Subject: Filing of Application for New License
Mammoth Pool Hydroelectric Power Project – FERC Project No. 2085

The Southern California Edison Company (SCE) is filing the enclosed Application for New License for the Mammoth Pool Hydroelectric Power Project (Application), FERC Project No. 2085. The existing License expires November 30, 2007. Enclosed are the original, one paper copy, and seven electronic copies (on Compact Disk) of the Application and associated signed verification and certificate of service. Pursuant to Commission authorization by letter dated March 15, 2000, SCE undertook the licensing process and prepared the Application pursuant to the Commission's Alternative Licensing Process (ALP) regulations at 18 CFR §4.34(i). In addition to the Mammoth Pool Hydroelectric Power Project, the ALP included three other SCE projects (FERC Nos. 67, 120, and 2175) for which license applications will be due in February 2007. As SCE and the stakeholders participating in the ALP were unable to reach a settlement agreement prior to November 28, 2005, license applications for the other three projects are not being filed at this time. While SCE considers the ALP process to be officially completed, SCE expects to continue informal settlement negotiations with some or all of the stakeholders over the next six to eight months.

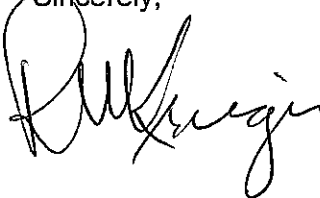

This Application, comprised of seven volumes, has been prepared in accordance with the Commission's regulations at 18 CFR §§ 4.51 and 16.8. Volume 1 contains the Initial Statement and Exhibits A, B, C, D, and H; Volume 2 is the Preliminary Draft Environmental Assessment (PDEA) and its attachments; Volume 3 contains the PDEA Supporting Documents; Volume 4 contains the PDEA Supporting Documents that are Non-Internet Public Information; Volume 5 contains Exhibit G and some Exhibit A documents that are Non-Internet Public Information; Volume 6 is the Confidential Cultural Resources Report; and Volume 7 contains Exhibit F and the PDEA supporting documents that are Confidential Critical Energy Infrastructure Information. Please note that due to the large quantity of material submitted, each Volume may consist of more than one CD. A more detailed list (outline) of the material in each volume, and whether that material is available to the public or protected in some manner, is attached to this transmittal letter.

By copy of this letter, SCE is notifying government agencies and other potentially interested parties about the Application submittal (see Distribution List). Agencies and interested parties on the Distribution List will receive CDs of the Application documents, except Volumes 6 and 7, which contain Privileged and Critical Energy Infrastructure Information, respectively. Both Volumes 6 and 7 are being filed only with the Commission.

SCE intends to apply to the California State Water Resources Control Board for a Clean Water Act Section 401 Water Quality Certification when the Commission issues its Notice of Ready for Environmental Analysis, and will furnish documentation of that application to the Commission.

If you have any questions or require additional information, please contact:

Mr. Geoffrey L. Rabone
