August 16, 2019

Leslie Palmer, Director
Safety and Enforcement Division
California Public Utilities Commission
505 Van Ness Avenue
San Francisco, CA  94102

Re:  PSPS Post Event Report Regarding Pro-Active De-Energization Event
July 29 to August 2, 2019

Dear Director Palmer:

Southern California Edison (SCE) respectfully submits the attached report in compliance with PSPS Post Event Reporting requirements regarding its pro-active de-energization event that began June 28, 2019. This report has been verified by an Officer of SCE in accordance with Rule 1.11 of the Commission’s Rules of Practice and Procedure.

Sincerely,

Laura Genao
Managing Director
SCE State Regulatory Affairs

cc:  ESRB_ComplianceFilings@cpuc.ca.gov
Southern California Edison
Public Safety Power Shutoff Protocol (PSPS)
Post-Event Reporting in Compliance with Resolution ESRB-8
and Decision 19-05-042
July 29 to August 2, 2019

Submitted to:
California Public Utilities Commission
Director of the Safety and Enforcement Division
August 16, 2019
Executive Summary
On July 29, 2019, Southern California Edison (SCE) Incident Management Team 1 reported to the Emergency Operations Center to perform response operations associated with an elevated fire weather event with the potential for employment of SCE’s Public Safety Power Shutoff protocol. Approximately 7,751 customers were initially identified in portions of Los Angeles, Riverside and Kern Counties as potentially impacted. Pro-active de-energization was ultimately not required. However, appropriate notifications of the potential event were made to public safety partners, critical infrastructure providers and customers pursuant to Resolution ESRB-8 and Decision (D.) 19-05-042.

SCE submits the following report to the California Public Utilities Commission’s Director of the Safety and Enforcement Division pursuant to Resolution ESRB-8 and Decision (D.) 19-05-042. In separate sections of this report, SCE sets forth the reasons for its decision to notify customers of the potential for de-energization, including the day-by-day background for the event, and responds to the questions as required in ESRB-8 and D.19.05-042.
SCE’s Decision to Notify Customers

SCE’s decision to notify customers of potential use of the Public Safety Power Shutoff (PSPS) protocol was based on the following factors:

- Individual wind thresholds for circuits based on High Fire Risk Area (HFRA) maps and a combination of actual and historical wind data signified a heightened risk of potential impacts from an incoming weather event; and
- The assigned rating of the SCE Fire Potential Index (FPI) was “elevated” or higher for circuits identified in the High Fire Risk Area

Actions taken to manage the response included:

- Operating restrictions on impacted circuits in Los Angeles, Kern and Riverside Counties;
- Activation of an Incident Management Team for response operations associated with potential de-energization;
- Notifications to public safety partners, critical infrastructure providers and customers;
- Patrolling of impacted circuits before and after the event; and
- Live field observation of impacted circuits during the period of concern to determine the need to execute the Public Safety Power Shutoff Protocol to maintain public safety.

Additional details of the event leading to the decision to provide notifications can also be found in the associated report timeline.

---

1 The SCE Fire Potential Index is an internal tool that utilizes both modeled forecasted meteorological conditions and conditions of fuels to give context to potential impacts due to weather. Inputs to the FPI include wind conditions, dryness of the air near the ground, and moisture content of the vegetation. The FPI is comprised of three ratings; moderate, elevated and extreme with specific response actions associated with each rating.

2 Specific operating restrictions SCE may employ during a Public Safety Power Shutoff can be found in the 2019 SCE Wildfire Mitigation Plan approved by the CPUC on May 30, 2019.
Event Timeline July 29 to August 2, 2019

Monday, July 29, SCE meteorologists continued to update SCE personnel of forecasts predicting local winds with high gusts, hot temperatures, and very dry conditions creating an elevated fire weather threat as determined by the SCE FPI beginning Monday, July 29 through Friday, August 2. To manage this incident, PSPS Incident Management Team 1 reported to the SCE Emergency Operations Center (EOC) effective July 29 at 9:00 a.m., to continue execution of the PSPS protocol.

Initial circuits on the monitoring list included the Bootlegger circuit in Los Angeles County and the Borel-Isabella, Canebrake, Erskine and Horse Mountain circuits in Kern County. Canebrake and Horse Mountain were removed in the afternoon with updated forecasting. The Bootlegger circuit was expected to meet PSPS criteria between July 29 and August 1. The Borel-Isabella and Erskine circuits were expected to meet PSPS criteria between July 29 and August 2. SCE provided notifications to emergency and public safety partners, critical infrastructure providers and potentially impacted customers according to internal notification protocols.

Tuesday, July 30, SCE meteorologists provided updated forecasting analysis and the Borel-Isabella, Bootlegger and Erskine circuits remained on the monitoring list. While the Borel-Isabella and Erskine remained static for meeting PSPS criteria on August 2, the Bootlegger circuit was now forecasted to meet the PSPS criteria on August 3. Updated forecasting analysis again in the afternoon resulted in the Bootlegger Circuit PSPS criteria period moving back to August 1. SCE provided updated notifications to emergency and public safety partners, critical infrastructure providers and potentially impacted customers according to internal notification protocols.

Wednesday, July 31, SCE meteorologists forecasted the Borel-Isabella and Erskine circuits to meet PSPS criteria in the afternoon through August 4. The Bootlegger circuit was still expected to meet PSPS criteria on August 1. SCE provided updated notifications to emergency and public safety partners, critical infrastructure providers and potentially impacted customers according to internal notification protocols.

Thursday, August 1, the Borel-Isabella and Erskine circuits remained on the monitoring list and were now expected to meet PSPS criteria through August 5. The Bootlegger Circuit was expected to meet PSPS criteria in the afternoon of August 1 as well as the afternoon of August 2. SCE provided updated notifications to emergency and public safety partners, critical infrastructure providers and potentially impacted customers according to internal notification protocols.

Friday, August 2, SCE meteorologists provided updated forecasting analysis and both the Bootlegger in Los Angeles County and the Erskine and Borel-Isabella circuits in Kern County were removed from the monitored circuit list due to no longer meeting PSPS criteria. The Shovel circuit was added to the monitored circuit list and forecasted to meet PSPS criteria.
beginning August 6. SCE provided updated notifications to emergency and public safety partners, critical infrastructure providers and potentially impacted customers according to internal notification protocols.

No circuits remained on the monitored circuit list for August 2 to August 6. Given that the Shovel Circuit in Los Angeles County was forecasted to meet the PSPS criteria on the afternoon of August 6 and the four-day break in circuits on the monitored list, the decision was made to conclude the July 29, 2019 PSPS event for reporting purposes.
Response to ESRB-8 Requirements

The following material addresses Resolution ESRB-8 requirements in each of the categories associated with notifications. Each of these categories is addressed in separate sections.

1. The local communities’ representatives contacted prior to de-energization, the date on which they were contacted, and whether the areas affected by the de-energization are classified as Zone 1, Tier 2, or Tier 3 as per the definition in General Order 95, Rule 21.2-D

SCE maintained ongoing communications with both unincorporated and incorporated communities affected throughout the duration of the weather event ending August 2, 2019. Additionally, PDF maps and electronic mapping files for affected areas were made accessible to all impacted areas at [www.sce.com/maps](http://www.sce.com/maps). SCE also routinely submitted the CalOES Public Safety Power Shutoff Notification Form to the State Warning Center as conditions changed. Daily conference calls were conducted with the California State Warning Center, CalOES, CalFIRE and the CPUC.

The following table illustrates when contact was made as required, and a copy of all messaging is located in Appendix B of this report.

Communications to Media/Public Outreach

SCE provided informational updates to the public during the PSPS event through sce.com, social media channels and direct contact with media outlets. On July 31, the SCE media team fielded inquiries from KBAK-TV (Bakersfield), where there has been an on-going PSPS event for most of the last month. Inquiries were also fielded from the Riverside Press Enterprise (Southern California News Group) and KGET (Bakersfield) on August 1. On August 1, media team members hosted a Desert Sun reporter and photographer in the Emergency Operations Center to discuss how we manage PSPS and potential wildfires.

2. If unable to provide customers with notice at least 2 hours prior to the de-energization event, provide an explanation in its report.

Not applicable. No circuits were pro-actively de-energized during this event.

3. Summarize the number and nature of complaints received as the result of the de-energization event and include claims that are filed due to de-energization.

Not applicable. No customers lodged formal complaints with Consumer Affairs during this event.

4. Provide a detailed description of the steps taken to restore power.

Not applicable. No circuits were pro-actively de-energized during this event.

5. Identify the address of each community assistance location during a de-energization event, describe the location (in a building, a trailer, etc.), and describe the assistance available at each location, and give the days and hours that it was open.

Not applicable. No circuits were pro-actively de-energized during this event.
Response to Decision (D.) 19-05-042 Requirements

1. Decision criteria leading to de-energization.

Not applicable. No circuits were pro-actively de-energized during this event.

2. A copy of all notifications, the timing of notifications, the methods of notifications and who made the notifications (the utility or local public safety partners).

A copy of all notifications, the timing of notifications and the methods of notifications can be found in Appendix A “Customer Notifications”; Appendix B, “Public Official Notifications”; and Table 1 of this report. SCE was the primary provider of customer notifications. The respective counties shared the primary messaging executed by SCE with public safety partners for situational awareness.

3. An explanation of the circumstances that resulted in failure to communicate a potential pro-active de-energization event, if any.

Not applicable. All appropriate communications were executed ahead of the potential pro-active de-energization event.

4. A description and evaluation of engagement with local and state public safety partners in providing advanced education and outreach during the de-energization event.

Advanced notification of this Public Safety Power Shutoff event was communicated to all impacted counties, CalOES and the CPUC approximately 72 hours before any forecasted weather was scheduled to impact the SCE service territory. Regular updates were given throughout the event using the CalOES PSPS Notification Form, daily situational awareness calls and individual contact with the impacted counties. Additional information regarding SCE’s engagement with public safety partners is provided above in the Event Timeline and Responses to ESRB-8 Requirements.

5. For those customers where positive or affirmative notification was attempted, an accounting of the customers (which tariff and/or access and functional needs population designation), the number of notification attempts made, the timing of attempts, who made the notification attempt (utility or public safety partner) and the number of customers for whom positive notification was achieved.

SCE made positive contact with all customers for this event, including all critical care customers under the Medical Baseline Tariff. SCE was informed that one critical care customer no longer resided at a location and one critical care customer updated their contact information.
6. A description of how sectionalization, i.e., separating loads within a circuit, was considered and implemented and the extent to which it impacted the size and scope of the de-energization event.

   Not applicable. No circuits were pro-actively de-energized for this event.

7. An explanation of how the utility determined that the benefit of de-energization outweighed potential public safety risks

   Not applicable. No circuits were pro-actively de-energized for this event.

8. The timeline for power restoration (re-energization), in addition to the steps taken to restore power as required in Resolution ESRB-8

   No circuits were pro-actively de-energized for this event. However, should it be necessary, the estimated restoration time for planning purposes was determined to be eight hours from the time that all elevated weather conditions moved below thresholds.

9. Lessons learned from the de-energization events

   During this event, SCE sent messaging to both customers and local agencies in the unincorporated area of Los Angeles County. This messaging did not align and inconsistently identified the names of the communities in the unincorporated area between the two messages. SCE is diligently working to continuously improve the ability to deliver timely, coordinated, PSPS event notifications and has instituted a verification process into the Incident Management Team structure to prevent this misalignment from happening in future events.

10. Any recommended updates to the guidelines adopted in Resolution ESRB-8 and Decision (D.) 19-05-042

   No updates to the guidelines have been identified from this event.

Subject: Important Information from SCE – Update on Public Safety Power Shutoff in Kern County

Please click here to acknowledge receipt of this message

This message is from the Southern California Edison Liaison Officer for official use by local government officials.

SCE is continuing to monitor weather conditions and continues exploring options for a potential Public Safety Power Shutoff (PSPS) of electrical circuits in High Fire Risk Areas (HFRA) for unincorporated areas in Kern County.

Please note that while these areas may already be experiencing weather-related outages, SCE has not proactively shut off power at this time.

SCE has identified the following HFRA circuits in your County remain on the PSPS monitor list and might be de-energized.

- **Erskine Circuit**
  - Unincorporated areas including the communities of Bodfish and Lake Isabella

- **Canebrake Circuit**
  - Kernville, Lake Isabella, Onyx and Weldon

- **Horse Mountain Circuit**
  - Near Inyokern

For your reference, PDF and GIS circuit maps may be found at [www.sce.com/maps](http://www.sce.com/maps). Please look at the left-hand navigation links for a drop-down menu for this specific PSPS event to view maps for the circuit listed above. You may also find all HFRA maps, by County, and a list of circuits by jurisdiction to assist your planning efforts.

SCE’s Incident Management Team (IMT) continues to monitor conditions. The actual onset of weather conditions and other circumstances beyond our control may impact coordination and notification efforts. As such, there is a possibility that a PSPS event could be called sooner than anticipated, additional circuits could be added, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will attempt to notify you as conditions change.

SCE is also notifying customers on the impacted circuits to inform them about the potential shutoff.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, SCE crews are working safely and as quickly as possible to restore service.

Subject: Important Information from SCE – Possible Public Safety Power Shutoff (PSPS) in Riverside County

Please click here to acknowledge receipt of this message

This message is from the Southern California Edison Liaison Officer for official use by local government officials.

Due to projected weather conditions, SCE is exploring options for a potential Public Safety Power Shutoff (PSPS) of electrical circuits in High Fire Risk Areas (HFRA) serving portions of some cities and unincorporated areas in Riverside County as early as 12:00pm today.

The following circuit and corresponding community in your County remains on SCE’s PSPS watch list:

Fingal

- Unincorporated communities including Cabazon

For your reference, PDF and GIS circuit maps may be found at www.sce.com/maps. Please look at the left-hand navigation links for a drop-down menu for this specific PSPS event to view maps for the circuits listed above. You may also find all HFRA maps, by County, and a list of circuits by jurisdiction to assist your planning efforts.

SCE has activated an Incident Management Team (IMT) to monitor conditions. The actual onset of weather conditions and other circumstances beyond our control may impact coordination and notification efforts. As such, there is a possibility that a PSPS event could be called sooner than anticipated, additional circuits could be impacted, or conditions could change, resulting in shutoffs no longer being considered for one or more circuits. We will attempt to notify you as conditions change.

SCE is also notifying customers on the impacted circuits to inform them about the potential shutoff to give them time to prepare.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, SCE crews are working safely and as quickly as possible to restore service.

Please Note: Weather forecasts on radio and television may provide differing information. SCE is relying on forecast data provided by in-house meteorologists.

If you have any questions, please call 855-683-9067 to leave a message and we will return your call shortly. This number is for government agencies only. The Incident Management Team (IMT) Liaison Officer can be reached by email at SCELiaisonOfficer@sce.com. The public should call 800-611-1911 or visit www.sce.com if they have questions.

Again, no Public Safety Power Shutoffs have been initiated by SCE at this time.

This message is from the Southern California Edison Liaison Officer for official use by local government officials.

SCE is continuing to monitor weather conditions and continues to explore options for a potential Public Safety Power Shutoff (PSPS) of electrical circuits in High Fire Risk Areas (HFRA) for cities and unincorporated areas in Kern County.

Please note that while these areas may already be experiencing weather-related outages, SCE has not proactively shut off power at this time.

SCE has identified the following HFRA circuit in your County that is on the PSPS monitor list and might be de-energized.

- Erskine
  - Unincorporated areas including the communities of Lake Isabella and Bodish

For your reference, PDF and GIS circuit maps may be found at www.sce.com/maps. Please look at the left-hand navigation links for a drop-down menu for this specific PSPS event to view maps for the circuits listed...

Subject: Important Information from SCE – Public Safety Power Shutoff (PSPS) Averted in Kern County

Please click here to acknowledge receipt of this message

This message is from the Southern California Edison Liaison Officer for use by local government officials.

As you are aware, Public Safety Power Shutoff (PSPS) was considered for your area. As of 8/2/19 at 11:30 am, the following circuit is no longer being considered for PSPS:

Erskine
- Unincorporated areas including the communities of Lake Isabella and Bodfish

SCE will continue to monitor conditions and will notify you of any significant changes.

For your reference, PDF and GIS circuit maps may be found at www.sce.com/maps. Please look at the left-hand navigation links for a drop-down menu for this specific PSPS event to view maps for the circuits listed above. You may also find all High Risk Fire Area (HFRA) maps, by County, and a list of circuits by jurisdiction to assist your planning efforts.

For customers in these areas who are experiencing a weather-related or other unplanned repair outage not related to PSPS, SCE crews are working safely and as quickly as possible to restore service.

Please Note: Weather forecasts on radio and television may provide differing information. SCE is relying on forecast data provided by in-house meteorologists.

If you have any questions, please call 855-683-9067 to leave a message and we will return your call shortly. This number is for government agencies only. The IMT Liaison Officer can be reached by email SCELiaisonOfficer@sce.com. The public may call 800-611-1911 or visit www.sce.com if they have questions.

Again, no Public Safety Power Shutoffs have been initiated by SCE at this time.
