

**NOTICE OF CONSTRUCTION**  
**Southern California Edison's West of Devers Upgrade Project**

**El Casco Substation Telecommunication Work**

**Southern California Edison (SCE)** has scheduled construction of the **West of Devers (WOD) Upgrade Project (Project)**. The Project will upgrade the existing transmission lines between the Devers, El Casco, San Bernardino, and Vista substations to increase system transfer capacity from 1,600 megawatts (MW) to 4,800 MW. The Project is located primarily within the existing WOD right-of-way in incorporated and unincorporated parts of Riverside and San Bernardino counties.

Upgrades will occur on approximately 30 miles of the existing Devers–El Casco line, 14 miles of the El Casco–San Bernardino line, 43 miles of the Devers–San Bernardino line, 45 miles of the Devers-Vista No. 1 and No. 2 lines, 3.5 miles of the Etiwanda–San Bernardino line, and 3.5 miles of the San Bernardino–Vista line.

The Project was approved by the California Public Utilities Commission (CPUC) in August 2016.

**Immediate Construction Area:** Approximately 42,000 feet of fiber optic cable will be installed on existing distribution poles along San Timoteo Canyon Road, in the City of Redlands leading to the El Casco Substation, located in Riverside County. Approximately 2,000 feet of underground cable will be installed in existing conduit from the front of the substation into the existing substation building. SCE is required to provide this public notice to satisfy project licensing requirements, however this scope of work is not expected to impact the operations of recreation areas.

**Immediate Construction Activity:** Construction is required to upgrade the existing fiber optic cable to provide increased capacity to the existing system.

**Construction Period:** November 6, 2017 – November 30, 2017

**SCE's Commitment and You**

SCE understands that construction can potentially be disruptive to daily activities. The company is committed to ensuring the communities' safety and, to the extent possible, minimizing inconvenience. SCE is committed to working with recreation facilities to minimize the impacts of this Project and will use its best efforts to schedule construction activities to avoid heavy recreational use periods, including major holidays.

**For More Information**

Visit the Project website: <https://www.sce.com/wps/portal/home/about-us/reliability/upgrading-transmission/west-of-devers>

Call the Project information line: 888-226-9916

We look forward to coordinating with you.

Sincerely,

**Sylvia Granados**
