Business Rate Basics

Rate Schedule TOU-PA-2-A for Pumping & Agriculture

What Is TOU-PA-2-A and Are You Eligible?

Choosing the right rate is an important business decision. We're here to help. Rate Schedule Time-Of-Use (TOU) Pumping and Agricultural Rate Option A (TOU-PA-2-A) may work for your small- or medium-sized business if you use 70% or more of your electricity for agriculture or for water or sewage pumping, and none of your remaining energy for domestic purposes.

Under this rate, your monthly demand cannot reach or exceed 200 kilowatt (kW) more than twice a year. If your demand reaches or exceeds 200 kW three times in a 12-month period, your account will be transferred to rate schedule TOU-PA-3-A.

How It Works

Under this rate, your monthly bill is calculated based on three types of charges: a fixed "Customer Charge"; "Energy Charges" based on your actual usage in kWh; and a "Facilities-Related Demand Charge" based on demand:

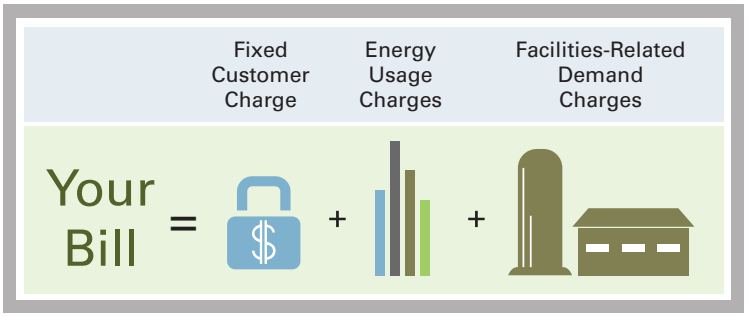
- A monthly **Customer Charge** covers a portion of basic services, such as customer billing.
- **Energy Charges** vary by season and time of day (please see reverse side for more on seasonal peak hours).
- **Facilities-Related Demand Charges** apply at all times, and are calculated per kilowatt (kW) according to your highest recorded demand during each billing cycle.

Alternatives for Agribusiness

You've got options when it comes to your rate. If TOU-PA-2-A doesn't fit your business needs, you may benefit by taking service under one of our Agricultural Time-Of-Use rates, such as TOU-PA-2-B or TOU-PA-2-SOP. Learn more at **sce.com/business**.

Want To Save More?

We offer a variety of Demand Response programs. Participating can have a positive impact on your bottom line. We invite you to learn more at **sce.com/drp**.

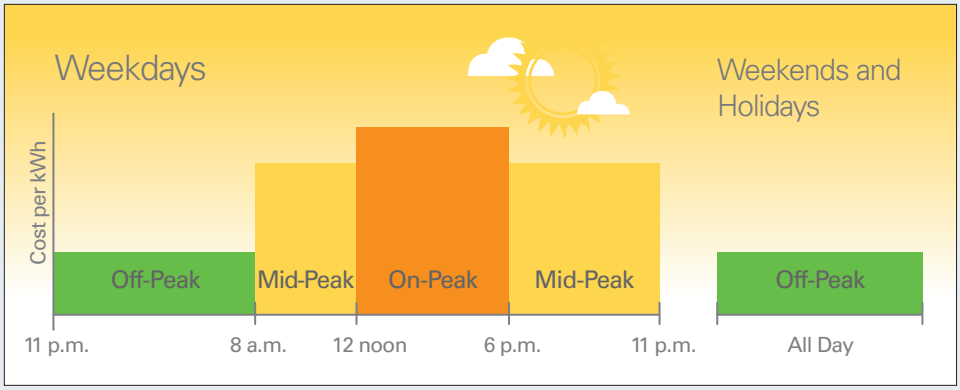


At a Glance: Rates By Season and Time

Many rates factor season, day, and hour into prices. The following charts depict SCE's traditional Time-Of-Use (TOU) periods in the summer and winter seasons.

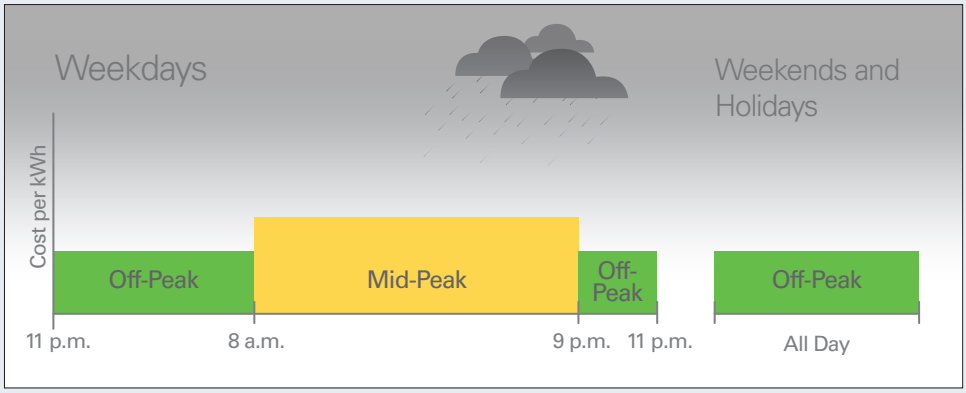
Summer Season*

Begins at 12 a.m. on June 1 and continues until 12 a.m. on October 1 each year.



Winter Season*

Begins 12 a.m. on October 1 and continues until 12 a.m. on June 1 each year.



On-Peak: Highest Energy Charge

Mid-Peak: Medium Energy Charge

Off-Peak: Lowest Energy Charge

*The lower off-peak rate applies on holidays. When any holiday falls on Sunday, the following Monday will be recognized as a holiday. Holidays are New Year's Day, President's Day, Memorial Day, Independence Day, Labor Day, Veteran's Day, Thanksgiving Day, and Christmas Day.

This rate sheet is meant to be an aid to understanding SCE's Rate Schedule TOU-PA-2-A. It does not replace pricing information contained in the CPUC-approved tariffs. Please refer to the tariffs for a complete list of terms and conditions of service, which can be viewed online at sce.com.
