Retail) of amortizing the associated balances each year. If an annual amortization amount affects Income Taxes, the expense difference must be grossed up for income taxes.

#### Notes/Instructions:

- 1) Fixed Charge Rate of capital and income tax costs associated with \$1 of Rate Base is defined elsewhere in this formula as "AFCRCWIP".
- 2) Input Prior Year for this Informational Filing in Line 13.
- 3) Calculation: (Line 11, Col 1) + ((Line 11, Col 2) \* (Line 13 2010)).
- 4) Franchise Fee Exclusion is equal to the Franchise Fee Factor on the 28-FFU Line 5 times Line  $\frac{39}{38}$  +  $\frac{40}{39}$ .
- 5) Only exclude if not already excluded in Schedule 20.
- 6) If appropriate, additional expenses may be excluded from the Wholesale Base TRR

#### Schedule 26 Tax Rates

#### **Calculation of Income Tax Rates**

# Schedule 26 Tax Rates

# Notes:

1) In the event that statutory marginal tax rates change during the Prior Year, the effective tax rate used in the formula shall be weighted by the number of days each such rate was in effect. For example, a 35% rate in effect for 120 days superseded by a 40% rate in effect for the remainder of the year will be calculated as:
-((.3500 x 120) + (.4000 x 245))/365 = .3836.

Calculation of FITR for Prior Year:

	(Col 1) FITR	<del>(Col 2)</del> Days	Note
a	<u>-%</u>		Input FITR in effect for first part of year and number of days
b	<del>- %</del>		Input FITR in effect for second part of year and number of days
e	FITR:	<u>- %</u>	= ((Line a, C1)*(Line a, C2)+ (Line b, C1)*(Line b, C2))/365

# 3) FF and U Factors

	Prior			
	<u>Year</u>	FF Factor	<b>U</b> Factor	<u>Notes</u>
5		- %	- %	Calculated according to Instruction 3

#### Notes:

1) Franchise Fees represent payments that SCE makes to municipal entities for the right to locate facilities within the municipality.

#### Instructions:

- 1) Enter Franchise Fee and Uncollectibles Factors as approved by the California Public Utilities Commission ("CPUC") in modules 1 and 2 above pursuant to Instruction 2. If approved factors changed during Prior Year, enter both, and note period of time for which each applies in "From" and "To" columns, and number of days each was in effect during the Prior Year in "Days in Prior Year" Column.
- 2) Franchise Fees Factor is calculated from CPUC Decision by dividing adopted Franchise Fees by Total Operating Revenues less Franchise Fees. Uncollectibles Factor is calculated by dividing adopted Uncollectibles expense by Total Operating revenues less Uncollectibles Expense. Resulting FF & U Factors represent factors that, when applied to TRR without FF and U will correctly determine FF and U expense.
- 3) Calculate in module 3 the weighted average FF and U factors from the factors in modules 1 and 2 based on the number of days each FF and U factor was in effect during the Prior Year at issue.

	<u>Percent</u>	<u>Calculation</u>
Prior Year FF Factor:	- %	((L1 FF Factor * L1 Days) + (L2 FF Factor * L2 Days))/365 (L1+L2 Days)
Prior Year U Factor:	- %	((L3 U Factor * L3 Days) + (L4 U Factor * L4 Days))/ <del>365</del> ( <u>L3+L4 Days)</u>

#### 19 Notes:

- 1) See Col 9 of Lines 35a, 35b, 35c, etc.
- 2) Sales forecast in total Giga-watt hours usage, represents the customers' total annual GWh usage. Based on same forecast as Gross Load forecast in Schedule 32, Line 1, but at customer meter level. Does not include Backup GWh included in Column 4 (the sum of Column 3 and 4 equals total Sales Forecast).
- 3) Backup GWh represents the amount of electric service that is provided by SCE to a customer who has an onsite generating facility during unscheduled outages of the customer's on-site generator. Only applies to TOU-8-Standby-SEC, TOU-8-Standby-PRI, TOU-8-Standby-SUB Rate Groups.
- 4) Amount of energy included in the sales forecast that is not subject to transmission charges pursuant to the California Public Utilities Commission ("CPUC") approved Net Energy Metering Program.
- 5) Sales forecast pertaining to the sum of monthly maximum supplemental Mega-watt demand, applies to demand charge schedules
- 6) Sales forecast pertaining to the sum of monthly contracted standby Mega-watt demand, applies to standby schedules
- 7) Net Forecast in total Giga-watt hours usage represents the customers' annual Net GWh, applicable to Non-Demand Charge Schedules such as Residential or Small General Service 8) Recorded sales from Sample meters adjusted for population use to set the total demand rate for the optional time-of-use schedules within the GS-1 rate group
- 9) Line 1b2, Col11 = Line 1b Col9 \* Line 1b Col11 \* 10^6
- 10) Total demand rate for the optional time-of-use schedules within the GS-1 rate group, Line 1b2:Col10 = Line 1b2:Col12 ( which = Line 1b2:Col11 / ((Line1b:Col12 + Line1b:Col13) \* 10^3)
- 11) Sum of the TOU-8 Standby and TOU-8 Non-Standby billing determinants in Line1:Col6

#### Schedule 33 Retail Transmission Rates

- 12) For TOU-8 Rates revenue = Supplemental Demand Charge on Line 9 Column 8 \* Maximum Demand on Lines 1 Column 6
- 13) For optional time-of-use schedules within the GS-1 rate group (Line16b:Col6), = (Line1b2:Col11 Line16:Col3) / Line1b:Col12 / 10^3
- 14) For the non TOU-8-Standby rate group, it is the minimum of Line16i:Col7, or the total demand rate in Line1:Col109
- 15) Applicable to time-of-use schedules within the GS-1 rate group
- 16) Applicable to the optional schedules that contain horse power charge such as PA-1
  17) GWh for TOU-8-Standby-SEC, TOU-8-Standby-PRI, TOU-8-Standby-SUB Rate Groups are placed in TOU-8-SEC, TOU-8-PRI, TOU-8-SUB Rate Groups respectively.

#### **Determination of PBOPs Filing Requirement and PBOPs Filing Amounts**

Complete Lines 1-9 of this Schedule every other Annual Update beginning with the Annual Update submitted in 2014 (for Rate Year 2015). Complete Lines 10-14 every Annual Update beginning with the Annual Update submitted in 2014 (for Rate Year 2015).

Pursuant to Section 8.b of the formula rate protocols, SCE must make a filing to adjust the current Authorized PBOPs Expense Amount if the absolute value of the sum of the Cumulative PBOP Recovery Difference and the Future PBOPs Recovery Difference is greater than 20% of the sum of SCE's forecast PBOP expense for the current year and the following year.

Check of above described condition:

	CHECK OF ADOVE DESCRIBED CONDITION.

#### Notes:

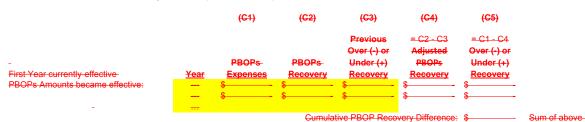

1) Commission-Approved Authorized PBOPs Expense Amounts beginning with Prior Year:

		PI	Authorized BOPS Expense	Commission
<del>Line</del>	<u> </u>	Year(s)	Amount	Authorization
<del>15</del>	Prior Year:		<del></del>	
<del>16</del>			<del>\$</del>	
<del>17</del>			<del>\$</del>	
<del>18</del>			<u>\$</u>	
<del>19</del>			<u>\$</u>	
The Owner de Con-	DDOD- D D'# '- #			

The Cumulative PBOPs Recovery Difference is the cumulative over-recovery or under-recovery of SCE's PBOPs expense amount during the period beginning on the date the currently effective Authorized PBOBs Expense Amounts became effective and ending on December 31 of the immediately preceding year ("Prior PBOPs Recovery Period")

			Decision
	<del>Year</del>	<u>Amount</u>	Reference
Current Authorized PBOPs Expense Amounts:		\$	
(See Instruction 1)		\$	

Calculation of Cumulative PBOPs Recovery Difference (see Instruction 2):

#### Schedule 35 PBOPs

- 2) The Future PBOP Recovery Difference is the difference between:
- a) The sum of SCE's Forecast PBOP Expense for the current year and next year ("Projected Expense"); and
- b) The sum of SCE's PBOPs Expense amount to be recovered under its Formula Rate for the current year
- and the next year at the current Authorized PBOPs Expense Amount ("Projected Recovery").

Calculation of Future PBOPs Recovery Difference:

		<u>Amount</u>	<u>Calculation</u>
a	Projected Expense:	\$	Sum of first two years of Forecast PBOPs Expenses
<del>b</del>	Projected Recovery:	\$	Sum from Note 1 for current and next year.
e	Future PBOPs Recovery Difference:	\$	Projected Expense less Projected Recovery

Five Year Forecast PBOPs Expenses:

			Forecast PBOPs
		<del>Year</del>	<b>Expenses</b>
d	Prior Year:	_	\$
•			\$
f			\$
g		_	\$
h		_	\$

Twenty Percent of sum of forecast PBOPs Expense for current Rate Year and Immediately succeeding Rate Year: \$ (d+e)\* 0.2

3) The PBOPs True Up TRR Adjustment determines the amount by which the True Up TRR for the Prior Year should be adjusted in order to correctly reflect the Authorized PBOPs Expense Amount that was in effect for the Prior Year (rather than the stated amount that is in effect for the current year as shown on Schedule 20, Note 3, Line a).

#### Instructions:

1) Enter Authorized PBOPs Expense Amounts and associated Commission Decision aothirizing amounts on Lines 6-10,

beginning with the Prior Year for the Annual Update.

"Current Authorized PBOPs Expense Amounts" in Note 1 are the amounts in effect beginning the first year these amounts were authorized.

This schedule is to be filled out (if required by the protocols) utilizing the amounts in effect at that time. If a filing to revise the Authorized

PBOPs Expense Amounts is required, SCE shall make such filling after the Draft Annual Update is posted.

SCE shall request that the Commission make the revised Authorized PBOPs Expense Amounts (as determined on Lines 5-9) effective beginning on January 1 of the filing year.

If the Commission approves SCE's filing, the Authorized PBOPs Expense Amount on Schedule 20, Note 3, Line a for the subsequent Annual Update shall then correspond to the first "Filing PBOPs Expense" in Column 3, Line 5 above. Absent another filing, subsequent Authorized PBOPs Expense Amounts in subsequent Annual Updates will correspond to the amounts in lines 6-9.

2) Fill out table through the year immediately preceeding the current calendar year in which the Annual Update is filed.

Enter in C1 "PBOPs Expenses" for each year equal to SCE's actual PBOPs expenses.

Enter in C2 PBOPs Recovery based on Commission approved amounts from most recent PBOPs filling for each year in Prior PBOPs Recovery Period. Enter in C3 "Previous Over (-) or Under (+) Recovery" from previous filling to revise PBOPs amounts (Lines 5 and 6, C2), if any. Enter with same sign, and corresponding to the years over which it was amortized.

C4."Adjusted PBOPs Recovery" represents PBOPs Recovery with the previous period over or undercollection removed.
