The Tehachapi project is a series of new and upgraded transmission facilities spanning approximately 173 miles. The system upgrade is designed to deliver electricity from renewable energy generators in Kern County, as well as power added to the system from traditional generating sources, south through Los Angeles County and east to the existing Mira Loma Substation in Ontario, San Bernardino County.

SCE’s Commitment
SCE remains committed to working with communities along the project area to reduce, to the extent possible, the impacts of construction and minimize any inconvenience to residents and businesses during construction. SCE will:

• Limit construction hours to comply with all relevant local regulations to the extent feasible; certain construction activities may require SCE to perform work outside of locally regulated work hours
• Implement dust control, noise abatement and other environmental protection measures
• Provide prior notification to affected property owners of construction activities
• Provide information to local communities on street closures or other activities that could temporarily limit access for area residents and businesses
• Provide contact information for SCE personnel who are available to answer questions that may arise during construction
• Ensure a safe and secure work environment during construction activities

If you have any questions about the scheduled work or other project-related activities in your neighborhood, please contact us at the project hotline at (877) 795-8787 or visit the TRTP website at www.sce.com/trtp.

Safety Corner

LIGHTS AND OTHER ELECTRICAL DECORATIONS SAFETY

The holiday season is quickly approaching. Many holidays have a happy tradition involving decorations. Below are a few tips to help keep you and your family safe around electricity this holiday season.

DON’T overload outlets or extension cords. Plugging too many appliances or strands of lights into a single outlet can cause them to overheat, which could start a fire.

DO inspect all strands of lights and other electrical decorations before you plug them in. Discard them if they have broken sockets, cracked or frayed cords, bare wires or loose connections.

DON’T connect more than three strands of incandescent holiday lights together. Even better, use LED lights, which consume less electricity and give off less heat.

DON’T hammer nails or tacks through electrical cords when hanging lights.

If you would like to receive future newsletter updates via e-mail, please e-mail us at trtp@sce.com and enter “Newsletter” in the e-mail’s subject line.

DID YOU KNOW?
The number of power outages caused by metallic balloons touching power lines in Southern California Edison’s service territory in February 2014, compared to 59 in February 2013—a 49 percent drop. In 1990, California law began requiring metallic balloons to be weighted down to reduce balloon-related outages.
GETTING READY TO GO GREEN: UPCOMING CONSTRUCTION ACTIVITIES

During the next three months, TRTP construction activities will include (please note that the construction schedule is tentative and may change depending on weather and other factors):

SEGMENT 4
City of Lancaster and parts of unincorporated Kern and Los Angeles Counties
- Major construction is complete

SEGMENT 5
Cities of Lancaster and Palmdale, and parts of unincorporated Los Angeles County, including Acton
- Major construction is complete

SEGMENT 6
Unincorporated Los Angeles County, including Acton
- Major construction is complete
- Install FAA safety marker balls (helicopter activity)
- Site stabilization is underway

SEGMENT 10
Parts of unincorporated Kern County
- Major construction is complete

SEGMENT 11
Parts of unincorporated Los Angeles County, including Acton
- Access road improvements and work site development
- Demolition of existing electrical transmission conductor (wires), structures (towers) and foundations
- Installation of foundations for new electrical transmission towers, including site preparation
- Assembly and installation of new electrical transmission towers utilizing both conventional equipment and helicopters
- Installation of new electrical transmission wires

Every effort will be made to reduce the amount of noise generated by activities related to construction. SCE understands that construction may be inconvenient to local residents. We greatly appreciate your patience as we move to complete construction as quickly and safely as possible.

**Construction Impacts**

In addition to SCE efforts to minimize the impacts to residents and businesses during construction, here are some simple tips that may help you reduce construction disturbance:

- Close all windows and doors facing the construction area in order to reduce noise and dust.
- Watch for information updates in the form of mailers, door hangers, etc. to ensure you have the most up-to-date information about construction activities taking place in your area.

**Tips for Minimizing Construction Disturbance**

- Do you know that you can look up the location of your address in relation to the TRTP project route? To view your address and the TRTP project location, visit www.sce.com/trtp and click on “For More Information” then “Look Up My Address.”

**Construction Activities**

- Major construction is complete
- Access road improvements and work site development
- Demolition of existing electrical transmission wires, towers and foundations
- Installation of foundations for new electrical transmission towers, including site preparation, new electrical transmission towers utilizing both conventional equipment and helicopters, and new electrical transmission wires or FAA safety marker balls

**Where it’s at!**

- Map showing various segments, substations, and roadways with construction activities.
- Information about construction impacts and tips for minimizing disturbance.

---

**Getting Ready to Go Green: Upcoming Construction Activities**

- During the next three months, TRTP construction activities will include a range of activities to complete construction as quickly and safely as possible.
- Segments 4, 5, 6, 10, and 11 are highlighted with specific details.
- Tips for minimizing construction disturbance are provided for residents.

---

**Construction Activities Map**

- Illustrated map with various segments, substations, and roadways.
- Color-coded areas indicate construction activities.
- Legend for construction activities included.

---

**Tips for Minimizing Construction Disturbance**

- Close windows and doors facing construction areas.
- Watch for updates in the form of mailers and door hangers.

---

**Address Lookup**

- Instructions for finding your address in relation to the TRTP project route.
- Visit www.sce.com/trtp and look up your address.

---

**Conclusion**

- Emphasis on appreciation for residents' patience during construction.
- Encouragement to report construction issues.

---

**Additional Details**

- Contact information for reporting construction issues.
- Resources for staying informed about project progress.
